Troublemaker: A Barnaby and Hooker Graphic Novel - Alex Evanovich 2007-07-17

Barney and Hooker are together again and fighting crime, leaving a trail of chaos, panic, and disorder in their wake. Some would say they're drawn toward trouble like a moth to a flame. Others would claim their friends, Rosa and Felicia, dump trouble in Barney's and Hooker's laps. Either way, they are in over their heads when Rosa is kidnapped, and her disappearance is linked to a dangerous voodoo priest and his search for a mystery-drenched stolen statue. Written by Janet and Alex Evanovich, and illustrated by Joëlle Jones (Dr. Horrible, Token), *Troublemaker* brings ultimate adventure set in sun-filled Miami! • Janet Evanovich, the New York Times number-one best-selling author, brings her hit Barnaby series to Dark Horse Comics! • The entire *Troublemaker* story collected into one affordable volume! • "With art reminiscent of the Florida sun and writing supercharged with action, the *Troublemaker* graphic novel from best-selling author Evanovich and her daughter is a winner!"—RT Book Reviews

Brodmann's - K. Brodmann 2007-02-16

This is the third edition of the translation, by Laurence Garey, of "Vergleichende Lokalisationslehre der Grosshirnrinde" by Korbinian Brodmann, originally published by Barth-Verlag in Leipzig in 1909. It is one of the major "classics" of the neurological world. Even today it forms the basis for so-called "localisation" of function in the cerebral cortex. Brodmann's "areas" are still used to designate functional regions in the cortex, the part of the brain that brings the world that surrounds us into consciousness, and which governs our responses to the world. For example, we use "area 4" for the "motor" cortex, with which we control our muscles, "area 17" for "visual" cortex, with which we see, and so on. This nomenclature is used by neurologists and neurosurgeons in the human context, as well as by experimentalists in various animals. Indeed, Brodmann's famous "maps" of the cerebral cortex of humans, monkeys and other mammals must be among the most commonly reproduced figures in neurobiological publishing. The most famous of all is that of the human brain. There can be few textbooks of neurology, neurophysiology or neuroanatomy in which Brodmann is not cited, and his concepts pervade most research publications on systematic neurobiology. In spite of this, few people have ever seen a copy of the 1909 monograph, and even fewer have actually read it! There had never been a complete English translation available until the first edition of the present translation of 1994, and the original book had been almost unavailable for 50 years or more, the few antiquarian copies still around commanding high prices. As Laurence Garey, too, used Brodmann's findings and maps in his neurobiological work, and had the good fortune to have access to a copy of the book, he decided to read the complete text and soon discovered that this was much more than just a report of laboratory findings of a turn-of-the-twentieth-century neurologist. It was an account of neurobiological thinking at that time, covering aspects of comparative neuroanatomy, neurophysiology and neuropathology, as well as giving a fascinating insight into the complex relationships between European neurologists during the momentous times when the neuron theory was still new.

The Oxford Handbook of Heracles - Daniel Ogden 2021-07-13

Heracles is the quintessential ancient Greek hero. The rich and massive tradition associated with him encompasses myths of all kinds: quest myths, monster-fights, world-foundational myths, aetiological myths, philosophical myths, allegorical myths, and more. It informs and is informed by every genre and variety of Classical literature. The figure of Heracles opens windows onto numerous aspects of ancient religion, including those of cult, syncretism, Christian reception, the relationship between gods and heroes, and the intersection of religion with politics. The *Oxford Handbook of Heracles* is the first large-scale guide to Heracles, his myth-cycle the Twelve Labors, and, to the pervasive impact of the hero upon Greek and Roman culture. The first half of the volume is devoted to the lucid exposition and analysis of the ancient evidence, literary and iconographic, for Heracles' life and deeds. In the second half, the Heracles tradition is analyzed from a range of thematic perspectives, including the contrasting projections of the figure across the major literary genres and in art; the ways in which Greek communities and even Roman emperors exploited the figure in the fashioning of their own identities and for political advantage; his cult in Greece and Rome and its syncretism with that of the Phoenician Melqart; and Heracles' reception in later Western tradition. Presenting, in 39 chapters, the authoritative work of international experts in a clear and well-structured format, this volume provides a convenient reference tool for scholars and offers an accessible

starting-point for students.

