

Conduct Risk Management Using A Behavioural Approach To Protect Your Board And Financial Services Business

Getting the books **conduct risk management using a behavioural approach to protect your board and financial services business** now is not type of challenging means. You could not on your own going afterward books heap or library or borrowing from your links to open them. This is an categorically simple means to specifically get lead by on-line. This online revelation conduct risk management using a behavioural approach to protect your board and financial services business can be one of the options to accompany you next having further time.

It will not waste your time. consent me, the e-book will definitely vent you further concern to read. Just invest little grow old to contact this on-line declaration **conduct risk management using a behavioural approach to protect your board and financial services business** as capably as evaluation them wherever you are now.

The Handbook of Forensic Learning Disabilities - Tim Riding 2021-04-05
This comprehensive and practical guide helps professionals and staff within hospitals change the way they collect record store and use clinical information about patients. It illustrates how clinical governance and evidence-based practice can be easily addressed by modernising clinical information practice to benefit patients and improve staff and service efficiency. As well as helping organisations define and establish improved systems this book is of continuing use for all healthcare professionals who make store and use patient records. 'High quality shared record keeping is recognised as being fundamentally important to good patient care. This book offers an excellent practical approach to addressing the changes needed in clinical record keeping to support improved patient care clinical governance better management information and the move towards electronic patient records. It brings together a strong clinical focus with the informatics principles needed to support a successful move to modern record keeping.' Yvonne Baker and Tricia Woodhead in the Foreword It will be a useful guide for clinicians and all other health professionals dealing with clinical information.

Conduct Risk Management - Roger Miles 2017-01-03

Conduct risk is at the core of behavioural regulation, a new approach to regulating financial services, whose new agencies and public prosecutors have spread rapidly across the world. Its prosecutors intervene assertively to challenge financial service providers to show clear evidence of a new customer-centric approach, which understands and responds to the hidden drivers of customer behaviour. They use their unprecedented powers to levy very large fines and even to imprison wrongdoers - often for not taking precautions rather than for any active wrongdoing. Conduct Risk Management is a tool for recognizing, acting on, and predicting conduct risk impacts in regulated business. Conduct Risk Management sees beyond econometric and other 'box-ticking' traditions of risk management. Whilst protecting senior managers, it helps all staff to make positive use of conduct risk to promote behaviour the regulator will accept as 'good', as good behaviour is good business. The new conduct regulations personally affect every manager in financial services, and their suppliers, with new regulations making senior managers liable to imprisonment for failures in organizational conduct. Conduct Risk Management sets out plainly what practitioners need to know to understand the regulator's intentions, to prove compliance, protect competitiveness and maintain licence to operate.

Ethical Issues in Forensic Mental Health Research - Chris Brown 2003-03-15

A contemporary case-based discussion of ethical dilemmas faced by researchers in forensic mental health, this book offers useful guidance to anyone planning research in this field. It focuses on problems frequently encountered, such as issues of capacity to consent in forensic settings and the meaning of consent to participate. Chapters cover issues such as the procurement of consent among incarcerated people; the ability of young people to provide consent; the effects of culturally specific lay beliefs about mental illness; confidentiality; multidisciplinary approaches; and ethics in risk assessment research. The contributors address questions such as whether research can be therapeutic, and whether it is ever reasonable to compromise patient confidentiality for the wider benefits of publishing research. Based on empirical data from researchers' own experiences, this comprehensive book will be essential reading for anyone planning research in the area of forensic mental health, and all whose work is in this area.

[Understanding the Financial Conduct Authority](#) - Ashley Kovas 2015-07-28

The Financial Conduct Authority began its work in April 2013 with a

post-crisis mandate to take pre-emptive action against firms. When problems occur, the FCA increasingly takes disciplinary action against individual senior managers as well as against the firm. Most of these cases are tragedies - if the individuals concerned understood the likely outcome they would have behaved differently. This book sets out the psychology of the FCA and covers the 'hot spots' that senior management and their compliance officers need to get right. The key to the FCA approach is 'conduct risk'. This deliberately undefined term includes anything that might cause a problem to the FCA in the achievement of its regulatory mission. The FCA sees the world through the lens of risk; everything, including firms themselves, are assessed on how likely they are to cause the FCA to fail in its role of securing appropriate protection for consumers, enhancing the integrity of the UK financial system and promoting effective competition in the interests of consumers. Conduct risk is about behaviour and the FCA is keen to understand the drivers of human behaviour and how they can use them to bring about the outcomes they wish to see. Firms' culture is also under the microscope, all the more so since the recent trading incidents where groups of traders colluded across firms to manipulate LIBOR and the foreign exchange markets. A chapter on Culture examines how firms can start work to prepare for the FCA's increasing engagement on culture. The starting point of course is to understand what culture is.

