## **Human Motion Sensing and Recognition** - Honghai Liu 2017-05-11

This book introduces readers to the latest exciting advances in human motion sensing and recognition, from the theoretical development of fuzzy approaches to their applications. The topics covered include human motion recognition in 2D and 3D, hand motion analysis with contact sensors, and vision-based view-invariant motion recognition, especially from the perspective of Fuzzy Qualitative techniques. With the rapid development of technologies in microelectronics, computers, networks, and robotics over the last decade, increasing attention has been focused

on human motion sensing and recognition in many emerging and active disciplines where human motions need to be automatically tracked, analyzed or understood, such as smart surveillance, intelligent human-computer interaction, robot motion learning, and interactive gaming. Current challenges mainly stem from the dynamic environment, data multi-modality, uncertain sensory information, and real-time issues. These techniques are shown to effectively address the above challenges by bridging the gap between symbolic cognitive functions and numerical sensing & control tasks in intelligent systems. The book not only serves as a valuable reference source for researchers and professionals in the fields of computer vision and robotics, but will also benefit practitioners and graduates/postgraduates seeking advanced information on fuzzy techniques and their applications in motion analysis.

## **High Class Response** - Harri Firmansyah 2016-03-15

Memiliki kehidupan yang berkualitas adalah impian semua manusia. Namun, kenyataan membuktikan lebih banyak orang yang hidup berkubang dalam kualitas yang tidak pernah diinginkannya ketimbang yang hidup dalam kualitas yang diidam-idamkannya. Berbagai cara sudah dijalani dan berbagai alat untuk mencapai tujuannya pernah dicoba, tapi mengapa kualitas idaman itu terasa, terlihat, dan terdengar semakin menjauh? Buku ini secara sederhana memperlihatkan konektivitas yang signifikan antara Kualitas Hidup dan Pembentuknya, yaitu Respons! Panduan runut yang ada di dalamnya bukan saja sangat masuk akal dalam konteks menghadapi kehidupan, namun juga sangat ilmiah, mudah, sekaligus aplikatif. Kita akan digiring oleh narasi yang begitu memudahkan dan mencerahkan tentang bagaimana seseorang dapat menjelaskan, memprediksi, bahkan mengontrol kehidupan. Dalam buku ini, Anda tidak akan menemukan bagaimana Kolonel Sanders, Thomas Alfa Edison, atau sederet nama beken dalam merespons beribu kegagalannya. Sebaliknya, contoh-contoh yang disajikan adalah manusia biasa saja, seperti saya dan Anda, yang memiliki tantangan permasalahan hidup yang mungkin jauh lebih besar ketimbang orang kebanyakan. Namun, kini mereka memiliki kualitas kehidupan yang JAUH di atas rata-rata karena memiliki sesuatu dalam mencapainya, yaitu HIGH CLASS RESPONSE!

Manajemen Periklanan - Rachmat Kriyantono 2013-03-31

Menarik untuk disampaikan bahwa iklan pada dasarnya mengusung dua kepentingan besar. Pertama, sebagai sebuah karya dengan kreativitas yang diusungnya dapat merepresentasikan kepribadian, positioning, dan diferensif produk. Di sisi lain, kedua iklan tentu saja sebagai salah satu promotion tools untuk dapat merangsang adanya pembelian produk. Untuk menjawab dua hal inilah, kehadiran buku ini saya pikir dapat menjadi salah satu alternatif wacana. Setelah membaca buku ini, saya memandang bahwa kajian-kajian periklanan telah secara jernih dan jelas dibahas dengan bahasa yang mudah dipahami oleh mahasiswa. Sebagai buku ajar, saya optimis buku ini dapat memudahkan proses transfer informasi tentang seluk-beluk dunia periklanan. Dilengkapi pula dengan contoh-contoh yang memudahkan penjelasannya." (Dr. Bambang D.P, S.Sos, M.Si -Ketua program pascasarjana Ilmu Komunikasi UB Malang - dalam kata pengantar di buku ini). Buku Manajemen Periklanan ini dapat digunakan oleh para pelaku periklanan maupun sebagai materi ajar mata kuliah Manajemen Periklanan. Buku ini membahas secara detail dan komprehensif proses manajemen periklanan, Mulai dari perencanaan, penyusunan tujuan, implimentasi hingga evaluasi kampanye periklanan. Selain itu, buku ini juga membahas faktor-faktor lain yang mempengaruhi berjalannya proses tersebut, seperti perilaku konsumen maupun kode etik dan regulasi periklanan.

An Investment Perspective on Global Value Chains - Christine Zhenwei Qiang 2021-06-15

