City of Fear - Robin David 2013-09-01

An extraordinary account of ordinary people in troubled times In 2001, a calamitous earthquake struck Gujarat. A year later came the kind of communal carnage the nation had not seen since the Partition. For Robin David, then an assistant editor with the Times of India, the two events engendered a tectonic shift in his own life. The earthquake left deep cracks in his ancestral home, while the riots undermined all the certainties of life, making it impossible to walk through hitherto familiar neighbourhoods. A decade later, the wounds have not healed. At a time when the memory of the riots has already faded in the minds of many, *City of Fear* documents the varied forms of fear that people in Gujarat experienced during that period, especially those of the author's own Indian Jewish Bene Israeli family.

This is the first book to set out to delineate different ways of studying and theorising Arab subcultural groups and practices, including film, graffiti, music, live art performances, Arab techies and youth cultures. Contributors tackle a number of questions including: How is the study of Arab subcultures to be theorised? How are we to analyse such creative processes in a new worldliness characterised by trans-temporality and trans-subjectivity? *Arab Subcultures* effectively opens up a critical and interdisciplinary dialogue about Arab subcultures with different fields of enquiry, including anthropology, philosophy, art criticism and cultural studies, at the heart of which lies the key intellectual task of re-imagining the uneasy relation between aesthetics and politics in the age of revolutions.

Legal Principles for Combatting Cyberlaundering - Daniel Adeoyé Leslie
2014-07-18

This volume deals with the very novel issue of cyber laundering. The book investigates the problem of cyber laundering legally and sets out why it is of a grave legal concern locally and internationally. The book looks at the current state of laws and how they do not fully come to grips with the problem. As a growing practice in these modern times, and manifesting through technological innovations, cyber laundering is the birth child of money laundering and cybercrime. It concerns how the internet is used for 'washing' illicit proceeds of crime. In addition to exploring the meaning and ambits of the problem with concrete real-life examples, more importantly, a substantial part of the work innovates ways in which the dilemma can be curbed legally. This volume delves into a very grey area of law, daring a yet unthreaded territory and scouring undiscovered paths where money laundering, cybercrime, information technology and international law converge. In addition to unearthing such complexity, the hallmark of this book is in the innovative solutions and dynamic remedies it postulates.

Islam and the West - Sadia Zulfiqar 2015-06-18

Islam, like the West, is not a homogenous monolith. However, Islam is most commonly represented in the West in terms of suicide bombing, suppressed and veiled women, and internal and external conflict. These depictions of Islam suggest that the relationship between Islam and the West is, and has always been, one of hostility and hatred. However, this collection locates threads of connection and 'love' between Islam and the West, and argues that it is important to bring them to the forefront i ...

Popular Religion in Modern China - Lan Li 2016-03-23

Since the early 1980s, China's rapid economic growth and social transformation have greatly altered the role of popular religion in the country. This book makes a new contribution to the research on the phenomenon by examining the role which popular religion has played in modern Chinese politics. *Popular Religion in Modern China* uses Nuo as an example of how a popular religion has been directly incorporated into the Chinese Community Party's (CCP) policies and how the religion functions as a tool to maintain socio-political stability, safeguard national unification and raise the country's cultural 'soft power' in the eyes of the world. It provides rich new material on the interplay between contemporary Chinese politics, popular religion and economic development in a rapidly changing society.

Concepts of Music and Copyright - Andreas Rahmatian 2015-10-30

Copyright specialists have often focused on the exploitation of copyright of music and on infringement, but not on the question of how copyright conceptualises music. This highly topical volume brings together specialists in music, musicology and copyright law, providing a genuinely interdisciplinary research approach. It compares and contrasts the

concepts of copyright law with those of music and musical performance. Several tensions emerge between the ideas of music as a living art and of the musical work as a basis for copyright protection. The expert contributors discuss the notions of the musical work, performance, originality, authorship in music and in copyright, and co-ownership from the disciplinary perspectives of music, musicology and copyright law. The book also examines the role of the Musicians' Union in the evolution of performers' rights in UK copyright law, and, in an empirical study, the transaction costs theory for notice-and-takedown regimes in relation to songs uploaded on YouTube. This unique study offers an interdisciplinary perspective for academics, policymakers and legal practitioners seeking a state-of-the-art understanding of music and copyright law.

