**West of Kabul, East of New York** - Tamim Ansary 2003-03-01

A passionate personal journey through two cultures in conflict Shortly after militant Islamic terrorists destroyed the World Trade Center, Tamim Ansary of San Francisco sent an e-mail to twenty friends, telling how the threatened U.S. reprisals against Afghanistan looked to him as an Afghan American. The message spread, and in a few days it had reached, and affected, millions of people-Afghans and Americans, soldiers and pacifists, conservative Christians and talk-show hosts; for the message, written in twenty minutes, was one Ansary had been writing all his life. West of Kabul, East of New York is an urgent communiqué by an American with "an Afghan soul still inside me," who has lived in the very different worlds of Islam and the secular West. The son of an Afghan man and the first American woman to live as an Afghan, Ansary grew up in the intimate world of Afghan family life, one never seen by outsiders. No sooner had he emigrated to San Francisco than he was drawn into the community of Afghan expatriates sustained by the dream of returning to their country -and then drawn back to the Islamic world himself to discover the nascent phenomenon of militant religious fundamentalism. Tamim Ansary has emerged as one of the most eloquent voices on the conflict between Islam and the West. His book is a deeply personal account of the struggle to reconcile two great civilizations and to find some point in the imagination where they might meet.

**A Kingdom in Crisis** - Andrew MacGregor Marshall 2015-11-15

'Perhaps the best introduction yet to the roots of

Thailand's present political impasse. A brilliant book.' Simon Long, The Economist Struggling to emerge from a despotic past, and convulsed by an intractable conflict that will determine its future, Thailand stands at a defining moment in its history. Scores have been killed on the streets of Bangkok. Freedom of speech is routinely denied. Democracy appears increasingly distant. And many Thais fear that the death of King Bhumibol Adulyadej is expected to unleash even greater instability. Yet in spite of the impact of the crisis, and the extraordinary importance of the royal succession, they have never been comprehensively analysed - until now. Breaking Thailand's draconian lèse majesté law, Andrew MacGregor Marshall is one of the only journalists covering contemporary Thailand to tell the whole story. Marshall provides a comprehensive explanation that for the first time makes sense of the crisis, revealing the unacknowledged succession conflict that has become entangled with the struggle for democracy in Thailand.

*Hello, Shadowlands* - Patrick Winn 2018-06-07

'Reads like a thriller you can't put down' - Megha Rajagopalan, China Bureau Chief, BuzzFeed News 'ensures you'll never think about Southeast Asia in the same way ever again.' - Geographical Magazine Essential to understanding Southeast Asia in the 21st century, Hello, Shadowlands reveals a booming underworld of organised crime across a region in flux— a \$100 billion trade that deals in narcotics, animals and people —and the staggering human toll that is being steadily ignored by the West. From Myanmar's anarchic

hills to the swamplands of Vietnam, jihadis are being pitted against brothel workers, pet thieves against vigilantes and meth barons against Christian vice squads. Hello, Shadowlands takes a deep plunge into crime rings both large and small. It also examines how China's rise and America's decline is creating new opportunities for transnational syndicates to thrive. Focusing on human stories on both sides of this crime wave, the acclaimed Bangkok-based broadcaster and journalist Patrick Winn intimately profiles the men and women of the region who are forced to make agonizing choices in the absence of law.

**What Would Ben Graham Do Now?** - Jeffrey Towson 2011-04-21

As originally conceived by the legendary Benjamin Graham, traditional value investing involves purchasing relatively stable stocks and companies at a percentage below their intrinsic value. But this approach contains many hidden, U.S.-centric assumptions that simply don't work well in today's high-growth emerging markets. In this book, leading global value investor Jeffrey Towson extends and modernizes value investing, helping you apply its core principles while you access tremendous opportunities available in today's fastest-growing markets. Towson introduces the powerful Value Point system that grows out of his experience on the elite investing team selected by Prince Alwaleed, the "Arabian Warren Buffett." While retaining Graham's relentless focus on price and quality, he shows how to integrate three crucial additional forms of value into your stock assessments: the value of political access in a government-infused investment world, the value of reputation in a world of colliding markets, actors and biases, and the value of capabilities in a multi-local world. Building on these techniques, Towson presents a complete investment playbook for the next five years. Next, he shows how to invest for

the next twenty years—successfully navigating the titanic market collisions that will batter investors who aren't prepared for them.

