*Multilingual Communication* - Juliane House 2004-01-01

In a world of increasing migration and technological progress, multilingual communication has become the rule rather than the exception. This book reflects the growing interest in understanding communication between members of different linguistic

groups and contains a collection of original papers by members of the German Science Foundation's research center on multilingualism at Hamburg University and by international experts, offering an overview of the most important research fields in multilingual communication. The book is divided into four sections dealing with interpreting and translation, code-switching in various institutional contexts, two important strands of multilingual communication: rapport and politeness, and contrastive studies of Japanese and German grammar and discourse. The editors' preface presents the relevant theoretical and methodological background to the issues discussed in this book and points to useful directions for future research.

Business Processes - Angelika Menne-Haritz 2006-02-04  
Collaborative decision making processes are a form of communication inside organizations. Their functioning can teach lessons

for the design of electronic office systems. Those processes are open ended and therefore decide themselves on their form. Like oral deliberations which cannot be modelled in advance any open ended communication process needs means for common control over the further advancement and the ending of the process. The history of German administrative practice and its special methods of using disposals for the control of common processes shows the creation of records as based on communication needs generated by the intention of joint actions. For electronic decision making processes the purposes remain the same, but the means have to follow the effects of electronic communication on messages. The book is a reworked English version of a thesis for the official qualification for university professorship accepted by the German University of Administrative Sciences Speyer. Germany.

### **The Position of the German Language in the World -**

Ulrich Ammon 2019-08-08

The Position of the German Language in the World focuses on the global position of German and the factors which work towards sustaining its use and utility for international communication. From the perspective of the global language constellation, the detailed data analysis of this substantial research project depicts German as an example of a second-rank language. The

book also provides a model for analysis and description of international languages other than English. It offers a framework for strengthening the position of languages such as Arabic, Chinese, French, Portuguese, Spanish and others and for countering exaggerated claims about the global monopoly position of English. This comprehensive handbook of the state of the German language in the world was originally published in 2015 by Walter de Gruyter in German and has been critically acclaimed. Suitable for scholars and researchers of the German language, the handbook shows in detail how intricately and thoroughly German and other second-rank languages are tied up with a great number of societies and how these statistics support or weaken the languages' functions and maintenance.

**100/101/201 Complete Pack**  
- Strokes International  
2008-04-01

The complete set of Series 100, 101 and 201 takes you from the beginner level to the business

professional level. Move from beginner with no prior knowledge of the language to total language competence for business and professional use. The product comes in a high quality packaging with a slipcase. The fully cross-linked language courses from STROKES are one of a kind. Every sentence and every word in the practical dialogues provide both natural and literal translations. In addition, each individual word is linked to a specific grammar explanation. Verbs are directly linked to a conjugation chart. Study vocabulary and grammar in the direct context of a dialogue. 1. EASY LEARNING - The road to foreign language fluency STROKES Easy Learning will

not only teach you the basics of a foreign language in a very short time, it will also guide you all the way down the path to total command of a foreign language. 2. All in one comprehensive language course The STROKES language learning software is a complete all-in-one package that includes all the tools a language learner needs. A context related vocabulary trainer, a dictionary, and a complete grammar complement the set of 300 real-life dialogues and 36 types of multimedia exercises. 3. Language courses in 23 languages and 3 levels The STROKES language software collection includes 3 levels of proficiency. Whether you are an absolute beginner, an advanced learner or a business professional, STROKES has the product you need to easily learn a foreign language. Features and benefits of STROKES EASY LEARNING There is no language that you can't learn. EASY LEARNING uses the advantages of modern computer technologies and has

developed advanced learning techniques that make foreign languages very accessible, even to the not so talented. Here are the determining features of EASY LEARNING that will guide you along the path to total language fluency: 1. Real-Life Language Training Your EASY LEARNING language course will teach you exactly what you need in 300 dialogue situations, covering a wide range of topics that include everyday life, travel and business. The focused training will get you well prepared for conversation in the situations that you are most likely to encounter in real life. It's total immersion. The day you travel to a foreign country, you will feel like you've been there, and communication will come easy. 2. Situation focused Training Language training with STROKES always sets the focus on the one primary goal of mastering communication in each of the 300 real-life situations. To master a situation, you do all the language exercises of your lesson plan within the context

of that situation. You learn to say the most important things to the extent that you end up saying things automatically, without having to think. This is the key to fluency in a foreign language. You also do a number of motivating exercises to learn and consolidate the vocabulary, grammar and pronunciation that apply to the same situation.

3. Total cross-linking of the language content  
What is cross-linking of the language content? A cross-linked language content means that the words of the dialogues are linked to sound, relevant grammar topics, conjugation tables of verbs, literal translations and dictionary forms of words.

4. Natural and Literal Translations  
Natural translations of sentences are translations that are written exactly the way you would express something in English. You need natural translations to immediately understand what is meant in all parts of your language course. Literal translations of words and sentences are translations that follow the structure and

grammar rules of the foreign language. You need literal translations to immediately understand how a native speaker thinks and expresses himself, which is frequently completely different from English. The major benefit of natural and literal translations is that they enable you to learn with direct comparison to your mother tongue, which makes you understand and progress much faster.

5. Multi Channel Learning System  
What makes learning effective and fun with STROKES language courses is that you use the 5 different learning channels of reading, hearing, writing, speaking and picture association in a variety of 36 types of exercises.

6. Lesson plans with 36 diverse types of exercises

7. Your personalized lesson plan  
When you create your own lesson plan, you can choose the exercises and the sequence that work best for you. In the selection of EASY LEARNING exercises there are usually several exercises for each of 10 learning goals, as listed below. Depending on the type of

learner you are, you can select those exercises that best suit your personality. The Vocabulary Trainer STROKES language courses come with an intelligent vocabulary trainer, which you can use to review all the words of a single dialogue at a time, a combination of dialogues or for all the dialogues you have learnt. By integrating the vocabulary trainer in your daily lesson plan, you ensure that you never forget the words you have already learnt as you go along. The Grammar Trainer STROKES language courses include a complete grammar with examples from the real-life dialogues. Each grammar topic is linked to the dialogues, which allows you to learn and review grammar topics one by one and by direct reference to the sentences of the dialogues in which the topics occur.