[Culture Audit in Financial Services](#) - Roger Miles 2021-06-03

In the next wave of conduct regulation in financial markets, from 2021 conduct regulators in the UK and elsewhere expect firms to produce evidence on how they are improving behaviour and culture. Facing this, many practitioners are anxious that their current reporting and management information (MI) are irrelevant to meeting as-yet unclear regulatory expectations. This book provides the insights and tools firms need to report on culture, securing both enhanced business value and the regulator's approval. Culture is now seen as a key contributor to good governance, feeding into existing discourse on environmental, social and governance (ESG) factors and the emerging dialogue on 'non-financial (mis)conduct', but conventional measures of business quality are unfit for the new reporting agenda. Culture Audit in Financial Services follows the arc of 'behavioural regulation' to examine what the regulator really wants, before offering guidance on how culture audit differs from conventional auditing, how to put the latest pure-research findings to work, and the key features of well-designed conduct and culture reports. Written by an impartial author and a variety of contributors with extensive experience working with practitioners, regulators, and many of the world's finest academic initiatives, this book is filled with practical, grounded advice on how best to approach this new challenge and avoid infractions.

Managing Suicide Risk in Primary Care - Craig J. Bryan, PsyD 2010-11-19

"Primary care is the new frontier for preventing suicide and Bryan and Rudd are its pioneers, offering wisdom and guidance based on their experience in bridging behavioral health care to the primary health care setting. This is a truly significant reference." Lanny Berman, PhD, ABPP Executive Director, American Association of Suicidology President, International Association for Suicide Prevention "In their pragmatic and useful book titled *Managing Suicide Risk in Primary Care*, Bryan and Rudd provide an essential reference guide for health care professionals working in primary care settings."--*PsycCRITIQUES* "This book offers a comprehensive approach that can help the physician become competent to assess and intervene with suicidal risk as well as lessen his or her anxiety when dealing with patients at suicide risk. Needless to say, this can be a life and death matter for some patients... One of the great

strengths of this book is how they have adapted insights and interventions from traditional mental health care for the uniqueness of primary care... I highly recommend this book for any professional working in primary care. It will be taken off the shelf for reference and reviewed many times in the course of a career."--Family Medicine Journal

Roughly forty-five percent of individuals who commit suicide make contact with a primary medical provider in the month prior to their death; nearly twenty percent make contact within one day of their death. This practical guide demonstrates how the primary care setting--an increasingly important provider of mental health treatment--can be an effective place for preventing suicide and providing ameliorative care. Firmly grounded in the clinical realities of primary care, Bryan and Rudd address the key issues that often plague behavioral health consultants (BHCs) in such settings where appointments are brief, patient contact is limited, and decision making and treatment are collaborative. They offer effective strategies for BHCs to manage patients across a suicidal crisis beginning with the development of procedures prior to crisis, steps to take during a crisis, planning for post-crisis care, transition to specialty mental health facilities, and legal issues. Key Features: Targets techniques for suicide assessment and prevention in primary care settings Addresses the clinical realities of working in a primary care setting and how to adapt them to the needs of suicidal patients Covers clinical protocols, legal issues, and risk management Discusses the formation of collaborative relationships with patients and staff Provides brief interventions with suicidal patients and post-crisis strategies Written by leading specialists in behavioral health, primary care, and suicidology

The Wiley Handbook of What Works in Violence Risk Management - J. Stephen Wormith 2020-02-10

A comprehensive guide to the theory, research and practice of violence risk management The Wiley Handbook of What Works in Violence Risk Management: Theory, Research and Practice offers a comprehensive guide to the theory, research and practice of violence risk management. With contributions from a panel of noted international experts, the book explores the most recent advances to the theoretical understanding, assessment and management of violent behavior. Designed to be an accessible resource, the highly readable chapters address common issues associated with violent behavior such as alcohol misuse and the less common issues for example offenders with intellectual disabilities. Written for both those new to the field and professionals with years of experience, the book offers a wide-ranging review of who commit acts of violence, their prevalence in society and the most recent explanations for their behavior. The contributors explore various assessment approaches and highlight specialized risk assessment instruments. The Handbook provides the latest evidence on effective treatment and risk management and includes a number of well-established and effective treatment interventions for violent offenders. This important book: Contains an authoritative and comprehensive guide to the topic Includes contributions from an international panel of experts Offers information on violence risk formulation Reveals the most recent techniques in violence risk assessment Explains what works in violence intervention Reviews specialty clinical assessments Written for clinicians and other professionals in the field of violence prevention and assessment, The Wiley Handbook of What Works in Violence Risk Management is unique in its approach because it offers a comprehensive review of the topic rather than like other books on the market that take a narrower view.

