Inventing a Discipline - Maureen Daly Goggin 2000

Heeding the call of noted rhetoric scholar Richard E. Young to engage in serious, scholarly investigations of the assumptions that underlie established practices and habits about writing, the contributors to this critical volume study a diverse array of disciplinary issues, situate their work in a wide matrix of theoretical perspectives, and engage in multiple modes of inquiry and in multiple discourses. In section 1, the authors consider the history, present state, and potential future directions of the research, scholarship, and pedagogies of the field. Section 2 presents the theoretical, historical, and empirical investigations of particular kinds of rhetorical theories and practices. Section 3 offers discussions of specific writing programs and pedagogical approaches. After an introduction by Maureen Daly Goggin, essays in the book are: (1) "A Rhetoric for Literate Society: The Tension between Expanding Practices and Restricted Theories" (Charles Bazerman); (2) "Accounting for 'Well-Worn Grooves': Composition as a Self-Reinforcing Mechanism" (Maureen Daly Goggin and Steve Beatty); (3) "Cross-Disciplinarity in Rhetorical Scholarship?" (Janice M. Lauer); (4) "Shaping Sophisticates: Implications of the Rhetorical Turn for Rhetoric Education" (Joseph Petraglia); (5) "Rhetoric and the Ecology of the Noosphere" (Robert Inkster); (6) "The Modesty of Aristotle's 'Rhetoric'" (Eugene Garver); (7) "Classical Rhetoric in American Writing Textbooks, 1950-1965" (Karen Rossi Schnakenberg); (8) "Reinventing Memory and Delivery" (Winifred Bryan Horner); (9) "From Heuristic to Aleatory Procedures; Or, Toward 'Writing the Accident'" (Victor J. Vitanza); (10) "Bridging the Gap: Integrating Visual and Verbal Rhetoric" (Lee Odell and Karen McGrane); (11) "Inventing the American Research University: Nineteenth-Century American Science and the New Middle Class" (Danette Paul and Ann M. Blakeslee); (12) "Scientific Writing and Scientific Thinking: Writing the Scientific Habit of Mind" (Carol Berkenkotter); (13) "The Rhetoric of Social Action: College Mentors Inventing the Discipline" (Elenore Long); (14) "WAC, WHACK: You're an Expert--NOT!" (Sam Watson); (15) "Can Writing Be Taught? Being 'Explicit' in the Teaching and Learning of Writing across the Curriculum" (Stuart Greene and Rebecca Schoenike Nowacek); (16) "Notes on the Evolution of Network Support for Writing across the Curriculum" (Mike Palmquist); and (17) "Pedagogical Invention and Rhetorical Action in Writing across the Curriculum" (Jo-Ann M. Sipple, William L. Sipple, and J. Stanton Carson). (Each chapter contains references.) (RS)

Nelson Physics 12 - Alan J. Hirsch 2003

Nelson Physics 12 provides a rigorous, comprehensive, and accurate treatment of all concepts and processes presented in Ontario's Physics, Grade 12, university Preparation course (SPH4U). This resource thoroughly equips students with the independent learning, problem-solving, and research skills that are essential to successfully meet the entrance requirements for university programs. Complex Physics concepts are presented in a clear, understandable fashion and key concepts, such as static equilibrium, are treated in greater depth than specified in the curriculum.

Towards a Sustainable Philosophy of Endurance Sport - Ron Welters 2019-02-05

This book provides new perspectives on endurance sport and how it contributes to a good and sustainable life in times of climate change, ecological disruption and inconvenient truths. It builds on a continental philosophical tradition, i.e. the philosophy of among others Peter Sloterdijk, but also on "ecosophy" and American pragmatism to explore the idea of sport as a voluntary attempt to overcome unnecessary obstacles. Since ancient times, human beings have been involved in practices of the Self in order to work on themselves and improve themselves, for instance by strengthening their physical condition and performance through sport. In the contemporary world, millions of individuals engage in endurance sports such as running, swimming and cycling, to get or keep themselves in shape. This study focuses on the ethical dimension of long-distance sport, notably cycling, as a way to become better citizens, but also to contribute to a more sustainable society and healthier planet. Dominant world-views are challenged and an alternative vision is presented. Discourse analysis and conceptual analysis are combined with phenomenology and self-observations of a dedicated practitioner of endurance sport. This book is a great source for philosophers, sport philosophers, environmental philosophers, sport scientists, policy makers, sport journalists, and endurance sport practitioners.

