Curriculum, Teachers and Technology in the Turkish and International Contexts - Fatma Bikmaz 2022-09-15

This volume addresses problems and emerging trends in curriculum and technology, and discusses educational matters at the intersection of national and international challenges. It takes the reader on a journey considering issues in curriculum research and practice and developments in teacher education and technology. The book also shows that curriculum as an applied discipline has direct and indirect influences not only on schooling, but also on uncertainties of society, vulnerable groups and global changes. It will be of great interest to curriculum scholars, educators and practitioners, especially when distance education and remote teaching are on the agenda of all education systems throughout the world.

Shadow World - Robert Chandler 2008-08-05

THE SECRET WAR AGAINST AMERICA America is at war and the stakes are huge. The fight is not just in Iraq and Afghanistan, it is a global contest between the United States, radical Islam, a resurgent Russia, and a virulent New Left that is coming to power in Latin America and stalking the corridors of power around the world, including the United

States. These three enemies of America are separate but they cooperate--and in his stunning new book, *Shadow World*, Robert Chandler shows how. In *Shadow World* you'll learn: * Why "post-Communist" Russia is not really "post-Communist" at all, but represents an insidious new strategic threat to the United States * How "cultural communism" has rejuvenated the radical Left's prospects around the world * Why American-style democracy is losing out to Castro and Hugo Chavez-style communism in Latin America * How radical Islam has allied itself to the New Left--and why this makes radical Islam even more dangerous than before *Shadow World* reveals, in a way no other book has done, the new strategic realities of the post-Cold War, post-9/11 world. Provocative, insightful, thorough, it is essential reading for those who want to see the 21st century as America's century, and not the century of her enemies.

Encyclopedia of American Indian Contributions to the World - Emory Dean Keoke 2009

Describes the lives and achievements of American Indians and discusses their contributions to the world.

The 'Other' Students - Dina C. Maramba 2012-12-01

Though the Filipino American population has increased numerically in many areas of the United States, especially since the influx of professional immigrants in the wake of the 1965 Immigration Act, their

impact on schools and related educational institutions has rarely been documented and examined. *The Other Students: Filipino Americans, Education, and Power* is the first book of its kind to focus specifically on Filipino Americans in education. Through a collection of historical and contemporary perspectives, we fill a profound gap in the scholarship as we analyze the emerging presence of Filipino Americans both as subjects and objects of study in education research and practice. We highlight the argument that one cannot adequately and appropriately understand the complex histories, cultures, and contemporary conditions faced by Filipino Americans in education unless one grapples with the specificities of their colonial pasts and presents, their unique migration and immigration patterns, their differing racialization and processes of identity formations, the connections between diaspora and community belonging, and the various perspectives offered by ethnic group-centered analysis to multicultural projects. The historical, methodological, and theoretical approaches in this anthology will be of interest to scholars, researchers, and students in disciplines which include Education, Ethnic Studies, Asian American and Pacific Islander Studies, Anthropology, Sociology, Political Science, Urban Studies, Public Policy, and Public Health.

Global Discontent - Manouchehr Pedram Ph. D 2017-01-18

There are more similarities between the 7 billion people worldwide than there are differences, and global harmony, instead of widespread conflict, is possible. The "global mosaic" of our lives: lifestyle, culture, nationality, race, religion, gender, gender identity, ability, sexual orientation, socioeconomic level, and belief system are all tiles that can fit together to form a colorful and harmonious cultural mosaic. In *Global Discontent: The Mosaic of Cultural Diversity*, Dr. Pedram provides us with a user-friendly philosophical, historical, and sociological guide to many of the issues facing the world today, and to possible resolutions toward an ideal world. This work is an expression of Dr. Pedram's dream:

that in the twenty-first century humanity in every corner of the globe will put conflict, war, hostility, and global discord behind them and, in their place, work to create a cooperative and peaceful global community, with global governance for the common good.