Financial Behavior - Harold Kent Baker 2017

About the editors -- About the contributors -- Abbreviations -- Financial behavior and psychology -- Financial behavior : an overview / H. Kent Baker, Greg Filbeck, and Victor Ricciardi -- The financial psychology of players, services, and products / Victor Ricciardi -- The financial behavior of major players -- Individual investors / Henrik Cronqvist and Danling Jiang -- Institutional investors / Alexandre Skiba and Hilla Skiba -- Corporate executives, directors, and boards / John R. Nofsinger and Pattanaporn Chatjuthamard -- Financial planners and advisors / Benjamin F. Cummings -- Financial analysts / Susan M. Young -- Portfolio managers / Erik Devos, Andrew C. Spieler, and Joseph M. Tenaglia -- Financial psychopaths / Deborah W. Gregory -- Financial and investor psychology of specific players -- The psychology of high net worth individuals / Rebecca Li-Huang -- The psychology of traders / Duccio Martelli -- A closer look at frequent trader / Michal Strahivevitz -- The psychology of women investors / Marguerita M. Davies and Peter Brooks -- The future of behavioral finance / Michael Dowling and Brian Lucey -- Discussion questions and answers -- Index

Organizational Behaviour in Sport - James Skinner 2017-05-18

What makes a sport enterprise successful? How can managers working in sport improve organizational effectiveness through strategic behaviour management? This comprehensive and accessible textbook addresses these important questions and examines the theories that underpin organizational analysis in sport. Helping both students and practitioners to understand the different types of behaviour that occur within a sports enterprise, it also demonstrates how to develop ways of managing behaviour more effectively for the benefit of all stakeholders. The book explores behaviour on individual, interpersonal, group and whole-organization levels, and presents an evidence-based framework for analysis built around key concepts such as: Change and culture Leadership Motivation, rewards and incentives Power and influence Conflict, disputes and grievances Equity, diversity and inclusion. With international case studies, learning objectives, review questions and guides to further reading included in every chapter, no other textbook develops critical skills or an awareness of ethical issues in such detail and depth. Organizational Behaviour in Sport is essential reading for all students and practitioners working in sport, leisure or recreation management.

Cognitive-Behaviour Therapy for People with Learning Disabilities

- Biza Stenfert Kroese 2005-08-04

Cognitive therapy is a well known and widely used means of helping depressed patients, but is only now beginning to be extended to other client groups. Cognitive Therapy for Learning Disability contains contributions from well known and highly experienced practitioner researchers about the theoretical and practical issues surrounding the application of cognitive therapy to this special client group. Since cognitive therapy is usually understood to consist mainly of talking and introspection, the communication difficulties, challenging behaviours and the whole question of self-regulation make CBT for learning disabled people a challenging and fascinating topic. Cognitive Therapy for Learning Disability provides a wealth of practical examples for training and will be invaluable to clinical psychologists, psychiatrists and all researchers and practitioners who deal with learning disabled people in their daily lives.

Introduction to Management - Richard Pettinger 2020-03-06

This popular core textbook provides an authoritative introduction to business management. Covering all the functional areas of the field, the text provides a robust framework to help students understand the inter-relatedness of different aspects of management and how they fit together in an organisation. Strong emphasis is placed throughout on providing students with a thorough and practical grounding in the topic, with a focus on helping them developing effective management skills. Now in its fourth edition, Introduction to Management has been fully updated and expanded to cover new developments in the field. Written by a leading expert with extensive management experience, this is ideal reading for students studying introductory courses in management at undergraduate, postgraduate or MBA level. It does not require prior knowledge of business and management. New to this Edition: - Includes new chapters on innovation, enterprise, risk management, ethics and responsibility - New 'Management in focus' boxes providing interesting and useful insights into management practice in the real world - New 'Critical thinking, analysis and evaluation' feature to encourage students

to think deeply about management problems

Organizational Behavior - Linda K. Stroh 2003-04-02

This second edition is a revision of a successful reader in organizational behavior, edited by Jerald Greenberg. This volume describes the latest advances in the field of organizational behavior. Each chapter is a description of "what was," "what is," and "what will be" as envisioned by leading researchers and experts. Topics covered include: affect, stress, self-fulfilling prophecies, diversity, justice, reputations, deviant behavior, conflict, construct validity, and cross-cultural behavior. The book concludes with a commentary chapter by Ed Locke--a distinguished senior scholar--who offers directions and guidance on the field's future. This book will appeal to professors and scholars in industrial-organizational psychology, organizational behavior, human resource management, and social psychology. It is an invaluable compendium reporting on the state of the science in a rapidly developing field.

Antisocial Behaviour and Conduct Disorders in Children and Young People - National Collaborating Centre for Mental Health (Great Britain) 2013

Antisocial behaviour and conduct disorders are the most common reason for referral to child and adolescent mental health services and have a significant impact on the quality of life of children and young people and their parents and carers. Rates of other mental health problems (including antisocial personality disorder) are considerably increased for adults who had a conduct disorder in childhood. This new NICE guideline seeks to address these problems by offering advice on prevention strategies and a range of psychosocial interventions. It reviews the evidence across the care pathway, encompassing access to and delivery of services, experience of care, selective prevention interventions, case identification and assessment, psychological and psychosocial indicated prevention and treatment interventions, and pharmacological and physical interventions. Readership: Intended for healthcare professionals in CAMHS, but this will also be useful to professionals in primary care (as there is much emphasis on recognition).

