Exile and Return - Jonathan Stökl 2015-08-31

Many books of the Hebrew Bible were either composed in some form or edited during the Exilic and post-Exilic periods among a community that was to identify itself as returning from Babylonian captivity. At the same time, a dearth of contemporary written evidence from Judah/Yehud and its environs renders any particular understanding of the process

within its social, cultural and political context virtually impossible. This has led some to label the period a dark age or black box - as obscure as it is essential for understanding the history of Judaism. In recent years, however, archaeologists and historians have stepped up their effort to look for and study material remains from the period and integrate the local history of Yehud, the return from Exile,

and the restoration of Jerusalem's temple more firmly within the regional, and indeed global, developments of the time. At the same time, Assyriologists have also been introducing a wide range of cuneiform material that illuminates the economy, literary traditions, practices of literacy and the ideologies of the Babylonian host society - factors that affected those taken into Exile in variable, changing and multiple ways. This volume of essays seeks to exploit these various advances.

A SECRET SORROW - Karen Van Der Zee 2015-04-13

After her nightmarish recovery from a serious car accident, Faye gets horrible news from her doctor, and it hits her hard like a rock: she can't bear children. In extreme shock, she breaks off her engagement, leaves her job and confines herself in her family home. One day, she meets her brother's best friend, and her soul makes a first step to healing.

Margins of Writing, Origins of Cultures - Seth L. Sanders 2006

Who invented national literature? What is the relationship between script, identity, and history? This volume contains papers from a symposium, which brought leading philologists together with anthropologists and historians to connect theories of writing, language, and identity with the results of ancient Near Eastern scholarship.

Parasite and Disease Spread by Major Rivers on Earth - Heinz Mehlhorn 2019-11-12

This book focuses on waterborne pathogens and significant diseases occurring along major rivers around the globe, including key examples like the Amazonas, Mekong River and Nile. Written by leading international experts, it offers unique insights into local riverine infection risks in times of global warming, and addressing these through advances in diagnosis, health management and the development of simple but effective control measures. It also sheds light on why former societies collapsed due to

transmitted diseases during periods of climate change, droughts and floods, to help establish effective preventive measures for the future. The book appeals to a wide readership, from scientists in the field of parasitology, infectious diseases and epidemiology, to healthcare managers and general readers with an interest in pathogen spread along the largest rivers on earth. It particularly highlights past and current control mechanisms in times of global warming and assesses potential future health hazards.

Computer Vision - ECCV 2000 - David Vernon 2003-08-06
Ten years ago, the inaugural European Conference on Computer Vision was held in Antibes, France. Since then, ECCV has been held biennially under the auspices of the European Vision Society at venues around Europe. This year, the privilege of organizing ECCV 2000 falls to Ireland and it is a signal honour for us to host what has

become one of the most important events in the calendar of the computer vision community. ECCV is a single-track conference comprising the highest quality, previously unpublished, contributed papers on new and original research in computer vision. This year, 266 papers were submitted and, following a rigorous double-blind review process, with each paper being reviewed by three referees, 116 papers were selected by the Programme Committee for presentation at the conference. The venue for ECCV 2000 is the University of Dublin, Trinity College. - unded in 1592, it is Ireland's oldest university and has a proud tradition of scholarship in the Arts, Humanities, and Sciences, alike. The Trinity campus, set in the heart of Dublin, is an oasis of tranquility and its beautiful squares, elegant buildings, and tree-lined playing- elds provide the perfect setting for any conference.

Ancient Greek Cults - Jennifer Larson 2007-05-07

Using archaeological, epigraphic, and literary sources; and incorporating current scholarly theories, this volume will serve as an excellent companion to any introduction to Greek mythology, showing a side of the Greek gods to which most students are rarely exposed. Detailed enough to be used as a quick reference tool or text, and providing a readable account focusing on the oldest, most widespread, and most interesting religious practices of the ancient Greek world in the Archaic and Classical periods, *Ancient Greek Cults* surveys ancient Greek religion through the cults of its gods and goddesses, heroes and heroines. Jennifer Larson conveniently summarizes a vast amount of material in many languages, normally inaccessible to undergrad students, and explores, in detail, the variety of cults celebrated by the Greeks, how these cults differed geographically, and how each deity was conceptualized in local cult titles and rituals.

Including an introductory chapter on sources and methods, and suggestions for further reading this book will allow readers to gain a fresh perspective on Greek religion.

