Het doel van dit boek is om de lezers kennis te laten maken met de wetenschap der politiek. In zestien hoofdstukken komen de belangrijkste thema's uit de politiek en de politieke wetenschappen aan de orde. Tezamen geven deze hoofdstukken geen volledig overzicht, maar wel een goede indruk van de onderwerpen waarmee beoefenaren van deze wetenschap zich mee bezig houden. Handbook of Affective Sciences - Richard J Davidson 2009-05-21

One hundred stereotype maps glazed with the

most exquisite human prejudice, especially collected for you by Yanko Tsvetkov, author of the viral Mapping Stereotypes project. Satire and cartography rarely come in a single package but in the Atlas of Prejudice they successfully blend in a work of art that is both funny and thought-provoking. The book is based on Mapping Stereotypes, Yanko Tsvetkov's critically acclaimed project that became a viral Internet sensation in 2009. A reliable weapon against bigots of all kinds, it serves as an inexhaustible source of much needed argumentation and- occasionally-as a nice slab of paper that can be used to smack them across the face whenever reasoning becomes utterly impossible. The Complete Collection version of the Atlas contains all maps from the previously published two volumes and adds twenty five new ones, wrapping the best-selling series in a single extended edition.

De staat van de democratie - 2004

Nederland is nodig toe aan democratische zelfreflectie. Ingrijpende maatschappelijke ontwikkelingen als de verplaatsing van de politiek, mediatisering, Europese integratie, mondialisering, vervreemde burgers en toenemende maatschappelijke complexiteit nopen hiertoe. Maar ook de electorale aardverschuiving van mei 2002 en de recente initiatieven van de minister voor Bestuurlijke Vernieuwing leiden tot veel discussie over de staat van de democratie en 'democratische vernieuwing'. Wat is er aan de hand? En, belangrijker nog, wat is er aan te doen? In deze wrr-Verkenning analyseert en beoordeelt een reeks van deskundigen afkomstig uit

wetenschap, beleid en veld deze uitdagingen aan de democratie. Vervolgens belicht een viertal democratie-experts wat democratische benaderingen voor oplossingen te bieden hebben. Moet het primaat weer bij de politiek worden gelegd, is het referendum het antwoord, is interactief bestuur het panacee of moeten we juist vertrouwen op het vermogen tot zelfbestuur van maatschappelijke organisaties?

Stalking in the Netherlands - Suzan van der Aa 2010

Writing love letters, making phone calls, and sending gifts, these are all seemingly innocuous or even romantic behaviours. This changes, however, when the love expressed in the letters remains unrequited, when the phone calls amount to hundreds a night, or when the gifts consist of bullets and funeral wreaths. When attempts to contact another person happen with a certain duration, nature, and frequency, the behaviour can be qualified as stalking and it can have a detrimental impact on the life of the person subjected to the unwanted attention. The

phenomenon of stalking has not been the topic of much research and this goes all the more for stalking in the Netherlands. In this book, an account is given of the nature and prevalence of the problem, of the effectiveness and the (dis)advantages of resorting to the police, and of the pros and cons of two alternative anti-stalking measures: hiring the services of a private investigation and protection agency and obtaining a civil restraining order. Suzan van der Aa (Tilburg, 1982) studied criminal law at Tilburg University. In September 2005, she started working as a Ph. D. candidate at the International Victimology Institute Tilburg (INTERVICT). In addition, she conducted several applied research projects for third parties, such as the Dutch Ministry of Justice and the European Commission. Recently, she has accepted a position as senior researcher (Universitair Docent) at INTERVICT. This book is her doctoral thesis.

At Spes non Fracta - Marten Gerbertus Buist

2012-12-06

The setting for this study is reflected in the subtitle 'Merchant bankers and diplomats at work.' The aim is to follow the partners in their many and diverse activities: in their relationship towards each other, in their contacts with other houses and in their attitudes towards government officials. Moreover, the author has attempted to show the motives for their commercial and financial actions, where these were discernible. A point of departure such as this implies that the surviving correspondence constitutes the principal source of information. Quantitative data are included, but within this framework their role is subsidiary. Because this book is intended for various categories of readers, it has been divided into three parts. The introductory chapter, which contains an abridged history of Hope & Co. up to 1815, is intended for those whose interest in the subject is of a more general nature. In the same chapter, a number of main themes such as the growth of

foreign loans in the Nether lands and the technique per se of issuing loans are discussed, and attention is devoted to some of the problems of trade and to the question whether Hope & Co. should be viewed as merchants or as bankers. In conclusion, an impression is given of the part played by Amsterdam as a financial centre during the Napoleonic era and of the very exceptional position which Hope & Co. occupied at that time.