Forensic Assessment of Violence Risk - Mary Alice Conroy 2007-10-12
Forensic Assessment of Violence Risk: A Guide for Risk Assessment and Risk Management provides both a summary of research to date and an integrated model for mental health professionals conducting risk assessments, one of the most high-stakes evaluations forensic mental health professionals perform.

Non-financial Risk Management in the Financial Industry - Norbert Gittfried 2022-04-13

Managing environment, social and governance (ESG) risk, compliance risk and non-financial risk (NFR) has become increasingly critical for businesses in the financial services industry. Furthermore, expectations by regulators are ever more demanding, while monetary sanctions are being scaled up. Accordingly, ESG, Compliance and NFR risk management requires sophistication in various aspects of a risk management system. This handbook analyses a major success factor necessary for meeting the requirements of modern risk management: an institution-specific target operating model (TOM) - integrating strategy, governance & organisation, risk management, data architecture and cultural elements to ensure maximum effectiveness. Also, institutions need to master the digital transformation for their business model to be sufficiently sustainable for the years to come. This book will offer ways on how to achieve just that. The book has been written by senior ESG, Compliance and NFR experts from key markets in Europe, the U.S. and Asia. It gives practitioners the necessary guidance to master the challenges in today's global risk environment. Each chapter covers key regulatory requirements, major implementation challenges as well as both practical solutions and examples.

Law and Corporate Behaviour - Christopher Hodges 2015-10-22

This book examines the theories and practice of how to control corporate behaviour through legal techniques. The principal theories examined are deterrence, economic rational acting, responsive regulation, and the findings of behavioural psychology. Leading examples of the various approaches are given in order to illustrate the models: private enforcement of law through litigation in the USA, public enforcement of competition law by the European Commission, and the recent reform of policies on public enforcement of regulatory law in the United Kingdom. Noting that behavioural psychology has as yet had only limited application in legal and regulatory theory, the book then analyses various European regulatory structures where behavioural techniques can be seen or could be applied. Sectors examined include financial services, civil aviation, pharmaceuticals, and workplace health & safety. Key findings are that 'enforcement' has to focus on identifying the causes of

non-compliance, so as to be able to support improved performance, rather than be based on fear motivating complete compliance. Systems in which reporting is essential for safety only function with a no-blame culture. The book concludes by proposing an holistic model for maximising compliance within large organisations, combining public regulatory and criminal controls with internal corporate systems and external influences by stakeholders, held together by a unified core of ethical principles. Hence, the book proposes a new theory of ethical regulation.

Behavioural Approaches to Problems in Childhood - Patricia Howlin 1998-02-04

This is a very practical book on the value of behavioural techniques in the treatment of children with various disorders including hyperactivity, conduct problems, autism and communication difficulties. Written by an international group of experts, it will provide practitioners in the field with a clear picture of the value of behavioural methodology. It also stresses the necessary assessment and evaluation procedures required in order to implement the techniques appropriately.

Forensic Psychiatry and Psychology in Europe - Kris Goethals 2018-05-30

This study guide aims to make European trainees in forensic psychiatry and psychology and young forensic psychiatrists and psychologists aware of the differences and commonalities in forensic psychiatry and psychology in different countries within Europe and to enable them to learn from the approaches adopted in each country. The guide is divided into five main sections that address legal frameworks, service provision and frameworks, mandatory skills, teaching and training in forensic psychiatry and psychology, and capita selecta. In addition, recommendations are made with respect to the practice of teaching and training across European countries. It is anticipated that the guide will provide an excellent means of improving specific skills and that, by learning about the offender/patient pathways in the different jurisdictions of Europe, the reader will gain a deeper understanding of the principles that govern methods and practices in their own work with mentally disordered offenders.

Books of Abstracts of the 16th World Congress of the International Association for Child and Adolescent Psychiatry and Allied Professions (IACAPAP) - H. Remschmidt 2013-06-29

This book contains all of the abstracts of the 16th World Congress of the International Association for Child and Adolescent Psychiatry and Allied Professions (IACAPAP) held in Berlin, Aug 22-26, 2004. The abstracts are arranged according to the type of session (main lecture, state of the art lecture, symposium, workshop, course, or poster exhibition) and the day of the conference. The abstracts of the industry-sponsored sessions are also included. A subject index is provided to help track themes of special interest. The author index allows you to find the abstract authors and the address of the first author for direct contact. The general theme of the congress "Facilitating Pathways: Care, Treatment and Prevention in Child and Adolescent Mental Health" is quite inclusive and the contributions to the Congress, as reflected in the abstracts, cover the whole range of child and adolescent mental health endeavour, including all modern methods and trends in research and clinical application. The ways we understand and treat our patients are changing rapidly, and this too is reflected in the contributions to this volume, which give state-of-the-art information that should allow us to provide better care, treatment and prevention to children, adolescents and their care-givers everywhere in the world.