**Managing the Dragon** - Jack Perkowski 2008-03-18

The first book by a westerner who built a company in China from scratch The emergence of China as a world economic power is one of the biggest stories of our time. Every business that intends to be an important part of the fast-changing global economy needs to know how to play the game in China. Who better to be your guide than Jack Perkowski, the pioneer who went to China in the early 1990s. Equipped with just a concept, he built a company step-by-step from the ground up—ASIMCO Technologies—that became a major player in China's fast-growing automotive business. Perkowski's story is as rich, involving, and improbable as those of nineteenth-century titans such as Rockefeller and Carnegie or of twentieth-century ones like Michael Dell and Bill Gates, but with one obvious difference: They and others built their companies when America was emerging or dominant. Perkowski built his at the dawn of the Chinese century. Perkowski's insights about the challenges and potential of western involvement in today's great Chinese expansion—gained on the ground in China itself over the past fifteen years—are of inestimable value and relevance to us all. For instance:

- The good news about China: Everything is possible. The bad news: Nothing is easy.
- To build a business in China, you must develop a local management team—avoiding both former bureaucrats of the state-run enterprises and the country's new breed of wildcat entrepreneurs.
- You must learn the real reason why China is able to produce goods so cheaply.
- Forget your notions about the Chinese economy being rigidly controlled by Beijing—it is, in fact, highly decentralized and locally driven. As the Chinese say, "The mountains are high and the emperor is far away." Perkowski tells his story with clarity, lots of humor, and a gripping sense of adventure. He takes us along on his own version of the Long March, when he visited two factories a day for nine months, hitting every province, going through endless rounds of dinners and the inevitable drinking games, and eating what seemed like every part of every animal. He

vividly describes what it's like to be a westerner living and working in China and the dramatic transformation he's seen in the country, from a place left behind by the modern world to a place where a new world is being born. Filled with hard-nosed lessons for anyone with ambitions of breaking into the Chinese market, and a rich source of practical wisdom about the realities of China today, *Managing the Dragon* answers the questions people ask Perkowski most often about his unique experience, as well as those they never think of asking-but should.

*The Oil and the Glory* - Steve Levine 2007-10-23  
Remote, forbidding, and volatile, the Caspian Sea long tantalized the world with its vast oil reserves. But outsiders, blocked by the closed Soviet system, couldn't get to it. Then the Soviet Union collapsed, and a wholesale rush into the region erupted. Along with oilmen, representatives of the world's leading nations flocked to the Caspian for a share of the thirty billion barrels of proven oil reserves at stake, and a tense geopolitical struggle began. The main players were Moscow and Washington-the former seeking to retain control of its satellite states, and the latter intent on dislodging Russia to the benefit of the West. *The Oil and the Glory* is the gripping account of this latest phase in the epochal struggle for control of the earth's "black gold." Steve LeVine, who was based in the region for *The Wall Street Journal*, *The New York Times*, and *Newsweek*, weaves an astonishing tale of high-stakes political gamesmanship, greed, and scandal, set in one of the most opaque corners of the world. In LeVine's telling, the world's energy giants jockey for position in the rich Kazakh and Azeri oilfields, while superpowers seek to gain a strategic foothold in the region and to keep each other in check. At the heart of the story is the contest to build and operate energy pipelines out of the landlocked region, the key to controlling the Caspian and its oil. The oil pipeline that resulted, the longest in the world, is among Washington's greatest foreign policy triumphs in at least a decade and a half. Along the way, LeVine introduces such players as James Giffen, an American moneyman who was also the political "fixer" for oil companies eager to do business on the Caspian and the broker for Kazakhstan's president and ministers; John

Deuss, the flamboyant Dutch oil trader who won big but lost even bigger; Heydar Aliyev, the oft-misunderstood Azeri president who transcended his past as a Soviet Politburo member and masterminded a scheme to loosen Russian control over its former colonies in the Caspian region; and all manner of rogues, adventurers, and others drawn by the irresistible pull of untold riches and the possible "final frontier" of the fossil-fuel era. The broader story is of the geopolitical questions of the Caspian oil bonanza, such as whether Russia can be a trusted ally and trading partner with the West, and what Washington's entry into this important but chaotic region will mean for its long-term stability. In an intense and suspenseful narrative, *The Oil and the Glory* is the definitive chronicle of events that are understood by few, but whose political and economic impact will be both profound and lasting.

