Ladino-English, English-Ladino Concise Encyclopedic Dictionary (Judeo-Spanish) - Elli Kohen 2000

This unique book is the first Ladino dictionary for English

speakers! Ladino, also known as Judeo-Spanish or Judezmo, was the language spoken by the Sephardic Jews who settled in the Ottoman Empire after their expulsion from Spain in the 15th century. Definitions

include word origins, the cultural context of expressions, and usage, making the book an invaluable reference tool for anyone interested in Romance and Oriental languages and/or Jewish culture.

An Introduction to Language and Linguistics - Ralph Fasold
2006-03-06

This accessible textbook is the only introduction to linguistics in which each chapter is written by an expert who teaches courses on that topic, ensuring balanced and uniformly excellent coverage of the full range of modern linguistics. Assuming no prior knowledge the text offers a clear introduction to the traditional topics of structural linguistics (theories of sound, form, meaning, and language change), and in addition provides full coverage of contextual linguistics, including separate chapters on discourse, dialect variation, language and culture, and the politics of language. There are also up-to-date separate chapters on language and the brain, computational

linguistics, writing, child language acquisition, and second-language learning. The breadth of the textbook makes it ideal for introductory courses on language and linguistics offered by departments of English, sociology, anthropology, and communications, as well as by linguistics departments.

The Jewish Neo-Aramaic Dialect of Urmi - Geoffrey Khan 2008

This volume contains a detailed grammatical description of the spoken Aramaic dialect of the Jewish communities in the towns of Sulemaniyya and ?alabja in North Eastern Iraq together with numerous transcribed texts. The dialect, which belongs to the North-Eastern Neo-Aramaic group, is now on the verge of extinction.

The Jews of China - Jonathan Goldstein 1998-12-04

An impressive interdisciplinary effort by Chinese, Japanese, Middle Eastern, and Western Sinologists and Judaic Studies specialists, these books scrutinize patterns of migration, acculturation,

assimilation, and economic activity of successive waves of Jewish arrivals in China from approximately A.D.1100 to 1949. While Jewish individuals and communities in China have been described in microhistorical, antiquarian, or nostalgic fashion, they have never been contrasted as a whole and in a scholarly way with other Jewish Diaspora communities.

Encyclopedia of Linguistics - Philipp Strazny 2013-02-01 Utilizing a historical and international approach, this valuable two-volume resource makes even the more complex linguistic issues understandable for the non-specialized reader. Containing over 500 alphabetically arranged entries and an expansive glossary by a team of international scholars, the *Encyclopedia of Linguistics* explores the varied perspectives, figures, and methodologies that make up the field.

New Perspectives in Biblical and Rabbinic Hebrew - Aaron D. Hornkohl 2021-04-06

Most of the papers in this volume originated as presentations at the conference *Biblical Hebrew and Rabbinic Hebrew: New Perspectives in Philology and Linguistics*, which was held at the University of Cambridge, 8-10th July, 2019. The aim of the conference was to build bridges between various strands of research in the field of Hebrew language studies that rarely meet, namely philologists working on Biblical Hebrew, philologists working on Rabbinic Hebrew and theoretical linguists. This volume is the published outcome of this initiative. It contains peer-reviewed papers in the fields of Biblical and Rabbinic Hebrew that advance the field by the philological investigation of primary sources and the application of cutting-edge linguistic theory. These include contributions by established scholars and by students and early career researchers.

Encyclopedia of Ancient Greek Language and Linguistics - Georgios K. Giannakis 2014

[A History of the Hebrew Language](#) - Angel Sáenz-Badillos 1996-01-25

This book is a comprehensive description of Hebrew from its Semitic origins and the earliest settlement of the Israelite tribes in Canaan to the present day.

[Language Contact and the Development of Modern Hebrew](#) - 2015-11-16

Language Contact and the Development of Modern Hebrew, edited by Edit Doron, presents twenty four different innovative syntactic constructions of Modern Hebrew, attributing them to syntactic change due to the impact of contact languages on previous stages of Hebrew. The contents of this volume was also published as a special double issue of Journal of Jewish Languages, 3: 1-2 (2015).

[Contact and Ideology in a Multilingual Community](#) - Dalit Assouline 2017-08-07

This book presents the role of ideology in language contact situations and the scope of its influence on linguistic

behavior. It will also provide an important addition to the field of Yiddish linguistics.

