Semitic and Assyriological Studies - Pelio Fronzaroli 2003

This substantial volume comprises almost fifty Semitic and Assyriological studies dedicated to Pelio Fronzaroli, professor of Semitic philology at the University of Florence, written by colleagues and pupils.

*Dictionary of European Proverbs* - Emanuel Strauss 2012-11-12

This Dictionary contains over 50,000 proverbs, in some 70 European languages and dialects, arranged in 2,500 sets. It is the fruits of over 40 years of collection and research, the only collection of proverbs on anything like this scale ever to be published anywhere in the world. Emanuel Strauss has trawled through innumerable collections of proverbs in all languages, from early printed books and rare items to the

latest theses and journals, and grouped together many thousands of proverbs in sets of equivalent meaning.

Comprehensive indexes for each language provide access to any proverb by way of its key words. A critical bibliography musters some 500 items, from incunabula to the current decade.

Spazi Riflessivi in Passeggeri Notturni - Daniela Bisello

Antonucci 2019-10-31

Spazi Riflessivi in Passeggeri Notturni è un testo innovativo e versatile per l'insegnamento dell'italiano tramite riflessioni ed elaborazioni su questioni sociali emerse dalla lettura di *Passeggeri notturni*, racconti brevi di Gianrico Carofiglio. Il testo, indicato per un livello intermedio-avanzato, propone una vasta gamma di esercizi grammaticali contestualizzati e attività interdisciplinari che

**Ecco!** - Giuseppe Iavicoli 2014-01-07

Written in easy, conversational English, ECCO! reviews and explains all major points of Italian grammar, with special attention to those areas that

appear more foreign to English speakers. Emphasis is also placed on vocabulary enrichment. The book presents about 6,000 Italian words, grouped thematically by structural or grammatical characteristics, many of them illustrated by examples. It also includes about 1,000 Italian idioms (particular turns of phrase peculiar to the language) and lists all irregular forms of verbs and nouns. Students wanting to move beyond an elementary acquaintance with Italian will find the book useful as a self-teaching tool, an adjunct to other textbooks or as a reference source

articles reflects hot, ongoing debates in molecular research, such as the monophyletic versus paraphyletic nature of the sponge group, or the new awareness on pros and cons of standard barcodes and other markers in sponge taxonomy and phylogeny. It also features articles showing how the new sequencing technologies reveal the functional and phylogenetic complexity of the "microbial universe" associated to sponge tissues. The ecological interactions of sponges, the effects of nutrients and pollutants, the variability in reproductive patterns, and the processes generating genotypic and phenotypic variability in sponge populations are covered in several contributions. Zoogeography, population structure and dynamics are also approached with both traditional and molecular tools. The effect of anthropogenic disturbance on the natural environment finds its place in this volume with papers dealing with metal accumulation and the potential role of sponges as biomonitors.

Biodiversity data from unexplored tropical and deep sea areas are presented. We hope readers will enjoy the selection of papers, which we believe represent collectively a significant contribution to our current understanding of sponges. Previously published in *Hydrobiologia*, vol. 687, 2012

The story-teller; or, Table-book of popular literature. Ed. by R. Bell - Story-teller 1843

Information Structure in Spoken Arabic - Jonathan Owens 2013-03

This book explores speakers' intentions, and the structural and pragmatic resources they employ, in spoken Arabic - which is different in many essential respects from literary Arabic. Based on new empirical findings from across the Arabic world this book elucidates the many ways in which context and the goals and intentions of the speaker inform and constrain linguistic structure in spoken Arabic. This is the first book to provide an in-depth analysis of information structure in spoken Arabic, which is based on language as it is actually used, not on normatively-given grammar. Written by leading experts in Arabic linguistics, the studies evaluate the ways in which relevant parts of a message in spoken Arabic are encoded, highlighted or obscured. It covers a broad range of issues

from across the Arabic-speaking world, including the discourse-sensitive properties of word order variation, the use of intonation for information focussing, the differential role of native Arabic and second languages to encode information in a codeswitching context, and the need for cultural contextualization to understand the role of "disinformation" structure. The studies combine a strong empirical basis with methodological and theoretical issues drawn from a number of different perspectives including pragmatic theory, language contact, instrumental prosodic analysis and (de-)grammaticalization theory. The introductory chapter embeds the project within the deeper Arabic grammatical tradition, as elaborated by the eleventh century grammarian Abdul Qahir al-Jurjani. This book provides an invaluable comprehensive introduction to an important, yet understudied, component of spoken Arabic.

**Dictionary of Marine Natural Products, with CD-ROM** - John Blunt 2008  
Focusing for the first time on more than 25,000 marine-specific natural products, *Dictionary of Marine Natural Products with CD-ROM* indexes each product by chemical name, organism type, and compound type. Following a similar format to the Chapman & Hall Chemical Database, this comprehensive volume is mirrored on an accompanying

CD-ROM that is fully text and structure-searchable. Each entry includes biological source, chemical structure, physical properties, biological activity, and literature references. This new tool offers immediate access to information essential to the development of novel pharmaceuticals, pesticides, and marine anti-fouling agents derived from unique molecular structures of marine natural products.
