Participatory Heritage - Henriette Roued-Cunliffe 2017-01-18

The internet as a platform for facilitating human organization without the need for organizations has, through social media, created new challenges for cultural heritage institutions. Challenges include but are not limited to: how to manage copyright, ownership, orphan works, open data access to heritage representations and artefacts, crowdsourcing, cultural heritage amateurs, information as a commodity or information as public domain, sustainable preservation, attitudes towards openness and much more. Participatory Heritage uses a selection of international case studies to explore these issues and demonstrates that in order for personal and community-based documentation and artefacts to be preserved and included in social and collective histories, individuals and community groups need the technical and knowledge infrastructures of support that formal cultural institutions can provide. In other words, both groups need each other. Divided into three core sections, this book explores: - Participants in the preservation of cultural heritage; exploring heritage institutions and organizations, community archives and group - Challenges; including discussion of giving voices to communities, social inequality, digital archives, data and online sharing - Solutions; discussing open access and APIs, digital postcards, the case for collaboration, digital storytelling and co-designing heritage practice. Readership: This book will be useful reading for individuals working in cultural institutions such as libraries, museums, archives and historical societies. It will also be of interest to students taking library, archive and cultural heritage courses.

Turning the Page - Fiona M. Collins 2006

Since the nineteenth century, children's literature has been adapted for both the stage and the screen. As the twentieth century progressed, children's books provided the material for an increasing range of new media, from radio to computer games, from television to cinema blockbuster. Although such adaptations are now recognised as a significant part of the culture of childhood and popular culture in general, little has been written about the range of products and experiences that they generate. This book brings together writers whose work offers contrasting perspectives on the process of adaptation and the varying transformations - social, historical and ideological - that take place when a text moves from the page to another medium. Linking all these contributions is an interest in the changing definition of children's literature and its target audience within an increasingly media-rich society.