**Fifty Million Rising** - Saadia Zahidi 2018-01-30

There is a quiet revolution that is radically reshaping the Muslim world: 50 million women have entered the workforce and are upending their countries' economies and societies.

Longlisted for the FT & McKinsey Business Book of the Year Award Across the Muslim world, ever greater numbers of women are going to work. In the span of just over a decade, millions have joined the workforce, giving them more earning and purchasing power and greater autonomy. In *Fifty Million Rising*, award-winning economist Saadia Zahidi illuminates this discreet but momentous revolution through the stories of the remarkable women who are at the forefront of this shift—a McDonald's worker in Pakistan who has climbed the ranks to manager; the founder of an online modest fashion startup in Indonesia; a widow in Cairo who runs a catering business with her daughter, against her son's wishes; and an executive in a Saudi corporation who is altering the culture of her workplace; among many others. These women are challenging familial and social conventions, as well as compelling businesses to cater to women as both workers and consumers. More importantly, they are gaining the economic power that will upend entrenched cultural norms, re-shape how women are viewed in the Muslim world and elsewhere, and change the mindset of the next generation. Inspiring and deeply reported, *Fifty Million Rising* is a uniquely insightful portrait of a seismic shift with global significance, as Muslim women worldwide claim a seat at the table.

**Operation Yao Ming** - Brook Larmer 2005-11-03

The riveting story behind NBA giant Yao Ming, the ruthless Chinese sports machine that created him, and the East-West struggle over China's most famous son. The NBA's 7'6" All-Star Yao Ming has changed the face of basketball, revitalizing a league desperate for a new hero while becoming a multimillionaire pitchman for Reebok and McDonald's. But his journey to America—like that of his forgotten foil, 7'1" Wang Zhizhi—began long before he set foot on the world's brightest athletic stage.

*Operation Yao Ming* opens with the story of the two boys' parents, basketball players brought together by Chinese officials intent on creating a generation of athletes who could bring glory to their resurgent motherland. Their children

would have no more freedom to choose their fates. By age thirteen, Yao was pulled out of sports school to join the Shanghai Sharks pro team, following in the footsteps of Wang, then the star of the People's Liberation Army team. Rumors of the pair of Chinese giants soon attracted the NBA and American sports companies, all eager to tap a market of 1.3 billion consumers. In suspenseful scenes, journalist Brook Larmer details the backroom maneuverings that brought China's first players to the NBA. Drawing on years of firsthand reporting, Larmer uncovers the disturbing truth behind China's drive to produce Olympic champions, while also taking readers behind the scenes of America's multibillion-dollar sports empire. Caught in the middle are two young men—one will become a mega-rich superstar and hero to millions, the other a struggling athlete rejected by his homeland yet lost in America.

**How Asia Works** - Joe Studwell 2013-07-02

“A good read for anyone who wants to understand what actually determines whether a developing economy will succeed” (Bill Gates, “Top 5 Books of the Year”). An Economist Best Book of the Year from a reporter who has spent two decades in the region, and who The Financial Times said “should be named chief myth-buster for Asian business.” In *How Asia Works*, Joe Studwell distills his extensive research into the economies of nine countries—Japan, South Korea, Taiwan, Indonesia, Malaysia, Thailand, the Philippines, Vietnam, and China—into an accessible, readable narrative that debunks Western misconceptions, shows what really happened in Asia and why, and for once makes clear why some countries have boomed while others have languished. Studwell’s in-depth analysis focuses on three main areas: land policy, manufacturing, and finance. Land reform has been essential to the success of Asian economies, giving a kick-start to development by utilizing a large workforce and providing capital for growth. With manufacturing, industrial development alone is not sufficient, Studwell argues. Instead, countries need “export discipline,” a government that forces companies to compete on the global scale. And in finance, effective regulation is essential for fostering, and sustaining growth. To explore all of these subjects, Studwell journeys far and wide, drawing on fascinating examples from a Philippine sugar baron’s stifling of reform to the explosive growth at a Korean steel mill. “Provocative . . . *How Asia Works* is a striking and enlightening book . . . A lively mix of scholarship, reporting and polemic.” —The Economist

