Design of Molecular Materials - Jacques Simon 2000

This timely and fascinating book is destined to be recognised as THE book on supramolecular engineering protocols. It covers this sometimes

difficult subject in an approachable form, gathering together information from many sources. Supramolecular chemistry, which links organic chemistry to materials science, is one of the fastest growth areas of chemistry research. This book creates a correlation between the structure of single molecules and the physical and chemical properties of the resulting materials. By making systematic changes to the component molecules, the resulting solid can be engineered for optimum performance. There is a clearly written development from synthesis of designer molecules to properties of solids and further on to devices and complex materials systems, providing guidelines for mastering the organisation of these systems. Topics covered include: * Systemic chemistry * Molecular assemblies * Notions of symmetry * Supramolecular engineering * Principe de Curie * Organisation in molecular media * Molecular semiconductors * Industrial applications of molecular materials This superb book will be invaluable to researchers in the field of supramolecular materials and also to students and teachers of the subject.

La condena. Biografías clandestinas - Martha Robles 2012-03-07

Se trata de un texto introductorio al concepto de "revolución científica". En la primera parte se aborda la polémica entre aquellos que apoyan la idea de la continuidad del desarrollo científico (Sarton, Whewell, Dijksterhuis) y aquellos que ven en la historia de la ciencia como una sucesión entre periodos de estabilidad y periodos de revolución conceptual (Kuhn, Duhem, Koyré). La segunda parte estudia los casos de diversos personajes -Aristóteles, Galeno, Descartes y Newton, por ejemplo-, considerados los protagonistas de distintas revoluciones científicas.

Guide to Reference Materials for Canadian Libraries - Kirsti Nilsen 1992

**** About itself the 8th edition notes: "Primarily intended as an instructional guide for library personnel and researchers who work with reference materials, the Guide surveys the basic and most familiar or typical resources for general reference work, and for work with the disciplines of the humanities, social sciences, and pure and applied sciences." The 7th edition, titled Guide to basic reference materials . . . , is recommended by ARBA, v.16, but is missed by BCL3 and Sheehy. A solid work marred by the flimsy paper binding--a shockingly bad production decision: a bibliography gets repeated use. Annotation copyrighted by Book News, Inc., Portland, OR

Les Sauvages de la Mer Pacifique - Art Gallery of New South Wales 2000
Les Sauvages de la Mer Pacifique is a rare panoramic wallpaper manufactured in France at the beginning of the 19th century. A product of French neoclassical culture, it draws its dramatic subject matter from the exploratory voyages of Europeans to the South Pacific. The imaginatively evoked scene created for the observer within the papered room a world of exotic cultures and environments. Four extensive essays examine the collection and reception of Pacific artifacts in Europe in the late 18th and early 19th centuries; the source material for the wallpaper's imagery; philosophical and technical aspects of its production; and the wallpaper in the context of the post-colonial Pacific region.

**** The British counterpart to Sheehy (in which it is recommended--and vice versa), distributed in the US by Unipub. Volume 3 completes the 5th edition with 8,833 entries (vol. 1: Science and technology, 1989, 5,995

entries; vol.2: Social and historical sciences, philosophy and religion, 1990, 7,166 entries). While the majority of items are reference books, Walford is a guide to reference material and therefore includes periodical articles, microforms, online, and CD-ROM sources. A special effort has been made to make sure the output of small and specialist presses is not neglected. Annotation copyrighted by Book News, Inc., Portland, OR
