The Psychology of Social Networking Vol.1 -  
Giuseppe Riva 2015-01-01

Using a novel approach to consider the available  
literature and research, this book focuses on the  
psychology of social media based on the  
assumption that the experience of being in a  
social media has an impact on both our identity  
and social relationships. In order to 'be online',  
an individual has to create an online presence -  
they have to share information about themselves  
online. This online self is presented in different  
ways, with diverse goals and aims in order to

engage in different social media activities and to  
achieve desired outcomes. Whilst this may not  
be a real physical presence, that physicality is  
becoming increasingly replicated through  
photos, video, and ever-evolving ways of defining  
and describing the self online. Moreover,  
individuals are using both PC-based and mobile-  
based social media as well as increasingly  
making use of photo and video editing tools to  
carefully craft and manipulate their online self.  
This book therefore explores current debates in  
Cyberpsychology, drawing on the most up-to-  
date theories and research to explore four main  
aspects of the social media experience  
(communication, identity, presence and  
relationships). In doing so, it considers the  
interplay of different areas of psychological  
research with current technological and security  
insight into how individuals create, manipulate  
and maintain their online identity and  
relationships. The social media are therefore at  
the core of every chapter, with the common

thread throughout being the very unique approach to considering diverse and varied online behaviours that may not have been thus far considered from this perspective. It covers a broad range of both positive and negative behaviours that have now become integrated into the daily lives of many westernised country's Internet users, giving it an appeal to both scholarly and industry readers alike.

Transportation, Knowledge and Space in Urban and Regional Economics - Kakuya Matsushima 2018

This collection of 16 original research chapters by international scholars addresses the complementary roles of transportation and

knowledge and their spatial manifestations in modern urban and regional economies. The authors provide research from North America, Europe and Asia. While the studies employ sophisticated methods and theory, there is a strong element of practical applications and policy implications in each chapter as well. This book will be of interest to communities of research and practice in urban and regional economics and planning, regional science and economic geography, transportation research, planning and management and the knowledge economy.

**Research Handbook on Innovation Governance for Emerging Economies -**

Stefan Kuhlmann 2017-01-27

Although in recent years some emerging economies have improved their performance in terms of R&D investment, outputs and innovative capacity, these countries are still blighted by extreme poverty, inequality and social exclusion. Hence, emerging countries are

exposed to conditions which differ quite substantially from the dominant OECD model of innovation policy for development and welfare. This Research Handbook contributes to the debate by looking at how innovation theory, policy and practice interact, and explains different types of configurations in countries that are characterized by two contrasting but mutually reinforcing features: systemic failure and resourcefulness. Focusing on innovation governance and public policies, it aims to understand related governance failures and to explore options for alternative, more efficient approaches.

Images in Social Media - Susanne Ørnager  
2022-06-01

This book focuses on the methodologies, organization, and communication of digital image collection research that utilizes social media content. ("Image" is here understood as a cultural, conventional, and commercial—stock photo—representation.) The lecture offers expert views that provide different interpretations of images and their potential implementations. Linguistic and semiotic methodologies as well as

eye-tracking research are employed to both analyze images and comprehend how humans consider them, including which salient features generally attract viewers' attention. This literature review covers image—specifically photographic—research since 2005, when major social media platforms emerged. A citation analysis includes an overview of co-citation maps that demonstrate the nexus of image research literature and the journals in which they appear. Eye tracking tests whether scholarly templates focus on the proper features of an image, such as people, objects, time, etc., and if a prescribed theme affects the eye movements of the observer. The results may point to renewed requirements for building image search engines. As it stands, image management already requires new algorithms and a new understanding that involves text recognition and very large database processing. The aim of this book is to present different image research areas and demonstrate the challenges image

research faces. The book's scope is, by necessity, far from comprehensive, since the field of digital image research does not cover fake news, image manipulation, mobile photos, etc.; these issues are very complex and need a publication of their own. This book should primarily be useful for students in library and information science, psychology, and computer science.

development studies, international politics, and sociology as well as policy-makers, and non-governmental organizations in the field.