**The Confucian Kingship in Korea** - JaHyun Kim Haboush 2001

The Neo-Confucian kingship was based on the ideal of the sage king, an ordinary human being rendered supreme through his extraordinary virtue. The eighteenth-century Korean ruler Yôngjo, one of that country's most illustrious yet most tragic rulers, is a fascinating example of the Neo-Confucian sage kingship. In this book, JaHyun Kim Haboush provides an outstanding, dramatically realized introduction to traditional Korean culture through the story of Yôngjo, and offers profound insights into the complex interplay between Confucian rhetoric and the politics of the Yi monarchy. Haboush focuses on the deteriorating relationship between Yôngjo and his only son, Crown Prince Sado, and relates the agonizing choices the Confucian ruler was forced to make between saving either his son or his dynasty. Originally published as *A Heritage of Kings*, this paperback edition contains a new preface reflecting new discoveries and updated scholarship in the field.

**The Great Rebalancing** - Michael Pettis  
2014-10-26

China's economic growth is sputtering, the Euro is under threat, and the United States is combating serious trade disadvantages. Another Great Depression? Not quite. Noted economist and China expert Michael Pettis argues instead that we are undergoing a critical rebalancing of the world economies. Debunking popular misconceptions, Pettis shows that severe trade imbalances spurred on the recent financial crisis and were the result of unfortunate policies that distorted the savings and consumption patterns of certain nations. Pettis examines the reasons behind these destabilizing policies, and he predicts severe economic dislocations that will have long-lasting effects. Demonstrating how economic policies can carry negative repercussions the world over, *The Great Rebalancing* sheds urgent light on our globally linked economic future.

**Asian Godfathers** - Joe Studwell 2008-09-23  
The author of *How Asia Works* follows the money. "Alarming . . . enlightening . . . Joe Studwell should be named chief myth buster for Asian business" (*Financial Times*). Hong Kong and Southeast Asia are home to five hundred million people, yet their economies are dominated by only fifty families whose interests range from banking to real estate, shipping to sugar, gambling to lumber. At their peak, eight of the world's two dozen richest men were Southeast Asian, but their names would not be familiar to most regular readers of *The Wall Street Journal*. A complex mythology surrounds these billionaires, but in *Asian Godfathers*, Joe Studwell finds that the facts are even more remarkable than the myths. Studwell has spent fifteen years as a reporter in the region, and he marshals his unprecedented sources to paint intimate and revealing portraits of the men who control Southeast Asia. Studwell also provides us with a rich and deep understanding of the broader historic, economic, and political influences that have shaped Southeast Asia over the past 150 years. *Asian Godfathers* is a riveting and illuminating book that lifts the curtain on a world of staggering secrecy and hypocrisy, and reveals—for the first time—who the leaders of one of the planet's most important and tumultuous markets really are, why they got to the top, and how they keep themselves there. "The romp around the region's pleasure domes is a blast." —*The Wall Street Journal* (Asia)

