

Agricultural Science Limpopo Doe June 2014 Grade 12 Question Paper

Getting the books **agricultural science limpopo doe june 2014 grade 12 question paper** now is not type of inspiring means. You could not only going with ebook amassing or library or borrowing from your connections to approach them. This is an certainly simple means to specifically get guide by on-line. This online revelation agricultural science limpopo doe june 2014 grade 12 question paper can be one of the options to accompany you similar to having supplementary time.

It will not waste your time. allow me, the e-book will enormously circulate you additional thing to read. Just invest tiny era to get into this on-line declaration **agricultural science limpopo doe june 2014 grade 12 question paper** as competently as review them wherever you are now.

Comparative and International Education - C. C. Wolhuter 2019-08-26

This book explores the evolution and current state of the scholarly field of comparative and international education over 200 years of development. Experts in the field explore comparative and international education in each of the major world regions.

Study and Master Mathematical Literacy Grade 12 CAPS Learner's Book - Karen Morrison 2014-05-01

Zirconium and Hafnium - 1993

Social Sciences, Grade 6 - Lee Smith 2012-09-28

Study & Master Social Sciences has been specially developed by an experienced author team for the Curriculum and Assessment Policy Statement (CAPS). The comprehensive Learner's Book: * provides activities that develop learners' skills and understanding of each of the modules specified by the CAPS curriculum * includes good-quality illustrations, photographs and diagrams in full colour * offers current and relevant content clearly set out according to the curriculum document. The innovative Teacher's Guide includes: * step-by-step guidance on the teaching of each lesson and activity as well as each form of assessment * Remedial and Extension activities for each module * bright ideas to extend the curriculum into the world outside the classroom * a complete section on Formal Assessment, with sample examinations

and their memoranda as well as photocopiable record sheets and templates.

The Bont Tick - Charles P. Lounsbury 1899

An Enterprise Map of Mozambique - John Sutton 2014-06

Renewable Energy - Mansour Al Qubeissi 2020-09-09

The demand for secure, affordable and clean energy is a priority call to humanity. Challenges associated with conventional energy resources, such as depletion of fossil fuels, high costs and associated greenhouse gas emissions, have stimulated interests in renewable energy resources. For instance, there have been clear gaps and rushed thoughts about replacing fossil-fuel driven engines with electric vehicles without long-term plans for energy security and recycling approaches. This book aims to provide a clear vision to scientists, industrialists and policy makers on renewable energy resources, predicted challenges and emerging applications. It can be used to help produce new technologies for sustainable, connected and harvested energy. A clear response to economic growth and clean environment demands is also illustrated.

Goat Science - Sándor Kukovics 2018-06-20
Goat science covers quite a wide range and varieties of topics, from genetics and breeding, via nutrition, production systems, reproduction, milk and meat production, animal health and parasitism, etc., up to the effects of goat

products on human health. In this book, several parts of them are presented within 18 different chapters. Molecular genetics and genetic improvement of goats are the new approaches of goat development. Several factors affect the passage rate of digesta in goats, but for diet properties, goats are similar to other ruminants. Iodine deficiency in goats could be dangerous. Assisted reproduction techniques have similar importance in goats like in other ruminants. Milk and meat production traits of goats are almost equally important and have significant positive impacts on human health. Many factors affect the health of goats, heat stress being of increasing importance. Production systems could modify all of the abovementioned characteristics of goats.

World Migration Report 2020 - United Nations 2019-11-27

Since 2000, IOM has been producing world migration reports. The World Migration Report 2020, the tenth in the world migration report series, has been produced to contribute to increased understanding of migration throughout the world. This new edition presents key data and information on migration as well as thematic chapters on highly topical migration issues, and is structured to focus on two key contributions for readers: Part I: key information on migration and migrants (including migration-related statistics); and Part II: balanced, evidence-based analysis of complex and emerging migration issues.

THE EARLY GRADE READING

ASSESSMENT - Amber K. Gove 2011-09-28

The Early Grade Reading Assessment (EGRA) measures students' progress towards reading. EGRA gauges early literacy skills through a 15-minute individual oral assessment of five fundamental reading skills. RTI worked with education experts to develop the EGRA in 2006, and it has been piloted and implemented in more than 40 countries. This volume aims to take stock of the substantial amount of information and experience generated through the use of EGRA, and to share this knowledge with practitioners, policymakers, and international donors. Chapters cover not only particular applications of the instrument but also put EGRA in the context of broader issues and developments in literacy and education.

