**Small Things** - Nthikeng Mohlele 2018-05  
In this haunting tale of love and learning, the existential chaos of a life ravaged by circumstance takes on a rhythm of its own, one bound by loss and loneliness, but also an intelligent awareness of self. Sometimes melancholy, sometimes brutal, occasionally funny and infuriating, a journalist-comrade-lover caught up in the shade and shadow of politics and social injustice faces treachery and betrayal on every level. Set against the backdrop of a cityscape that taunts and tantalises, this is where love fails and passion wanes, "where suffering has no meaning", where an individual escapes death only to find himself confronted with choices wrought by remorse and

retribution, by conscience and character. And yet, with all trauma, there is a distinct musicality to the lyrical unpacking that follows a string of small things ...

**An African Language Experience** - Dahiru Muhammad Argungu 2017-09-21

The present book is about Hausa linguacultural practices. Its primary goal is to demonstrate aspects of the relationship between Hausa language and culture as it affects northern Nigeria, the territory with the largest concentration of native-Hausa speakers on earth today. Using various examples, illustrations and real-life situations, the book seeks to portray Hausa speakers experiences and practices as they daily exploit their language to communicate their needs and, in the process, express their culture. These experiences and practices are realised largely through Hausa verbal and non-verbal means or both which together give rise to linguacultural patterns of behaviour unique to the speakers. It is hoped that readers, particularly non-Hausas, will find the book enjoyable especially in trying to experience what native-Hausa speakers, using their language to communicate, experience during social interactions. Supported by a number of optional activities and exercises, students and teachers of

Hausa will particularly find the book not only resourceful and entertaining but also reader-friendly especially with regard to the role of culture in language learning and teaching. Indeed the book has been partly written to encourage the use of Hausa culture in language teaching and learning.

**Multimodal Literacy** - Carey Jewitt 2003-01-01  
<Multimodal Literacy challenges dominant ideas around language, learning, and representation. Using a rich variety of examples, it shows the range of representational and communicational modes involved in learning through image, animated movement, writing, speech, gesture, or gaze. The effect of these modes on learning is explored in different sites including formal learning across the curriculum in primary, secondary, and higher education classrooms, as well as learning in the home. The notion of literacy and learning as a primary linguistic accomplishment is questioned in favor of the multimodal character of learning and literacy. By illustrating how a range of modes contributes to the shaping of knowledge and

what it means to be a learner, <Multimodal Literacy provides a multimodal framework and conceptual tools for a fundamental rethinking of literacy and learning.

*Practising Strategy* - Tersia Botha 2019-01-25  
"Given the common acknowledgement that strategy implementation is the greatest challenge to managers in the 21st century and the greatest reason for strategy failure we decided to focus on strategy implementation. It also includes a more detailed coverage of managing strategic risk."--Publisher's description.

*Popularizing Science and Technology in the European Periphery, 1800-2000* - Faidra

Papanelopoulou 2016-03-23

The vast majority of European countries have never had a Newton, Pasteur or Einstein. Therefore a historical analysis of their scientific culture must be more than the search for great luminaries. Studies of the ways science and technology were communicated to the public in countries of the European periphery can provide a valuable insight into the mechanisms of the appropriation of scientific ideas and technological practices across the continent. The contributors to this volume each take as their focus the popularization of science in countries on the margins of Europe, who in the nineteenth and twentieth centuries may be perceived to have had a weak scientific culture. A variety of scientific genres and forums for presenting science in the public sphere are analysed, including botany and women, teaching and popularizing physics and thermodynamics, scientific theatres, national and international exhibitions, botanical and zoological gardens,

popular encyclopaedias, popular medicine and astronomy, and genetics in the press. Each topic is situated firmly in its historical and geographical context, with local studies of developments in Spain, Portugal, Italy, Hungary, Denmark, Belgium and Sweden. Popularizing Science and Technology in the European Periphery provides us with a fascinating insight into the history of science in the public sphere and will contribute to a better understanding of the circulation of scientific knowledge.