World Class - William Gaudelli 2014-04-04

How have school curricula been affected by the ripple effects of globalization? How do teachers and students attempt to understand their complex world? Most states require world teaching in some form, yet little is known about how teachers and students engage in this critical curricular area. *World Class: Teaching and Learning in Global Times* directly fills this need by providing a detailed, inside look at global education in three high schools. The data from the study, drawn from extensive interviews and observations, illustrate the daily challenges and complexities of global teaching and learning. Comprehensive yet scholarly, this volume: *raises thought-provoking questions for both theorists and practitioners; *addresses controversial issues embedded in global education and throughout the social studies curriculum, such as the tension between universalism and cultural relativism, the problematic nature of identity in classroom discourse, and the apparent duality of national and global loyalties; *connects issues particular to global education with wider scholarship in education; *examines the interplay of theory and practice in global education and, more broadly, the social sciences; and *provides an exploratory and provocative look at dimensions of global civics, with an analysis of the events of 9/11/01 and how they have shaped global perspectives about living as one planet. The book is organized in three parts--contexts, problems, and alternatives. Contexts allows readers to consider global education from multiple perspectives: teacher, student, administrator, community member, and scholar. Problems focuses on pedagogical challenges associated with global education. Alternatives provides reflection points that encourage readers to consider different ways we might converse about global teaching and learning. Written for scholars, practitioners, and students in social studies, curriculum and instruction, global/multicultural education, and related fields, *World Class: Teaching and Learning in*

Global Times is an excellent text for preservice and graduate-level courses in these areas.

Examining the Teacher Induction Process in Contemporary Education Systems - Öztürk, Mustafa 2018-08-10

Before today's teachers are ready to instruct the intellectual leaders of tomorrow, they must first be trained themselves. Every teacher experiences an induction process that can make their early years as an educator nerve-racking. Focusing on this period of time in a teacher's career can lead to greater teacher retention and success. Examining the Teacher Induction Process in Contemporary Education Systems addresses the construct of teacher induction through theoretical and empirical research. It also provides an in-depth conceptualization of being a novice teacher through micro-political realities of teaching in different geographical and cultural regions. While highlighting topics including adaptation challenges, mentor-mentee interaction, and teacher retention, this book is ideally designed for school administrators, early career teachers, educational researchers, educational professionals, and academicians seeking current research on early career educator adaptation and practices.

Education for America's Role in World Affairs - John Fonte 1994

This collection of carefully argued essays examines what American students should know about world affairs in the post-cold war era. The issues which are examined are those that will continue to be debated as our schools prepare for the next century. The authors probe the complex and sometimes contradictory claims of global, peace, multicultural, and citizenship education. They offer prescriptions for change based on a strong academic core of history, international relations, government, economics, and geography, with the presumption of values consistent with America's democratic ideals. Contents: Foreword, Chester E. Finn, Jr.; Introduction, John Fonte and Andre Ryerson; A Brief History of Pre-Collegiate Global and International Studies Education, Andrew Smith; Global Education and Controversy: Some Observations, Robert Fullinwider; Teaching About the World and Our Nation's Heritage: The Relationship Between International Education and Education for American Citizenship, John Fonte; Implications of the 'New Demographics' and the 'Information Explosion' for International Education, Herbert London; International Education: The Search for Subject, Gilbert T. Sewall; International Studies in the School

Curriculum, Diane Ravitch; Geography's Role in International Education, Raymond English; China: Case-Study of Textbook Failures, Andre Ryerson; What American Students Should Know About the World, Owen Harris; Conclusion, John Fonte and Andre Ryerson; Bibliography; Addendum; Index.

The New Handbook of Research on Music Teaching and Learning - Music educators national conference (Etats-Unis). 2002-04-18

The original Handbook of Research on Music Teaching and Learning was published in 1992 by Schirmer Books with the sponsorship of the Music Educators National Conference (MENC) and was hailed as "a welcome addition to the literature on music education because it serves to provide definition and unity to a broad and complex field" (Choice). This new companion volume, again with the sponsorship of the MENC, will take into account the significant changes in music education in the intervening years. This second volume involves the profession's ...

The Trouble with Textbooks - Gary A. Tobin 2008

The Trouble with Textbooks sounds the alarm about how textbooks disparage some groups and teach historical distortions. Our schools are supposed to instill young people with American values and provide students with the knowledge necessary for good citizenship. Instead, textbooks are filled with mistakes and misrepresentations. Book jacket.

Interpreting Islam - Hastings Donnan 2002-02-15

Islam is one of the most misunderstood concepts in the West. Myths and stereotypes surround it. This clear and penetrating volume helps readers to make sense of Islam. It offers a penetrating guide to the diversity and richness of contemporary knowledge about Islam and Muslim society. Throughout, the emphasis is upon the value of pluralistic approaches to Islam, rather than condensing complexity with unifying concepts such as

'Orientalism'. Interdisciplinary in scope and organization, the book cuts through the bewildering and seemingly anarchic diversity of contemporary knowledge about Islam and Muslim society. The methodological difficulties and advantages of Western researchers focusing on Islam are fully documented. The book demonstrates how gender, age, status and 'insider' / 'outsider' status impacts upon research and inflects research findings.