Masters of the Word - William J. Bernstein  
2013-04-30

A captivating, illuminating, and sweeping historical narrative revealing the fascinating role media has played throughout the course of history. In "an engaging mix of theory, fact and enlightenment from across the millennia that wears its rich scholarship lightly," *Masters of the Word* explains how new communication technologies and in particular our access to them, impacted human society (*The Guardian*). Writing was born thousands of years ago in Mesopotamia. Spreading to Sumer, and then Egypt, this revolutionary tool allowed rulers to extend their control far and wide, giving rise to the world's first empires. When Phoenician traders took their alphabet to Greece, literacy's first boom led to the birth of drama and democracy. In Rome, it helped spell the downfall of the Republic. Later, medieval scriptoria and vernacular bibles gave rise to religious dissent, and with the combination of cheaper paper and Gutenberg's printing press, the fuse of Reformation was lit. The Industrial Revolution brought the telegraph and the steam driven printing press, allowing information to move faster than ever before and to reach an even larger audience. But along with radio and television, these new technologies were more easily exploited by the powerful, as seen in Germany, the Soviet Union, even Rwanda, where radio incited genocide. With the rise of carbon duplicates (Russian samizdat), photocopying (the Pentagon Papers), the internet, social media and cell phones (the recent Arab Spring) more people have access to communications, making the world more connected than ever before. This "accessible, quite enjoyable, and highly informative read" will change the way you look at technology, history, and power (Booklist). "[Bernstein] enables us to see what remains the same, even as much has changed." —Library Journal, "Editors' Picks" "Riveting and thoroughly researched, it brims with interesting ideas and astonishing connections." —Phil Lapsley, author of *Exploding the Phone: The Untold Story of the Teenagers and Outlaws Who*

*Hacked Ma Bell* "[Bernstein's] narrative is succinct and extremely well sourced. . . . [He] reminds us of a number of technologies whose changed roles are less widely chronicled in conventional histories of the media." —*Irish Times*

Bananas - Peter Chapman 2014-03-04  
In this compelling history of the United Fruit Company, *Financial Times* writer Peter Chapman weaves a dramatic tale of big business, deceit, and violence, exploring the origins of arguably one of the most controversial global corporations ever, and the ways in which their pioneering example set the precedent for the institutionalized greed of today's multinational companies. The story has its source in United Fruit's nineteenth-century beginnings in the jungles of Costa Rica. What follows is a damning examination of the company's policies: from the marketing of the banana as the first fast food, to the company's involvement in an invasion of Honduras, a massacre in Colombia, and a bloody coup in Guatemala. Along the way the company fostered covert links with U.S. power brokers such as Richard Nixon and CIA operative Howard Hunt, manipulated the press in new, and stoked the revolutionary ire of Che Guevara and Fidel Castro. From the exploited banana republics of Central America to the concrete jungle of New York City, Peter Chapman's *Bananas* is a lively and insightful cultural history of the coveted yellow fruit, as well as a gripping narrative about the infamous rise and fall of the United Fruit Company.

**Pop!** - Daniel Gross 2007-05-08  
Argues that investment bubbles and their related business infrastructures have actually served to fuel the world's economic growth and globalization, in a historical account of American bubbles and collapses that contributed to prosperous longer-term innovations. 35,000 first printing.

**The Land of Flickering Lights** - Michael Bennet 2019-06-04  
The Colorado Senator offers "a sweeping diagnosis of the nation's political ills . . . stitched together with assurances that room for redemption still exists" (*New York Times Book Review*). In *The Land of Flickering Lights*, Senator Michael Bennet lifts a veil on the inner

workings of Congressional politics to reveal, in his words, “a series of actual stories—about the people, the politics, the motives, the money, the hypocrisy . . .” each of which demonstrates “the pathological culture of the capital and the consequences for us all.” Bennet unfolds the dramatic backstories behind the highly politicized confirmation battles over judicial nominations at all levels; the passage of the Trump tax law; the shredding of the Iran nuclear deal; the pervasive corruption unleashed by the influence of “dark money”; and the sabotage by a congressional minority of the “Gang of Eight’s” bi-partisan deal to reform America’s immigration policies. With frankness and refreshing candor, Bennet pulls the machinations behind these episodes into full public view, shedding vital new light on today’s political dysfunction. Arguing that each of us has a duty to act as a founder, he calls on Americans of all political persuasions to demand that the “winners” of our political battles be all the American people, nor one party or the other.