**Shifting Power in Asia-Pacific?** - Enrico Fels 2016-11-03

This book investigates whether a power shift has taken place in the Asia-Pacific region since the end of the Cold War. By systematically examining the development of power dynamics in Asia-Pacific, it challenges the notion that a wealthier and militarily more powerful China is automatically turning the regional tides in its favour. With a special emphasis on Sino-US competition, the book explores the alleged linkage between the regional distribution of relevant material and immaterial capabilities, national power and the much-cited regional power shift. The book presents a novel concept for measuring power in international relations by outlining a composite index on aggregated power (CIAP) that includes 55 variables for 44 regional countries and covers a period of twenty

years. Moreover, it develops a middle power theory that outlines the significance of middle powers in times of major power shifts. By addressing political, military and economic cooperation via a structured-focused comparison and by applying a comparative-historical analysis, the book analyses in depth the bilateral relations of six regional middle powers to Washington and Beijing.

*The Sub-national Dimension of the EU* - Carlo Panara 2015-03-02

This book is the first monograph-form legal study on multilevel governance in the EU and

represents a radical change in the approach to this topic. Particularly after the Treaty of Lisbon's entry into force, research on multilevel governance can no longer remain confined to the analysis of political dynamics or of soft law arrangements. Multilevel governance emerges as a constitutional principle in the European constitutional space, envisaging a method of governance based on the strong involvement of sub-national authorities in the creation and implementation of EU law and policy. Its foundation is in the mosaic resulting from the constitutional systems of the Union and its Member States. Multilevel governance arrangements play a fundamental part in achieving key Treaty objectives (such as subsidiarity, respect for the national identities of the Member States including regional and local self-government, openness, and closeness to the citizen). These arrangements lend legitimacy to EU decision-making, while also promoting constitutionalism and democracy in the EU.

## **Information and Communication Technologies (ICT) in Economic Modeling -**

Federico Cecconi 2019-07-30

This book presents the effects of integrating information and communication technologies (ICT) and economic processes in macroeconomic dynamics, finance, marketing, industrial policies, and in government economic strategy. The text explores modeling and applications in these fields and also describes, in a clear and accessible manner, the theories that guide the integration among information technology (IT), telecommunications, and the economy, while presenting examples of their applications.

Current trends such as artificial intelligence, machine learning, and big data technologies used in economics are also included. This volume is suitable for researchers, practitioners, and students working in economic theory and the computational social sciences.

*Reconceptualising the Rule of Law in Global Governance, Resources, Investment and Trade -*

Photini Pazartzis 2016-06-30

The relevance and importance of the rule of law to the international legal order cannot be doubted and was recently reaffirmed by the Declaration of the High-level Meeting of the General Assembly on the Rule of Law at the National and International Level's solemn commitment to it on behalf of states and international organizations. In this edited collection, leading scholars and practitioners from the fields of global governance, resources, investment and trade examine how the commitment to the rule of law manifests itself in the respective fields. The book looks at cutting-edge issues within each field and examines the questions arising from the interplay between them. With a clear three-part structure, it explores each area in detail and addresses contemporary challenges while trying to assure a commitment to the rule of law. The contributions also consider how the rule of law has been or should be reconceptualised. Taking

a multi-disciplinary approach, the book will appeal to international lawyers from across the spectrum, including practitioners in the field of international investment and trade law.

Advances in Questionnaire Design, Development, Evaluation and Testing - Paul C. Beatty 2019-12-05

A new and updated definitive resource for survey questionnaire testing and evaluation Building on the success of the first Questionnaire Development, Evaluation, and Testing (QDET) conference in 2002, this book brings together leading papers from the Second International Conference on Questionnaire Design, Development, Evaluation, and Testing (QDET2) held in 2016. The volume assesses the current state of the art and science of QDET; examines the importance of methodological attention to the questionnaire in the present world of information collection; and ponders how the QDET field can anticipate new trends and directions as information needs and data

collection methods continue to evolve. Featuring contributions from international experts in survey methodology, Advances in Questionnaire Design, Development, Evaluation and Testing includes latest insights on question characteristics, usability testing, web probing, and other pretesting approaches, as well as: Recent developments in the design and evaluation of digital and self-administered surveys Strategies for comparing and combining questionnaire evaluation methods Approaches for cross-cultural and cross-national questionnaire development New data sources and methodological innovations during the last 15 years Case studies and practical applications Advances in Questionnaire Design, Development, Evaluation and Testing serves as a forum to prepare researchers to meet the next generation of challenges, making it an excellent resource for researchers and practitioners in government, academia, and the private sector. **Relocation of Economic Activity** - Pawel Capik 2018-08-30