English as a Global Language - David Crystal 2012-03-29

Written in a detailed and fascinating manner, this book is ideal for general readers interested in the English language.

Languages in Jewish Communities, Past and Present - Benjamin Hary 2018-11-05

This book offers sociological and structural descriptions of language varieties used in over 2 dozen Jewish communities around the world, along with synthesizing and theoretical chapters. Language descriptions focus on historical development, contemporary use, regional and social variation, structural features, and Hebrew/Aramaic loanwords. The book covers commonly researched language varieties, like Yiddish, Judeo-Spanish, and Judeo-Arabic, as well as less commonly researched ones, like Judeo-Tat, Jewish Swedish, and

Hebraized Amharic in Israel today.

The Handbook of Bilingualism and Multilingualism - Tej K. Bhatia 2014-09-15

Honored as a 2013 Choice Outstanding Academic Title

Comprising state-of-the-art research, this substantially expanded and revised Handbook discusses the latest global and interdisciplinary issues across bilingualism and multilingualism. Includes the addition of ten new authors to the contributor team, and coverage of seven new topics ranging from global media to heritage language learning Provides extensively revised coverage of bilingual and multilingual communities, polyglot aphasia, creolization, indigenization, linguistic ecology and endangered languages, multilingualism, and forensic linguistics Brings together a global team of internationally-renowned researchers from different disciplines Covers a wide variety of topics, ranging from neuro- and psycho-linguistic

research to studies of media and psychological counseling Assesses the latest issues in worldwide linguistics, including the phenomena and the conceptualization of 'hyperglobalization', and emphasizes geographical centers of global conflict and commerce

Arabic Language and Linguistics - Reem Bassiouney 2012-04-13

Arabic, one of the official languages of the United Nations, is spoken by more than half a billion people around the world and is of increasing importance in today's political and economic spheres. The study of the Arabic language has a long and rich history: earliest grammatical accounts date from the 8th century and include full syntactic, morphological, and phonological analyses of the vernaculars and of Classical Arabic. In recent years the academic study of Arabic has become increasingly sophisticated and broad. This state-of-the-art volume

presents the most recent research in Arabic linguistics from a theoretical point of view, including computational linguistics, syntax, semantics, and historical linguistics. It also covers sociolinguistics, applied linguistics, and discourse analysis by looking at issues such as gender, urbanization, and language ideology. Underlying themes include the changing and evolving attitudes of speakers of Arabic and theoretical approaches to linguistic variation in the Middle East.

Textile Terminologies from the Orient to the Mediterranean and Europe, 1000 BC to 1000 AD -

Salvatore Gaspa 2017

The papers in this volume derive from the conference on textile terminology held in June 2014 at the University of Copenhagen. Around 50 experts from the fields of Ancient History, Indo-European Studies, Semitic Philology, Assyriology, Classical Archaeology, and Terminology from twelve different countries came together at the Centre

for Textile Research, to discuss textile terminology, semantic fields of clothing and technology, loan words, and developments of textile terms in Antiquity. They exchanged ideas, research results, and presented various views and methods. This volume contains 35 chapters, divided into five sections: - Textile terminologies across the ancient Near East and the Southern Levant - Textile terminologies in Europe and Egypt - Textile terminologies in metaphorical language and poetry - Textile terminologies: examples from China and Japan - Technical terms of textiles and textile tools and methodologies of classifications

The Poetic Priestly Source -

Jason M. H. Gaines 2015-12-15

Applying criteria for the identification of biblical Hebrew poetry, Jason M. H. Gaines distinguishes a nearly complete poetic Priestly stratum in the Pentateuch ("Poetic P"), coherent in literary, narrative, and ideological terms, from a later prose redaction ("Prosaic P"),

which is fragmentary, supplemental, and distinct in thematic and theological concern. Gaines describes the whole of the "Poetic P" source and offers a Hebrew reconstruction of the document. This dramatically innovative understanding of the history of the Priestly composition opens up new vistas in the study of the Pentateuch.