The Mission of Worship - Sandra Maria Van Opstal 2012-10-03

In this Urbana Onward minibook, Sandra Van Opstal argues that culturally diverse worship practices create a space for us to encounter the mission of God. Instructional Design for Teachers - Alison A. Carr-Chellman 2015-06-26

Instructional Design for Teachers, Second Edition focuses on the instructional design (ID) process specifically for K-12 teachers. The first edition introduced a new, common-sense model of instructional design to take K-12 teachers through the ID process step by step, with a special emphasis on preparing, motivating, and encouraging new and ongoing use of ID principles. This second edition includes new material on design in gaming, cybercharters, online classrooms, and flipped classrooms, as well as special considerations for the Common Core. Each chapter contains framing questions, common errors, easy-to-use rules of thumb, clearly stated outcomes, and examples showing ID in action. The basic model and its application within constructivism and user-design will help

teachers adapt from a behavioral approach to a more open, student-centered design approach. Combining basics with strategies to implement this model in the most advanced instructional approaches, this book empowers teachers and learners to use good instructional design with the most recent research-based approaches to learning. Instructional Design for Teachers shows how ID principles can impact instructional moments in positive and practical ways. The book can be used for basic ID courses and introductory curriculum courses, and is accessible to in-service as well as pre-service teachers.

Muslims and Islam in U.S. Education - Liz Jackson 2014-04-03

Winner of Philosophy of Education Society of Australasia (PESA)'s inaugural PESA Book Awards in 2015, and The University of Hong Kong Research Output Prize for Education 2014-15. *Muslims and Islam in U.S. Education* explores the complex interface that exists between U.S. school curriculum, teaching practice about religion in public schools, societal and teacher attitudes toward Islam and Muslims, and multiculturalism as a framework for meeting the needs of minority group students. It presents multiculturalism as a concept that needs to be rethought and reformulated in the interest of creating a more democratic, inclusive, and informed society. Islam is an under-considered religion in American education, due in part to the fact that Muslims represent a very small minority of the population today (less than 1%). However, this group faces a crucial challenge of representation in United States society as a whole, as well as in its schools. Muslims in the United States are impacted by ignorance that news and opinion polls have demonstrated is widespread among the public in the last few decades. U.S. citizens who do not have a balanced, fair and accurate view of Islam can make a variety of decisions in the voting booth, in job hiring, and within their small-scale but important personal networks and spheres of influence, that make a very negative impact on Muslims in the United States. This

book presents new information that has implications for curricula, religious education, and multicultural education today, examining the unique case of Islam in U.S. education over the last 20 years. Chapters include: Perspectives on Multicultural Education 9/11, the Media, and the New Need to Know Islam and Muslims in Public Schools Blazing a Path for Intercultural Education This book is an essential resource for professors, researchers, and teachers of social studies, particularly those involved with multicultural issues, critical and sociocultural analysis of education and schools; as well as interdisciplinary scholars and students in anthropology and education.

New World Dharma - Trevor Carolan 2016-03-16

Interviews and profiles of spiritual and cultural figures influenced by Buddhism. Based on Trevor Carolan's interviews, profiles, and essays from the past twenty years, this book offers a fascinating and intimate look at many of the Buddhist (and Buddhist-inspired) spiritual and cultural leaders who have shaped our time. Drawn from the global mosaic of the arts and humanities, environmentalism, and governance, Carolan's collaborators include Buddhist teachers, poets, writers, activists, and even a politician. Readers will encounter Red Pine, Maxine Hong Kingston, Gary Snyder, Robert Aitken-Roshi, Jerry Brown, the Dalai Lama, Allen Ginsberg, along with many others. They explore engaged practice, East-West ethics, the role of dharma-influenced literature, Beat literature, social and political activism, and more. A rich resource for anyone interested in Buddhism, *New World Dharma* reveals a Buddhist consciousness responding to the challenge of rethinking what citizenship, community, and the sacred might mean in a global age. Congratulations to Trevor Carolan for creating a wise and excellent sequence of essays, accurate historical information, and interviews which provide very useful insights and Buddhist time-tracks to both Buddhist and non-Buddhist readers and researchers. Ed Sanders, poet and historian *New World Dharma* sheds light on a major development in literary and spiritual life by giving a personal, social, internal look into the lives of key Buddhist writers and leaders. In hindsight, it is clear that the influx of Asian spiritual teachings into the West instigated a cultural

awakening of major proportion. This book provides a sense of how the fabric of this cultural awakening was woven, thread by thread, over several decades, as the people interviewed were all connected in some way. □ □ Fran Grace, coeditor of *Meditation and the Classroom: Contemplative Pedagogy for Religious Studies*