Ethical Trade, Gender and Sustainable Livelihoods - Kiah Smith 2014-03-21

Fair and ethical trade is often criticized for being highly gendered, and for institutionalizing the ethical values of consumers, the priorities of NGOs and governments, and most of all, food retailers. But little is known about how women smallholder farmers experience diverse ethical standards, or whether and how standards reflect their values, local cultural and environmental contexts, or priorities for achieving sustainable livelihoods. Linking gender, smallholder livelihoods and global ethical trade regulations, this book reveals that multiple understandings of social justice, environmental sustainability and well-being - or ethicality - exist in parallel to those institutionalized in ethical trade schemes. Through an in-depth case study of smallholder subsistence and French bean farming in Kenya, the book grounds the analysis of livelihoods, gender and ethical trade in women smallholders' perspectives, links the macro level of markets with the micro level of livelihoods, and engenders relations of power, structure and agency in food networks. It brings together disparate bodies of theory to illustrate the knowledge, strategies and values of women smallholder farmers that are often beyond the scope of ethical trade regulations. It also provides a challenging new vision for doing food systems research.

Potiphar's Wife - Kieran Tapsell 2014-03-01

English summary: The cover-up of child sexual abuse by the Catholic Church has been occurring under the pontificate of six popes since 1922. For 1500 years, the Catholic Church accepted that clergy who sexually abused children deserved to be stripped of their status as priests and then imprisoned. A series of papal and Council decrees from the twelfth century required such priests to be dismissed from the priesthood, and then handed over to the civil authorities for further punishment. That all changed in 1922 when Pope Pius XI issued his decree *Crimen Sollicitationis* that created a de facto privilege of clergy by imposing the secret of the Holy Office on all information obtained through the Church's canonical investigations. If the State did not know about these crimes, then there would be no State trials, and the matter could be treated as a purely canonical crime to be dealt with in secret in the Church courts. Pope Pius XII continued the decree. Pope John XXIII reissued it in 1962. Pope Paul VI in 1974 extended the reach of pontifical secrecy to the allegation itself. Pope John Paul II confirmed the application of pontifical secrecy in 2001, and in 2010, Benedict XVI even extended it to allegations about priests sexually abusing intellectually disabled adults. In 2010, Pope Benedict gave a dispensation to pontifical secrecy to allow reporting to the police where the local civil law required it, that is, just enough to keep bishops out of jail. Most countries in the world do not have any such reporting laws for the vast majority of complaints about the sexual abuse of children. Pontifical secrecy, the cornerstone of the cover up continues. The effect on the lives of children by the imposition of the Church's Top Secret classification on clergy sex abuse allegations may not have been so bad if canon law had a decent disciplinary system to dismiss these priests. The 1983 Code of Canon Law imposed a five year limitation period which virtually ensured there would be no canonical trials. It required bishops to try to reform these priests before putting them on trial. When they were on trial, the priest could plead the Vatican Catch 22 defence he should not be dismissed because he couldn't control himself. The Church claims that all of this has changed. Very

little has changed. It has fiddled around the edges of pontifical secrecy and the disciplinary canons. The Church has been moonwalking.

Carbon Governance, Climate Change and Business Transformation - Adam Bumpus 2014-07-17

Transformation to a low carbon economy is a central tenet to any discussion on the solutions to the complex challenges of climate change and energy security. Despite advances in policy, carbon management and continuing development of clean technology, fundamental business transformation has not occurred because of multiple political, economic, social and organisational issues. Carbon Governance, Climate Change and Business Transformation is based on leading academic and industry input, and three international workshops focused on low carbon transformation in leading climate policy jurisdictions (Canada, USA and the UK) under the international Carbon Governance Project (CGP) banner. The book pulls insights from this innovative collaborative network to identify the policy combinations needed to create transformative change. It explores fundamental questions about how governments and the private sector conceptualize the problem of climate change, the conditions under which business transformation can genuinely take place and key policy and business innovations needed. Broadly, the book is based on emerging theories of multi-levelled, multi-actor carbon governance, and applies these ideas to the real world implications for tackling climate change through business transformation. Conceptually and empirically, this book stimulates both academic discussion and practical business models for low carbon transformation.

Reimagining Social Movements - Henri Lustiger-Thaler 2016-12-05

The social scientific study of social movements remains largely shaped by categories, concepts and debates that emerged in North Atlantic societies in the late 1960s and early 1970s, namely resource mobilization, framing, collective identity, and new social movements. It is now, however, increasingly clear that we are experiencing a profound period of social transformation associated with online interactivity, informationalization and globalization. Written by leading experts from around the world, the chapters in this book explore emerging forms of movement and action not only in terms of the industrialized countries of the North Atlantic, but recognizes the importance of globalizing forms of action and culture emerging from other continents and societies. This is the first book to bring together key authors exploring this transformation in terms of action, culture and movements. It not only engages with critical transformations in the nature of collective action, but also makes a significant contribution to the globalizing of sociology.

