Soil Erosion and Carbon Dynamics - Eric J. Roose 2005-12-09

The most complete, nonpartisan source of information on this hot agronomic topic available today, this book brings together a diverse group of papers and data to resolve the debate between sedimentologists and soil scientists and agronomists over whether the effects of soil erosion on carbon and atmospheric CO₂ is beneficial or destructive. Divided into four sections, it offers data on how soil erosion affects soil, water, and air quality. Topics include mineralization rate, inundation, sediment deposition, and global warming potential, as well as carbon dioxide, methane, and nitrous oxide emissions, and the implications of soil erosion on the global carbon cycle and carbon budget.

Women Workers in the Second World War - Penny Summerfield 2013-03-05

The Second World War is often seen as a period of emancipation, because of the influx of women into paid work, and because the state took steps to relieve women of domestic work. This study challenges such a picture. The state approached the removal of women from the domestic sphere with extreme caution, in spite of the desperate need for women's labour in war work. Women's own preferences were frequently neglected or distorted in the search for a compromise between production and patriarchy. However, the

enduring practices of paying women less and treating them as an inferior category of workers led to growth in the numbers and proportions of women employed after the war in many areas of work. Penny Summerfield concludes that the war accelerated the segregation of women in 'inferior' sectors of work, and inflated the expectation that working women would bear the double burden without a redistribution of responsibility for the domestic sphere between men, women and the state. First published in 1984, this is an important book for students of history, sociology and women's studies at all levels.

Beyond Little Rock - John A. Kirk 2007-10-01

Based on extensive archival work, private paper collections, and oral history, this book includes eight of John Kirk's essays, two of which have never been published before. Together, these essays locate the dramatic events of the crisis within the larger story of the African American struggle for freedom and equality in Arkansas. Examining key episodes in state history from before the New Deal to the present, Kirk covers a wide range of topics that include the historiography of the school crisis; the impact of the New Deal; early African American politics and mass mobilization; race, gender, and the civil rights movement; the role of white liberals in the struggle; and the intersections of race and city planning policy. Kirk unearths many previously neglected individuals, organizations, and episodes, and provides a thought-provoking analytical framework for understanding them.

The Mushroom at the End of the World - Anna Lowenhaupt Tsing 2021-06-08

"A tale of diversity within our damaged landscapes, *The Mushroom at the End of the World* follows one of the strangest commodity chains of our times to explore the unexpected corners of capitalism. Here, we witness the varied and peculiar worlds of matsutake commerce: the worlds of Japanese gourmets, capitalist traders, Hmong jungle fighters, industrial forests, Yi Chinese goat herders, Finnish nature guides, and more. These companions also lead us into fungal ecologies and forest histories to better understand the promise of cohabitation in a time of massive human destruction."--Publisher's description.

Social Psychology in Forensic Practice - Joel Harvey 2022-12-21

This book explores how different social psychology theories and concepts can be applied to practice. Considering theories from attribution theory to coercion theory, social identity theories to ostracism, the authors offer a greater understanding and appreciation of the ways in which social psychology can contribute to forensic practice. The book argues that social psychology is useful for carrying out assessments (including risk assessments), formulations, and interventions with clients in forensic settings, as well as for psychological consultation, training, and the development of services. These theories are also important when understanding multi-disciplinary and multi-agency working, staff-client relationships, and peer-to-peer relationships. Through illustrative composite case examples, taken from the authors' experiences in forensic settings, the chapters demonstrate effective ways to pursue a theoretically informed practice. Exploring a broad range of theories and a timely topic, *Social Psychology in Forensic Practice* will interest a wide readership including graduate and undergraduate students and researchers in criminology, sociology, and forensic, social and clinical psychology. It will also be of practical use to health professionals and non-health professionals working in forensic settings as well as policy makers and others commissioning forensic services.

Managing Industrial Decline - Michael Dintenfass 1992

Managing Industrial Decline examines the dramatic decline of the British coal industry through the lens of comparative business history, challenging the prevailing belief that the industry's decline was due primarily to global economic factors and instead demonstrating that entrepreneurial failings of individual coal firms contributed significantly to the problem. Through a comparative analysis of company histories, Dintenfass shows how the full range of business operations at British coal firms, including labor management policies, technological choices, and marketing practices, affected their performance. The histories of individual firms demonstrate that the managements could improve productivity, increase sale prices, and sustain profitability, even as the coal trade succumbed to cyclical depression and secular decline. According to Dintenfass, comparisons between the individual firms and the regional coal industries to which they belonged show that neighboring firms were slow to introduce the modest innovations that the successful firms pioneered. Since there were few barriers to the implementation of these strategies, it appears that Britain's coal masters miscalculated their costs and benefits, contributing to the problem by failing to adopt inexpensive and accessible second-best solutions to production and commercial problems. *Managing Industrial Decline*, breaks new ground in the field of business history and restores entrepreneurship to its proper place in the analysis of industrial decline.

An African Elegy - Ben Okri 2015-04-30

Dreams are the currency of Okri's writing, particularly in this first book of poems, *An African Elegy*, but also in his books of short stories and prize-winning novel *The Famished Road*. Okri's dreams are made on the stuff of Africa's colossal economic and political problems, and reading the poems is to experience a constant succession of metaphors of resolution in both senses of the word. Virtually every poem contains an exhortation to climb out of the African miasma, and virtually every poem harvests the dream of itself with an upbeat restorative ending' - Giles Foden, *Times Literary Supplement*

Ways of Knowing - Chris Clarke 2013-09-18

The world faces a crisis of meaning. The old stories - whether the exclusive claims of rival religions or the grand schemes of perennial philosophy - seem bankrupt to many. The editorial stance of this book is that mysticism and science offer a way forward here, but only if they abandon the idol of a single logical synthesis and acknowledge the diversity of different ways of knowing. The contributors, from disciplines as diverse as music, psychology, mathematics and religion, build a vision that honours diversity while pointing to an implicit unity.