The African Film Industry - UNESCO

2021-10-01

The production and distribution of film and audiovisual works is one of the most dynamic growth sectors in the world. Thanks to digital technologies, production has been growing rapidly in Africa in recent years. For the first time, a complete mapping of the film and audiovisual industry in 54 States of the African continent is available, including quantitative and qualitative data and an analysis of their strengths and weaknesses at the continental and regional levels. The report proposes strategic recommendations for the development of the film and audiovisual sectors in Africa and invites policymakers, professional organizations, firms, filmmakers and artists to implement them in a concerted manner.

Critical Issues in South African Education -

Charl C. Wolhuter 2020-12-31

The main thesis of this book is that, given that South African education faces major challenges, the BRICS (Brazil, Russia, India, China and South Africa) constellation of states offers — thus far overlooked — a valuable tertium comparationis, a source of international comparative perspectives, to inform the domestic scholarly discourse on education. This book first investigates the national contexts and development of education in the BRICS countries, arguing that this grouping represents a valuable but yet overlooked field for illuminating South African education issues with international perspectives. The book consists of chapters arguing for and illustrating this thesis from a variety of angles. Common to all chapters is that authors used the comparative method in education, that is comparing the national education system, in their education societal context interrelationships, of the BRICS countries. The chapters focus on a number of critical issues in South African education, including the language of learning and teaching issue, the alignment of the world of education with the world of work, early childhood education, and the development of world-class universities. Regarding the last, for example, China has been the terrain of the most intensive national projects of establishing world-class universities, with Project 985, Project 211, and the “Double First Class University” project. The

chapters demonstrate what South Africa, in approaching her education issues, can learn from the experience of the BRICS countries. *The Social Origins of Language* - Daniel Dor 2014-06-27

This book offers an exciting new perspective on the origins of language. Language is conceptualized as a collective invention, on the model of writing or the wheel, and the book places social and cultural dynamics at the centre of its evolution: language emerged and further developed in human communities already suffused with meaning and communication, mimesis, ritual, song and dance, alloparenting, new divisions of labour and revolutionary changes in social relations. The book thus challenges assumptions about the causal relations between genes, capacities, social communication and innovation: the biological capacities are taken to evolve incrementally on the basis of cognitive plasticity, in a process that recruits previous adaptations and fine-tunes them to serve novel communicative ends. Topics include the ability brought about by language to tell lies, that must have confronted our ancestors with new problems of public trust; the dynamics of social-cognitive co-evolution; the role of gesture and mimesis in linguistic communication; studies of how monkeys and apes express their feelings or thoughts; play, laughter, dance, song, ritual and other social displays among extant hunter-gatherers; the social nature of language acquisition and innovation; normativity and the emergence of linguistic norms; the interaction of language and emotions; and novel perspectives on the time-frame for language evolution. The contributors are leading international scholars from linguistics, anthropology, palaeontology, primatology, psychology, evolutionary biology, artificial intelligence, archaeology, and cognitive science.

Education, Development, and Underdevelopment - Sureshchandra Shukla 1998

Transforming Water Management in South Africa - Barbara Schreiner 2011-12-10

One of the early set of reforms that South Africa embarked on after emerging from apartheid was in the water sector, following a remarkable, consultative process. The policy and legal

reforms were comprehensive and covered almost all aspects of water management including revolutionary changes in defining and allocating rights to water, radical reforms in water management and supply institutions, the introduction of the protection of environmental flows, and major shifts in charging for water use and in the provision of free basic water. Over ten years of implementation of these policy and legislative changes mean that valuable lessons have already been learned and useful experiences gained in the challenge of effective water resources management and water services provision in a middle income country.

Number Patterns 1 - Nuffield Mathematics Project 1973

Social Sciences, Grade 4 - Lee Smith 2012-09-28

Study & Master Social Sciences has been specially developed by an experienced author team for the Curriculum and Assessment Policy Statement (CAPS). The comprehensive Learner's Book: * provides activities that develop learners' skills and understanding of each of the modules specified by the CAPS curriculum * includes good-quality illustrations, photographs and diagrams in full colour * offers current and relevant content clearly set out according to the curriculum document. The innovative Teacher's Guide includes: * step-by-step guidance on the teaching of each lesson and activity as well as each form of assessment * Remedial and Extension activities for each module * bright ideas to extend the curriculum into the world outside the classroom * a complete section on Formal Assessment, with sample examinations and their memoranda as well as photocopyable record sheets and templates.

