Practice Management for Design Professionals - John Philip Bachner 1991-09-03

In the mid-1960s geotechnical engineers paid the highest liability insurance of any profession and by 1969 were virtually uninsurable. As a result, the ASFE was founded and helped these engineers not only lower their insurance rates, but get to the point where, by 1980, they were the least liability-prone members of the design profession. Now, John Bachner and the ASFE tell all other design professionals how to accomplish the same task. This book, which incorporates the ASFE's Introduction to Professional Practice program for advancing architects' and engineers' knowledge of professional practice issues, addresses almost every aspect of the design professionals' practice as they relate to liability, from procedures for verifying the accuracy of technical output to steps for improving client and project selection, workscope development, personnel training and dispute resolution.

Software Engineering - Elvis Foster 2014-12-16

This text provides a comprehensive, but concise introduction to software engineering. It adopts a methodical approach to solving software engineering problems proven over several years of teaching, with outstanding results. The book covers concepts, principles, design, construction, implementation, and management issues of software systems. Each chapter is organized systematically into brief, reader-friendly sections, with itemization of the important points to be remembered. Diagrams and illustrations also sum up the salient points to enhance learning. Additionally, the book includes a number of the author's original methodologies that add clarity and creativity to the software engineering experience, while making a novel contribution to the discipline. Upholding his aim for brevity, comprehensive coverage, and relevance, Foster's practical and methodical discussion style gets straight to the salient issues, and avoids unnecessary topics and minimizes theoretical coverage.
