Kaleidoscope Snowflakes Coloring Book -
Kristen N. Fox 2015-08-25

Choose a colored pencil, pen, or marker and start coloring the kaleidoscope patterns of these unique ice crystal snowflakes! These 25 original designs are detailed and somewhat complex,

drawn with fine lines, and each has its own unique look and feel. These aren't your common white snowflakes - they want COLOR! Each design was hand-drawn with a stylus and a drawing tablet, and was inspired by creative impulses and a love of snowflakes and winter. Some designs are large, single snowflakes, others are patterns or interesting groupings, and they are all printed one-sided. Coloring is fun no

matter what your age. It's also a wonderful way to relax and release stress. You can color these snowflakes anytime - over the winter holidays, or in the middle of summer when the weather is too hot!

The Art of Creative Research - Philip Gerard 2017-02-23

All writers conduct research. For some this

means poring over records and combing, archives but for many creative writers research happens in the everyday world—when they scribble an observation on the subway, when they travel to get the feel for a city, or when they strike up a conversation with an interesting stranger. The Art of Creative Research helps writers take this natural inclination to explore and observe and turn it into a workable—and enjoyable—research plan. It shows that research shouldn't be seen as a dry, plodding aspect of writing. Instead, it's an art that all writers can master, one that unearths surprises and fuels imagination. This lends authenticity to fiction and poetry as well as nonfiction. Philip Gerard distills the process into fundamental questions: How do you conduct research? And what can you do with the information you gather? He covers both in-person research and work in archives and illustrates how the different types of research can be incorporated into stories, poems, and essays using examples from a wide

range of writers in addition to those from his own projects. Throughout, Gerard brings knowledge from his seasoned background into play, drawing on his experiences as a reporter and a writer of both fiction and nonfiction. His enthusiasm for adventure is infectious and will inspire writers to step away from the keyboard and into the world. "Research can take you to that golden intersection where the personal meets the public, the private crosses the universal, where the best literature lives," Gerard writes. With his masterly guidance, anyone can become an expert in artful investigation.

Artist-Teacher Practice and the Expectation of an Aesthetic Life - Carol Wild 2022-07-08

This book explores why and how the personal creative practice of arts teachers in school matters. It responds to ethnographic research that considers specific works-of-art created by teachers within the context of their classrooms. Through a classroom-based ethnographic investigation, the book proposes that the potential impact of artist-teacher practice in the classroom can only be understood in relation to the flows of power and policy that concurrently shape the classroom. It shows how artist-teacher practice functions as a creative practice of freedom tending to the present and future aesthetic life of the classroom, countering the effects of neoliberal schooling and austerity politics. The book questions what the artist-teacher can produce within that context.

Through the unique focus on artist-teacher practice, the book explores the changing nature of the classroom and the social and political dimensions of the school. It will be key reading for researchers and postgraduate students of arts education, critical pedagogy, teacher identity and aesthetics. It will also be of interest to art and design educators.

Art-Based Research - Shaun McNiff 1998-06-01

Art therapy and all of the other creative arts therapies have promoted themselves as ways of expressing what cannot be conveyed in conventional language. Why is it that creative arts therapists fail to apply this line of thinking to research? In this exciting and innovative book, Shaun McNiff, one of the field's pioneering educators and authors, breaks new ground in defining and inspiring art-based research. He illustrates how practitioner-researchers can become involved in art-based inquiries during

their educational studies and throughout their careers, and shows how new types of research can be created that resonate with the artistic process. Clearly and cogently expressed, the theoretical arguments are illustrated by numerous case examples, and the final part of the book provides a wealth of ideas and thought provoking questions for research. This challenging book will prove invaluable to creative art therapy educators, students, and clinicians who wish to approach artistic inquiry as a way of conducting research. It will also find a receptive audience within the larger research community where there is a rising commitment to expanding the theory and practice of research. Integrating artistic and scientific procedures in many novel ways, this book offers fresh and productive visions of what research can be.