Intellectual Property Law in Cyberspace - G. Peter Albert 1999

Cybercases & the Internet add new dimensions to the law of trademarks, copyrights, trade secrets, & patents. In this timely resource, the authors analyze these areas of I.P. law & how each interacts with information in the unique situations of cyberspace. You get unmatched guidance on examining & handling cases that involve questions about protecting & enforcing I.P. rights as they relate to the Internet, including: * administrative dispute resolution policies proposed & implemented by domain name registrars--& how to protect registrations from challenges * application of trademark law to Internet issues such as metatags, hyperlinking, framing, & spamming * infringement, defenses, & criminal penalties as applied to Internet technologies such as digital watermarks & World Wide Web text, graphics, & sound files * what Internet Service Providers (ISPs) need to understand about the Online Copyright Infringement Liability Limitation Act * how WWW sites, bulletin board postings, & Internet e-mail are posing fundamental challenges to various trade secret doctrines * recent enforcement actions of Internet technology & software patents * plus details on the domain name system, how to register domain names, & more. Use this resource to stay on the edge of Internet I.P. law; examine the cases that are setting precedents; & prepare, argue, & win your cases in this expanding area.

Brain and Art - Bruno Colombo 2019-08-29

This book analyzes and discusses in detail art therapy, a specific tool used to sustain health in affective developments, rehabilitation, motor skills and cognitive functions. Art therapy is based on the assumption that the process of making art (music, dance, painting) sparks emotions

and enhances brain activity. Art therapy is used to encourage personal growth, facilitate particular brain areas or activity patterns, and improve neural connectivity. Treating neurological diseases using artistic strategies offers us a unique option for engaging brain structural networks that enhance the brain's ability to form new connections. Based on brain plasticity, art therapy has the potential to increase our repertoire for treating neurological diseases. Neural substrates are the basis of complex emotions relative to art experiences, and involve a widespread activation of cognitive and motor systems. Accordingly, art therapy has the capacity to modulate behavior, cognition, attention and movement. In this context, art therapy can offer effective tools for improving general well-being, quality of life and motivation in connection with neurological diseases. The book discusses art therapy as a potential group of techniques for the treatment of neurological disturbances and approaches the relationship between humanistic disciplines and neurology from a holistic perspective, reflecting the growing interest in this interconnection.

Grimoire for the Apprentice Wizard - Oberon Zell-Ravenheart 2004-02-04

With contributions and additional material from Raymond Buckland, Raven Grimassi, Patricia Telesco, Morning Glory Zell-Ravenheart, and other illustrious members of The Grey Council, here is the book Merlin would have given a young Arthur...if only it had existed. This essential handbook contains everything an aspiring Wizard needs to know. It is profusely illustrated with original art by Oberon and friends, as well as many woodcuts from medieval and alchemical manuscripts—plus charts, tables, and diagrams. It also contains: Biographies of famous Wizards in history and legend; Descriptions of magickal tools and regalia (with full instructions for making them); spells and workings for a better life; rites and rituals for special occasions; a bestiary of mythical creatures; systems of divination; the Laws of Magick; myths and stories of gods and heroes; lore and legends of the stars and constellations; instructions for performing amazing illusions, special effects, and many other wonders of the magickal multiverse. To those who study the occult, in particular, Witchcraft, the name of Oberon Zell-Ravenheart is internationally-known and respected. He is a genuine Wizard, and he has written this book for any person wishing to become one. Perhaps, as some have written, Oberon Zell-Ravenheart is the real Albus Dumbledore to aspiring Harry Potters! In addition to his own writings in this collection, he also presents other writers who add some highly thoughtful insights. Such as