Business Ethics: Ethical Decision Making and Cases - O. C. Ferrell 2021-06-16

Learn to make successful ethical decisions in the midst of the new business realities of 2020 and 2021 with Ferrell/Fraedrich/Ferrell's market-leading BUSINESS ETHICS: ETHICAL DECISION MAKING AND CASES, 13E. Packed with current examples and exercises, this edition demonstrates how to integrate ethics into key strategic business decisions as reorganized chapters clearly present the ethical decision-making process in today's complex ethical, legal, social and political environments. New scenarios highlight 2020 economic and pandemic realities and preview ethical challenges you are most likely to encounter as a new manager. Updates address the processes and best practices behind successful business ethics programs as well as the latest legislation and new coverage of global sustainability and corporate social responsibility. New and original cases provide insights into ethics in familiar organizations, such as Tesla and TOMS, while exercises reinforce concepts with hands-on applications. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Offence Paralleling Behaviour - Michael Daffern 2010-10-26

New to the Wiley Series in Forensic Clinical Psychology, *Offence Paralleling Behaviour* presents an original framework of individualised assessment and treatment methods for clinicians working in the forensic environment. Provides a framework that helps practitioners to identify and work with offence-relevant behaviour and evidence pro-social change Describes how Offence Paralleling Behaviour (OPB) can be successfully identified and used in risk assessment and treatment planning Brings together leading academics and frontline clinicians, including psychiatric nurses, psychologists, psychiatrists, occupational therapists, drug and alcohol specialists, and correctional officers, as well as featuring the views of prisoners on OPB Presents methods which allow staff to identify and use OPB in clinical practice

Working with Children and Young People who have displayed Harmful Sexual Behaviour - Stuart Allardyce 2018-07-01

In providing clear practice messages for practitioners, contemporary issues such as problematic online sexual behaviour and adolescent harmful sexual behaviour are covered and a formulation-based, trauma-informed and multi-systemic approach to working with children and their families is proposed.

Risk Behaviour and Risk Management in Business Life - Bo Green 2013-03-09

Risk behaviour and risk management in business life influence a wide range of fields in which only a very limited amount of research has been undertaken. These topics have often been treated as if they were theoretically and practically isolated from other fields, the so called risk archipelago problem. What is actually needed is another focus, in which the problem of risk is treated as a central theme. The demand for interdisciplinary research means that there is a need for crossing scientific boundaries. In approaching risk problems from a holistic perspective there is also a parallel need for linking the scientific and the business worlds. Researchers must work closely together in concrete multidisciplinary research projects and in co-operation with the industrial world in seeking out and solving research problems of importance. This book contains selected and re-written papers, and keynote speeches presented in a risk-seminar that Stockholm University organised in June 1997. The seminar, in which 200 researchers and practitioners from 26 countries participated, was divided into four main topic areas: Risk Assessment and Credit Management, Psychology in Business Life, Risk Management in Small Firms and Law and Business Risk. In writing this book, the editor invited eight professors from four continents to assist him in introducing the reader to the different and scientific disciplines and in explaining the need for interdisciplinary, multidisciplinary and cross-disciplinary risk research projects. The book consists of eight chapters and the target groups are researchers, doctoral and master students at universities and business people working in the risk management area.

Ethical Business Practice and Regulation - Christopher Hodges 2018-01-11

This book explains the concepts of Ethical Business Practice (EBP) and Ethical Business Regulation (EBR), a new paradigm in compliance and enforcement based on behavioural science and ethics. EBR provides the basis for an effective relationship between a business and its regulators, resulting in better outcomes for both. EBR is attracting extensive attention from regulators and businesses around the world. The UK Government's 2017 Regulatory Futures Review draws on EBR as the foundation for its policy of 'regulatory self-assurance'. EBR draws on findings from behavioural science, responsive regulation, safety and business and integrity management to create a practical and holistic approach. Examples include the open culture that is essential for civil aviation safety, the Primary Authority agreements between regulators and national businesses, and feedback mechanisms provided by market vigilance systems and sectoral consumer ombudsmen. This book provides an essential blueprint for sustainable business and effective future regulation.

