*The Crash Detectives* - Christine Negroni 2016-09-27

NEW YORK TIMES BESTSELLER “Negrone is a talented aviation journalist who clearly understands the critically important part the human factor plays in aviation safety.” —Captain Chesley “Sully” Sullenberger, pilot of US Airways 1549, the Miracle on the Hudson A fascinating exploration of how humans and machines fail—leading to air disasters from Amelia Earhart to MH370—and how the lessons learned from these accidents have made flying safer. In *The Crash Detectives*, veteran aviation journalist and air safety investigator Christine Negrone takes us inside crash investigations from the early days of the jet age to the present, including the search for answers about what happened to the missing Malaysia Airlines Flight 370. As Negrone dissects what happened and why, she explores their common themes and, most important, what has been learned from them to make planes safer. Indeed, as Negrone shows, virtually every aspect of modern pilot training, airline operation, and airplane design has been shaped by lessons learned from disaster. Along the way, she also details some miraculous saves, when quick-thinking pilots averted catastrophe and kept hundreds of people alive. Tying in aviation science, performance psychology, and extensive interviews with pilots, engineers, human factors specialists, crash survivors, and others involved in accidents all over the world, *The Crash Detectives* is an alternately terrifying and inspiring book that might just cure your fear of flying, and will definitely make you a more informed passenger. “Christine Negrone combines her investigative reporting skills with an understanding of the complexities of air accident investigations to bring to life some of history’s most intriguing and heartbreaking cases.” —Bob Woodruff, ABC News

[Competition versus Predation in Aviation Markets](#) - Peter Forsyth 2018-01-18

Prior to liberalization, there was little scope for predatory behaviour in the aviation market. However, following deregulation, new entrants sought to compete with entrenched incumbents. Low-cost carriers (LCCs) gained significant market share, which in turn provoked many different kinds of defensive response. Having put pressure on established carriers, low-cost airlines are themselves feeling the pressure of competition from new operators. While it is normal and natural for airlines to react to competition - modifying their services, the ways in which they offer them and their prices - when does aggressive commercial behaviour go too far and become predation? This book considers what exactly is meant by 'predation' in the aviation environment, and explores the strategies LCCs adopt in order to gain market share, as well as the strategies of the established airlines in response to competition from new entrants to the market. It also addresses the key question of what competition policy should do to ensure intensive competition. *Competition versus Predation in Aviation Markets* brings together contributions from around the world, from airlines, government agencies, leading academics and consultants, providing a wealth of perspectives on a business practice crucial to airline survival.

**In-Flight Medical Emergencies** - Jose V. Nable 2018-03-22

This book is a practical guide for health care professionals encountering medical emergencies during commercial flight. Health care providers should consider responding to emergencies during flight as there are often no other qualified individuals on board. This text covers the most common emergencies encountered during flight, both general medical

emergencies and those specifically tied to the effects of flying, including cardiac, respiratory, and neurological issues. Medicolegal issues are considered in depth, for both United States domestic and international flights, as there is potential legal risk involved in giving medical assistance on a flight. Additional chapters are dedicated to pre-flight clearance and the role non-physician healthcare providers can play. *In-Flight Medical Emergencies: A Practical Guide to Preparedness and Response* is an essential resource for not only physicians but all healthcare professionals who travel regularly.

**Flight Path** - Paul Grescoe 2004-05-05

At a time when airlines across North America and around the world are facing crisis after crisis, and many collapsing into bankruptcy, WestJet has become Canada's most successful airline and one of the two most profitable carriers in North America. WestJet got off the ground in 1996, with three aircraft and 220 employees serving just five western Canadian cities. Today, the company is soaring to new heights, with more than 6 million 'guests'; traveling on 44 planes, and WestJet's over 3,700 people providing service to 26 destinations. Flight Path is the first book to chronicle the amazing success story of Canada's leading low-fare airline. It offers a detailed look at WestJet's path to success and holds valuable lessons for any business reader: the empowering corporate philosophy and people-first culture; the low-cost structure that drives profitability; the passion for customer service that puts the fun back into flying; the focus on technology innovations; and the unwavering commitment to providing safe, friendly, and affordable air travel.

**Low Cost Carriers** - Stephen Ison 2017-07-05

Low cost carriers (LCCs) represent one of the most exciting and dynamic yet often contentious developments in recent commercial aviation history. Formed as a direct result of policies of airline deregulation and liberalisation that were initiated in the United States in the late 1970s before being implemented in certain European, Australasian, Latin American and other world markets from the mid-1990s onwards to encourage competition, LCCs have been responsible for progressively reconfiguring the spatial patterns, operational practices and passenger experiences of flight. In the process, they have enabled growing numbers of people to fly to more places, more frequently, and at lower cost than had been previously possible. In so doing, however, they have generated a number of socio-economic and environmental challenges. The 23 essays included in this volume provide a detailed insight into the emergence, expansion and evolution of the low cost carrier sector worldwide. The volume covers deregulation and liberalisation of the global airline sector, the business models and operating characteristics of low cost carriers, the changing nature of the airline/airport

relationship, LCC network characteristics, issues of pricing and competition and the current impacts and likely future trajectories.

**Flying Off Course IV** - Rigas Doganis 2009-12-18

The airline industry presents an enigma. High growth rates in recent decades have produced only marginal profitability. This book sets out to explain, in clear and simple terms, why this should be so. It provides a unique insight into the economics and marketing of international airlines. Flying Off Course has established itself over the years as the indispensable guide to the inner workings of this exciting industry. This enlarged fourth edition, largely re-written and completely updated, takes into account the sweeping changes which have affected airlines in recent years. It includes much new material on many key topics such as airline costs, 'open skies', air cargo economics, charters and new trends in airline pricing. It also contains two exciting new chapters on the economics of the low-cost no frills carriers and on the future prospects of the industry. The book provides a practical insight into key aspects of airline operations, planning and marketing within the conceptual framework of economics. It is given added force by the author's hands-on former experiences as a Chairman and CEO of Olympic Airways and as a non-executive Director of South African Airways while he is currently a non-executive Director of easyJet.