Raymond Buckland, among others. The illustrations and photographs which accompany the text are among the finest found anywhere, and are a helpful boon to those wanting to see what they are reading about. Biographies of many famous Wizards of history and legend appear in the book. Detailed descriptions of magickal tools with information for making them appears in this book. Additional information includes rites and rituals for special occasions, a bestiary of mythical creatures, a detailed and educational discussion on the laws of magick, myths, and lore of the stars and constellations. This book is full of instructions! As a handbook and guide for becoming a Wizard, this is as near perfect and honest a book as one will find today. New Page Books has done a great service to the paranormal and occult community readers by publishing this worthwhile reference book. Oberon Zell-Ravenheart has written a classic on Wizardry. This is his masterpiece. One of the American pioneers of Paganism in the United States, his lifetime of learning and information is shared with readers from all walks of life. He started in 1968 with the publication of his award-winning journal, Green Egg, and is often considered by readers as one of their favorite Pagan writers. The lessons in this fine book are accurate, honest, and entertaining. If you want to become a Wizard, this is the book to start with, and learn from. This Grimoire is must-have reading for readers interested in true magick. The information given on ghosts will hold the reader spellbound, as will all information in this reference book!

This Contentious Storm: An Ecocritical and Performance History of King Lear - Jennifer Mae Hamilton 2017-08-24

This book is available as open access through the Bloomsbury Open Access programme and is available on www.bloomsburycollections.com. From providential apocalypticism to climate change, this ground-breaking ecocritical study traces the performance history of the storm scene in King Lear to explore our shifting, fraught and deeply ideological relationship with stormy weather across time. This Contentious Storm offers a new ecocritical reading of Shakespeare's classic play, illustrating how the storm has been read as a sign of the providential, cosmological, meteorological, psychological, neurological, emotional, political, sublime, maternal, feminine, heroic and chaotic at different points in history. The big ecocritical history charted here reveals the unstable significance of the weather and mobilises details of the play's dramatic narrative to figure the weather as a force within self, society and planet.

Introduction to Thermal Systems Engineering - Michael J. Moran 2002-09-17

This survey of thermal systems engineering combines coverage of thermodynamics, fluid flow, and heat transfer in one volume. Developed by leading educators in the field, this book sets the standard for those interested in the thermal-fluids market. Drawing on the best of what works from market leading texts in thermodynamics (Moran), fluids (Munson) and heat transfer (Incropera), this book introduces thermal engineering using a systems focus, introduces structured problem-solving techniques, and provides applications of interest to all engineers. *Improving Real-time Train Dispatching* - Andrea D'Ariano 2008

Being Modern - Robert Bud 2018-10-10

In the early decades of the twentieth century, engagement with science was commonly used as an emblem of modernity. This phenomenon is now attracting increasing attention in different historical specialties. Being Modern builds on this recent scholarly interest to explore engagement with science across culture from the end of the nineteenth century to approximately 1940. Addressing the breadth of cultural forms

in Britain and the western world from the architecture of Le Corbusier to working class British science fiction, *Being Modern* paints a rich picture. Seventeen distinguished contributors from a range of fields including the cultural study of science and technology, art and architecture, English culture and literature examine the issues involved. The book will be a valuable resource for students, and a spur to scholars to further examination of culture as an interconnected web of which science is a critical part, and to supersede such tired formulations as 'Science and culture'.

The Act of Will - Dorothy T. Firman 2010-03

This is Dr. Roberto Assagioli's second book on the psychological system he formulated known as Psychosynthesis. It continues where his first book left off and delves into the important process of willing as a psychological function based on a higher self rather on guilt or determination as in the Victorian concept of the will.