This timely volume provides a thorough analysis of current trends in location and relocation of economic activity globally, regionally and locally. Using robust empirical material this book offers a multidisciplinary, comprehensive overview, critique and extension of long-established theories underpinning patterns of firm (re)location. It explores dominant trends in the mobility and relocation of industries and firms, examines the factors guiding such trends and evaluates their consequences in both developed and emerging economies in Europe, Asia and Latin America. This book will be appreciated by diverse audiences. Geography and regional science researchers of 'economic activity location' can engage with the critical appraisal of key theoretical concepts and an analysis of recent empirical data. Students of human and economic geography, planning, regional

development, and global supply chain management in senior years of undergraduate programmes and completing postgraduate degrees will appreciate the accessible language, multiple examples and graphical illustrations of theoretical frameworks underpinning location and relocation of firms and industries, and its consequences. Practitioners, including local and regional policy makers and location consultants will enjoy the comparative discussion of solutions and practices adopted in localities, regions and countries as diverse as China, Brazil, The Netherlands and Poland.

This Handbook covers all major aspects of EU Cohesion policy, one of the most significant areas of intervention of the European Union. Over five parts, It discusses this policy's history and governing principles; the theoretical approaches from which it can be assessed; the inter-institutional and multi-level dynamics that it tends to elicit; its practical implementation and impact on EU member states; its interactions with other EU policies and strategies; and the cognitive maps and narratives with which it can be associated. An absolute must for all students of the EU.  
**STEM Integration in K-12 Education** - National Research Council 2014-02-28  
STEM Integration in K-12 Education examines current efforts to connect the STEM disciplines in K-12 education. This report identifies and characterizes existing approaches to integrated STEM education, both in formal and after- and out-of-school settings. The report reviews the evidence for the impact of integrated

approaches on various student outcomes, and it proposes a set of priority research questions to advance the understanding of integrated STEM education. *STEM Integration in K-12 Education* proposes a framework to provide a common perspective and vocabulary for researchers, practitioners, and others to identify, discuss, and investigate specific integrated STEM initiatives within the K-12 education system of the United States. *STEM Integration in K-12 Education* makes recommendations for designers of integrated STEM experiences, assessment developers, and researchers to design and document effective integrated STEM education. This report will help to further their work and improve the chances that some forms of integrated STEM education will make a positive difference in student learning and interest and other valued outcomes.

This book revives the discussion on public social services and their redesign, with a focus on services relating to care and the social inclusion of vulnerable groups, providing rich information on the changes that occurred in the organisation

and supply of public social services over the last thirty years in different European places and service fields. Despite the persisting variety in social service models, three shared trends emerge: public sector disengagement, 'vertical re-scaling' of authority and 'horizontal re-mix' in the supply system. The consequences of such changes are evaluated from different perspectives - governance, social and territorial cohesion, labour market, gender - and are eventually deemed 'disruptive' in both economic and social terms. The policy implications of the restructuring are also explored. This title will be Open Access on Elgaronline.com.

*Child Poverty in New Zealand* - Jonathan Boston  
2014-06-16

Jonathan Boston and Simon Chapple have written the definitive book on child poverty in New Zealand. Dr Russell Wills, Children's Commissioner Between 130,000 and 285,000 New Zealand children live in poverty, depending on the measure used. These disturbing figures

are widely discussed, yet often poorly understood. If New Zealand does not have 'third world poverty', what are these children actually experiencing? Is the real problem not poverty but simply poor parenting? How does New Zealand compare globally and what measures of poverty and hardship are most relevant here? What are the consequences of this poverty for children, their families and society? Can we afford to reduce child poverty and, if we can, how? Jonathan Boston and Simon Chapple look hard at these questions, drawing on available national and international evidence and speaking to an audience across the political spectrum. Their analysis highlights the strong and urgent case for addressing child poverty in New Zealand. Crucially, the book goes beyond illustrating the scale of this challenge, and why it must be addressed, to identifying real options for reducing child poverty. A range of practical and achievable policies is presented, alongside candid discussion of their strengths and

limitations. These proposals for improving the lives of disadvantaged children deserve wide public debate and make this a vitally important book for all New Zealanders.