Genuine Use of Trademarks - Eléonore Gaspar 2021-08-18

This book addresses the issue of trademark use that may be required for the protection and/or maintenance of trademark rights. Since the first edition of this book in 2018, there have been significant modifications in some countries, particularly, following the implementation of EU Directive 2015/2436 in the EU countries. Laws around the world do not attach the same consequence to the lack of use of a trademark, and courts do not always assess in the same way whether a trademark is genuinely used. This is a fundamental issue for trademark owners since, depending on the jurisdiction, lack of genuine use can lead to the refusal of trademark registration, the revocation of trademark rights, or prevent the owner of a non-used trademark from initiating an action based on its trademark. This detailed analysis provides clarity, insight, and guidance on the legal issues and practical implications of genuine use of trademarks in twenty-six jurisdictions worldwide. This book was developed within the framework of the International Association for the Protection of Intellectual Property (AIPPI), a non-affiliated, non-profit organization dedicated to improving and promoting the protection of intellectual property at both national and international levels. This topic was the subject of an AIPPI study, and its subsequent Resolution - The Requirements of Genuine Use of Trademarks for Maintaining Protection (2011, Hyderabad) - which aims to harmonize this issue of genuine use of trademarks. The authors of the chapters for each jurisdiction were carefully selected based on their extensive experience and in-depth knowledge of trademark protection in their respective jurisdictions. Each chapter considers issues and topics such as the following: types of use that qualify as genuine use of a trademark, including requirements as to whether uses are consistent with the function of the trademark or made in the course of trade; requirements as to the volume, duration, and frequency of use; impact of the trademark's designation of goods and services; issues relating to the sign used, particularly, if it is used in a different form from the registered trademark (this includes consideration of alteration of the distinctive character, or the potential impact of a plurality of registered trademarks for different signs, or the question of use in black and white or in colour); proof to be provided to evidence genuine use as a trademark, including issues of timing and territory; situations in which the issue of genuine use can be of importance; valid reasons for non-use; consequences of lack of use depending on the context, including possible revocation of trademark rights; and case law examples. As a comparative law study and a collection of contributions from around the world on a key issue of trademark law, this book is of tremendous practical interest. Trademark owners, parties involved in or contemplating enforcement proceedings, and interested legal practitioners will benefit greatly from its thorough comparative analysis and guidance. It is also exceptionally valuable as a comprehensive resource for academics and researchers interested in the international harmonization of trademark law.

Interrogating the 'Germanic' - Matthias Friedrich 2020-11-23

Any reader of scholarship on the ancient and early medieval world will be familiar with the term 'Germanic', which is frequently used as a linguistic category, ethnonym, or descriptive identifier for a range of forms of cultural and literary material. But is the term meaningful, useful, or legitimate? The term, frequently applied to peoples, languages, and material culture found in non-Roman north-western and central Europe in classical antiquity, and to these phenomena in the western Roman Empire's successor states, is often treated as a legitimate, all-encompassing name for the culture of these regions. Its usage is sometimes intended to suggest a shared social identity or ethnic affinity among those who produce these phenomena. Yet, despite decades of critical commentary that have highlighted substantial problems, its dominance of scholarship appears not to have been challenged. This edited volume, which offers contributions ranging from literary and linguistic studies to archaeology, and which span from the first to the sixteenth centuries AD, examines why the term remains so pervasive despite its problems, offering a range of alternative interpretative perspectives on the late and post-Roman worlds.

The biology of *Latimeria chalumnae* and evolution of coelacanths - J.A. Musick 2012-12-06

Thirteen - Steve Cavanagh 2019-08-13

Thirteen is the legal thriller Lee Child, Michael Connelly, and Ruth Ware are raving about and readers can't put down. "Outstanding - an intriguing premise, a tense, gripping build-up, and a spectacular climax. This guy is the real deal. Trust me." —Lee Child "A dead bang BEAST of a book that expertly combines Cavanagh's authority on the law with an absolutely great thrill ride. Books this ingenious don't come along very often." —Michael Connelly It's the murder trial of the century. And Joshua Kane has killed to get the best seat in the house - and to be sure the wrong man goes down for the crime. Because this time, the killer isn't on trial. He's on the jury. But there's someone on his tail. Former-conman-turned-criminal-defense-attorney Eddie Flynn doesn't believe that his movie-star client killed two people. He suspects that the real killer is closer than they think - but who would guess just how close? "A brilliant, twisty, ingeniously constructed puzzle of a book. Steve Cavanagh pulls off an enviable premise with panache." —Ruth Ware *Mammalian Carbohydrate Recognition Systems* - Paul R. Crocker 2012-12-06

In the last decade there has been a great expansion in our knowledge of the existence, nature and functions of mammalian carbohydrate binding proteins. This book covers the structures and postulated functions for the major classes of mammalian carbohydrate binding proteins. These include intracellular lectins involved in diverse functions such as protein synthesis quality control, targeting of lysosomal enzymes and in the secretory pathway. In addition, several chapters are devoted to other major families of lectins that are found at the cell surface or in extracellular fluids which are involved in various recognition functions such as cell-cell interactions in inflammation and recognition of pathogen carbohydrates in host defence.

A Reader in Themed and Immersive Spaces - Scott A. Lukas 2016

"Themed spaces have, at their foundation, an overarching narrative, symbolic complex, or story that drives the overall context of their spaces. Theming, in some very unique ways, has expanded beyond previous stereotypes and oversimplifications of culture and place to now consider new and often controversial topics, themes, and storylines."--Publisher's website.