Black Brands - Fernando Olivares 2019-07-01

Who manufactures cereal for Kellogg's? Why are the Mercedes Smart and the Renault Twingo almost identical? Do Danone and Nestlé really manufacture everything they make us believe they manufacture? Is Zara an opaque or a transparent brand? Why do some companies claim "we do not manufacture for other brands" when yet they hide from us the fact that sometimes "other brands manufacture for them"? The number of companies outsourcing the whole of their production for their brands in

an opaque manner is constantly increasing while they disregard the legitimate need for information and communication of the general public and consumers. Paradoxically, in this age of transparency opacity is ever growing among well-known brands in every industrial sector. *Black Brands (in the Age of Transparency)* is an extraordinary piece of work on truths and lies, on transparency and opacity of leading companies and brands in our age. The book is full of relevant cases never discussed before in sectors such as consumer products, baby foods, fashion, vehicles and mobile phones. Insightful and incisive, Fernando Olivares has directed his team to produce this book that will educate us as citizens and consumers. Their goal is to promote honest transparency – the only way to attain corporate legitimacy and sustainability in our time.

This is a stimulating and enticing collection written by leading exponents of, and experts in, primary geography education. This book was originally published as a special issue of *Education 3-13*.

Advancing Women in Science - Willie Pearson, Jr. 2015-04-23

Many countries have implemented policies to increase the number and quality of scientific researchers as a means to foster innovation and spur economic development and progress. To that end, grounded in a view of women as a rich, yet underutilized knowledge and labor resource, a great deal of recent attention has focused on encouraging women to pursue education and careers in science — even in countries with longstanding dominant patriarchal regimes. Yet, overall, science remains an area in which girls and women are persistently disadvantaged. This book addresses that situation. It bridges the gap between individual- and societal-level perspectives on women in science in a search for systematic solutions to the challenge of building an inclusive and productive scientific workforce capable of creating the innovation needed for economic growth and societal wellbeing. This book examines both the role of gender as an organizing principle of social life and the relative position of women scientists within national and international labor markets. Weaving together and engaging research on globalization, the social organization of science, and gendered societal relations as key social forces, this book addresses critical issues affecting women's contributions and participation in science. Also, while considering women's representation in science as a whole, examinations of women in the chemical sciences, computing, mathematics and statistics are offered as examples to provide insights into how differing disciplinary cultures, functional tasks and socio-historical conditions can affect the advancement of women in science relative to important variations in educational and occupational realities. Edited by three social scientists recognized for their expertise in science and technology policy, education, workforce participation, and stratification, this book includes contributions from an intellectually diverse group of international scholars and analysts and features compelling cases and initiatives from around the world, with implications for research, industry practice, education and policy development.

Misunderstanding Russia - Magda Leichtova 2016-07-22

Well argued and balanced, Leichtova provides an alternative and more constructive understanding of what drives Russian foreign policy. The book is based on the concepts of constructivism and orientalism in international relations to analyse the policies of the Russian Federation. This book highlights that Russian foreign policy is a complex phenomenon constructed from internal as well as external developments, perceptions and expectations. At the same time, it also highlights that Western states are the most significant Other in construction of the Russian foreign policy and even Russian identity and, at the same time, actively create an 'image of Russia' in international politics which is widely based on their own Western assumptions about the country. The

author introduces the reader to an alternate portrayal of relations between Russia and the West which all analysts should take into consideration before drawing conclusions.

Egypt - Azmi Bishara 2022-07-14

Azmi Bishara's seminal study of the 2011 Egyptian Revolution chronicles in granular detail the lead up to the momentous uprisings and the subsequent transition and coup. The book critically investigates the social and economic conditions that formed the backdrop to the revolution and the complex challenges posed by the transition from authoritarianism to democracy. Part One, 'From July Coup to January Revolution', goes back to what is called the '1952 revolution' or the '1952 Coup d'état' and traces events until 2011 when Hosni Mubarak stepped down as the president of Egypt after weeks of protest. It highlights the relationship between the presidency and the army to show that, contrary to popular belief, the presidency grew gradually stronger at the expense of other institutions, especially the army, and reached its apogee under Mubarak. Part Two 'From Revolution to Coup d'Etat', covers the critical stages from when the military junta took over the governing of Egypt as the Supreme Council of the Armed Forces (SCAF), and the election of Morsi, up until the coup to overthrow his presidency. Using a democratic transition theory perspective, Azmi Bishara explains the failure of the democratic transition and how it has impacted on Arab revolutions ever since. Written while the revolutions were taking place, this book conveys a sense of immediacy and urgency as Bishara makes wide-ranging assessments with many of his forecasts corroborated in later years. The book is renowned for its use of primary source material - including interviews, statistics and public opinion polls - thus preserving the memory of the revolution and remaining one of the most comprehensive reference books on the subject to date.