**Monsoon Mansion** - Cinelle Barnes 2018-10-30  
Told with a lyrical, almost-dreamlike voice as intoxicating as the moonflowers and orchids that inhabit this world, *Monsoon Mansion* is a harrowing yet triumphant coming-of-age memoir exploring the dark, troubled waters of a family's rise and fall from grace in the Philippines. It would take a young warrior to survive it. Cinelle Barnes was barely three years old when her family moved into Mansion Royale, a stately ten-bedroom home in the Philippines. Filled with her mother's opulent social aspirations and the gloriously excessive evidence of her father's self-made success, it was a girl's storybook playland. But when a monsoon hits, her father leaves, and her mother's terrible lover takes the reins, Cinelle's fantastical childhood turns toward tyranny she could never have imagined. Formerly a home worthy of magazines and lavish parties, Mansion Royale becomes a dangerous shell of the splendid palace it had once been. In this remarkable ode to survival, Cinelle creates something magical out of her truth--underscored by her complicated relationship with her mother. Through a tangle of tragedy and betrayal emerges a revelatory journey of perseverance and strength, of grit and beauty, and of coming to terms with the price of family--and what it

takes to grow up.

*Breakout Nations: In Pursuit of the Next Economic Miracles* - Ruchir Sharma 2012-04-09  
International Bestseller One of Foreign Policy's "21 Books to Read in 2012" A Publishers Weekly Top 10 Business Book “The best book on global economic trends I’ve read in a while.”—Fareed Zakaria, CNN GPS To identify the economic stars of the future we should abandon the habit of extrapolating from the recent past and lumping wildly diverse countries together. We need to remember that sustained economic success is a rare phenomenon. After years of rapid growth, the most celebrated emerging markets—Brazil, Russia, India, and China—are about to slow down. Which countries will rise to challenge them? In his best-selling book, writer and investor Ruchir Sharma identifies which countries are most likely to leap ahead and why, drawing insights from time spent on the ground and detailed demographic, political, and economic analysis. With a new chapter on America’s future economic prospects, *Breakout Nations* offers a captivating picture of the shifting balance of global economic power among emerging nations and the West.  
*Crabgrass Frontier* - Kenneth T. Jackson 1987-04-16

This first full-scale history of the development of the American suburb examines how "the good life" in America came to be equated with the a home of one's own surrounded by a grassy yard and located far from the urban workplace. Integrating social history with economic and architectural analysis, and taking into account such factors as the availability of cheap land, inexpensive building methods, and rapid transportation, Kenneth Jackson chronicles the phenomenal growth of the American suburb from the middle of the 19th century to the present day. He treats communities in every section of the U.S. and compares American residential patterns with those of Japan and Europe. In conclusion, Jackson offers a controversial prediction: that the future of residential deconcentration will be very different from its past in both the U.S. and Europe.  
[The China Dream](#) - Joe Studwell 2007-12-01  
“An entertaining, if cautionary, tale of Western business woes in China, stretching back seven hundred years” (The Wall Street Journal). In The

China Dream, acclaimed business journalist Joe Studwell challenges the predictions that China will become an economic juggernaut on the world stage in the twenty-first century—and instead foresees an economic crisis. Tracing the most recent developments in China from Deng Xiaoping’s “liberalization” of its market in the 1980s through the opening of its economy to foreign investment in the 1990s, Studwell examines the roadblocks to the continuation of the country’s unprecedented expansion and why its economy will fail once more—but this time, harder than ever before, and with potentially catastrophic results. Provocative and flawlessly researched, *The China Dream* analyzes what’s really going on in China—and what we can do to prepare for the coming crisis. “The much-needed antidote to the delusions . . . about the riches to be made from investing and selling in China. Brimming with . . . statistics.” —The Washington Post “[A] detailed account . . . An excellent examination of the political and economic history of China, fascinating and mostly unknown to Westerners.” —Booklist (starred review) “Lays bare much of the stuff and nonsense that surrounds the China dream, and traces how myth and misunderstandings—compounded by hype and lashings of snake oil—have bewitched some of the world’s most respected corporations and led them to ruin the proverbial \$1.3 billion consumer market . . . As such, it deserves to help redefine the debate on the nature of the China market.” —James Kynge, China bureau chief of the Financial Times