A Thesaurus of English Word Roots - Horace Gerald Danner 2014-03-27

Horace G. Danner's *A Thesaurus of English Word Roots* is a compendium of the most-used word roots of the English language. As Timothy B. Noone notes in his foreword: "Dr. Danner's book allows you not only to build up your passive English vocabulary, resulting in word recognition knowledge, but also gives you the rudiments for developing your active English vocabulary, making it possible to infer the meaning of words with which you are not yet acquainted. Your knowledge can now expand and will do so exponentially as your awareness of the roots in English words and your corresponding ability to decode unfamiliar words grows apace. This is the beginning of a fine mental linguistic library: so enjoy!" In *A Thesaurus of English Word Roots*, all word roots are listed alphabetically, along with the Greek or Latin words from which they derive, together with the roots' original meanings. If the current meaning of an individual root differs from the original meaning, that is listed in a separate column. In the examples column, the words which contain the root are then listed, starting with their prefixes, for example, dysacusia, hyperacusia. These root-starting terms then are followed by terms where the root falls behind the word, e.g., acouesthesia and acoumeter. These words are followed by words where the root falls in the middle or the end, as in such terms as bradyacusia and odyacusis.. In this manner, *A Thesaurus of English Word Roots* places the word in as many word families as there are elements in the word. This work will interest linguists and philologists and anyone interested in the etymological aspects of English language.

Histories of Technology, the Environment and Modern Britain -

Jon Agar 2018-04-09

Histories of Technology, the Environment and Modern Britain brings together historians with a wide range of interests to take a uniquely wide-lens view of how technology and the environment have been intimately and irreversibly entangled in Britain over the last 300 years. It combines, for the first time, two perspectives with much to say about Britain since the industrial revolution: the history of technology and environmental history. Technologies are modified environments, just as nature is to varying extents engineered. Furthermore, technologies and our living and non-living environment are both predominant material forms of organisation - and self-organisation - that surround and make us. Both have changed over time, in intersecting ways. Technologies discussed in the collection include bulldozers, submarine cables, automobiles, flood barriers, medical devices, museum displays and biotechnologies. Environments investigated include bogs, cities, farms, places of natural beauty and pollution, land and sea. The book explores this diversity but also offers an integrated framework for understanding these intersections.

Materials for Advanced Power Engineering 1994 - D. Coutsouradis 1994

The role of energy in the modern world goes beyond mere technology and economics to influence welfare, the environment, the quality of life and, in broad terms, civilization itself. Since the Industrial Revolution, energy conservation technology has been at the forefront of the innovation required to satisfy the needs of mankind and, more than any other, this technology has always depended on the performance of the materials used.

New Century Senior Physics - Richard Walding 2004

New Century Senior Physics meets the global objectives of the 2007 Queensland Senior Physics syllabus in terms of Knowledge and Conceptual Understanding, Scientific Investigation and Evaluating and Concluding. All 10 key concepts of the syllabus have been developed in

varied contexts along with an extensive range of mandatory and elective key ideas. Key Features: A contextual approach throughout--each chapter begins with questions, problems or situations that experienced teachers have found to spark students' interest A familiar format allowing students to quickly find information, whatever the context they may be studying Teachers can develop contexts of their own choosing without restriction to a narrow set of pre-chosen contexts An easy to follow progression through focus questions to the underlying key concepts and ideas Many and varied contextualised questions, problems and puzzles, including traditional closed-response questions as well as open-ended and stimulus-response questions - all essential for understanding 'Novel Challenge' questions - drawn from unfamiliar situations and designed to develop the higher order thinking (HOT) skills End-of-chapter review questions - ranging from simpler practice questions requiring straightforward use of principles and problem-solving (one and two star difficulty) to more challenging extension questions (three stars) requiring HOT skills A focus on the tentative nature of scientific knowledge where throughout history accidents and serendipity have gone hand-in-hand with scientific investigation An open, 'chatty' writing style that speaks directly to students but with sufficient depth to cover information they will need for tertiary studies in science and other physics-related areas such as engineering, medical science, computing, human movement etc. Gender-balanced contexts using material drawn from boys' and girls' spheres of experience icon-coded stimulus ideas for experimental and non-experimental investigations suggested by physics teachers throughout the state Online Support Visit the authors' Web Page containing on-line worked solutions to the end-of-chapter extension (challenging, complex, novel) questions and the Novel Challenge text-box questions, suggestions for Extended Experimental Investigations and hints to students who are about to undertake them, as well as a host of other resource material useful in developing a school work program. Shiny Shoes - Mark Coyer 2022-02-22