**Sri Lanka Education Sector Assessment** - Halil Dundar 2017-06-16

A country's education system plays a pivotal role in promoting economic growth and shared prosperity. Sri Lanka has enjoyed high school-attainment and enrollment rates for several decades. However, it still faces major challenges in the education sector, and these challenges undermine the country's inclusive growth goal and its ambition to become a competitive upper-middle-income country. The authors of Sri Lanka Education Sector Assessment: Achievements, Challenges, and Policy Options offer a thorough review of Sri Lanka's education sector—from early childhood education through higher education. With this book, they attempt to answer three questions: • How is Sri Lanka's education system performing, especially with respect to participation rates, learning outcomes, and labor market outcomes? • How

can the country address the challenges at each stage of the education process, taking into account both country and international experience and also best practices? • Which policy actions should Sri Lanka make a priority for the short and medium term? The authors identify the most critical constraints on performance and present strategic priorities and policy options to address them. To attain inclusive growth and become globally competitive, Sri Lanka needs to embark on integrated reforms across all levels of education. These reforms must address both short-term skill shortages and long-term productivity. As Sri Lanka moves up the development ladder, the priorities of primary, secondary, and postsecondary education must be aligned to meet the increasingly complex education and skill requirements.

Strangers in Their Own Land - Arlie Russell  
Hochschild 2016-09-06

In *Strangers in Their Own Land*, the renowned

sociologist Arlie Hochschild embarks on a thought-provoking journey from her liberal hometown of Berkeley, California, deep into Louisiana bayou country—a stronghold of the conservative right. As she gets to know people who strongly oppose many of the ideas she famously champions, Hochschild nevertheless finds common ground and quickly warms to the people she meets—among them a Tea Party activist whose town has been swallowed by a sinkhole caused by a drilling accident—people whose concerns are actually ones that all Americans share: the desire for community, the embrace of family, and hopes for their children. *Strangers in Their Own Land* goes beyond the commonplace liberal idea that these are people who have been duped into voting against their own interests. Instead, Hochschild finds lives ripped apart by stagnant wages, a loss of home, an elusive American dream—and political choices and views that make sense in the context of their lives. Hochschild draws on her expert

knowledge of the sociology of emotion to help us understand what it feels like to live in "red" America. Along the way she finds answers to one of the crucial questions of contemporary American politics: why do the people who would seem to benefit most from "liberal" government intervention abhor the very idea?

**The O Level Book** - 2011-07-31

With the recent scrapping of GCSEs fresh in everyone's minds, The O Level Book is the perfect book to settle that age-old argument between the generations: were the exams of yesteryear really harder than anything children have to face today in the age of calculators and spell checkers? Are contemporary kids less intelligent than previous generations? Here is the chance to find out as the whole family pit their wits against one another in the ultimate generation game, contrasting the schooling of yesteryear with modern educational practices. Testing you on a range of old-school topics: English Language; General Science; Geography

and History; Household Cookery; Mathematics. A wonderfully nostalgic yet testing anthology, The O Level Book encourages you to dust off your slide rules and get your thinking caps on to see who will come out on top in your family!

[Minerals Yearbook](#) - Mines Bureau 2018-04-19  
- Minerals Yearbook, 2014, V. 3: Area Reports: International: Asia and the Pacific. Volume III, Area Reports: International, is published as four separate reports. These regional reports contain the latest available minerals data on more than 180 foreign countries and discuss the importance of minerals to the economies of these nations and the United States. Each report begins with an overview of the region's mineral industries during the year. It continues with individual country chapters that examine the mining, refining, processing, and use of minerals in each country of the region and how each country's mineral industry relates to U.S. industry. Most chapters include production tables and industry structure tables, information

about Government policies and programs that affect the country's mineral industry, and an

outlook section.
