Last Bell - Carl Bistany 2015-11-05

In the mid-nineties, the Alfred Glickman School was just another failing school in one of America's most violent cities. Then SABIS, a private, for-profit education provider, took over. Twenty years later, the school is a six-time silver medalist in U.S. News & World Report's annual "America's Best High Schools" listing, and every single graduate of the school has been offered a college place. With success of this magnitude, you would think that for-profit managed charter schools like SABIS would be in high demand. On the contrary, they are fought at every turn. Why is the idea of employing for-profit companies to help rescue failing public schools treated with fear and hostility? Stranger still, why does a nation built on free enterprise refuse to embrace a free market strategy when so many students and schools would clearly benefit and with so much at stake?

Last Bell is a book about politics, money and power. It examines the charge that for-profits running charter schools are in it for the money, not the kids, and reveals the real motives of those spreading these ideas and why they fight private sector involvement in public schools. Last Bell is a reasonable voice in a polarized debate. It does not call for an end to public schools but rather imagines a future in which private companies

help create a competitive market for public education to boost performance, turn derelict schools into centers of excellence and give parents even in the worst neighborhoods real choice and their children a future.

Generating Prosperity for Working Families in Affluent Countries - Brian Nolan 2018-09-26

The challenge of how to ensure that working families see their living standards improve over time is central in rich countries. Many argue that conditions are stagnating for many, driving political polarization and threatening social stability. *Generating Prosperity for Working Families in Affluent Countries* investigates how common such a "squeeze" on middle-income earners has actually been, and what forces underlie it in terms of globalization, technology, and government policies. *Generating Prosperity for Working Families in Affluent Countries* presents the findings of a comprehensive analysis of performance in improving living standards across the wealthy nations of the OECD. It relates performance to overall economic growth, exploring why these often diverge substantially, and to the different models of capitalism or economic growth embedded in each country. Going beyond income, other indicators and aspects of living standards are also incorporated including non-monetary indicators of deprivation and financial strain, wealth and its distribution, and intergenerational mobility. Through looking across this broad canvas, this book teases out how ordinary households have fared in recent decades in these critically important respects, and how that should inform the quest for inclusive growth and prosperity.

Analyzing the Relationship between Corporate Social Responsibility and Foreign Direct Investment - Ojo, Marianne 2016-08-30

The decisions a corporation makes affect more than just its stakeholders and can have wide social, environmental, and economic consequences. The notion of corporate social responsibility (CSR) describes the relationship between a business and society as a whole, considering all tangential effects of business. This facilitates a business environment built around practical regulations and transparency necessary to ensure ethical and responsible business practice. Analyzing the Relationship between Corporate Social Responsibility and Foreign Direct Investment explores the relationship between ethical and environmental standards and foreign investment on the international market. As certain jurisdictions are hesitant to comply with these standards, this publication elucidates the benefits of practicing CSR as a means of sustainable economic growth and to mitigate devastating negative consequences, especially in the developing world. This book is a key reference source for professionals, economists, students of business and finance, policy makers, and government agencies.

The Routledge Companion to Smart Cities - Katharine S. Willis
2020-04-10

The Routledge Companion to Smart Cities explores the question of what it means for a city to be 'smart', raises some of the tensions emerging in smart city developments and considers the implications for future ways of inhabiting and understanding the urban condition. The volume draws together a critical and cross-disciplinary overview of the emerging topic of smart cities and explores it from a range of theoretical and empirical viewpoints. This timely book brings together key thinkers and projects from a wide range of fields and perspectives into one volume to provide a valuable resource that would enable the reader to take their own critical position within the topic. To situate the topic of the smart city for the reader and establish key concepts, the volume sets out the various interpretations and aspects of what constitutes and defines smart cities. It investigates and considers the range of factors that shape the characteristics of smart cities and draws together different disciplinary perspectives. The consideration of what shapes the smart city is explored through discussing three broad 'parts' - issues of governance, the nature of urban development and how visions are realised - and includes chapters that draw on empirical studies to frame the discussion with an understanding not just of the nature of the smart city but also how it is studied, understood and reflected upon. The Companion will appeal to academics and advanced undergraduates and postgraduates from across many disciplines including Urban Studies, Geography, Urban Planning, Sociology and Architecture, by providing state of the art reviews of key themes by leading scholars in the field, arranged under clearly themed sections.