Successful Poultry Production - J. W. Hurst 1910

Critical Mineral Resources of the United States - K. J. Schulz 2017

As the importance and dependence of specific mineral commodities increase, so does concern about their supply. The United States is currently 100 percent reliant on foreign sources for 20 mineral commodities and imports the majority of its supply of more than 50 mineral commodities. Mineral commodities that have important uses and face potential supply disruption are critical to American economic and

national security. However, a mineral commodity's importance and the nature of its supply chain can change with time; a mineral commodity that may not have been considered critical 25 years ago may be critical today, and one considered critical today may not be so in the future. The U.S. Geological Survey has produced this volume to describe a select group of mineral commodities currently critical to our economy and security. For each mineral commodity covered, the authors provide a comprehensive look at (1) the commodity's use; (2) the geology and global distribution of the mineral deposit types that account for the present and possible future supply of the commodity; (3) the current status of production, reserves, and resources in the United States and globally; and (4) environmental considerations related to the commodity's production from different types of mineral deposits. The volume describes U.S. critical mineral resources in a global context, for no country can be self-sufficient for all its mineral commodity needs, and the United States will always rely on global mineral commodity supply chains. This volume provides the scientific understanding of critical mineral resources required for informed decisionmaking by those responsible for ensuring that the United States has a secure and sustainable supply of mineral commodities.

Adoption and impact of OER in the Global South - Hodgkinson-Williams, Cheryl

2018-01-05

Education in the Global South faces several key interrelated challenges, for which Open Educational Resources (OER) are seen to be part of the solution. These challenges include: unequal access to education; variable quality of educational resources, teaching, and student performance; and increasing cost and concern about the sustainability of education. The Research on Open Educational Resources for Development (ROER4D) project seeks to build on and contribute to the body of research on how OER can help to improve access, enhance quality and reduce the cost of education in the Global South. This volume examines aspects of educator and student adoption of OER and engagement in Open Educational Practices (OEP) in secondary and tertiary education as well as teacher professional development in 21

countries in South America, Sub-Saharan Africa and South and Southeast Asia. The ROER4D studies and syntheses presented here aim to help inform Open Education advocacy, policy, practice and research in developing countries.

African Philosophy of Education

Reconsidered - Yusef Waghid 2013-07

Much of the literature on the African philosophy of education juxtaposes two philosophical strands as mutually exclusive entities; traditional ethnophilosophy on the one hand, and 'scientific' African philosophy on the other. While traditional ethnophilosophy is associated with the cultural artefacts, narratives, folklore and music of Africa's people, 'scientific' African philosophy is primarily concerned with the explanations, interpretations and justifications of African thought and practice along the lines of critical and transformative reasoning. These two alternative strands of African philosophy invariably impact understandings of education in different ways: education constituted by cultural action is perceived to be mutually independent from education constituted by reasoned action. Yusef Waghid argues for an African philosophy of education guided by communitarian, reasonable and culture dependent action in order to bridge the conceptual and practical divide between African ethnophilosophy and 'scientific' African philosophy. Unlike those who argue that African philosophy of education cannot exist because it does not invoke reason, or that reasoned African philosophy of education is just not possible, Waghid suggests an African philosophy of education constituted by reasoned, culture-dependent action. This book provides an African philosophy aimed at developing a conception of education that can contribute towards imagination, deliberation, and responsibility - actions that can help to enhance justice in educative relations, both in Africa and throughout the world. This book will be essential reading for researchers and academics in the field of the philosophy of education, especially those wanting to learn from the African tradition.

[[Bulletins](#)]; 1 - Wayne Oil Tank & Pump Company 2021-09-09

This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it. This work is in

the public domain in the United States of America, and possibly other nations. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work. Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. To ensure a quality reading experience, this work has been proofread and republished using a format that seamlessly blends the original graphical elements with text in an easy-to-read typeface. We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant.

Tourism and Hospitality Studies - Irfan Yazicioglu 2020-12-16

This book discusses "tourism and hospitality" from different perspectives and disciplines. In addition, this book, considering the tourism and hotel management terminology, is expected to be a source book for the theoretical and practical scientific studies in the fields which is in close relationship such as gastronomy, recreation and marketing.