Adventures in Yiddishland -

Jeffrey Shandler 2006

"Shandler takes a wide-ranging look at Yiddish culture, including language learning, literary translation, performance, and material culture. He examines children's books, board games, summer camps, klezmer music, cultural festivals, language clubs, Web sites, cartoons, and collectibles - all touchstones of the meaning of Yiddish as it enters its second millennium. Rather than mourn the language's demise, *Adventures in Yiddishland* calls for taking an expansive approach to the possibilities for the future of Yiddish. Shandler's

conceptualization of postvernacularity sheds important new light on contemporary Jewish culture generally and offers insights into theorizing the relation between language and culture."--BOOK JACKET.

Usage-Based Studies in

Modern Hebrew - Ruth A.

Berman 2020-03-18

The goal of the volume is to shed fresh light on Modern Hebrew from perspectives

aimed at readers interested in the domains of general linguistics, typology, and

Semitic studies. Starting with chapters that provide

background information on the evolution and sociolinguistic

setting of the language, the bulk of the book is devoted to usage-based studies of the morphology, lexicon, and syntax of current Hebrew. Based primarily on original analyses of authentic spoken and online materials, these studies reflect varied theoretical frames-of-reference that are largely model-neutral in approach. To this end, the book presents a functionally motivated, dynamic approach to actual usage, rather than providing strictly structuralist or formal characterizations of particular linguistic systems. Such a perspective is particularly important in the case of a language undergoing accelerated processes of change, in which the gap between prescriptive dictates of the Hebrew Language Establishment and the actual usage of educated, literate but non-expert speaker-writers of current Hebrew is constantly on the rise.

**Language, Culture,
Computation:
Computational Linguistics
and Linguistics** - Nachum

Dershowitz 2014-12-05
This Festschrift volume is published in Honor of Yaacov Choueka on the occasion of this 75th birthday. The present three-volumes *liber amicorum*, several years in gestation, honours this outstanding Israeli computer scientist and is dedicated to him and to his scientific endeavours. Yaacov's research has had a major impact not only within the walls of academia, but also in the daily life of lay users of such technology that originated from his research. An especially amazing aspect of the temporal span of his scholarly work is that half a century after his influential research from the early 1960s, a project in which he is currently involved is proving to be a sensation, as will become apparent from what follows. Yaacov Choueka began his research career in the theory of computer science, dealing with basic questions regarding the relation between mathematical logic and automata theory. From formal languages, Yaacov moved to

natural languages. He was a founder of natural-language processing in Israel, developing numerous tools for Hebrew. He is best known for his primary role, together with Aviezri Fraenkel, in the development of the Responsa Project, one of the earliest fulltext retrieval systems in the world. More recently, he has headed the Friedberg Genizah Project, which is bringing the treasures of the Cairo Genizah into the Digital Age. This third part of the three-volume set covers a range of topics related to language, ranging from linguistics to applications of computation to language, using linguistic tools. The papers are grouped in topical sections on: natural language processing; representing the lexicon; and neologisation.

Encyclopedia of Arabic Language and Linguistics -

Kees Versteegh 2006

The Encyclopedia of Arabic Language and Linguistics is a major multi-volume reference work. It is a unique collaboration of hundreds of scholars from around the world

and covers all relevant aspects of the study of Arabic, dealing with all levels of the language (pre-Classical Arabic, Classical Arabic, Modern Standard Arabic, Arabic vernaculars, mixed varieties of Arabic).

New Explorations in Chinese Theoretical Syntax - Andrew

Simpson 2022-04-15

This volume brings together 19 cutting edge studies written by some of the most prominent linguists working on Chinese formal syntax, as a Festschrift volume dedicated to Yen-Hui Audrey Li. The contributions to the volume address a wide range of issues currently developing in the field of Chinese syntax, grouped into five thematic sections on the

structure of lexical and functional projections, modal verb syntax, syntax-semantics interactions, the syntax and interpretation of particles, and the acquisition of syntactic structures. With its rich descriptive content sourced from different varieties of Chinese, and its theoretical orientation and analyses, the book provides an important new resource both for researchers with a primary interest in Chinese and other linguists interested in discovering how properties of Chinese can inform the analysis of other languages.

Handbook of Jewish Languages

This handbook, the first of its kind, includes descriptions of the ancient and modern Jewish languages other than Hebrew, including historical and linguistic overviews, numerous text samples, and comprehensive bibliographies.

