1,000+ Practice Questions with Rationales for Psychiatric Technician Licensure Examination - Solomon Barroa 2017-07-05

The path to becoming a Psychiatric Technician is not easy. It requires completion of courses, clinical exposure, and passing the licensure examination. The completion of courses must be from an approved or accredited Psychiatric Technician program. Courses include 396 hours of education in nursing science, 54 hours in pharmacology, 378 in mental disorders, 378 in developmental disabilities, and 324 hours for other courses such as anatomy, physiology, nutrition, leadership, and management. The above requirements encompass classroom theory and supervised clinical exposure. This book contains 1,096 practice questions with rationales broadly and explicitly covering nursing science, gerontological nursing, basic anatomy and physiology, pharmacology, basic nutrition and dietetics, medical terminologies,

mental health including theories of personality, defense mechanisms, psychosocial tasks, developmental disabilities, anxiety disorders, affective disorders, organic brain syndromes, mood disorders, personality disorders, eating disorders, substance abuse disorders, schizophrenia, sexual issues, psychopharmacology, psychotherapy, therapeutic techniques of communication, and other important topics. It is not intended to reflect the exact questions of the Board examination. The author's intention is to provide effective review material for the reader. Various levels of difficulty are reflected in this book. There are easy and difficult questions. Sample Questions: 1. Self-control is a goal for a male pediatric client with autism. The client frequently scratches his neck causing bleeding and infection. Which of the following is appropriate for this type of client? (a. the client is encouraged to look for a staff before rubbing his neck b. the client will wear padded mittens c.

restraints will be used when the client scratches d. the client will be reprimanded when he scratches) 2. Feeding tubes sometimes get clogged. Which of the following causes the clogging? (a. thin watery formula b. warm temperature c. powdered medication d. none of the above) 3. The Psychiatric Technician charted that a 78-year-old client on her shift was doing lip smacking and picking at clothes before briefly losing consciousness. The client also became amnesic about what had happened after consciousness was regained. The Psychiatric Technician knows that they are characteristics of which type of seizure? (a. complex partial seizure b. simple partial seizure c. atonic seizure d. akinetic seizure) 4. A client with severe mental disorder had undergone ECT (electroconvulsive therapy). The Psychiatric Technician is monitoring for adverse reactions from the procedure. Which of the following may occur? (Select all that apply) (a. intestinal obstruction b. Klinefelter's syndrome c.

hypotension d. arrhythmia e. confusion f. paresthesia) 5. Absorption of food is accomplished by the digestive system. Which of the following parts of this system is responsible for mechanical digestion? (a. gallbladder b. intestine c. mouth d. pancreas) 6. A male client with severe depression lost weight, speaks little, spends time immobile, and pays little attention to appearance. A day later, the client came to lunch with combed hair and dressed properly. Which of the following is the best response from the Psychiatric Technician? (a. "You must be feeling better. You look much better than yesterday" b. "This is the very first time I've seen you look good" c. "What happened to you? Your hair is suddenly combed" d. "I see that your hair is combed and dressed well") 7. Benzodiazepine was administered to a client with anxiety disorder. Therapeutic effects are being monitored. Which of the following actions may be exerted by this class of drug? (Select all that apply) (a. anticonvulsant b. temporary paralysis

c. skeletal muscle relaxation d. daytime sedation

Windows 7 Desktop Support and Administration - Darril Gibson 2010-07-02

A manual for Windows 7 desktop technicians and administrators It is estimated that 90 percent of the world's computers run Windows. Desktop

technicians and administrators need this comprehensive manual to guide them through their daily work with Windows 7. While this Sybex guide is packed with information you'll need to know for the MCITP certification exam, it is equally valuable in real-world situations you will encounter on the job. Covers troubleshooting, hardware and software applications, large-scale desktop environment management, and planning and configuring the desktop infrastructure using Windows 7 Provides plenty of relevant information for those seeking MCITP certification, including full coverage of the exam objectives for both Desktop Support Technician and Desktop Administrator exams Includes a CD with valuable study tools for the MCITP exams including video walkthroughs, flashcards, and two practice exams. Windows 7 Desktop Support and Administration provides knowledge that will be needed on certification exams and remains a valuable reference for support and

administrative personnel on the job. Note: CD-ROM/DVD and other supplementary materials are not included as part of eBook file. [Strengthening Forensic Science in the United States](#) - National Research Council 2009-07-29 Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. Strengthening Forensic Science in the United States: A Path Forward provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science

community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. *Strengthening Forensic Science in the United States* gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.
