Windvane Report - Peter Foerthmann 2021-05-18
Peter Foerthmann has been the first port of call for bluewater sailors seeking advice in steering matters for decades. His unrivalled expertise - the product of a lifetime developing and manufacturing windvane self-steering systems and contemplating their every complexity - continues to draw enquiries from all over the world. Now available in six languages, his specialist books present the state of the art and

provide reassurance - should any be needed - that the fundamental rules of physics still apply in a world increasingly dominated by bits and bytes. This book recounts both the author's personal history of almost half a century in the windvane self-steering segment of the international marine industry and the story of how a business that once built everything by hand has managed to transform itself into what must surely be one of the smallest high-tech

engineering companies in existence. The Windvane Report shares the milestones of the author's progress over the decades and recounts some of the remarkable disputes that have erupted in the sector as well as discussing and comparing important technical developments in the field. A roller-coaster ride through the highs and lows of a life on and by the water, this book offers the reader a wide-ranging insight into how Windpilot and the man behind it came to be what they are today.

the miles slipped beneath the tyres of their big BMWs, their troubles started. Exhaustion, injury and accidents tested their strength. Treacherous roads, unpredictable weather and turbulent politics challenged their stamina. They were chased by paparazzi in Kazakhstan, courted by men with very large guns in the Ukraine, hassled by the police, and given bulls' testicles for supper by Mongolian nomads. And yet despite all these obstacles they managed to ride more than twenty thousand miles in four months, changing their lives forever in the process. As they travelled they documented their trip, taking photographs, and writing diaries by the campfire. Long Way Round is the result of their adventures - a fascinating, frank and highly entertaining travel book about two friends riding round the world together and, against all the odds, realising their dream.

the age of twenty. She knows there is a whole world beyond that razor wire just calling out to be explored. Behind the Ride - David Mumpower 2019-08

Behind the Pixie Dust Curtain Every Disney attraction comes with a story, and every story involves a few tricks of the trade that only Imagineers know. Here's your chance to peek behind the curtain and learn some of the secrets about thirty of the most popular Disney theme park rides. David Mumpower takes you behind-the-scenes at Disneyland and Walt Disney World to reveal the inner workings of your favorite attractions. He'll explain why Walt Disney chose many of these rides, and he'll describe the challenges that Imagineers faced in doing the impossible by bringing them to life. Mumpower begins with the story of how a Russian monarch's love of sledding

indirectly led to the invention of the modern roller coaster. Then, he details the physical and thematic obstacles that Imagineers overcame to build iconic attractions like Pirates of the Caribbean, Space Mountain, and Mr. Toad's Wild Ride. Of course, some of the best Disney rides are more recent. Mumpower also examines the difficulties in developing cutting-edge attractions like Avatar Flight of Passage, Radiator Springs Racers, and Slinky Dog Dash. Mumpower covers opening day rides still in operation today as well as some of the most recent additions to the vaunted Disney theme park lineup. He discusses all of these ride experiences plus the tricks that make them possible--and magical. If you've ever gotten off a Disney ride and wondered how they did it, or if you're the type of fan who'd rather examine an attraction than experience it, or maybe you'd like to be an Imagineer yourself someday, this is the book you've been waiting for.

her grandmother's house for seven years before escaping north to freedom. She published an autobiography of her life, *Incidents in the Life of a Slave Girl*, which was one of the first open discussions about sexual abuse endured by slave women. She was an active abolitionist, associated with Frederick Douglass, and, during the Civil War, used her celebrity to raise money for black refugees. After the war, she worked to improve the conditions of newly-freed slaves. As a former Special Agent for the Department of Homeland Security who has seen the horrors and carnage of war, Timothy Ballard founded a modern-day "underground railroad" which has rescued hundreds of children from being fully enslaved, abused, or trafficked in third-world countries. His story includes the rescue and his eventual adoption of two young siblings--Mia and Marky, who were born in Haiti. Section 2 features the lives of five abolitionists, a mix of heroes from past to present, who call

us to action and teach us life lessons based on their own experiences: Harriet Tubman--The "Conductor"; Abraham Lincoln--the "Great Emancipator"; Little Mia--the sister who saved her little brother; Guesno Mardy--the Haitian father who lost his son to slave traders; and Harriet Jacobs--a teacher for us all.