Teaching Artistic Research - Ruth Mateus-Berr
2020-05-05

With artistic research becoming an established paradigm in art education, several questions arise. How do we train young artists and designers to actively engage in the production of knowledge and aesthetic experiences in an expanded field? How do we best prepare students for their own artistic research? What comprises a curriculum that accommodates a changed learning, making, and research landscape? And what is the difference between

teaching art and teaching artistic research?
What are the specific skills and competences a teacher should have? Inspired by a symposium at the University of Applied Arts Vienna in 2018, this book presents a diversity of well-reasoned answers to these questions.

Biodeterioration of Stone Surfaces - Larry St.Clair 2012-11-02

This is a timely volume in view of the considerable interest currently shown in the preservation of our cultural heritage, and the extensive and growing literature on the subject. Unfortunately, the latter is to be found in a wide variety of published sources, some aimed at a very specific readership and therefore not all that accessible to those who need this resource. The present volume draws together a spectrum of biodeterioration work from across the world to provide an overview of the materials examined and the methodologies employed to

elucidate the nature of the problems, as well as an extensive and current bibliographical resource on lichen biodeterioration.

Biodeterioration of historical and culturally important stone substrata is a complex problem to be addressed. Easy, risk-free solutions are simply not available to be dealt with by other than a wide range of expertise. Successful resolution of this issue will inevitably require a multidisciplinary effort, where biologists work in close cooperation with ecologists, geologists, geochemists, crystallographers, cultural property conservators, archaeologists, anthropologists, and historians in order to recommend the most effective management scheme. The advantage of this approach is obvious: multidisciplinary management teams with good leadership can ask more appropriate questions while developing much more thoughtful and informed decisions.

[God's Feminist Movement - Amber Picota](#)
2016-07-19

Experience True Liberation by Seeing Your Beauty, Femininity, and Freedom From Heavens Point of View Has Christianity kept women trapped in the stone age? In many ways, yes; but this is not by God's design. As society offers women opportunities to explore outer-space and govern nations, the church often stifles and limits them. The tide is changing, though. Amber Picota's God's Feminist Movement is a new

covenant manifesto calling women to embrace their true identity in Christ and fulfill their destiny as revolutionaries who shape the course of history with the Kingdom of God. There is a powerful new feminist movement emerging in the body of Christ. Its not politically driven and its not being championed by an uprising of angry man-haters. Based on an intense study of Scripture, factoring in historical and contextual hermeneutics and original languages, Picota shares a practical, non-legalistic, and non-traditional (yet deeply Biblical) look at topics that women commonly face, such as: Dating and Modesty Female Leaders in the Church Submission in Marriage Beauty and Self-Image Celebrate the power and beauty of womanhood. God has given you permission to change the world by being you! Break off religious traditions that keep women trapped in old school legalism and move beyond Christian clichs that minimize a womans true position in Christ!

Art as Research - Shaun McNiff 2013

The new practice of art-based research uses art making as a primary mode of enquiry rather than continuing to borrow research methodologies from other disciplines to study artistic processes. Drawing on contributions from arts therapies, education, history, organizational studies, and philosophy, the essays critically examine unique challenges that include the personal and sometimes intimate nature of artistic enquiry and the complexities of the partnership with social science which has dominated applied arts research; how artistic discoveries are apt to emerge spontaneously, even contrary to plans and what we think we know; how truth can be examined through both fact and fiction as well as the interplay of objective and subjective experience; and ways of generating artistic evidence and communicating outcomes. Offering examples from all of the arts this volume will be welcomed by researchers and students in many fields.

Early Buddhist Narrative Art - Patricia

Eichenbaum Karetzky 2000

Early Buddhist Narrative Art is a pictorial journey through the transmission of the narrative cycle based on the life of the historical Buddha. Karetzky, while demonstrating the various evolutions that the image of the Buddha underwent, maintains that there is an underlying homogeneity of the tradition in the cultures of India, Central Asia, China and Japan. The author, while focusing on the visual representation of the Buddhist narrative, goes into some detail regarding the importance of scriptures in each society, and how the written tradition informed the pictorial. Over seventy photos fill this book, which will be of interest to scholars of art history, Eastern religion and Buddhism in particular.