Independent Power Projects in Sub-Saharan Africa - Anton Eberhard 2016-04-18

Inadequate electricity services pose a major impediment to reducing extreme poverty and boosting shared prosperity in Sub-Saharan Africa. Simply put, Africa does not have enough power. Despite the abundant low-carbon and low-cost energy resources available to Sub-Saharan Africa, the region's entire installed electricity capacity, at a little over 80 GW, is equivalent to that of the Republic of Korea. Looking ahead, Sub-Saharan Africa will need to ramp-up its power generation capacity substantially. The investment needed to meet this goal largely exceeds African countries already stretched public finances. Increasing private investment is critical to help expand and improve electricity supply. Historically, most private sector finance has been channeled through privately financed independent power projects (IPP), supported by nonrecourse or limited recourse loans, with long-term power purchase agreements with the state utility or another off-taker. Between 1990 and 2014, IPPs have spread across Sub-Saharan Africa and are

now present in 17 countries. Currently, there are 125 IPPs, with an overall installed capacity of 10.7 GW and investments of \$24.6 billion. However, private investment could be much greater and less concentrated. South Africa alone accounts for 67 IPPs, 4.3 GW of capacity and \$14.4 billion of investments; the remaining projects are concentrated in a handful of countries. The objective of this study is to evaluate the experience of IPPs and identify lessons that can help African countries attract more and better private investment. At the core of this analysis is a reflection on whether IPPs have in fact benefited Sub-Saharan Africa, and how they might be improved. The analysis is based primarily on in depth case studies, carried out in five countries, including Kenya, Nigeria, South Africa, Tanzania and Uganda, which not only have the most numerous but also among the most extensive experience with IPPs.

Tourism in the Green Economy - World Tourism Organization 2012

The Tourism Background Report is an extended version of the Tourism Chapter of the Green Economy Report (GER), which makes the case for investments in greener and sustainable tourism as a means to create jobs and reduce poverty while also improving environmental outcomes. The Report analyses the main variables that influence tourism development and aims to demonstrate that concerted "greener" policies can steer the growth of the sector toward a more sustainable path.

Compared with a "business-as-usual" scenario, it shows how a green investment scenario would allow the sector to continue to expand steadily over the coming decades while ensuring significant environmental benefits such as reductions in water consumption, energy use and CO₂ emissions. The Report aims at encouraging policy makers to support increased investment in greening the tourism sector.

An Introduction to Global Studies - Patricia J. Campbell 2011-09-13

Taking an interdisciplinary approach, An Introduction to Global Studies presents readers with a solid introduction to the complex, interconnected forces and issues confronting today's globalized world. Introduces readers to major theories, key terms, concepts, and notable theorists Equips readers with the basic

knowledge and conceptual tools necessary for thinking critically about the complex issues facing the global community. Includes a variety of supplemental features to facilitate learning and enhance readers' understanding of the material.

Social Sciences, Grade 5 - Inga Norenus

2012-09-26

Study & Master Social Sciences has been specially developed by an experienced author team for the Curriculum and Assessment Policy Statement (CAPS). The comprehensive Learner's Book: * provides activities that develop learners' skills and understanding of each of the modules specified by the CAPS curriculum * includes good-quality illustrations, photographs and diagrams in full colour * offers current and relevant content clearly set out according to the curriculum document. The innovative Teacher's Guide includes: * step-by-step guidance on the teaching of each lesson and activity as well as each form of assessment * Remedial and Extension activities for each module * bright ideas to extend the curriculum into the world outside the classroom * a complete section on Formal Assessment, with sample examinations and their memoranda as well as photocopiable record sheets and templates.

Study and Master Life Sciences Grade 11

CAPS Study Guide - Gonasagaren S. Pillay

2014-08-21

Student Retention & Graduate Destination -

Moeketsi Letseka 2010

Student attrition has been a perennial theme in South African higher education throughout the decade. In its National Plan for Higher Education (2001), the Department of Education attributed high dropout rates primarily to financial and/or academic exclusions. Four years later, it reported that 30% of students dropped out in their first year of study and a further 20% during their second and third years. Against this backdrop, the erstwhile research programme on Human Resources Development initiated a research project to investigate more thoroughly why students dropped out, what led them to persist in higher education to graduation, and what made for a successful transition to the labour market. The chapters in this volume address these issues in relation to one or more

of seven institutional case studies conducted in 2005.

