**Women in the World's Legal Professions** - Ulrike Schultz 2003-04-08

Women lawyers, less than a century ago still almost a contradiction in terms, have come to stay. Who are they? Where are they? What impact have they had on the profession that had for so long been a bastion of male domination? These are key questions asked in this first comprehensive study of women in the world's legal professions. Answers are based on both quantitative and qualitative analyses, using a variety of conceptual frameworks. 26 contributions by 25 authors present and evaluate the situation of women in the legal

profession in both common and civil law countries in the developed world. 15 countries from four continents are covered: the United States of America, Canada, Australia, New Zealand, England, Israel, Germany, the Netherlands, Poland, Finland, France, Italy, Brazil, Korea, and Japan. The focus ranges from judges and public prosecutors, to law professors, lawyers (attorneys), notaries and company lawyers. National differences are clearly in evidence, but so are common features cutting across national boundaries. Experience of glass ceilings and revolving doors is as widespread and as real as success stories of women lawyers pursuing their own projects.

Ombudsmen at the Crossroads - Nick O'Brien 2017-01-23

This book charts the evolution of the Legal

Services Ombudsman for England and Wales. Established in 1990, it had a statutory remit that explicitly recognized its dual responsibility for consumer dispute resolution and democratic accountability. It was replaced in 2010 by a very different type of ombudsman institution. The book describes how the Ombudsman reconciled its different roles and how far it succeeded in changing the mentality of the legal profession. The authors relate the Ombudsman's successes and failures to current debates facing the ombudsman and regulatory community, and highlight the continuing potential of the ombudsman institution. The ombudsman institution emerges as a 'third way' between the courts and various forms of alternative dispute resolution, and as a creative and democratic means of responding to public grievance.

**Collaborative Practice** - Connie Healy  
2017-09-19

Collaborative practice is a new method of dispute resolution, used mainly in family law matters. By taking a non-adversarial approach, it challenges the strictly positivist view of the lawyer as 'zealous advocate' for the client. As such, it has received much criticism from the established Bar and legal profession. This book provides a doctrinal and empirical analysis of collaborative practice with a view to assessing its place within the dispute resolution continuum and addressing whether this criticism has been justified. It begins by establishing the theoretical underpinnings of conflict and differing approaches to conflict resolution, the impact of the comprehensive law movement and therapeutic jurisprudence. The origins and development of the collaborative process and the framework it provides for a multidisciplinary approach to conflict resolution is outlined. The book addresses the examination of the process undertaken in the lead up to the enactment of the Uniform Collaborative Law Act in 2010; now regarded as a model of best practice. Finally, through an examination of empirical research undertaken in the US, Canada and in England and Wales, and in presenting the results of the first known empirical research into the process in an Irish family law context, the book concludes with an evidenced based analysis of

the process from the perspective of couples who chose to use the collaborative model to resolve the issues surrounding their relationship breakdown, collaborative lawyers and lawyers who do not advocate a non-adversarial approach. As such this book provides a valuable insight into the process which will be of interest to: academics; practising lawyers; members of the judiciary; researchers in the fields of conflict resolution and family law and for students studying alternative dispute resolution (ADR). *Essays in Conveyancing and Property Law in Honour of Professor Robert Rennie* - Frankie McCarthy 2015-05-11

Professor Robert Rennie has been one of the most influential voices in Scots private law over the past thirty years. Highly respected as both an academic and a practitioner, his contribution to the development of property law and practice has been substantial and unique. This volume celebrates his retirement from the Chair of Conveyancing at the University of Glasgow in 2014 with a selection of essays written by his peers and colleagues from the judiciary, academia and legal practice. Each chapter covers a topic of particular interest to Professor Rennie during his career, from the historical development of property law rules through to the latest developments in conveyancing practice and the evolution of the rules of professional negligence. Although primarily Scottish in focus, the contributions will have

much of interest to lawyers in any jurisdiction struggling with similar practical problems, particularly those with similar legal roots including the Netherlands and South Africa. As a whole, the collection is highly recommended to students, practitioners and academics.

*Lawyers in 21st-Century Societies* - Richard L. Abel 2020-04-02

The world's legal professions have undergone dramatic changes in the 30 years since publication of the landmark three-volume *Lawyers in Society*, which launched comparative sociological studies of lawyers. This is the first of two volumes in which scholars from a wide range of disciplines, countries and cultures document and analyse those changes. The present volume presents reports on 46 countries, with broad coverage of North America, Western Europe, Latin America, Asia, Australia, North Africa and the Middle East, sub-Saharan Africa, and former communist countries. These national reports address: the impact of globalisation and neoliberalism on national legal professions (the relationship of lawyers and their professional associations to the state and tensions between state and citizenship); changes in lawyer demography (rapidly growing numbers and the profession's efforts to retain control, the entry of women and

obstacles to full gender equality, ethnic diversity); legal education (the proliferation of institutions and pedagogic innovation); the regulation of lawyers; structures of production (especially the growth of large firms and the impact of technology and paraprofessionals); the distribution of lawyers across roles; and access to justice (state-funded legal aid and pro-bono services). The juxtaposition of the reports reveals the dramatic transformations of professional rationales, labour markets, and working practices and the multiple contingencies of the role of lawyers in societies experiencing increasing juridification within a new geopolitical order.