The Problem of Social Inequality - Scott G. McNall 2015-12-07

Within and among nations, rising levels of social inequality threaten our collective future. Currently, upwards of 80% of people's life chances are determined by factors over which they have absolutely no control. Social inequality threatens the democratic project because it destroys the trust on which governments depend, and it gives rise to corrupt political and economic institutions. How can we get out of the traps we have created for ourselves? We need to reboot capitalism. Drawing on diverse examples from a range of countries, McNall explains the social, economic, and ecological traps we have set for ourselves and develops a set of rules of resilience that are necessary conditions for the creation and maintenance of democratic societies, and a set of rules essential for creating a sustainable future.

Wealthier, Fairer Scotland - Michael Keating 2017-03-08

The ambition of the Scottish Government is to create a wealthier and fairer nation. Following the devolution acts of 1998, 2012 and 2016, it has extensive powers and resources to fulfill its ambition. This interdisciplinary collection of essays asks how it can be achieved, given the range of powers available, economic constraints, institutions and public support. Looking at economic policy, taxation and welfare, it provides a realistic analysis of the opportunities and constraints facing a small, devolved nation. After years of debate on what powers Scotland should have, this book examines how they might be used to shape the country's future.

The Regulation of Financial Planning in Australia - Angelique Nadia Sweetman McInnes 2019-08-20

This book investigates the legitimacy of the current Australian Financial Services Licensee-Authorised Representative (AFSL-AR) licensing model, as specified in the Commonwealth Corporations Act 2001. The book rectifies the deficiency in scholarly attention to this matter by developing a new conceptualised framework for the financial planning discipline. It

takes into account theories in agency, legislation, legitimacy and the independent individual regulatory regimes in other professions; thereafter integrating this framework with the financial planning theory to examine the legitimacy, or what was found to be the illegitimacy of licensing advisers via multiple third party conflicted commercially oriented licensees. This book makes a very useful reference to understanding financial planning licencing model in Australia.

The Making of a World City - Greg Clark 2014-12-31

After two decades of evolution and transformation, London had become one of the most open and cosmopolitan cities in the world. The success of the 2012 Olympics set a high water-mark in the visible success of the city, while its influence and soft power increased in the global systems of trade, capital, culture, knowledge, and communications. The Making of a World City: London 1991 - 2021 sets out in clear detail both the catalysts that have enabled London to succeed and also the qualities and underlying values that are at play: London's openness and self-confidence, its inventiveness, influence, and its entrepreneurial zeal. London's organic, unplanned, incremental character, without a ruling

design code or guiding master plan, proves to be more flexible than any planned city can be. Cities are high on national and regional agendas as we all try to understand the impact of global urbanisation and the re-urbanisation of the developed world. If we can explain London's successes and her remaining challenges, we can unlock a better understanding of how cities succeed.

Controlling Capital - Nicholas Dorn 2016-02-12

Controlling Capital examines three pressing issues in financial market regulation: the contested status of public regulation, the emergence of 'culture' as a proposed modality of market governance, and the renewed ascendancy of private regulation. In the years immediately following the outbreak of crisis in financial markets, public regulation seemed almost to be attaining a position of command – the robustness and durability of which is explored here in respect of market conduct, European Union capital markets union, and US and EU competition policies.

Subsequently there has been a softening of command and a return to public-private co-regulation, positioned within a narrative on culture. The potential and limits of culture as a regulatory resource are unpacked here in respect of occupational and organisational aspects, stakeholder connivance and wider political embeddedness. Lastly the book looks from both appreciative and critical perspectives at private regulation, through financial market associations, arbitration of disputes and, most controversially, market 'policing' by hedge funds. Bringing together a distinguished group of international experts, this book will be a key text for all those concerned with issues arising at the intersection of financial markets, law, culture and governance.