Biomass Utilization - Wilfred Cote 2013-12-01

This proceedings volume represents the culmination of nearly three years of planning, organizing and carrying out of a NATO Advanced Study Institute on Biomass Utilization. The effort was initiated by Dr. Harry Sobel, then Editor of Biosources Digest, and a steering committee representing the many disciplines that this field brings together. . When the fiscal and logistical details of the original plan could not be worked out, the idea was temporarily suspended. In the spring of 1982, the Renewable Materials Institute of the State University of New York at the College of Environmental Science and Forestry in Syracuse, New York revived the plan. A number of modifications had to be made, including the venue which was changed from the U.S.A. to Portugal. Additional funding beyond the basic support provided by the Scientific Affairs Division of NATO had to be obtained. Ultimately there were supplementary grants from the Foundation for Microbiology and the Anne S. Richardson Fund to assist student participants. The New York State College of Forestry Foundation, Inc. provided major support through the Renewable Materials Institute. The ASI was held in Alcabideche, Portugal from September 26 to October 9, 1982. Eighty participants including fifteen principal lecturers were assembled at the Hotel Sintra Estoril for the program that was organized as a comprehensive course on biomass utilization. The main lectures were supplemented by relevant short papers offered by the participants.

Landscape Sensitivity - David S. G. Thomas

1993-06-22

Divided into three sections beginning with landscape sensitivity to geomorphic processes and climatic change along with overviews, case studies and modeling. The second part considers sensitivity regarding agricultural and pastoral land use issues. Lastly, it deals with sensitivity in relation to built environments.

Human Resources Development Review 2008 -

Andre Kraak 2008

Through 25 chapters authored by some of the leading researchers in the field, the Human Resources Development Review 2008 provides

an extensive overview of the contextual factors driving human resources development in South Africa. A key theme throughout the volume is the importance of a multi-faceted skills development strategy operating at three levels. The first entails high-skills policies aimed at expanding export-oriented manufacturing production and services provision, particularly in new globally competitive 'niche' areas. The second relates to the economy's ongoing need for intermediate skills, as is evident in the shortage of skilled artisans and technologists. Finally, the provision of basic, entry-level skills is important in view of the urgent need for large-scale job creation schemes, triggered by public sector initiatives, to ameliorate high levels of unemployment and despondency, especially amongst the youth.

Using Evidence in Policy and Practice - Ian Goldman 2020-06-10

This book asks how governments in Africa can use evidence to improve their policies and programmes, and ultimately, to achieve positive change for their citizens. Looking at different evidence sources across a range of contexts, the book brings policy makers and researchers together to uncover what does and doesn't work and why. Case studies are drawn from five countries and the ECOWAS (west African) region, and a range of sectors from education, wildlife, sanitation, through to government procurement processes. The book is supported by a range of policy briefs and videos intended to be both practical and critically rigorous. It uses evidence sources such as evaluations, research synthesis and citizen engagement to show how these cases succeeded in informing policy and practice. The voices of policy makers are key to the book, ensuring that the examples deployed are useful to practitioners and researchers alike. This innovative book will be perfect for policy makers, practitioners in government and civil society, and researchers and academics with an interest in how evidence can be used to support policy making in Africa. The Open Access version of this book, available at <https://doi.org/10.4324/9781003007043>, has been made available under a Creative Commons Attribution-Non Commercial-No Derivatives 4.0 license

Teaching Strategies for Quality Teaching and Learning - Roy Killen 2010

A practical guide to effective teaching for educators in all instructional settings, this account provides an introduction to nine teaching strategies considered to be the most useful for a majority of teachers. While questions and exercises are included to help readers develop their understanding of teaching strategies and reflective practice, the ideas developed in the book can be used to prompt learners to delve deeper into issues of personal interest. Electronic lesson plans, assessment templates, PowerPoint slides, and other lecturer support material are also available from the publisher to prescribing institutions.