[Attributive constructions in North-Eastern Neo-Aramaic](#) - Ariel Gutman 2016

This study is the first wide-scope morpho-syntactic

comparative study of North-Eastern Neo-Aramaic dialects to date. Given the historical depth of Aramaic (almost 3 millennia) and the geographic span of the modern dialects, coming in contact with various Iranian, Turkic and Semitic languages, these dialects provide an almost pristine "laboratory" setting for examining language change from areal, typological and historical perspectives. While the study has a very wide coverage of dialects, including also contact languages (and especially Kurdish dialects), it focuses on a specific grammatical domain, namely attributive constructions, giving a theoretically motivated and empirically grounded account of their variation, distribution and development. The results will be enlightening not only to Semitists seeking to learn about this fascinating modern Semitic language group, but also for typologists and general linguists interested in the dynamics of noun phrase morphosyntax.

Reign of the Anunnaki - Jan Erik Sigdell 2018-09-11

Reveals the ongoing alien manipulation of humanity and how we can break free •
Explores how the Anunnaki have maintained invisible surveillance over us and how they control our development through religion, secret societies, and catastrophes •
Reveals how they feed off our energies and how this ability has allowed them to remain here on Earth as multidimensional entities, enforcing their control invisibly •
Explains how they established religion to control us and how Gnostic Christianity--which came from Christ and not the Anunnaki--offers a way out of their matrix of control
Cuneiform texts found on clay plates in Mesopotamia tell us about an extraterrestrial race, called the Anunnaki, who came from space to exploit our planet. Through genetic manipulation, they created modern humans from existing earthly life forms to serve them as slaves. They physically left our planet millennia ago, but as Jan Erik Sigdell reveals, their influence

and control over humanity is still pervasive and significant. Sigdell explains how the Anunnaki have maintained invisible surveillance over us as well as control over how humanity develops, setting limits on our evolution and holding back our development by means of manipulation and catastrophes, including the deluge immortalized in the Bible and many other ancient myths. He shows how they still manipulate our politics and affairs via secret societies, such as the Illuminati, and the political elite, such as the Bilderberg Group. Examining ancient descriptions of the Anunnaki as entities that resemble winged reptiles or amphibians, the author also explores their diet and how they feed off blood and the energies given off by lower life forms, such as humans, when they are expressing extreme negative emotions, having sex, or dying. This energy-feeding ability has allowed them to remain here on Earth as multidimensional entities, enforcing their control

invisibly. He explains how the Anunnaki established religions as tools for control, setting up the major religions with themselves as “gods” and playing them against each other to keep humanity’s attention away from ongoing Anunnaki manipulation. They have also hidden from us the existence of the true highest creator, who created the cosmos as well as the Anunnaki themselves. The author reveals how the highest creator sent a messenger called Jesus to expose the Anunnaki and show us a way out of their matrix of control through a spirituality based on love, empathy, and sacred sexuality. But the “god” of the Anunnaki defeated this messenger and replaced him with a false Christ. This led to the development of Paulinian Christianity under Anunnaki influence, as well as other parallel religions such as Islam, and the suppression and elimination of the original Christianity, Gnostic Christianity. With the discovery of hidden Gnostic texts and teachings at Nag Hammadi in

1945, the way is now paved for our release from the reign of the Anunnaki.

A History of the Hebrew Language - Edward Yechezkel Kutscher 1982

Phonology and Morphology of Biblical Hebrew - Joshua Blau 2010-06-23

More than 80 years have passed since Bauer and Leander's historical grammar of Biblical Hebrew was published, and many advances in comparative historical grammar have been made during the interim. Joshua Blau, who has for much of his life been associated with the Academy of the Hebrew Language in Jerusalem, has during the past half century studied, collected data, and written frequently on various aspects of the Hebrew language. Phonology and Morphology of Biblical Hebrew had its origins in an introduction to Biblical Hebrew first written some 40 years ago; it has now been translated from Modern Hebrew, thoroughly revised and

updated, and it distills a lifetime of knowledge of the topic. The book begins with a 60-page introduction that locates Biblical Hebrew in the Semitic family of languages. It then discusses various approaches to categorization and classification, introduces and discusses various linguistic approaches and features that are necessary to the discussion, and provides a background to the way that linguists approach a language such as Biblical Hebrew—all of which will be useful to students who have taken first-year Hebrew as well those who have studied Biblical Hebrew extensively but have not been introduced to linguistic study of the topic. After a brief discussion of phonetics, the main portion of the book is devoted to phonology and to morphology. In the section on phonology, Blau provides complete coverage of the consonant and vowel systems of Biblical Hebrew and of the factors that have affected both systems. In the section on morphology, he discusses the