Routledge Handbook of Risk Management and the Law - Virginia A. Suveiu 2022-12-14

In today's highly globalized and regulated economy, private and public organizations face myriad complex laws and regulations. A process designed to detect and prevent regulatory compliance failures is vital. However, such an effective process cannot succeed without development and maintenance of a strong compliance and legal risk management culture. This wide-ranging handbook pulls together work from experts across universities and industries around the world in a variety of key disciplines such as law, management, and business ethics. It provides an

all-inclusive resource, specifying what needs to be known and what needs to be further pursued in these developing areas. With no such single text currently available, the book fills a gap in our current understanding of legal risk management, regulatory compliance, and ethics, offering the potential to advance research efforts and enhance our approaches to effective legal risk management practices. Edited by an expert on legal risk management, this book is an essential reference for students, researchers, and professionals with an interest in business law, risk management, strategic management, and business ethics.

Forensic Child and Adolescent Mental Health - Susan Bailey 2017-04-24

An overview of forensic child and adolescent mental health for professionals in mental health, social care, education, law and policy.

People Risk Management - Keith Blacker 2015-04-03

People Risk Management provides unique depth to a topic that has garnered intense interest in recent years. Based on the latest thinking in corporate governance, behavioural economics, human resources and operational risk, people risk can be defined as the risk that people do not follow the organization's procedures, practices and/or rules, thus deviating from expected behaviour in a way that could damage the business's performance and reputation. From fraud to bad business decisions, illegal activity to lax corporate governance, people risk - often called conduct risk - presents a growing challenge in today's complex, dispersed business organizations. Framed by corporate events and challenges and including case studies from the LIBOR rate scandal, the BP oil spill, Lehman Brothers, Royal Bank of Scotland and Enron, People Risk Management provides best-practice guidance to managing risks associated with the behaviour of both employees and those outside a company. It offers practical tools, real-world examples, solutions and insights into how to implement an effective people risk management framework within an organization.

[The International Journal of Indian Psychology, Volume 3, Issue 3, No. 2 - IJIP](#).In 2016-04-21

This gives me an immense pleasure to announce that 'RED'SHINE Publication, Inc' is coming out with its third volume of peer reviewed, international journal named as 'The International Journal of Indian Psychology. IJIP Journal of Studies' is a humble effort to come out with an affordable option of a low cost publication journal and high quality of publication services, at no profit no loss basis, with the objective of helping young, genius, scholars and seasoned academicians to show their psychological research works to the world at large and also to fulfill their academic aspirations.

Routledge International Handbook of Sexual Homicide Studies - Jean Proulx 2018-04-17

This book provides the first systematic overview of the theoretical, empirical, clinical, and police issues related to sexual murderers and murder. Bringing together leading researchers, theoreticians, and practitioners from across eight different countries, this is a truly international collaboration and an essential reference text for students, researchers, and professionals interested in sexual homicide, as well as an exhaustive source of guidelines for the assessment and treatment of sexual murderers. This book is divided into five parts: Part I, Theories and research, presents a detailed review of theoretical models and empirical studies of sexual homicide. Part II, Sexual sadism, discusses theoretical, empirical, and clinical considerations and reviews the literature on the characteristics of sadistic sexual aggressors. Part III, Clinical issues, discusses the assessment and management of sexual murderers at each phase of the judicial process: at trial, during incarceration, and during follow-up in the community. Part IV, Policing issues, discusses research and practical issues related to police activities surrounding a sexual murder. Topics include investigation, offender and geographical profiling, behavioural linkage, and police interrogation of the murderers. Part V, New directions, presents new directions for the study of sexual homicide and discusses the limits of current knowledge related to sexual murderers and their crimes. Offering a broad and comprehensive approach, this Handbook is an indispensable source of information on theory, research, clinical assessment, treatment, and police issues related to sexual murderers and murder.

[Expert Judgement in Risk and Decision Analysis](#) - Anca M. Hanea 2021-02-19

This book pulls together many perspectives on the theory, methods and practice of drawing judgments from panels of experts in assessing risks and making decisions in complex circumstances. The book is divided into four parts: Structured Expert Judgment (SEJ) current research fronts; the contributions of Roger Cooke and the Classical Model he developed;

process, procedures and education; and applications. After an Introduction by the Editors, the first part presents chapters on expert elicitation of parameters of multinomial models; the advantages of using performance weighting by advancing the “random expert” hypothesis; expert elicitation for specific graphical models; modelling dependencies between experts’ assessments within a Bayesian framework; preventive maintenance optimization in a Bayesian framework; eliciting life time distributions to parametrize a Dirichlet process; and on an adversarial risk analysis approach for structured expert judgment studies. The second part includes Roger Cooke’s oration from 1995 on taking up his chair at Delft University of Technology; one of the editors reflections on the early decade of the Classical Model development and use; a current overview of the theory of the Classical Model, providing a deep and comprehensive perspective on its foundations and its application; and an interview with Roger Cooke. The third part starts with an interview with Professor Dame Anne Glover, who served as the Chief Scientific Advisor to the President of the European Commission. It then presents chapters on the characteristics of good elicitations by reviewing those advocated and applied; the design and development of a training course for SEJ; and on specific experiences with SEJ protocols with the intention of presenting the challenges and insights collected during these journeys. Finally, the fourth (and largest) part begins with some reflections from Willy Aspinall on his many experiences in applying the Classical Model in several application domains; it continues with related reflections on imperfect elicitations; and then it presents chapters with applications on medicines policy and management, supply chain cyber risk management, geo-political risks, terrorism and the risks facing businesses looking to internationalise.