Women at the Dawn of History - Agnete W. Lassen 2020-02-29

In the patriarchal world of ancient Mesopotamia, women were often represented in their relation to men - as mothers, daughters, or wives - giving the impression that a woman's place was in the home. But, as we explore in this volume, they were also authors and scholars, astute business-women, sources of expressions of eroticism, priestesses with access to major gods and goddesses, and regents who exercised power on behalf of kingdoms, states, and empires.

Systems provides a comprehensive knowledgebase of the systems that generate, evaluate, summarize, and report accounting information. Balancing technical concepts and student comprehension, this textbook introduces only the most-necessary technology in a clear and accessible style. The text focuses on business processes and accounting and IT controls, and includes discussion of relevant aspects of ethics and corporate governance. Relatable real-world examples and abundant end-of-chapter resources reinforce Accounting Information Systems (AIS) concepts and their use in day-to-day operation. Now in its fourth edition, this popular textbook explains IT controls using the AICPA Trust Services Principles framework—a comprehensive yet easy-to-understand framework of IT controls—and allows for incorporating hands-on learning to complement theoretical concepts. A full set of pedagogical features enables students to easily comprehend

the material, understand data flow diagrams and document flowcharts, discuss case studies and examples, and successfully answer end-of-chapter questions. The book's focus on ease of use, and its straightforward presentation of business processes and related controls, make it an ideal primary text for business or accounting students in AIS courses.

ECO-COMPASS - Xiaosu Yi
2019-04-25

Today, mainly man-made materials, such as carbon and glass fibers, are used to produce composite parts in aviation. Renewable materials, such as natural fibers or bio-sourced resin systems, have not yet found their way into aviation. The project ECO-COMPASS aims to evaluate the potential applications of ecologically improved composite materials in the aviation sector in an international collaboration of

Chinese and European partners. Natural fibers such as flax and ramie will be used for different types of reinforcements and sandwich cores. Furthermore, bio-based epoxy resins to substitute bisphenol-A based epoxy resins in secondary structures are under investigation. Adapted material protection technologies to reduce environmental influence and to improve fire resistance are needed to fulfil the demanding safety requirements in aviation. Modelling and simulation of chosen eco-composites aims for an optimized use of materials while a Life Cycle Assessment aims to prove the ecological advantages compared to synthetic state-of-the-art materials. This Special Issue provides selected papers from the project consortium partners.

Chikungunya and Zika Viruses: Global Emerging Health Threats is the go-to resource for both historical and current information on this important virus that is rapidly increasing its global range. Epidemics since 2005 have spread from Africa and Asia, and through Europe, and an ongoing epidemic has caused nearly two million cases in the Americas. It causes severe crippling arthritis, with symptoms lasting for months or years. As no vaccine or treatment is available, there is international interest in the virus, thus funding opportunities for research have dramatically increased. This book presents our understanding of the virus, bringing comprehensive knowledge in a single source. Provides a comprehensive collection of the state-of-the-art on CHIKV biology in a go-to reference book Edited by leaders in the field who provide a single, up-to-date source of information Gives a better understanding of the

transmission and spread of chikungunya virus, a clear, coherent description of the outcomes of infection (both acute and chronic), and its biology and risk factors Pulls relevant background information to justify projects of many professionals developing vaccines and mosquito vector control approaches

Google+ for Photographers -
Colby Brown 2012

Prior to Google+, Photographers relied on a mix of Twitter, Facebook, Flickr, and other services to display their work and interact with others. No single service provided photographers with a complete set of tools that allowed them to connect with others in a rich, meaningful way—until now. Unlike other social networks, Google+ allows photographers to upload, personalize, and update images easily. The Google+ interface is intuitive and attractive—images appear large and uncropped in the stream, preserving their original integrity; and the

infinite scrolling feature creates a fluid, enjoyable photo browsing experience. In addition, the Google+ interface is built to encourage social interaction, not in miniature sound bites, but in full-length discussions with diverse groups of people. Users can build circles to connect with just those they want to include in different conversations, and they can use the Hangouts feature to talk with other users in real time from anywhere in the world. With this book, you'll see why Google+ has quickly become the most inspiring and interactive social network for photographers, and you'll learn how to leverage Google+ to build a following and connect with other photographers—and potential customers. Explains how to effectively showcase your work for the vibrant and growing Google+ photography community Shows how to upload, organize, and share your images; and hone your skills through photo-critique circles Features interviews with leading photographers

who share their own photos and tips on how to make the most of Google+ to build an online presence