International Trademark Licensing - Stojan Arnerstål 2021-08-11

Increasingly, firms use licensing to exploit and commercialize trademarks internationally. In a globalized market, the free flow of goods and services by means of licensing requires detailed knowledge of national legal provisions and principles that apply to agreements of this type. This chapter-by-chapter comparative overview on the law and application of trademark licensing worldwide - including chapters on such key commercial jurisdictions as the EU Member States, the United Kingdom, the United States, Brazil, and Japan - is written by a team of experienced and distinguished attorneys, each representing a particular country. Each contributor describes and analyses legal challenges and offers practical guidance on licensing issues in his or her national jurisdiction. Within this framework, each chapter discusses such issues and topics as the following: country-specific regulations on trademark licensing; particular legal requirements to be complied with prior to entering into a license agreement; antitrust legislation affecting the scope of a license agreement; breach of a trademark licensing agreement; circumstances under which a breach of contract also constitutes a trademark infringement; permitted extent of non-compete or non-challenge clauses; licensee's standing to sue third parties for trademark infringement; effect of invalidation or expiry of the licensed trademark on the agreement; and licensee's right to claim entitlement to goodwill in the trademark, or a right to compensation, for investments made in the trademark. Because of the broad

range and variety of countries covered, the book will be welcomed by legal practitioners dealing or coming into contact with trademark licensing in practically any jurisdiction. Taken together, the chapters provide invaluable insights into the similarities and differences among the covered jurisdictions, helping trademark holders and their counsel to understand the particulars of a specific market and deciding whether to enter it or not. It will also be valuable as a comprehensive resource for academic researchers or policymakers interested in the international harmonization of intellectual property licensing law.

Masters of the Ninth Art - Matthew Screech 2005-01-01

In English-speaking countries, Francophone comic strips like Hergés's Les Aventures de Tin Tin and Goscinny and Uderzo's Les Aventures d'Asterix are viewed—and marketed—as children's literature. But in Belgium and France, their respective countries of origin, such strips—known as bandes dessinées—are considered a genuine art form, or, more specifically, "the ninth art." But what accounts for the drastic difference in the way such comics are received? In *Masters of the Ninth Art*, Matthew Screech explores that difference in the reception and reputation of bandes dessinées. Along with in-depth looks at Tin Tin and Asterix, Screech considers other major comics artists such as Jacque Tardi, Jean Giraud, and Moebius, assessing in the process their role in Francophone literary and artistic culture. Illustrated with images from the artists discussed, *Masters of the Ninth Art* will appeal to students of European popular culture, literature, and graphic art.

Made by Dad - Scott Bedford 2013-05-07

The Snail Soup Can Decoy to keep the candy stash safe. The Customizable “Keep Out” Sign to deter meddlesome siblings and parents. A Bunk Bed Communicator made from cardboard tubes (“Psst! Can you keep the snoring down?”). Clever, whimsical, and kind of genius, here are 67 unique projects that will turn any dad with DIY leanings into a mad scientist hero that his kid(s) will adore. No screens, no hi-tech gadgetry. Made by Dad combines the rough-edged, handmade ethos of a Boy Scout manual or The Dangerous Book for Boys with a sly sense of humor that kids love. Scott Bedford, a creative director by day and Webby Award-winning blogger by nights and weekends, wields an X-ACTO knife, magic marker, and prodigious imagination to create endlessly delightful projects for his two sons. He knows that kids like contraptions and gadgets, things that are surprising—a chair that appears to be balanced on eggshells. Things that are complex—a multilevel city, with buildings, tunnels, and roads, built from old boxes around the legs of a table. And especially things with humor—the Snappy Toast Rack, made to resemble a crocodile’s gaping mouth. The projects are shown in full-color photographs, and the instructions are illustrated in detailed line drawings that exude personality. Some are quick and simple enough to be done in a coffee shop; others are more of an afternoon project—yielding hours and hours of rich, imaginative playtime.

Crossing Languages to Play with Words - Sebastian Knospe 2016-09-26

Wordplay involving several linguistic codes is an important modality of ludic language. This volume offers a multidisciplinary approach to the topic, discussing examples from different epochs, genres, and communicative situations. The contributions illustrate the multi-dimensionality, linguistic make-up, and the special interactive potential of wordplay across linguistic and cultural boundaries, including the challenging practice of translation.

Gier, Korruption und Machtmissbrauch in der Antike - Christian Bachhiesl 2019-04

Die Begriffe Gier, Korruption und Machtmissbrauch umschreiben ein weites, heterogenes Themenfeld. Eines aber ist den untersuchten Phänomenen gemeinsam, nämlich eine Überschreitung von zumindest moralischen Grenzen. In diesem Band werden sie im Hinblick auf verschiedene historische Spezifika und Bedingungen ebenso untersucht wie auf zugrundeliegende anthropologische Konstanten. Dabei werden vielerlei Lebensbereiche ins Auge gefasst, etwa Gesellschaft, Politik, Recht, Wirtschaft, Kunst oder Religion. Der behandelte Zeitraum reicht von der griechischen Klassik bis zur Spätantike, auch die Wirkungs- und Rezeptionsgeschichte findet Beachtung.