Regulatory Governance and Risk Management - Binglin Yang 2011-07-27
Regulatory Governance and Risk Management will be the first book addressing the diffusion of risk-based governance in the coal mining industry from a health and safety standpoint. More specifically, it aims to understand a puzzling phenomenon. Since the 1990s, the approach of risk-based governance has been widely adopted in almost all developed countries in Europe and commonwealth countries. It, however, has diffused much more slowly in the U.S. Using a diffusion approach and comparisons between Australia and the U.S., this book examines mechanisms that both drive and prevent the diffusion of risk-based governance in the coal mining industry. This book has two major selling points. First, this is a timely work given the Upper Big Branch coal mine explosion occurred in April, 2010. After this disaster, many asked why an enhanced level of enforcement after 2006 has not prevented catastrophic accidents from occurring and why risk-based governance, which helps other countries achieve better safety performance, has been largely ignored in the U.S. This book answers these questions and makes recommendations on how to remove barriers in moving toward risk-based governance. Second, this book is readable because it embeds theories into storytelling and gives particular emphasis on the influence of key strategic individuals.

Climate Change Enterprise Risk Management - Martin Massey 2022-12-03

Develop and execute a resilient climate change enterprise risk strategy that can be tailored to any organization with this essential guide for risk professionals and business leaders. Climate Change Enterprise Risk Management equips readers with a practical roadmap for how organizations can integrate climate change into their enterprise risk strategy. It offers guidance on how to secure a robust framework that can identify and manage climate threats and opportunities for a business, how to increase the visibility of climate risk management activities at board level, and how and when to implement techniques such as thresholds, mitigation strategies, monitoring capabilities and risk appetite metrics. The book covers both existing best practice risk management tools and how they can be adapted for climate enterprise risk management as well as new interdisciplinary tools like stakeholder mapping. Climate Change Enterprise Risk Management is richly supported by global examples, interviews and case studies representing a wide range of companies and industries including the insurance, finance, infrastructure, oil and gas, legal and auditing sectors. This is a must-read for all risk professionals and business leaders involved in developing and executing enterprise risk management and strategy. It will also be valuable reading for students taking modules on enterprise risk management and climate change, sustainable business and risk management.

Research Handbook on Law and Ethics in Banking and Finance - Costanza A. Russo 2019

The global financial crisis evidenced the corrosive effects of unethical behaviour upon the banking industry. The recurrence of misbehaviour in the financial sector, including fraud and manipulations of market indices, suggests the need to establish a banking culture that conforms to the highest standards of ethical and professional behaviour. This Research Handbook on Law and Ethics in Banking and Finance focuses on the role that law should play and the effectiveness of newly introduced regulations and supervisory actions as a driver for ethical conduct so as to reconnect the interests of bankers and financiers with the interests of society.

Information Security and Employee Behaviour - Angus McIlwraith 2021-08-23

Research conducted over many years suggests that between 60 and 85 per cent of all information security incidents are the result of a lack of knowledge and/or understanding amongst an organisation's own people. And yet the great majority of money spent protecting systems is focused on creating technical defences against often exaggerated external threats. Angus McIlwraith's book explains how corporate culture affects perceptions of risk and information security, and how this in turn affects employee behaviour. He then provides a pragmatic approach for educating and training employees in information security and explains how different metrics can be used to assess awareness and behaviour. Information security awareness will always be an ongoing struggle against complacency, problems associated with new systems and technology, and the challenge of other more glamorous and often short-term priorities. Information Security and Employee Behaviour will help you develop the capability and culture that will enable your organisation to avoid or reduce the impact of unwanted security breaches. This second edition has been thoroughly updated throughout, incorporating other areas like anthropology and other non-technical disciplines which are making an impact on recent developments. It also explores the technology used to deliver communication, education and awareness, particularly in the areas of online delivery and recent developments such as ‘gamification’, as well as the ways in which the research, tools, techniques and methodologies relating to the measurement and change of organisational culture have matured.