*Invasion Rabaul* - Bruce Gamble 2014-03-15

The riveting first book in Bruce Gamble’s critically acclaimed Rabaul trilogy, originally published in hardcover as *Darkest Hour*, which chronicles the longest battle of World War II. January 23, 1942, New Britain. It was 2:30 a.m., the darkest hour of the day and, for the tiny Australian garrison sent to defend this Southwest Pacific island, soon to be the darkest hour of the war. Lark Force, comprising 1,500 soldiers and six nurses, faced a vastly superior Japanese amphibious unit poised to overrun Rabaul, capital of Australia’s mandated territories. *Invasion Rabaul*, the first book in military historian Bruce Gamble’s critically acclaimed Rabaul trilogy, is a gut-wrenching account of courage and sacrifice, folly and

disaster, as seen through the eyes of the defenders who survived the Japanese assault. Gamble’s gripping narrative follows key individuals—soldiers and junior officers, an American citizen and an Army nurse among them—who were driven into the jungle, prey to the unforgiving environment and a cruel enemy that massacred its prisoners. The dramatic stories of the Lark Force survivors, told here in full for the first time, are among the most inspiring of the Pacific War—and they lay a triumphant foundation for one of today’s most highly praised military nonfiction trilogies.

*The Delusions Of Crowds* - William J. Bernstein

2021-02-23

From the award-winning author of *A Splendid Exchange*, a fascinating new history of financial and religious mass manias over the past five centuries “We are the apes who tell stories,” writes William Bernstein. “And no matter how misleading the narrative, if it is compelling enough it will nearly always trump the facts.” As Bernstein shows in his eloquent and persuasive new book, *The Delusions of Crowds*, throughout human history compelling stories have catalyzed the spread of contagious narratives through susceptible groups—with enormous, often disastrous, consequences. Inspired by Charles Mackay’s 19th-century classic *Memoirs of Extraordinary Popular Delusions and the Madness of Crowds*, Bernstein engages with mass delusion with the same curiosity and passion, but armed with the latest scientific research that explains the biological, evolutionary, and psychosocial roots of human irrationality. Bernstein tells the stories of dramatic religious and financial mania in western society over the last 500 years—from the Anabaptist Madness that afflicted the Low Countries in the 1530s to the dangerous End-Times beliefs that animate ISIS and pervade today’s polarized America; and from the South Sea Bubble to the Enron scandal and dot com

bubbles of recent years. Through Bernstein's supple prose, the participants are as colorful as their motivation, invariably "the desire to improve one's well-being in this life or the next." As revealing about human nature as they are historically significant, Bernstein's chronicles reveal the huge cost and alarming implications of mass mania: for example, belief in dispensationalist End-Times has over decades profoundly affected U.S. Middle East policy. Bernstein observes that if we can absorb the history and biology of mass delusion, we can recognize it more readily in our own time, and avoid its frequently dire impact.

*Standing on the Sun* - Christopher Meyer 2012  
"That global commerce is undergoing a tectonic shift is no secret. What you haven't yet heard, and are probably looking for, is a clear-eyed and cogent view of what the world will look like as

this transformation takes shape, including the specific opportunities that will emerge. This book scans the world landscape to provide a vision for the future, and delivers the so-what action items that businesses so desperately need. . This is not a book about the recent great recession or the best policy moves. It's about economic change drawn on a larger canvas, and how it is ushering in a whole new future for capitalism. . Standing on the Sun does not discuss marketing to the "bottom of the pyramid" or success models for doing business in the emerging economies. Instead, it identifies the innovations that will disrupt the patterns of business and governance around the world. It will reveal the nascent, market-leading management solutions that are the very beginning of the next wave. It will offer compelling stories and examples that describe the new measurement of value, the changing nature of scarcity, the value of sustainability, and the pricing of externalities that are all suddenly wide open to reinterpretation"--