Oppenheim 2013-01-31

"This splendid work of scholarship . . . sums up with economy and power all that the written record so far deciphered has to tell about the ancient and complementary civilizations of Babylon and Assyria."—Edward B. Garside, *New York Times Book Review Ancient Mesopotamia*—the area now called Iraq—has received less attention than ancient Egypt and other long-extinct and more spectacular civilizations. But numerous small clay tablets buried in the desert soil for thousands of years make it possible for us to know more about the people of ancient Mesopotamia than any other land in the early Near East. Professor Oppenheim, who studied these tablets for more than thirty years, used his intimate knowledge of long-dead languages to put together a distinctively personal picture of the Mesopotamians of some three thousand years ago. Following Oppenheim's death, Erica Reiner used the author's outline to complete the revisions he had begun. "To

any serious student of Mesopotamian civilization, this is one of the most valuable books ever written."—Leonard Cottrell, *Book Week* "Leo Oppenheim has made a bold, brave, pioneering attempt to present a synthesis of the vast mass of philological and archaeological data that have accumulated over the past hundred years in the field of Assyriological research."—Samuel Noah Kramer, *Archaeology* A. Leo Oppenheim, one of the most distinguished Assyriologists of our time, was editor in charge of the *Assyrian Dictionary of the Oriental Institute* and John A. Wilson Professor of Oriental Studies at the University of Chicago.

Conference in Computer Vision at Trinity College Dublin. The subject of the workshop was the visual acquisition of models of the 3D world from images and their application to virtual and augmented reality. Over the last few years tremendous progress has been made in this area. On the one hand important new insights have been obtained resulting in more exhibitively and new representations. On the other hand a number of techniques have come to maturity, yielding robust algorithms delivering good results on real image data. Moreover supporting technologies - such as digital cameras, computers, disk storage, and visualization devices - have made things possible that were infeasible just a few years ago. Opening the workshop was Paul Debevec's invited presentation on image-based modeling, rendering, and lighting. He represented a number of techniques for using digital images of real scenes to create 3D models, virtual camera moves,

and realistic computer animations. The remainder of the workshop was divided into three sessions: Computation and Algorithms, Visual Scene Representations, and Extended Environments. After each session there was a panel discussion that included all speakers. These panel discussions were organized by Bill Triggs, Marc Pollefeys, and Tomas Pajdla respectively, who introduced the topics and moderated the discussion. A substantial part of these proceedings are the transcripts of the discussions following each paper and the full panel sessions. These discussions were of very high quality and were an integral part of the workshop.

Historical Dictionary of Mesopotamia - Gwendolyn Leick 2009-11-16

The Greek name Mesopotamia means 'land between the rivers.' The Romans used this term for an area that they controlled only briefly (between 115 and 117 A.D.): the land between the Euphrates and Tigris rivers, from the south Anatolian

mountains ranges to the Persian Gulf. It comprises the civilizations of Sumer and Akkad (third millennium B.C.) as well as the later Babylonian and Assyrian empires of the second and first millennium. Although the 'history' of Mesopotamia in the strict sense of the term only begins with the inscriptions of Sumerian rulers around the 27th century B.C., the foundations for Mesopotamian civilization, especially the beginnings of irrigation and the emergence of large permanent settlements, were laid much earlier, in the fifth and fourth millennium. The second edition of the Historical Dictionary of Mesopotamia defines concepts, customs, and notions peculiar to the civilization of ancient Mesopotamia, from adult adoption to ziggurats. This is accomplished through a chronology, an introductory essay, a bibliography, appendixes, and hundreds of cross-reference dictionary entries on religion, economy, society, geography, and important kings and rulers.

John Dee's Five Books of Mystery - John Dee 2003-01-01
Discovered in a hidden compartment of an old chest long after his death, the secret writings of John Dee, one of the leading scientists and occultists of Elizabethan England, record in minute detail his research into the occult. Dee concealed his treatises on the nature of humankind's contact with angelic realms and languages throughout his life, and they were nearly lost forever. In his brief biography of John Dee, Joseph Peterson calls him a "true Renaissance man" detailing his work in astronomy, mathematics, navigation, the arts, astrology, and the occult sciences. He was even thought to be the model for Shakespeare's Prospero. All this was preparation for Dee's main achievement: five books, revealed and transcribed between March 1582 and May 1583, bringing to light mysteries and truths that scholars and adepts have been struggling to understand and

use ever since. These books detail his system for communicating with the angels, and reveal that the angels were interested in and involved with the exploration and colonization of the New World, and in heralding in a new age or new world order. While Dee's influence was certainly felt in his lifetime, his popularity has grown tremendously since. His system was used and adapted by the Hermetic Order of the Golden Dawn, and subsequently by Aleister Crowley. This new edition of John Dee's Five Books of Mystery is by far the most accessible and complete published to date. Peterson has translated Latin terms and added copious footnotes, putting the instructions and references into context for the modern reader.