Behavioral Risk Management - Hersh Shefrin 2016-04-29

The psychological dimension of managing risk is of crucial importance, and its study has led to the identification of specific do's and don'ts. Those with an understanding of the psychology underlying risk and the skills to recognize its manifestation in practice, have the opportunity to develop frameworks that embody the do's and don'ts, thereby producing sound judgments and good decisions. Those lacking the understanding and the skills are destined to be more hit and miss in their approach to risk management, doing the don'ts and not doing the do's. Virtually every major risk management catastrophe in the last fifteen years has psychological pitfalls at its root. The list of catastrophes includes the 2008 bankruptcy of Lehman Brothers and subsequent global financial crisis, the 2010 explosion at BP's Macondo well in the Gulf of Mexico and the 2011 nuclear meltdown at the Fukushima Daiichi power plant. A critical lesson from psychological studies for those involved in risk management is that people's judgments and decisions about risk vary with type of circumstance. In Behavioral Risk Management readers will learn that there are specific actions that organizations can undertake to incorporate understanding, recognition, and behavioral interventions into the practice of risk management. There are many examples throughout the book that illustrate doing the don'ts. The chapters in the first part of the book introduce the main ideas, and the chapters in the latter part provide insight into how to apply those ideas to the practical world in which risk managers operate.

Human Safety and Risk Management - A. Ian Glendon 1995

This book, written by two authors with extensive experience of lecturing on the 'Human Aspects of Safety' on training courses for safety practitioners, considers major psychological and organizational issues within the framework of health and safety at work and the management of risk, extending applied knowledge from psychology and related disciplines in new directions. The book reflects developing approaches to managing risk as it applies to individuals, teams and organizations in the workplace. Specifically it aims to improve understanding of ways in which human behaviour both influences, and can be shaped by, effective management of safety and risk in the workplace. For the safety and risk professional and student alike there are straightforward introductions to, and explorations of, the relevant aspects of behavioural science, supported by numerous examples. For those who wish to read further around the subject, this clear exposition of material is supplemented by

references and sources of further reading. The basic appeal of the book lies in the coverage of material and logical progression through the various topics. The emphasis throughout is on the use of applied and theoretical approaches in explaining safety and risk applications. The book is as relevant to a practitioner as it is to a student audience, and contains guidance and advice relevant to practice, enforcement, teaching, training, research, consultancy and support services. Human Safety and Risk Management makes human aspects of safety and risk available to those who do not necessarily have a behavioural science background, including the informed lay reader.

Cyber Behavior: Concepts, Methodologies, Tools, and Applications

- Management Association, Information Resources 2014-04-30

Following the migration of workflows, data, and communication to the Cloud and other Internet-based frameworks, interaction over the Web has become ever more commonplace. As with any social situation, there are rules and consequences to actions within a virtual environment. Cyber Behavior: Concepts, Methodologies, Tools, and Applications explores the role of cyberspace in modern communication and interaction, including considerations of ethics, crime, security, and education. With chapters on a variety of topics and concerns inherent to a contemporary networked society, this multi-volume work will be of particular interest to students and academicians, as well as software developers, computer scientists, and specialists in the field of Information Technologies.

Digital Human Modeling and Applications in Health, Safety, Ergonomics and Risk Management. Human Body, Motion and Behavior - Vincent G. Duffy 2021-07-03

This two-volume set LNCS 12777 and 12778 constitutes the thoroughly refereed proceedings of the 12th International Conference on Digital Human Modeling and Applications in Health, Safety, Ergonomics and Risk Management, DHM 2021, which was held virtually as part of the 23rd HCI International Conference, HCII 2021, in July 2021. The total of

1276 papers and 241 posters included in the 39 HCII 2021 proceedings volumes was carefully reviewed and selected from 5222 submissions. DHM 2021 includes a total of 56 papers; they were organized in topical sections named: Part I, Human Body, Motion and Behavior: Ergonomics, human factors and occupational health; human body and motion modeling; and language, communication and behavior modeling. Part II, AI, Product and Service: Rethinking healthcare; artificial intelligence applications and ethical issues; and digital human modeling in product and service design.

Business Ethics and Risk Management - Christoph Luetge 2013-12-01

This volume explores various aspects of risk taking. It offers an analysis of financial, entrepreneurial and social risks, as well as a discussion of the ethical implications of empirical findings. The main issues examined in the book are the financial crisis and its implications for business ethics. The book discusses unethical behaviour as a reputational risk (e.g., in the case of Goldman Sachs) and the question is raised as to what extent the financial crisis has changed the banks' entrepreneurial strategy. The book presents an analysis of the reasons leading to the crisis and identifies them as ethical dilemma structures. In addition, it looks at general questions regarding ethical behaviour and risk taking, such as: To what extent does the social embeddedness or abstraction play a role in guaranteeing ethical behaviour? What conclusions can be drawn from institutional or evolutionary perspectives on risk management? Finally, the book discusses further issues that become factors of risk within and between societies, such as work insecurity, corruption or the problem of facilitation payments as a risk in international transactions.

Conduct Risk Management - Roger Miles 2017-01-28

Gives financial service providers the knowledge, insight and practical tools they need to understand the hidden drivers of behaviour, de-bias their customer offering and so avoid fines and imprisonment under the conduct regime.