A corporate CEO doesn't like where his company or his life is heading--cheating, manipulation, and just heading down the wrong path. As a young man, he saw this type of thing in his father's company and remembers that is exactly why he started his own business. He didn't like what it did to his father and definitely doesn't want the same thing for his family. He knows the finance field is tough, but there must be a way to run this business with ethics, values, and morals. He notices one of his junior employees has something unique and interesting about the way he handles his challenges. He doesn't know much about the finance industry but is aware that problems exist within the company. Despite this, he seems happy, and it appears he handles things well, from the cheating salesmen to obnoxious customers. The CEO devises a plan for them to meet, and they immediately become great friends. Together they develop solutions for the company's problems. However, the biggest problem is that the CEO realizes the reason for his personal unhappiness and doesn't like what faces him. After asking his newfound friend for help to solve the problems with himself and his company, he finds himself in serious trouble. This trouble can only be handled by one source, and the new friend knows what it is. The CEO goes down while the friend goes up. Now who works for whom? That is the question for all of us. The truth will surprise you.

500 Years of New Words - Bill Sherk 2004-09-01

500 Years of New Words takes you on an exciting journey through the English language from the days before Shakespeare to the first decade of the 21st century. All the main entries are arranged not alphabetically but in chronological order based on the earliest known year that each word was printed or written down. Beginning with "America" in 1507 and spanning the centuries to "Marsiphobiphiliac" in 2004 (a person who would love to go to Mars but is afraid of being marooned there), this book can be opened at any page and the reader will discover a dazzling array of linguistic delights. In other words, this book is unputdownable (the main entry for 1947). If Shakespeare were alive today, he would buy this book.

Guy Debord, the Situationist International, and the Revolutionary Spirit - James Trier 2019-07-15

Guy Debord, the Situationist International, and the Revolutionary Spirit presents a history of the two avant-garde groups that French filmmaker and subversive strategist Guy Debord founded and led: the Lettrist International (1952-1957) and the Situationist International (1957-1972). *The Foundations of Phenomenological Psychotherapy* - Giampiero Arciero 2018-05-30

This book addresses selected central questions in phenomenological psychology, a discipline that investigates the experience of self that emerges over the course of an individual's life, while also outlining a new method, the formal indication, as a means of accessing personal experience while remaining faithful to its uniqueness. In phenomenological psychology, the psyche no longer refers to an isolated self that remains unchanged by life's changing situations, but is rather a phenomenon (ipseity) which manifests itself and constantly takes form over the course of a person's unique existence. Thus, the formal indication allows us to study the way in which ipseity relates to the world in different situations, in a way that holds different meanings for different people. Based on this new approach, phenomenological psychotherapy marks a transition from a mode of grasping the truth about oneself through reflection, to a mode of accessing the disclosure of self through a work of self-transformation (the care of self) that requires the person to actually change her position on herself. By putting forward this method, the authors shed new light on the dynamic interplay between a person's historicity and uniqueness on the one hand, and the related physiopathological mechanisms on the other, providing evidence from the fields of genetics, cardiology, the neurosciences and psychiatry. The book will appeal to a broad readership, from psychiatrists, psychologist and psychotherapists, to researchers in these fields.
