**Morrell's Narrative of a Voyage to the South and West Coast of Africa** - Benjamin Morrell 1844

**South Pole** - Elizabeth Leane 2016-04-15

As one of two points where the Earth's axis meets its surface, the South Pole should be a precisely defined place. But as Elizabeth Leane shows in this book, conceptually it is a place of paradoxes. An invisible spot on a high, featureless ice plateau, the Pole has no obvious material value, yet it is a highly sought-after location, and reaching it on foot is one of the most extreme adventures an explorer can undertake. The Pole is, as Leane shows, a deeply imagined place, and a place of politics, where a series of national claims converge. Leane details the important

challenges that the South Pole poses to humanity, asking what it can teach us about ourselves and our relationship with our planet. She examines its allure for explorers such as Robert F. Scott and Roald Amundsen, not to mention the myriad writers and artists who have attempted to capture its strange, inhospitable blankness. She considers the Pole's advantages for climatologists and other scientists as well as the absurdities and banalities of human interaction with this place. Ranging from the present all the way back to the ancient Greeks, she offers a fascinating—and lavishly illustrated—story about one of the strangest and most important places on Earth.

*Madhouse at the End of the Earth* - Julian Sancton 2021-05-04

NEW YORK TIMES BESTSELLER • The “exquisitely researched and deeply engrossing” (The New York Times) true survival story of an early polar expedition that went terribly awry—with the ship frozen in ice and the crew trapped inside for the entire sunless, Antarctic winter “The energy of the narrative never flags. . . . Sancton has produced a thriller.”—The Wall Street Journal In August 1897, the young Belgian commandant Adrien de Gerlache set sail for a three-year expedition aboard the good ship Belgica with dreams of glory. His destination was

the uncharted end of the earth: the icy continent of Antarctica. But de Gerlache's plans to be first to the magnetic South Pole would swiftly go awry. After a series of costly setbacks, the commandant faced two bad options: turn back in defeat and spare his men the devastating Antarctic winter, or recklessly chase fame by sailing deeper into the freezing waters. De Gerlache sailed on, and soon the Belgica was stuck fast in the icy hold of the Bellingshausen Sea. When the sun set on the magnificent polar landscape one last time, the ship's occupants were condemned to months of endless night. In the darkness, plagued by a mysterious illness and besieged by monotony, they descended into madness. In *Madhouse at the End of the Earth*, Julian Sancton unfolds an epic story of adventure and horror for the ages. As the Belgica's men teetered on the brink, de Gerlache relied increasingly on two young officers whose friendship had blossomed in captivity: the expedition's lone American, Dr. Frederick Cook—half genius, half con man—whose later infamy would overshadow his brilliance on the Belgica; and the ship's first mate, soon-to-be legendary Roald Amundsen, even in his youth the storybook picture of a sailor. Together, they would plan a last-ditch, nearly certain-to-fail escape from the ice—one that would either etch their names in history or doom them to a terrible fate at the ocean's bottom. Drawing on the diaries and journals of the Belgica's crew and with exclusive access to the ship's logbook, Sancton brings novelistic flair to a story of human extremes, one so remarkable that even today NASA studies it for research on isolation for future missions to Mars. Equal parts maritime thriller and gothic horror, *Madhouse at the End of the Earth* is an unforgettable journey into the deep.

**Below the Convergence** - Alan Gurney 2007-02-27

This wonderfully written book tells of the first Herculean expeditions to Antarctica, from astronomer Edmond Halley's 1699 voyage in the Paramore to the sealer John Balleny's 1839 excursion in the Eliza Scott, all in search of land, glory, fur, science, and profit. Life was harsh: crews

had poor provisions and inadequate clothing, and scurvy was a constant threat. With unreliable--often homemade--charts, these intrepid explorers sailed in the stormy waters of the Southern Ocean below the Convergence, that sea frontier marking the boundary between the freezing Antarctic waters and the warmer sub-Antarctic seas. These men were the first to discover and exploit a new continent, which was not the verdant southern island they had imagined but an inhospitable expanse of rock and ice, ringed by pack ice and icebergs: Antarctica.

**Voyage Towards the South Pole and Round the World** - James Cook 2014-03-21

Whether the unexplored part of the Southern Hemisphere be only an immense mass of water, or contain another continent, as speculative geography seemed to suggest, was a question which had long engaged the attention, not only of learned men, but of most of the maritime powers of Europe. To put an end to all diversity of opinion about a matter so curious and important, was his majesty's principal motive in directing this voyage to be undertaken, the history of which is now submitted to the public. But, in order to give the reader a clear idea of what has been done in it, and to enable him to judge more accurately, how far the great object that was proposed, has been obtained, it will be necessary to prefix a short account of the several voyages which have been made on discoveries to the Southern Hemisphere, prior to that which I had lately the honour to conduct, and which I am now going to relate.

A Voyage of Discovery Towards the North Pole - Frederick William Beechey 1843

Account of expedition in search of North Pole led by D. Buchan in 1818. Sailed to Svalbard, where beset, and put into harbour. Traced pack ice edge towards Greenland. Also includes chronology of early attempts to reach the Pacific by way of the Pole.