Occupational Outlook Handbook - United States. Bureau of Labor Statistics 1976

The Chemistry of Matter Waves - Jan C.A. Boeyens 2013-08-13

The quantum and relativity theories of physics are considered to underpin all of science in an absolute sense. This monograph argues against this proposition primarily on the basis of the two theories' incompatibility and of some untenable philosophical implications of the quantum model. Elementary matter is assumed in both theories to occur as zero-dimensional point particles. In relativity theory this requires the space-like region of the underlying Minkowski space-time to be rejected as unphysical, despite its precise mathematical characterization. In quantum theory it leads to an incomprehensible interpretation of the wave nature of matter in terms of a probability function and the equally obscure concept of wave-particle duality. The most worrisome aspect about quantum mechanics as a theory of chemistry is its total inability, despite unsubstantiated claims to the contrary, to account for the fundamental concepts of electron spin, molecular structure, and the periodic table of the elements. A remedy of all these defects by reformulation of both theories as nonlinear wave models in four-dimensional space-time is described.

Community Paralegals and the Pursuit of Justice - Vivek Maru 2020-11-26

The United Nations estimates that four billion people worldwide live outside the protection of the law. These people can be driven from their land, intimidated by violence, and excluded from society. This book is about community paralegals

- sometimes called barefoot lawyers - who demystify law and empower people to advocate for themselves. These paralegals date back to 1950s South Africa and are active today in many countries, but their role has largely been ignored by researchers. *Community Paralegals and the Pursuit of Justice* is the first book on the subject. Focusing on paralegal movements in six countries, Vivek Maru, Varun Gauri, and their coauthors have collected rich, vivid stories of paralegals helping people to take on injustice, from domestic violence to unlawful mining to denial of wages. From these stories emerges evidence of what works and how. The insights in the book will be of immense value in the global fight for universal justice. This title is also available as Open Access.

Perspectives on Student Affairs in South Africa - McGlory Speckman 2014-07-17

The goal of *Perspectives on Student Affairs in South Africa* is to generate interest in student affairs in South Africa. The papers contained herein are based on best practice, local experience and well-researched international and local theories. The papers in this book deal with matters pertaining to international and national trends in student affairs: academic development, access and retention, counselling, and material support for students coming from disadvantaged backgrounds. They are linked to national and international developments, as described in the first two papers. This publication will assist both young and experienced practitioners as they grow into their task of developing the students entrusted to them. All contributors are South Africans with a great deal of experience in student affairs, and all are committed to the advancement of student affairs in South Africa. The editors are former heads of student affairs portfolios at two leading South African universities.

State of the World's Indigenous Peoples - United Nations. Department of Economic and Social Affairs 2009

While indigenous peoples make up around 370 million of the world's population - some 5 per cent - they constitute around one-third of the world's 900 million extremely poor rural people. Every day, indigenous communities all over the world face issues of violence and brutality. Indigenous peoples are stewards of some of the

most biologically diverse areas of the globe, and their biological and cultural wealth has allowed indigenous peoples to gather a wealth of traditional knowledge which is of immense value to all humankind. The publication discusses many of the issues addressed by the Declaration on the Rights of Indigenous Peoples and is a cooperative effort of independent experts working with the Secretariat of the Permanent Forum on Indigenous Issues. It covers poverty and well-being, culture, environment, contemporary education, health, human rights, and includes a chapter on emerging issues.

Accountability in education: meeting our commitments - UNESCO 2017-10-30

"The second edition of the Global Education Monitoring Report (GEM Report) presents the latest evidence on global progress towards the education targets of the UN Sustainable Development Goals. With hundreds of millions of people still not going to school, and many not achieving minimum skills at school, it is clear education systems are off track to achieve global goals. The marginalized currently bear the most consequences but also stand to benefit the most if policy-makers pay sufficient attention to their needs. Faced with these challenges, along with tight budgets and increased emphasis on results-oriented value for money, countries are searching for solutions. Increased accountability often tops the list. The 2017/8 GEM Report shows the entire array of approaches to accountability in education. It ranges from countries unused to the concept, where violations of the right to education go unchallenged, to countries where accountability has become an end in itself instead of a means to inclusive, equitable and high-quality education and lifelong learning for all. The report emphasizes that education is a shared responsibility. While governments have primary responsibility, all actors - schools, teachers, parents, students, international organizations, private sector providers, civil society and the media ⁰³ have a role in improving education systems. The report emphasized the importance of transparency and availability of information but urges caution in how data are used. It makes the case for avoiding accountability systems with a disproportionate focus on narrowly defined results and punitive sanctions. In an era of

multiple accountability tools, the report provides clear evidence on those that are working and those that are not."--Back cover.
