Teaching with DBQs - Kevin Thomas Smith 2018-03-09

Help your students navigate complex texts in history and social studies. This book shows you how to use document-based questions, or DBQs, to build student literacy and critical thinking skills while meeting rigorous state standards and preparing students for AP exams. DBQs can be implemented year-round and can be adjusted to meet your instructional needs. With the helpful advice in this book, you'll learn how to use DBQs to teach nonfiction and visual texts, including primary and secondary sources, maps, and paintings. You'll also get ideas for teaching students to examine different points of view and write analytical responses. Topics include: Using the SOAPSETone (Speaker, Occasion, Audience, Purpose, Subject, Evidence and Tone) technique to to analyze visual and nonvisual texts; Teaching students to distinguish between primary and secondary sources; Working with multiple texts and learning to recognize the relationships between them; Formulating DBQs to suit different types of assessment, including short-answer questions, multiple-choice questions, and in-class essay prompts; Evaluating student responses and providing constructive feedback.

Research-Based Unit and Lesson Planning - Marie Menna Pagliaro 2012-01-16

By integrating the best of current research and practice in curriculum planning this book presents that comprehensive topic in a manageable form. Examples throughout are representative of different grade levels and subjects areas. It should be understood at the outset that the content offered for curriculum planning is not a rigid prescriptive formula but a careful and purposeful thought process that must be considered to obtain optimal results. In addition to developing knowledge about curriculum and instructional planning (what teachers should know), this book offers an innovative method for translating that knowledge into performance (what teachers are able to do). Knowledge is implemented by the use of coaching rubrics, sets of criteria for developing performance. Though readers will receive a thorough background in the planning process just from the content itself, its potential will be fully realized when readers also use the coaching rubrics.

Assessing Historical Thinking and Understanding - Bruce A. VanSledright 2013-07-31

Assessing Historical Thinking and Understanding advocates for a fundamental change in how educators think about making sense of learners' developing cognition and understanding in history. Author Bruce VanSledright argues that traditional and typical standardized testing approaches are seldom up to the task of measuring the more complex understandings students are asked to attain, as they cannot fully assess what the student knows. Rather, he points forward along a path toward changes in learning, teaching, and assessing that closely aligns with the Common Core State Standards. He delves into the types of history knowledge the standards require, illustrates how they can be applied in-use in history learning contexts, and theorizes how the standards might fit together cognitively to produce deep historical understandings among students in teaching-learning contexts. By providing a variety of assessment strategies and items that align with the standards, and identifying rich, useful assessment rubrics applicable to the different

types of assessments, he offers an important resource for social studies teachers and curriculum writers alike.

[A Handbook for History Teachers](#) - James A. Duthie 2012-09-28

History is not a mere chronicle of facts, but a dialogue between competing interpretations of the past; it should be taught as such. Teaching history in this way makes it both intellectually demanding and more interesting, while at the same time helps students acquire the knowledge and skills necessary to become functioning citizens in a democracy. The opening chapters provide the rationale for the study of history, its epistemological basis, and the logic of the discipline. The bulk of the book deals with practical ways to help students acquire, process, and apply information. In particular, it addresses the specific thinking skills required by the discipline, with many effective techniques for helping students to master them. The implications of this approach for teacher evaluation of student work are also addressed.
