Aligarh Muslim University - Mohammed Wajihuddin 2021-12-10

The Aligarh Muslim University (AMU) completed a hundred years in December 2020. In December 1920, the Mohammedan Anglo Oriental (MAO) College founded by Sir Syed Ahmed Khan in 1877, was transformed into AMU. Sir Syed also established the All India Mohammedan Educational Conference to infuse the subcontinent's Muslims with a spirit of modernism. This helped prepare the community, devastated in the aftermath of the Revolt of 1857, for new challenges. This book examines the critical role that the Aligarh Muslim University played in the making of the modern Indian Muslim. As Zakir Hussain, AMU alumnus, its former Vice-Chancellor and a former President of India, said over fifty years ago, 'The way Aligarh participates in various walks of national life will determine the place of Muslims in India's national life. The way India conducts itself towards Aligarh will determine largely, the form which our national life will acquire in the future.'

Competition Science Vision - 2001-10

Spectroscopy and Photochemistry of Planetary Atmospheres and Ionospheres - Vladimir A. Krasnopolsky 2019-02-14

The chemical composition of any planetary atmosphere is of fundamental importance in determining its photochemistry and dynamics in addition to its thermal balance, climate, origin and evolution. Divided into two parts, this book begins with a set of introductory chapters, starting with a concise review of the Solar System and fundamental atmospheric physics. Chapters then describe the basic principles and methods of spectroscopy, the main tool for studying the chemical composition of planetary atmospheres, and of photochemical modeling and its use in the theoretical interpretation of observational data on chemical composition. The second part of the book provides a detailed review of the carbon dioxide atmospheres and ionospheres of Mars and Venus, and the nitrogen-methane atmospheres of Titan, Triton and Pluto. Written by an expert author, this comprehensive text will make a valuable reference for graduate students, researchers and professional scientists specializing in planetary atmospheres.
