Calculus - Monty J. Strauss 2002

Built from the ground up to meet the needs of today's calculus learners, Calculus was the first book to pair a complete calculus syllabus with the best elements of reform—like extensive verbalization and strong geometric visualization. The Third Edition of this groundbreaking book has been crafted and honed, making it the book of choice for those seeking the best of both worlds. Numerous chapters offer an exciting choice of problem sets and include topics such as functions and graphs, limits and continuity, differentiation, additional applications of the derivative, integration, additional applications of the integral, methods of integration, infinite series, vectors in the plane and in space, vector-valued functions, partial differentiation, multiple integration, introduction to vector analysis, and introduction to differential equations. For individuals in fields related to engineering, science, or mathematics.

Homeopathic Guide for Travelers - Ravi Roy 2013-01-08

Ravi Roy and Carola Lage-Roy present a wealth of strategies for using homeopathic medicine to stay happy and healthy while traveling. A bestseller in its original German edition, *The Homeopathic Guide for Travelers* is equally useful for backpackers, business travelers, and even luxury vacationers. It provides all the preparation needed for a journey, whether a short outing, far-off holiday, or challenging trek. The homeopathic remedies profiled here—many of them effective even when taken last-minute—address everything from exhaustion to altitude change, from jet lag to climate shifts to the side effects of unfamiliar foods. Drawing from the latest research, the book describes which homeopathic medicines work best against infectious diseases, such as malaria, hepatitis, and Lyme disease, and details remedies for injuries sustained while backpacking, climbing, or diving. Roy and Lage-Roy also explain how to treat stings and bites from poisonous animals and reactions from plants like poison ivy. An introductory chapter features a basic traveler's first-aid kit.

It is primarily a guide to aid first responders in (1) quickly identifying the specific or generic classification of the material(s) involved in the incident, and (2) protecting themselves and the general public during this initial response phase of the incident"-Home page of source document on the Internet.

Introduction to Laser Technology - C. Breck Hitz 2012-04-10

The only introductory text on the market today that explains the underlying physics and engineering applicable to all lasers Although lasers are becoming increasingly important in our high-tech environment, many of the technicians and engineers who install, operate, and maintain them have had little, if any, formal training in the field of electro-optics. This can result in less efficient usage of these important tools. *Introduction to Laser Technology, Fourth Edition* provides readers with a good understanding of what a laser is and what it can and cannot do. The book explains what types of laser to use for different purposes and how a laser can be modified to improve its performance in a given application. With a unique combination of clarity and technical depth, the book explains the characteristics and important applications of commercial lasers worldwide and discusses light and optics, the fundamental elements of lasers, and laser modification.? In addition to new chapter-end problems, the Fourth Edition includes new and expanded chapter material on: Material and wavelength Diode Laser Arrays Quantum-cascade lasers Fiber lasers Thin-disk and slab lasers Ultrafast fiber lasers Raman lasers Quasi-phase matching Optically pumped semiconductor lasers *Introduction to Laser Technology, Fourth Edition* is an excellent book for students, technicians, engineers, and other professionals seeking a fuller, more formal introduction to the field of laser technology.

Unstoppable - Yanni Raz 2016-06-09

Unstoppable is a word defined as "difficult or impossible to preclude or stop." As a human quality, it is something that we associate with people such as sports superstars, those who do whatever it takes to inspire others and lead teams to the greatest of victories. Sometimes, an idea or person can become unstoppable. Unstoppable, like Charles Lindbergh crossing the Atlantic in a solo flight when no one had thought it was possible, or track star Roger Bannister breaking the four-minute mile barrier. Not everyone can be an explorer or a great athlete, but anyone can be unstoppable in their chosen endeavors in life. If you are willing to possess an unwavering determination to succeed and a consistent willingness to learn and evolve, you can become unstoppable and triumph too. This book is about a personal struggle, one in which the author awoke from a coma after a terrible accident and faced a life of permanent paralysis. A long battle of driven determination resulted in Yanni Raz regaining his health and becoming a self-made millionaire

after migrating from his native Israel to the United States. Through careers as a musician, a Starbucks barista, a salesman, a real estate whiz, a professional poker player and a hard money lender, Yanni learned reliable principles and the skills necessary for success. Unstoppable covers many topics including controlling your life, making the best decisions, creating new opportunities, properly assessing signals, expertly negotiating, and succeeding by storytelling across the media landscape. You'll learn about integrity in business, asset diversification, and many other life tips that thousands of people learn from Yanni on a daily basis. It is time to become fearless and lead a powerful life. With Yanni's new book Unstoppable, you can do just that.

Attraction and Hostility - Anton Pelinka 2017-07-28

Attraction and hostility find expression in almost every variety of human relationship, and have consequently provided a central theme for social

psychology since its beginnings. Yet attempts to conceptualize the diverse phenomena embraced in these terms have produced theories of such wide generality that they have little explanatory or predictive force. The object of the present study is to bring precision to a vast and sprawling area by setting limits and dimensions to the phenomena and investigating them experimentally on the basis of a series of hypotheses derived from a critical analysis of current conceptual approaches, including frustration, need-satisfaction, and dissonance models. The programme of experimental studies focuses on cognitive validation-a motivation to form and maintain subjectively valid evaluations of the self and the social environment-which is shown to be a common denominator of a number of attraction and hostility measures. The results throw light on reactions to boastfulness and to self-debasement; impressions of persons who are described by biased informants; effects of self-evaluation on competitiveness, and the projection of unfavourable characteristics. The interest of the study for social psychologists derives both from its theoretical integration of a wide range of behaviour and from its contribution to experimental design.