parts of speech (pronouns, verbs, nouns, numerals) and includes brief comments on the prepositions and waw. The historical processes affecting each feature are explained as Blau progresses through the various sections. The book concludes with a complete set of paradigms and extensive indexes. Blau's recognized preeminence as a Hebraist and Arabist as well as his understanding of language change have converged in the production of this volume to provide an invaluable tool for the comparative and historical study of Biblical Hebrew phonology and morphology.

Thematic Structure and Para-Syntax: Arabic as a Case Study - James Dickins 2020-03-05

Thematic Structure and Para-Syntax: Arabic as a Case Study presents a structural analysis of Arabic, providing an alternative to the traditional notions of theme and rheme. Taking Arabic as a case study, this book claims that approaches to thematic structure propounded in universalist linguistic theories,

of which Hallidayan systemic functional linguistics is taken as an illustrative example, are profoundly wrong. It argues that in order to produce an analysis of thematic structure and similar phenomena which is not undermined by its own theoretical presuppositions, it is necessary to remove such notions from the domain of linguistic and semiotic theory. The book initially focuses on Sudanese Arabic, because this allows for a beautifully clear exposition of general principles, before applying these principles to Modern Standard Arabic, and some other Arabic varieties. This book will be of interest to scholars in Arabic linguistics, linguistic theory, and information structure.

Anthropomorphism in Islam - Livnat Holtzman 2018-03-07

Through a close, contextualized, and interdisciplinary reading in Hadith compilations, theological treatises, and historical sources, this book offers an evaluation and understanding of the

traditionalistic endeavours to define anthropomorphism in the most crucial and indeed most formative period of Islamic thought.

All Things Morphology -

Sedigheh Moradi 2021-08-15

This book provides a view of where the field of morphology has been and where it is today within a particular theoretical framework, gathering up new and representative work in morphology by both eminent and emerging scholars, and touching on a very wide range of topics, approaches, and theoretical points of view.

These seemingly disparate articles have a common touchstone in their focus on a word-based, paradigmatic approach to morphology. The chapters in this book elaborate on these basic themes, from the further exploration of paradigms, to studies involving words, stems, and affixes, to examinations of competition, inheritance, and defaults, to investigations of morphemes, to ways that morphology interacts with other parts of the language from phonology

to sociolinguistics and applied linguistics. The editors and contributors dedicate this volume to Prof. Mark Aronoff for his profound influence on the field.

Routledge Encyclopedia of Translation Studies - Mona Baker 2009-03-04

Praise for the previous edition of the Encyclopedia of Translation Studies:

'Translation has long deserved this sort of treatment.

Appropriate for any college or university library supporting a program in linguistics, this is vital in those institutions that train students to become translators.' - Rettig on Reference 'Congratulations should be given to Mona Baker for undertaking such a mammoth task

and...successfully pulling it off. It will certainly be an essential reference book and starting point for anyone interested in translation studies.' - ITI Bulletin

'This excellent volume is to be commended for bringing together some of [its] most recent research. It provides a series of extremely

useful short histories, quite unlike anything that can be found elsewhere. University teachers will find it invaluable for preparing seminars and it will be widely used by students.' – The Times Higher Education Supplement '... a pioneering work of reference ...' – Perspectives on Translation

The Routledge Encyclopedia of Translation Studies has been the standard reference in the field since it first appeared in 1998. The second, extensively revised and extended edition brings this unique resource up-to-date and offers a thorough, critical and authoritative account of one of the fastest growing disciplines in the humanities. The Encyclopedia is divided into two parts and alphabetically ordered for ease of reference. Part One (General) covers the conceptual framework and core concerns of the discipline. Categories of entries include: central issues in translation theory (e.g. equivalence, translatability, unit of translation) key concepts (e.g. culture, norms, ethics,

