the human key condensed - Ted Agon 2016-03-08

This is the ultimate self-improvement book. Why? The three subjects of this book are Thinking, Learning and Communicating. We must improve these three core capabilities before we can have self-improvement. For that matter, we can't have child-improvement or business-improvement for the same reason. If it can't be defined, it can't be improved. What is your definition of each of these basic human qualities of Thinking, Learning and Communicating? This book has definitions that are short (under 12 words) simple sentences. The book goes on to see how applying these definitions we can develop each from infancy on through our older years. If any books or websites that offer us methods to improve thinking, learning or communicating skills and do not offer these basic definitions, how effective can they be? #### **The Marrano Phenomenon** - Agata Bielik-Robson 2019-05-09

What we call here the 'Marrano phenomenon' is still a relatively unexplored fact of modern Western culture: the presence of the borderline Jewish identity which avoids clear-cut cultural and religious attribution, but nevertheless exerts significant influence on modern humanities. Our aim, however, is not a historical study of the Marranos (or conversos), i.e., the mostly Spanish and Portuguese Jews of the 15th and 16th centuries, who were forced to convert to Christianity, but were suspected of retaining their Judaism 'undercover': such an approach already exists and has been developed within the field of historical

research. We rather want to apply the 'Marrano metaphor' to explore the fruitful area of mixture and crossover which allowed modern thinkers, writers, and artists of the Jewish origin to enter the realm of universal communication—without, at the same time, making them relinquish their Jewishness, which they subsequently developed as a 'hidden tradition'. What is of special interest to us is the modern development of the non-normative forms of religious thinking located on the borderline between Christianity and Judaism, from Spinoza to Derrida.

*Audacious Education Purposes* - Fernando M. Reimers 2020-04-23

This open access book offers a comparative study of eight ambitious national reforms that sought to create opportunities for students to gain the necessary breath of skills to thrive in a rapidly changing world. It examines how national governments transform education systems to provide students opportunities to develop such skills. It analyses comprehensive education reforms in Brazil, Finland, Japan, Mexico, Peru, Poland, Portugal and Russia and yields original and important

insights on the process of educational change. The analysis of these 21st century skills reforms shows that reformers followed approaches which are based on the five perspectives: cultural, psychological, professional, institutional and political. Most reforms relied on institutional and political perspectives. They highlight the systemic nature of the process of educational change, and the need for alignment and coherence among the various elements of the system in order. They underscore the importance of addressing the interests of various stakeholders of the

education system in obtaining the necessary impetus to initiate and sustain change. In contrast, as the book shows, the use of a cultural and psychological frame proved rarer, missing important opportunities to draw on systematic analysis of emerging demands for schools and on cognitive science to inform the changes in the organization of instruction. Drawing on a rich array of sources and evidence the book provides a careful account of how education reform works in practice.