Jackson Pollock and Lee Krasner - Ines Engelmann 2007

For more than a decade, Jackson Pollock and Lee Krasner devoted their lives to each other, serving in turn as muse, critic, companion, lover, friend and alter ego. Their romance was stormy - their raucous arguments are the stuff of legend - but their talents were prodigious. This book is packed with examples of the contributions both artists made to the world of modern art. Readers will learn how Pollock and Krasners artistry evolved and how they influenced each others success. Recent developments, such as a revealing biopic and the art worlds elevation of Pollock to the status of being the most expensive artist in the world, bring their portrait fully up-to-date. While the author acknowledges historys sensationalisation of their lives, it is the paintings themselves - revolutionary, innovative and daring - that tell the most compelling story.

Islamic Arms and Armor in The

Metropolitan Museum of Art - David G. Alexander 2015-12-31

Armor and weaponry were central to Islamic culture not only as a means of conquest and the spread of the faith, but also as symbols of status, wealth, and power. The finest arms were made by master craftsmen working with the leading designers, goldsmiths, and jewelers, whose work transformed utilitarian military equipment into courtly works of art. This book reveals the diversity and artistic quality of one of the most important and encyclopedic collections of its kind in the West. The Metropolitan Museum's holdings span ten centuries and include representative pieces from almost every Islamic culture from Spain to the Caucasus. The collection includes rare early works, among them the oldest documented Islamic sword, and is rich in helmets and body armor, decorated with calligraphy and arabesques, that were worn in Iran and Anatolia in the late fifteenth century. Other masterpieces include a jeweled short

sword (yatagan) with a blade of "watered" steel that comes from the court of Süleyman the Magnificent, a seventeenth-century gold-inlaid armor associated with Shah Jahan, and two gold-inlaid flintlock firearms belonging to the guard of Tipu Sultan of Mysore. Presenting 126 objects, each handsomely photographed and richly documented with a detailed description and discussion of its technical, historical, and artistic importance, this overview of the Met's holdings is supplemented by an introductory essay on the formation of the collection, and appendixes on iconography and on Turkman-style armor.

Research in the Creative and Media Arts - Desmond Bell 2019-04-01

In *Research in the Creative and Media Arts*, Desmond Bell looks at contemporary art and design practice, arguing that research activity is now a vital part of the creative dynamic. Today, creative arts and media students are expected to develop a range of research competencies and critical capacities in their creative project work. This book plots the basis for a research culture in the creative and media arts. It provides an illuminating genealogy of artistic research, revealing the intimate connections between art and science over the centuries and identifying some of the founding figures of practice-based artistic research. Bell explores the research that

artists undertake through a number of case studies, talking to a range of contemporary artists and media makers about their work and the role research plays in this. He also traces the dialogues between art practice and a range of other humanity disciplines, such as history, anthropology and critical theory. His analysis reveals how contemporary art practice is now so locked into a set of interlocutions about process and purpose that it increasingly resembles a research practice in and of itself. Research in the Creative and Media Arts is a comprehensive overview of the relationship between research and practice that is ideal for undergraduate and postgraduate students, as well as researchers in the fields of art and design, art history and visual culture.

A Short Guide to Writing about Art - Sylvan Barnet 2000

A Short Guide to Writing about Art offers invaluable advice for any art course where

students write papers. It addresses a wealth of fundamental matters: description versus analysis some critical approaches to art (e.g., formal analysis, cultural materialism, gender studies) getting ideas for an essay engaging in peer review developing paragraphs organizing a comparison using bibliographic tools, including the Internet quoting sources writing captions for illustrations avoiding sexist and Eurocentric language editing the final draft documenting sources, using either *The Chicago Manual of Style* or *The Art Bulletin* style preparing for essay examinations Among the new features of the sixth edition are new guidelines for using the World Wide Web and the Internet for art-historical research, five new checklist (e.g., a checklist for evaluating Web Sites), ten new illustrations, and the style guide published by *The Art Bulletin*. Several sample essays are also included, accompanied by analyses that show readers the particular strengths of effective writing.