**A Voyage Towards the South Pole and Round the World** - James Cook 2015-12-28

1772 April I sailed from Deptford, April 9th, 1772, but got no farther than Woolwich, where I was detained by easterly winds till the 23d, when the ship fell down to Long Reach, and the next day was joined by the Adventure. Here both ships received on board their powder, guns, gunners' stores, and marines. 1772 May On the 10th of May we left Long Reach, with orders to touch at Plymouth; but in plying down the river, the Resolution was found to be very crank, which made it necessary to put into Sheerness in order to remove this evil, by making some alteration in her upper works. These the officers of the yard were ordered to take in hand immediately; and Lord Sandwich and Sir Hugh Palliser came down to see them executed in such a manner as might effectually answer the purpose intended. 1772 June On the 22d of June the ship was again completed for sea, when I sailed from Sheerness; and on the 3d of July joined the Adventure in Plymouth Sound. The evening before, we met, off the Sound, Lord Sandwich, in the Augusta yacht, (who was on his return from visiting the several dock-yards,) with the Glory frigate and Hazard sloop. We saluted his lordship with seventeen guns; and soon after he and Sir Hugh Palliser gave us the last mark of the very great attention they had paid to this equipment, by coming on board, to satisfy themselves that every thing was done to my wish, and that the ship was found to answer to my satisfaction. At Plymouth I received my instructions, dated the 25th of June, directing me to take under my command the Adventure; to make the best of my way to the island of Madeira, there to take in a supply of wine, and then proceed to the Cape of Good Hope, where I was to refresh the ships' companies, and

to take on board such provisions and necessaries as I might stand in need of. After leaving the Cape of Good Hope, I was to proceed to the southward, and endeavour to fall in with Cape Circumcision, which was said by Monsieur Bouvet to lie in the latitude of 54° S. and in about 11° 20' E. longitude from Greenwich. If I discovered this cape, I was to satisfy myself whether it was a part of the continent which had so much engaged the attention of geographers and former navigators, or a part of an island. If it proved to be the former, I was to employ myself diligently in exploring as great an extent of it as I could, and to make such notations thereon, and observations of every kind, as might be useful either to navigation or commerce, or tend to the promotion of natural knowledge. I was also directed to observe the genius, temper, disposition, and number of the inhabitants, if there were any, and endeavour, by all proper means, to cultivate a friendship and alliance with them; making them presents of such things as they might value; inviting them to traffic, and shewing them every kind of civility and regard. I was to continue to employ myself on this service, and making discoveries either to the eastward or westward, as my situation might render most eligible; keeping in as high a latitude as I could, and prosecuting my discoveries as near to the South Pole as possible, so long as the condition of the ships, the health of their crews, and the state of their provisions, would admit of; taking care to reserve as much of the latter as would enable me to reach some known port, where I was to procure a sufficiency to bring me home to England. But if Cape Circumcision should prove to be part of an island only, or if I should not be able to find the said Cape, I was in the first case to make the necessary survey of the island, and then to stand on to the southward, so long as I judged there was a likelihood of falling in with the continent, which I was also to do in the latter case, and then to proceed to the eastward in further search of the said continent, as well as to make discoveries of such islands as might be situated in that unexplored part of the southern hemisphere; keeping in high latitudes, and prosecuting my discoveries, as above mentioned, as near the pole as possible until I had circumnavigated the globe; after which I was to proceed to the Cape

of Good Hope, and from thence to Spithead.

*Travels, Explorations and Empires, 1770-1835, Part I Vol 3* - Tim Fulford  
2021-12-17

A collection of work that attempts to reflect the diversity of travel literature from the late 18th and early 19th centuries. This literature often reveals something of the cultural and gender difference of the travellers, as well as ideas on colonialism, anthropology and slavery.

**Endurance** - Alfred Lansing 2000

Adventure, shipwreck, storms and survival on the high seas.

ENDURANCE is the story of one of the most astonishing feats of exploration and human courage ever recorded. In 1914 Sir Ernest Shackleton and a crew of 27 men set sail for the South Atlantic on board a ship called the Endurance. The object of the expedition was to cross the Antarctic overland. In October 1915, still half a continent away from their intended base, the ship was trapped, then crushed in ice. For five months Shackleton and his men, drifting on ice packs, were castaways on one of the most savage regions of the world. This utterly gripping book, based on first-hand accounts of crew members and interviews with survivors, describes how the men survived, how they lived together in camps on the ice for 17 months until they reached land, how they were attacked by sea leopards, the diseases which they developed, and the indefatigability of the men and their lasting civility towards one another in the most adverse conditions conceivable.

**Voyage of Will Rogers to the South Pole (Dodo Press)** - Christopher Spotswood 2009-04

"It seems strange that I should only now publish an account of my extraordinary voyage and experience near the South Pole, but when I arrived in England my story seemed to be so out of the way that I was laughed and jeered at, and not having written anything in my life in the shape of a journal, I gave up talking about it. Now, however, sooner than the world should lose what ought to be of great interest to it, I will attempt, in my plain way, to give an account of what occurred to me, and of the strange people I fell in with, in my last voyage, especially as my span of life is drawing to a close. The 18th century was a wealth of knowledge, exploration and rapidly

growing technology and expanding record-keeping made possible by advances in the printing press. In its determination to preserve the century of revolution, Gale initiated a revolution of its own: digitization of epic proportions to preserve these invaluable works in the largest archive of its kind. Now for the first time these high-quality digital copies of original 18th century manuscripts are available in print, making them highly accessible to libraries, undergraduate students, and independent scholars. Medical theory and practice of the 1700s developed rapidly, as is evidenced by the extensive collection, which includes descriptions of diseases, their conditions, and treatments. Books on science and technology, agriculture, military technology, natural philosophy, even cookbooks, are all contained here. ++++ The below data was compiled from various identification fields in the bibliographic record of this title.