Islam - Aslam Syed 2003-07

With the end of the Cold War, the American political establishment perceived Islam as the new enemy. The 1993 explosion at the World Trade Center, the 1998 bombing of the American embassies in Africa, and the events of 9/11 - all culminated in substantiating this perception. The War on Terrorism has raised several complicated issues surrounding the relationship between the United States and Islam. With America's increasing involvement in the Middle East, it is imperative for Muslims to understand America; but at the same time, Americans must learn to understand Islam. The progress of civilization hangs on the ability for cooperation and understanding between these cultures. Although this challenge of removing the "clash" between these two cultures is indeed pressing, it is not new. Negative images of Islam have persisted in the United States throughout its history. This volume of *The Annals* reflects on how damaging images of Islam have endured in the United States and how Americans' perceptions and misconceptions about Islam is inexorably linked to United States' policy in the Middle East. The articles in this special issue will spark intriguing debate and discussion as well as shed light on the complex concerns engulfing Americans' ideas about Islam and Muslim states and how this relationship influences global politics. International Perspectives on Teaching Rival Histories - Henrik Åström Elmersjö 2017-04-04

This book presents a survey of approaches to dealing with 'rival histories' in the classroom, arguing that approaching this problem requires great sensitivity to differing national, educational and narrative contexts. Contested narratives and disputed histories have long been an important issue in history-teaching all over the world, and have even been described as the 'history' or 'culture' wars. In this book, authors from across the globe ponder the question "what can teachers do (and what are they doing) to address conflicting narratives of the same past?", and puts an epistemological issue at the heart of the discussion: what does it mean for the epistemology of history, if it is possible to teach more than one narrative? Divided into three sections that deal with historical cultures, multicultural societies and multiperspectivity, the chapters of the book showcase that dealing with rival histories is very much dependent on context, and that diverse teaching traditions and societal debates mean that teachers' abilities in engaging with the teaching of rival narratives are very different. The volume will be compelling reading for students and researchers in the fields of education, history, sociology and philosophy, as well as practising teachers.

This handbook will be an essential companion for living justly, loving mercy and walking humbly with your God.

[Changing Teachers, Changing Times](#) - Andy Hargreaves 1994-01-01

The rules of the world are changing. It is time for the rules of teaching and teachers' work to change with them.' This is the challenge which Andy Hargreaves sets out in his book on teachers' work and culture in the postmodern world. Drawing on his current research with teachers at all levels, Hargreaves shows through their own vivid words what teaching is really like, how it is already changing, and why. He argues that the structures and cultures of teaching need to change even more if teachers are not to be trapped by guilt, pressed by time and overburdened by decisions imposed upon them. Provocative yet practical,

this book is written for teachers and those who work with teachers, and for researchers who want to understand teaching better in the postmodern age.

[The Language Police](#) - Diane Ravitch 2004-05-11

If you're an actress or a coed just trying to do a man-size job, a yes-man who turns a deaf ear to some sob sister, an heiress aboard her yacht, or a bookworm enjoying a boy's night out, Diane Ravitch's internationally acclaimed *The Language Police* has bad news for you: Erase those words from your vocabulary! Textbook publishers and state education agencies have sought to root out racist, sexist, and elitist language in classroom and library materials. But according to Diane Ravitch, a leading historian of education, what began with the best of intentions has veered toward bizarre extremes. At a time when we celebrate and encourage diversity, young readers are fed bowdlerized texts, devoid of the references that give these works their meaning and vitality. With forceful arguments and sensible solutions for rescuing American education from the pressure groups that have made classrooms bland and uninspiring, *The Language Police* offers a powerful corrective to a cultural scandal.

Rebooting Social Studies - Greg Milo 2017-03-01

Those facts. Those dates. Those four walls. Those still and petrified fossils of traditional history courses. Sure, it's history, but do we have to turn to tradition for guidance? Let's make it worth the students time. Let's give them something to take beyond their high school experience. Let's reboot history. The goal of the social studies is to provide students with the tools necessary to be active and productive citizens. History teachers need to assist their students in developing problem-solving skills for real-life scenarios, and this can be done whether we teach students about Ancient Athens or modern Akron, Ohio. The ancient Mediterranean, the Italian Renaissance, and the British East India Company are very distant concepts, far from what our students find as relevant. The same skills can be acquired by studying something nearer to the students' interests and everyday life. So, take a moment to take a

step back from the history curriculum, and ask yourself: "What skills will my students need in five years?"

World History Modern Era - Elisabeth Gaynor Ellis 1999