Bihar and Mithila - J. Albert Rorabacher 2016-09-13

The world has become obsessed with the Western notions of progress, development, and globalization, the latter a form of human and economic homogenization. These processes, through the aegis of the United Nations, are comparatively monitored. Those nations deemed to be 'lagging behind' are then provided with foreign aid and developmental assistance. For nearly seventy years, India has sought its place in this global endeavour; yet, even today, abject poverty and backwardness can be observed in districts in almost every state; with the highest concentration of such districts found in the state of Bihar and a cultural enclave, known as Mithila. Development in India has been elusive because it is difficult to define; and because the Western concepts of development and progress have no absolute equivalents within many non-Western settings. As a consequence, development programmes often fail because they are unable to ask the right questions, but equally important is the political economy derived from foreign aid. For politicians, there is no long-term benefit to be derived from successful development. In general, foreign aid only serves to corrupt governments and politicians and, in the end, does very little for those who need help. The struggling states of Bihar and Mithila serve as extreme examples of India's problems. Development here has been thwarted by a hereditary landed aristocracy supported by religion, casteism, custom, social stratification, tradition, and patterns of behaviour that can be traced back millennia. In turn, all these have been masterfully manipulated by co-opted politicians, who have turned politics into a veritable art form as this volume comprehensively demonstrates.

Privatisation, Education and Social Justice - Geoffrey Walford 2017-10-02

Privatisation in and of education is a process that takes many different forms, and is deeply controversial. While the shift in who pays is certainly an important dimension of privatisation, there have also been changes in the management, provision, and delivery of schooling. In most of the economically developed world, discussion about the privatisation of education is now several decades old, and yet new forms of privatisation are still being developed and old forms being applied to new

situations. This book examines the concept and nature of privatisation, and explores the impacts of privatisation in terms of social justice. The authors extend various arguments about the processes, and provide new research and critique. Some believe that privatisation can lead to increasing social justice for the poor, while others argue the exact opposite. This volume contributes to theoretical conceptions of social justice and education as well as providing up-to-date research results. This book was originally published as a special issue of *Oxford Review of Education*.

India's National Security - Satish Kumar 2015-07-03

This fourteenth volume of India's National Security Annual Review intensively analyses India's national security with respect to the changing internal and external dynamics. In the global environment, the situation is characterised by rising tensions between United States and Russia, intensified rivalry between United States (US) and China, and increasing cooperation between China and Russia. For India which seeks peaceful growth to emerge as a major power, this poses severe diplomatic challenges. This volume discusses the complexity of these challenges and the deftness with which India gets the best out of its strategic partnerships with the US and Russia while warding off the transgressions of a mighty adversary like China. It also studies the impact of internal convulsions and external intrusions on India's security from South Asian nations such as Afghanistan, Bangladesh, Nepal and Sri Lanka. Examining the field of internal security, the essays carry rare insights into the causes of expansion of Naxalite violence in tribal areas and the dynamics of conflict resolution in the Northeast, as well as India's deep concern as a growing power with its economic slowdown in the recent past, and energy and cyber security. Bringing together contributions from eminent scholars and diplomats, the volume will be indispensable for policymakers, government think tanks, defence and strategic studies experts, as well as students and researchers of international relations, foreign policy and political science.

Sustainability in Accounting Education - Maria Cadiz Dyball 2015-10-14

Accounting sustainably involves accounting for and to the natural environment, and accounting for and to society, including groups currently oppressed or disadvantaged by unsustainable processes and practices. This book creates a compelling case for the inclusion of sustainability at the heart of accounting educational programmes, offering critical lessons and identifying risks to avoid when designing accounting programmes and courses. Accounting sustainability has moved from the side-lines of policy discourses, accounting institutions, professional accounting practices, and research activities into the mainstream. The chapters in this proposed book engage in a critical dialogue to facilitate change in accounting education for sustainability. They dispel the myth that accounting for sustainability is an oxymoron, bad for business, unrelated to practice, or contrary to professional accounting bodies' accreditation requirements. This book was originally published as a special issue of *Accounting Education*.
