Proceedings of the Conference on the Decline in Coronary Heart Disease Mortality - 1979

Abstract: Data on the decrease in coronary heart disease in the US are presented in a collection of papers. Change, and trends in the US are compared to international trends (based on mortality and hospital data). Possible causes for the decline, including pathophysiological bases, coronary care, and artery bypass grafts are covered. Finally, changes in risk factors are described: trends in smoking and hypertension; food consumption patterns; changes in blood cholesterol; relation of physical activity, and environmental and social variables. A summary strategy for quantifying and studying coronary heart disease change is included. (rkm).

Management of Acute Coronary Syndromes - Christopher P. Cannon 2002-11-04

In this second edition of his highly acclaimed book, Christopher P. Cannon, MD, and a team of preeminent clinical investigators have thoroughly revised and expanded every chapter to reflect the recent explosion of clinical trials on the management of acute coronary syndromes (ACS). This includes: the newer tests, such as C reactive protein; a multimarker approach to diagnosis and risk stratification; new antiplatelet agents; and combinations of thrombolytic-antithrombotic regimens. Also discussed are the latest developments in interventional cardiology, the use of cost-effectiveness in clinical trials to choose appropriate therapies, and the employment of critical pathways analysis to improve compliance with evidence-based medicine and guideline recommendations.