From Juvenile Delinquency to Adult Crime: Criminal Careers, Justice Policy, and Prevention - Rolf Loeber 2012-05-09

What makes a juvenile delinquent develop into an adult criminal? What defines-cognitively, developmentally, legally-the transition from juvenile to adult and what determines whether

patterns of criminal behavior persist? In most US states and Western nations, legal adulthood begins at age 18. This volume focuses on the period surrounding that abrupt transition (roughly ages 15-29) and addresses what happens to offending careers during it. Edited by two leading authorities in the fields of psychology and criminology, *Transitions from Juvenile Delinquency to Adult Crime* examines why the period of transition is important and how it can be better understood and addressed both inside and outside of the justice system. Bringing together over thirty leading scholars from multiple disciplines in both North America and Europe, this volume asks critical questions about criminal careers and causation, and whether current legal definitions of adulthood accurately reflect actual maturation and development. The volume also addresses the current efficacy of the justice system in addressing juvenile crime and recidivism, why and how juveniles ought to be treated differently

from adults, if special legal provisions should be established for young adults, and the effectiveness of crime prevention programs implemented during early childhood and adolescence. With serious scholarly analysis and practical policy proposals, *Transitions from Juvenile Delinquency to Adult Crime* addresses what can be done to ensure that today's juvenile delinquents do not become tomorrow's adult criminals.

Empirical Legal Research - Frans L. Leeuw
2016-03-25

Empirical Legal Research describes how to investigate the roles of legislation, regulation, legal policies and other legal arrangements at play in society. It is invaluable as a guide to legal

scholars, practitioners and students on how to do empirical legal research, covering history, methods, evidence, growth of knowledge and links with normativity. This multidisciplinary approach combines insights and approaches from different social sciences, evaluation studies, Big Data analytics and empirically informed ethics. The authors present an overview of the roots of this blossoming interdisciplinary domain, going back to legal realism, the fields of law, economics and the social sciences, and also to civilology and evaluation studies. The book addresses not only data analysis and statistics, but also how to formulate adequate research problems, to use (and test) different types of theories (explanatory and intervention theories) and to apply new forms of literature research to the field of law such as the systematic, rapid and realist reviews and synthesis studies. The choice and architecture of research designs, the collection of data, including Big Data, and how

to analyze and visualize data are also covered. The book discusses the tensions between the normative character of law and legal issues and the descriptive and causal character of empirical legal research, and suggests ways to help handle this seeming disconnect. This comprehensive guide is vital reading for law practitioners as well as for students and researchers dealing with regulation, legislation and other legal arrangements.

How Welfare States Care - Monique Kremer
2007

Though women's employment patterns in Europe have been changing drastically over several decades, the repercussions of this social revolution are just beginning to garner serious attention. Many scholars have presumed that diversity and change in women's employment is based on the structures of welfare states and women's responses to economic incentives and disincentives to join the workforce; How Welfare States Care provides in-depth analysis of women's employment and childcare patterns, taxation, social security, and maternity leave provisions in order to show this logic does not hold. Combining economic, sociological, and

psychological insights, Kremer demonstrates that care is embedded in welfare states and that European women are motivated by culturally and morally-shaped ideals of care that are embedded in welfare states—and less by economic reality.

Principles of Transnational Civil Procedure - American Law Institute 2007-01-29

The ALI (American Law Institute) and UNIDROIT (the International Institute for the Unification of Private Law) are preeminent organizations working together toward the clarification and advancement of the procedural rules of law. Recognizing the need for a “universal” set of procedures that would transcend national jurisdictional rules and facilitate the resolution of disputes arising from transnational commercial transactions, Principles of Transnational Civil Procedure was launched to create a set of procedural rules and principles that would be adopted globally. This work strives to reduce uncertainty for parties that must litigate in unfamiliar surroundings and to promote fairness in judicial proceedings. As recognized standards of civil justice, Principles of Transnational Civil Procedure can be used in judicial proceedings as well as in arbitration. The result is a work that significantly contributes to the promotion of a universal rule of procedural law. The American Law Institute

was organized in 1923 following a study conducted by a group of prominent American judges, lawyers, and law professors. Their recommendation that a lawyers' organization be formed to improve the law and its administration led to the creation of The American Law Institute. UNIDROIT was founded in 1926 as a specialized agency of the League of Nations. It exists as an independent intergovernmental organization on the basis of a multilateral agreement, the UNIDROIT Statute. Its purpose is to study needs and methods for modernizing, harmonizing, and coordinating private laws between states and groups of states and to prepare legislative texts for consideration by governments.

Litigation, Costs, Funding and Behaviour - Willem H. van Boom 2016-12-08

This collection explores the practical operation of the law in the area of litigation costs and funding, and confronts the issue of how exposure to cost risks affects litigation strategy. It looks at

the interaction of the relevant legal regime, regulatory framework and disciplinary rules with the behaviour of litigants, courts and legislatures, examining subjects such as cost rules and funding arrangements. The book discusses a wide range of topics such as cost-shifting rules, funding and mass tort litigation, cost rules and third-party funding (TPF) rules in specific areas such as intellectual property (IP) litigation, commercial arbitration, investment arbitration, the role of legal expense insurance arrangements, fee regulation and professional ethics. The contributors include renowned scholars, experts in their respective fields and well-versed individuals in both civil procedure and the practice of litigation, arbitration and

finance. Together, they present a broad approach to the issues of costs, cost-shifting rules and third-party funding. This volume adds to the existent literature in combining topics in law and practice and presents an analysis of the most recent developments in this fast developing area.