This report investigates the role of foreign direct investment (FDI) in helping developing countries participate in global value chains (GVCs). It combines the perspectives and strategies from three types of players: multinational corporations, domestic firms and governments. It aims to provide practical guidance for developing countries to develop strategies that use FDI to strengthen GVC participation and upgrading. The report has six main chapters: 1. FDI and GVCs. Assesses the trade-investment nexus and analyzes the effect of FDI in countries' GVC participation and upgrading at the country level. 2. MNCs shape GVC development. Highlights MNCs' contribution to global economy and how their business strategies shape the evolution of GVCs. The chapter also compares MNCs' business strategies in terms of outsourcing and offshoring, risk mitigation and increasing market power across GVC archetypes. 3. Domestic firm perspectives on GVC participation. Looks at the various paths domestic firms can take to internationalize their production and trade. Investigates domestic firm characteristics that predict higher GVC participation, and the effect of GVC participation on firm performance. 4. Investment policy and promotion: what is in a government's toolbox? Summarizes the various policy instruments governments have at their disposal to help attract MNCs to their country and facilitate GVC participation of domestic firms. 5. Integrating countries into GVCs. Draws on a range of case studies to illustrate how governments can develop coherent strategies and policy packages to integrate their countries into GVCs. 6. FDI and GVCs in the wake of COVID-19. Reflects the impact of COVID-19 on FDI and GVCs, the response from multinationals and suppliers, and the implications for GVC reconfiguration. In addition, there are seven case studies that offer more nuanced analysis on the GVC participation in selected countries and sectors: • Five qualitative case studies: Five countries have been selected that managed to use FDI to stimulate GVC participation using a range of approaches. By design, these five countries also cover five different GVC archetypes. These countries are: (1) Kenya (horticulture);

(2) Dominican Republic (textiles); (3) Mauritius (tourism); (4) Malaysia (electronics); (5) China (software). • Two quantitative case studies: Rwanda, West-Bengal (India). These use a combination of firm- and transaction level datasets to study firm-level dynamics that explain the role of multinational and domestic firms across GVCs.

[Leading Megaprojects](#) - Mounir A. Ajam 2020-01-08

The performance of megaprojects is questionable, and a large percentage of them fail in one dimension or another. The challenges that contribute to these failures are known. Then why do these projects still fail at a high rate? *Leading Megaprojects: A Tailored Approach* examines the challenges facing megaprojects and, more importantly, successes in delivering megaprojects. To close the performance gaps in megaproject deliveries, the book presents a customizable model that professionals and organizations can use to increase the chance of successful project delivery. To illustrate the model, it uses examples and case studies, primarily from capital projects, with engineering and construction components. The book also explains how the approach can be applied to all projects, regardless of industry or domain. The book emphasizes the role of leadership because it takes the point of view that megaprojects cannot be successful without great leadership due to their massive size, complexity, number of parties and stakeholders involved, and cost, among other vital factors. Leaders can define the path for a megaproject to guide seasoned managers and project managers to successful closure. The tailored approach is based on a stage-gate project life cycle model, which covers projects from concept to success. However, it is not limited to a purist form of traditional project management. It is a tailored methodological approach, with an emphasis on leading the work, end-to-end, at the project level, along with the management of every stage of the project. Also, it presents the integration of the business, product delivery, and operations management into a cohesive approach. The book concludes with an in-depth simulation showing how the model is can be tailored to deliver a megaproject successfully.

**Dandelion** - Gabbie Hanna 2020-10-13

New York Times bestselling author Gabbie Hanna delivers everything from curious musings to gut-wrenching confessionals in her long-awaited sophomore collection of illustrated poetry. This edition includes a collection of uncomfortably honest personal essays about Gabbie's childhood and relationships. In this visually thrilling installment of the inner-workings of Gabbie's mind, we're taken on a journey of self-loathing, self-reflection, and ultimately, self-acceptance through deeply metaphorical imagery, chilling twists on child-like rhymes, and popular turns of phrase turned on their heads. Through raw, provocative tidbits, *Dandelion* explores what it means to struggle with a declining mental health in a world where mental health is both stigmatized and trivialized. The poems range from topics of rage and despair to downright silliness, so if you don't know whether to laugh or cry, just laugh until you cry.

**Competitive Strategy** - Michael E. Porter 2017-07-17

Porter's five forces analysis is a framework for analyzing the level of competition within an industry and business strategy development. It draws upon industrial organization (IO) economics to derive five forces that determine the competitive intensity and therefore the attractiveness of an industry. Attractiveness in this context refers to the overall industry profitability. An "unattractive" industry is one in which the combination of these five forces acts to drive down overall profitability. A very unattractive industry would be one approaching "pure competition," in which available profits for all firms are driven to normal profit. This analysis is associated with its principal innovator Michael E. Porter of Harvard University. This updated and expanded second edition of *Book* provides a user-friendly introduction to the subject, Taking a clear structural framework, it guides the reader through the subject's core elements. A flowing writing style combines with the use of illustrations and diagrams throughout the text to ensure the reader understands even the most complex of concepts. This succinct and enlightening overview is a required reading for all those interested in the subject . We hope you find this book useful in shaping your future career & Business.

**Hydrogen Technology** - Aline Léon 2008-07-18

Aline Leon' In the last years, public attention was increasingly shifted by the media and world governments to the concept of saving energy, reducing pollution, protecting the environment, and developing long-term energy supply solutions. In parallel, research funding relating to alternative fuels and energy carriers is increasing on both national and international levels. Why has future energy supply become such a matter of concern? The reasons are the problems created by the world's current energy supply system which is mainly based on fossil fuels. In fact, the energy stored in hydrocarbon-based solid, liquid, and gaseous fuels was, is, and will be widely consumed for internal combustion engine-based transportation, for electricity and heat generation in residential and industrial sectors, and for the production of fertilizers in agriculture, as it is convenient, abundant, and cheap. However, such a widespread use of fossil fuels by a constantly growing world population (from 2.3 billion in 1939 to 6.5 billion in 2006) gives rise to the two problems of oil supply and environmental degradation. The problem related to oil supply is caused by the fact that fossil fuels are not renewable primary energy sources: This means that since the first barrel of petroleum has been pumped out from the ground, we have been exhausting a heritage given by nature.