**Liem Sioe Liong's Salim Group** - Richard Borsuk 2014-11-07  
After Suharto gained power in Indonesia in the mid-1960s, he stayed as the country's president for more than three decades, helped by the powerful military, hefty foreign aid and support from a coterie of cronies. A pivotal business backer for his New Order government was Liem Sioe Liong, a migrant from China, who arrived in Java in 1938. A combination of the Suharto connection, serendipity and personal charm propelled him to become the wealthiest tycoon in Southeast Asia. This is the story of how Liem built the Salim Group, a conglomerate that in its heyday controlled Indonesia's largest non-state bank, the country's dominant cement producer and flour mill, as well as the world's biggest maker of instant noodles. The book features exclusive input from Liem, who died in 2012, and his youngest son, Anthony Salim. It traces the founder's life and the group's symbiosis with Suharto, his generals and family. After the tumultuous 1997-98 Asian financial crisis sparked Suharto's fall and a backlash against the strongman's cronies, Anthony staved off the crushing of the debt-laden group. Told in a journalistic style, the story of the Salim Group

provides insights into Suharto's New Order. For business executives, students and anyone with an interest in Southeast Asia's largest economy, the volume makes a valuable contribution towards understanding the country's modern history.

**Institutions of the Asia-Pacific** - Mark Beeson 2008-08-18

The Asia-Pacific is arguably the most important, but also the most complex and contested, region on the planet. Containing three of the world's largest economies and some of its most important strategic relationships, the region's capacity of regional elites to promote continuing economic development whilst simultaneously maintaining peace and stability will be one of the defining challenges of the twenty-first century international order. Intuitively, we might expect regional institutions to play a major role in achieving this. Yet one of the most widely noted characteristics of the Asia-Pacific region has been its relatively modest levels of institutional development thus far. However, things are changing: as individual economies in the Asia-Pacific become more deeply integrated, there is a growing interest in developing and adding to the institutions that already exist. *Institutions of the Asia-Pacific* examines how this region is developing, and what role established organisations like APEC and new bodies like ASEAN Plus Three are playing in this process. An expert in the field, Mark Beeson introduces the contested nature of the very region itself – should it be the 'Asia-Pacific' or 'East Asia' to which we pay most attention and expect to see most institutional development. By placing these developments in historical context, he reveals why the very definition of the region remains unsettled and why the political, economic and strategic relations of this remarkably diverse region remain fraught and difficult to manage.

**A Demon of Our Own Design** - Richard Bookstaber 2008-12-10

Inside markets, innovation, and risk Why do markets keep crashing and why are financial crises greater than ever before? As the risk manager to some of the leading firms on Wall Street—from Morgan Stanley to Salomon and Citigroup—and a member of some of the world's largest hedge funds, from Moore Capital to Ziff Brothers and FrontPoint Partners, Rick Bookstaber has seen the ghost inside the machine and vividly shows us a world that is even riskier than we think. The very things done to make markets safer, have, in fact, created a world that is far more dangerous. From the 1987 crash to Citigroup closing the Salomon Arb unit, from staggering losses at UBS to the demise of Long-Term Capital Management, Bookstaber gives readers a front row seat to the management decisions made by some of the most powerful financial figures in the world that led to catastrophe, and describes the impact of his own activities on markets and market crashes. Much of the innovation of the last 30 years has wreaked havoc on the markets and cost trillions of dollars. *A Demon of Our Own Design* tells the story of man's attempt to manage market risk and what it has wrought. In the process of showing what we have done, Bookstaber shines a light on what the future holds for a world where capital and power have moved from Wall Street institutions to elite and highly leveraged hedge funds.

**Asian Godfathers** - Joe Studwell 2010-09-03  
40 or 50 families control the economies of Hong Kong, Singapore, Thailand, the Philippines and Indonesia. Their interests range from banking to property, from shipping to sugar, from vice to gambling. 13 of the 50 richest families in the world are in South East Asia yet they are largely unknown outside confined business circles. Often this is because they control the press and television as well as everything else. How do they do it? What are their secrets? And is it good news or bad for the places where they operate? Joe Studwell explosively lifts the lid on a world of staggering secrecy and shows that the little most people know is almost entirely wrong.
