Extreme Economies - Richard Davies 2020-01-14

A New Statesman best book of the year | New York Times Editors' Choice pick A Financial Times best economics book of 2019 An accessible, story-driven look at the future of the global economy, written by a leading expert To predict our future, we must look to the extremes. So argues the economist Richard Davies, who takes readers to the margins of the modern economy and beyond in his globe-trotting book. From a prison in rural Louisiana where inmates purchase drugs with prepaid cash cards to the poorest major city on earth, where residents buy clean water in plastic bags, from the world's first digital state to a prefecture in Japan whose population is the oldest in the world, how these extreme economies function—most often well outside any official oversight—offers a glimpse of the forces that underlie human resilience, drive societies to failure, and will come to shape our collective future. While the people who inhabit these places have long been dismissed or ignored, Extreme Economies revives a foundational idea from medical science to turn the logic of modern economics on its head, arguing that the outlier economies are the place to learn about our own future. Whether following Punjabi migrants through the lawless Panamanian jungle or visiting a day-care for the elderly modeled after a casino, Davies brings a storyteller's eye to places where the economy has been destroyed, distorted, and even turbocharged. In adapting to circumstances that would be unimaginable to most of us, the people he encounters along the way have helped to pioneer the economic infrastructure of the future. At once personal and keenly analytical, Extreme Economies is an epic travelogue for the age of global turbulence, shedding light on today's most pressing economic questions.

Migration, Education and Translation - Vivienne Anderson 2019-11-27

This multidisciplinary collection examines the connections between education, migration and translation across school and higher education sectors, and a broad range of socio-geographical contexts. Organised around the themes of knowledge, language, mobility, and practice, it brings together studies from around the world to offer a timely critique of existing practices that privilege some ways of knowing and communicating over others. With attention to issues of internationalisation, forced migration, minorities and indigenous education, this volume asks how the dominance of English in education might be challenged, how educational contexts that privilege bi- and multi-lingualism might be re-imagined, what we might learn from existing educational practices that privilege minority or indigenous languages, and how we might exercise 'linguistic hospitality' in a world marked by high levels of forced migration and educational mobility. As such, it will appeal to scholars across the social sciences with interests in education, migration and intercultural communication.

The Book of L - G. Rozenberg 2012-12-06

This book is dedicated to Aristid Lindenmayer on the occasion of his 60th birthday on November 17, 1985. Contributions range from mathematics and theoretical computer science to biology. Aristid Lindenmayer introduced language-theoretic models for developmental biology in 1968. Since then the models have been commonly referred to as L systems. Lindenmayer's invention turned out to be one of the most beautiful examples of interdisciplinary science: work in one area (developmental biology) induces most fruitful ideas in other areas (theory of formal languages and automata, and formal power series). As evident from the articles and references in this book, the interest in L systems is continuously growing. For newcomers the first contact with L systems usually happens via the most basic class of L systems, namely, DOL systems. Here "0" stands for zero context between developing cells. It has been a major typographical problem that printers are unable to distinguish between 0 (zero) and 0 (oh). Thus, DOL was almost always printed with "oh" rather than "zero", and also pronounced that way. However, this misunderstanding turned out to be very fortunate. The wrong spelling "DOL" of "DOL" could be read in the suggestive way: DO L Indeed, hundreds of researchers have followed this suggestion. Some of them appear as contributors to this book. Of the many who could not contribute, we in particular regret the absence of A. Ehrenfeucht, G. Herman and H.A. Maurer whose influence in the theory of L systems has been most significant.

Silence within and beyond Pedagogical Settings - Eva Alerby 2020-09-15

This book explores the significance of silence within and beyond pedagogical contexts. Silence is a complex and multidimensional phenomenon for everyday life: since schools mirror society, it is also significant in education. While silence can be experienced in a multitude of different ways, the author reflects on whether silence itself can bear a message: is there an aspect of dialogue in silence, or is it a language all of its own? This book examines a variety of silences essential for education, examining such topics as silence and aspects of power, silent students, and the relationship between listening and silence. Drawing on a range of empirical data, the author elucidates the significance of silence in pedagogical contexts.

Your Hate Mail Will Be Graded - John Scalzi 2010-01-05

On September 13, 1998, John Scalzi sat down in front of his computer to write the first entry in his blog Whatever—and changed the history of the Internet as we know it today. What, you're not swallowing that one? Okay, fine: He started writing Whatever and amused about 15 people that first day. If that many. But he kept at it, for ten years and running. Now 40,000 people drop by on a daily basis to see what he's got to say. About what? Well, about whatever: Politics, writing, family, war, popular culture and cats (especially with bacon on them). Sometimes he's funny. Sometimes he's serious (mostly he's sarcastic). Sometimes people agree with him. Sometimes they send him hate mail, which he grades on originality and sends back. Along the way, Scalzi's become a best-selling, award-winning author, a father, and a geek celebrity. But no matter what, there's always another Whatever post to amuse and/or enrage his readers. Your Hate Mail Will Be Graded collects some of the best and most popular Whatever entries from the first ten years of the blog – a decade of Whatever, presented in delightfully random form, just as it should be. * Winner of the 2009 Hugo Award for Best Non-Fiction Book * Introduction by Star Trek actor Wil Wheaton Old Man's War Series #1 Old Man's War #2 The Ghost Brigades #3 The Last Colony #4 Zoe's Tale #5 The Human Division #6 The End of All Things Short fiction: "After the Coup" Other Tor Books The Android's Dream Agent to the Stars Your Hate Mail Will Be Graded Fuzzy Nation Redshirts Lock In The Collapsing Empire (forthcoming) At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

American Chew - Matthew Lippman 2013

Poetry. "Matthew Lippman's poems know how to love as only a heart knows how to love. Swelling with rage, candor, humor, and empathy, his lyrics embrace vulnerability and grit that navigate the mire that the world lays before us each day. Their music makes singular reconciliations where anxiety and angst are lent a tough and tender grace."—Michael Morse "Reading a Matthew Lippman poem is like encountering an unstoppable force—or forces. One moment you're walking down Broadway next to an old friend who's talking a mile a minute—he's on a tear, he's manic but eminently likable, and his monologue is heating up to the point of combustion. Another moment you're listening to a voiceover spoken by a hardboiled and vaguely hypnagogic private eye. And yet another moment you're at the Tamarack Lodge in a Catskills of long ago listening to a crazed Borscht Belt comedian. And finally you're listening to a mystic intoning prophecies from deep in the reaches of a dream. I love poetry that takes me through such a range of voices, guises, poses, intensities, and diapasons, yet also manages to make me feel that I am in the presence of a truly human and truly real and singular personality. These poems were written by a man who takes much pleasure in moving through this mysterious world in language and in a body. He wants to share this pleasure with us—and that is generous, and as good a reason for writing poems as any I can think of."—Geoffrey Nutter "Matthew's poems wake us up with brutal honesty and humor. If you think poetry has

lost touch with everyday life, this book will restore your faith and welcome you back."—Rob MacDonald