ideology, shifts, quality) approaches to translation and interpreting (e.g. sociological, linguistic, functionalist) types of translation (e.g. literary, audiovisual, scientific and technical) types of interpreting (e.g. signed language, dialogue, court). New additions in this section include entries on globalisation, mobility, localization, gender and sexuality, censorship, comics, advertising and retranslation, among many others. Part Two (History and Traditions) covers the history of translation in major linguistic and cultural communities. It is arranged alphabetically by linguistic region. There are entries on a wide range of languages which include Russian, French, Arabic, Japanese, Chinese and Finnish, and regions including Brazil, Canada and India. Many of the entries in this section are based on hitherto unpublished research. This section includes one new entry: Southeast Asian tradition. Drawing on the expertise of over 90 contributors from 30 countries and an international

panel of consultant editors, this volume offers a comprehensive overview of translation studies as an academic discipline and anticipates new directions in the field. The contributors examine various forms of translation and interpreting as they are practised by professionals today, in addition to research topics, theoretical issues and the history of translation in various parts of the world. With key terms defined and discussed in context, a full index, extensive cross-references, diagrams and a full bibliography the Routledge Encyclopedia of Translation Studies is an invaluable reference work for all students and teachers of translation, interpreting, and literary and social theory. Mona Baker is Professor of Translation Studies at the University of Manchester, UK. She is co-founder and editorial director of St Jerome Publishing, a small press specializing in translation studies and cross-cultural communication. Apart from numerous papers in scholarly

journals and collected volumes, she is author of *In Other Words: A Coursebook on Translation* (Routledge 1992), *Translation and Conflict: A Narrative Account* (2006) and Founding Editor of *The Translator: Studies in Intercultural Communication* (1995), a refereed international journal published by St Jerome since 1995. She is also co-Vice President of the International Association of Translation and Intercultural Studies (IATIS). Gabriela Saldanha is Lecturer in Translation Studies at the University of Birmingham, UK. She is founding editor (with Marion Winters) and current member of the editorial board of *New Voices in Translation Studies*, a refereed online journal of the International Association of Translation and Intercultural Studies, and co-editor (with Federico Zanettin) of *Translation Studies Abstracts and Bibliography of Translation Studies*.
Poetic Conventions as Cognitive Fossils - Reuven Tsur
2017-08-01
Poetic Conventions as

Cognitive Fossils offers a major theoretical statement of where poetic conventions come from. The work comprises Reuven Tsur's research in cognitive poetics to show how conventional poetic styles originate from cognitive rather than cultural principles. The book contrasts two approaches to cultural conventions in general, and poetic conventions in particular. They include what may be called the "culture-begets-culture" or "influence-hunting" approach, and the "constraints-seeking" or "cognitive-fossils" approach here expounded. The former assumes that one may account for cultural programs by pointing out their roots in earlier cultural phenomena and provide a map of their migrations. The latter assumes that cultural programs originate in cognitive solutions to adaptation problems that have acquired the status of established practice. Both conceptions assume "repeated social transmission," but with very different implications. The former frequently ends in

infinite regress; the latter assumes that in the process of repeated social transmission, cultural programs come to take forms which have a good fit to the natural constraints and capacities of the human brain. Tsur extends the principles of this analysis of cognitive origins of poetic form to the writing systems, not only of the Western world, but also to Egyptian hieroglyphs through the evolution of alphabetic writing via old Semitic writing, and Chinese and Japanese writings; to aspects of figuration in medieval and Renaissance love poetry in English and French; to the metaphysical conceit; to theories of poetic translation; to the contemporary theory of metaphor; and to slips of the tongue and the tip-of-the-tongue phenomenon, showing the workings and disruption of psycholinguistic mechanisms. Analysis extends to such varying sources as the formulae of some Mediaeval Hebrew mystic poems, and the ballad 'Edward,' illustrative of extreme 'fossilization' and the

constraints of the human brain.

Late Samaritan Hebrew -

Moshe Florentin 2017-07-03

This book provides a comprehensive grammatical and lexicographical review of all types of late Samaritan Hebrew in all their literary manifestations from the twelfth century to the present. Much of it is devoted to description of Hybrid Samaritan Hebrew (HSH), which since the 13th is

The Language of Demons and Angels - Christopher I. Lehrich
2003-01-01

This is the first modern study of Agrippa's occult philosophy, revealing it to be a coherent part of his intellectual work. It analyzes the text of "De occulta philosophia," explicating the sophisticated structure and argument of the work.
