[Exhausting Dance](#) - Andre Lepecki 2006-07-13

The only scholarly book in English dedicated to recent European contemporary dance, *Exhausting Dance: Performance and the Politics of Movement* examines the work of key contemporary choreographers who have transformed the dance scene since the early 1990s in Europe and the US. Through their vivid and explicit dialogue with performance art, visual arts and critical theory from the past thirty years, this new generation of choreographers challenge our understanding of dance by exhausting the concept of movement. Their work demands to be read as performed extensions of the radical politics implied in performance art, in post-structuralist and critical theory, in post-colonial theory, and in critical race studies. In this far-ranging and exceptional study, Andre Lepecki brilliantly analyzes the work of the choreographers: * Jerome Bel (France) * Juan Dominguez (Spain) * Trisha Brown (US) * La Ribot (Spain) * Xavier Le Roy (France-Germany) * Vera Mantero (Portugal) and visual and performance artists: * Bruce Nauman (US) * William Pope.L (US). This book offers a significant and radical revision of the way we think about dance, arguing for the necessity of a renewed engagement between dance studies and experimental artistic and philosophical practices.

Technology and Society - Deborah G. Johnson
2008-10-17

An anthology of writings by thinkers ranging from Freeman Dyson to Bruno Latour that focuses on the interconnections of technology, society, and values and how these may affect the future. Technological change does not happen in a vacuum; decisions about which technologies to develop, fund, market, and use engage ideas about values as well as calculations of costs and benefits. This anthology focuses on the interconnections of technology, society, and values. It offers writings by authorities as varied as Freeman Dyson, Laurence Lessig, Bruno Latour, and Judy Wajcman that will introduce readers to recent thinking about technology and provide them with conceptual tools, a theoretical framework, and knowledge to help understand how technology shapes society and how society shapes technology. It offers readers a new perspective on such current issues as globalization, the balance between security and privacy, environmental justice, and poverty in the developing world. The careful ordering of the selections and the editors' introductions give *Technology and Society* a coherence and flow that is unusual in anthologies. The book is suitable for use in undergraduate courses in STS and other disciplines. The selections begin with predictions of the future that range from forecasts of technological utopia to cautionary tales. These are followed by writings that explore the complexity of sociotechnical systems, presenting a picture of how technology and society work in step, shaping and being shaped by one another. Finally, the book goes

back to considerations of the future, discussing twenty-first-century challenges that include nanotechnology, the role of citizens in technological decisions, and the technologies of human enhancement.

Talking to Strangers - Malcolm Gladwell
2019-09-10

Malcolm Gladwell, host of the podcast Revisionist History and author of the #1 New York Times bestseller *Outliers*, offers a powerful examination of our interactions with strangers and why they often go wrong—now with a new afterword by the author. A Best Book of the Year: The Financial Times, Bloomberg, Chicago Tribune, and Detroit Free Press How did Fidel Castro fool the CIA for a generation? Why did Neville Chamberlain think he could trust Adolf Hitler? Why are campus sexual assaults on the rise? Do television sitcoms teach us something about the way we relate to one another that isn't true? *Talking to Strangers* is a classically Gladwellian intellectual adventure, a challenging and controversial excursion through history, psychology, and scandals taken straight from the news. He revisits the deceptions of Bernie Madoff, the trial of Amanda Knox, the suicide of Sylvia Plath, the Jerry Sandusky pedophilia scandal at Penn State University, and the death of Sandra Bland—throwing our understanding of these and other stories into doubt. Something is very wrong, Gladwell argues, with the tools and strategies we use to make sense of people we don't know. And because we don't know how to talk to strangers, we are inviting conflict and misunderstanding in ways that have a profound effect on our lives and our world. In his first book since his #1 bestseller *David and Goliath*, Malcolm Gladwell has written a gripping guidebook for troubled times.

#Accelerate - Robin Mackay 2019-01-15

An apparently contradictory yet radically urgent collection of texts tracing the genealogy of a controversial current in contemporary philosophy. Accelerationism is the name of a contemporary political heresy: the insistence that the only radical political response to capitalism is not to protest, disrupt, critique, or détourne it, but to accelerate and exacerbate its uprooting, alienating, decoding, abstractive tendencies. #Accelerate presents a genealogy of accelerationism, tracking the impulse through 90s UK darkside cyberculture and the theory-fictions of Nick Land, Sadie Plant, Iain Grant, and CCRU, across the cultural underground of the 80s (rave, acid house, SF cinema) and back to its sources in delirious post-68 ferment, in texts whose searing nihilistic jouissance would later be disavowed by their authors and the marxist and academic establishment alike. On either side of this central sequence, the book includes texts by Marx that call attention to his own "Prometheanism," and key works from recent years document the recent extraordinary emergence of new accelerationisms steeled against the onslaughts of neoliberal capitalist realism, and retooled for the twenty-first century. At the forefront of the energetic contemporary debate around this disputed,

problematic term, #Accelerate activates a historical conversation about futurity, technology, politics, enjoyment, and capital. This is a legacy shot through with contradictions, yet urgently galvanized today by the poverty of “reasonable” contemporary political alternatives.

Empathy and the Novel - Suzanne Keen
2007-04-19

Does empathy felt while reading fiction actually cultivate a sense of connection, leading to altruistic actions on behalf of real others? *Empathy and the Novel* presents a comprehensive account of the relationships among novel reading, empathy, and altruism. Drawing on psychology, narrative theory, neuroscience, literary history, philosophy, and recent scholarship in discourse processing, Keen brings together resources and challenges for the literary study of empathy and the psychological study of fiction reading. Empathy robustly enters into affective responses to fiction, yet its role in shaping the behavior of emotional readers has been debated for three centuries. Keen surveys these debates and illustrates the techniques that invite empathetic response. She argues that the perception of fictiveness increases the likelihood of readers' empathy in part by releasing them from the guarded responses necessitated by the demands of real others. Narrative empathy is a strategy and subject of contemporary novelists from around the world, writers who tacitly endorse the potential universality of human emotions when they call upon their readers' empathy. If narrative empathy is to be taken seriously, Keen suggests, then women's reading and responses to popular fiction occupy a central position in literary inquiry, and cognitive literary studies should extend its range beyond canonical novels. In short, Keen's study extends the playing field for literature practitioners, causing it to resemble more closely that wide open landscape inhabited by readers.

Future Babble - Dan Gardner 2010-10-12

In 2008, as the price of oil surged above \$140 a barrel, experts said it would soon hit \$200; a few months later it plunged to \$30. In 1967, they said the USSR would have one of the fastest-growing economies in the year 2000; in 2000, the USSR did not exist. In 1911, it was pronounced that there would be no more wars in

Europe; we all know how that turned out. Face it, experts are about as accurate as dart-throwing monkeys. And yet every day we ask them to predict the future — everything from the weather to the likelihood of a catastrophic terrorist attack. *Future Babble* is the first book to examine this phenomenon, showing why our brains yearn for certainty about the future, why we are attracted to those who predict it confidently, and why it's so easy for us to ignore the trail of outrageously wrong forecasts. In this fast-paced, example-packed, sometimes darkly hilarious book, journalist Dan Gardner shows how seminal research by UC Berkeley professor Philip Tetlock proved that pundits who are more famous are less accurate — and the average expert is no more accurate than a flipped coin. Gardner also draws on current research in cognitive psychology, political science, and behavioral economics to discover something quite reassuring: The future is always uncertain, but the end is not always near.

The tipping point is that magic moment when an idea, trend, or social behavior crosses a threshold, tips, and spreads like wildfire. This widely acclaimed bestseller, in which Malcolm Gladwell explores and brilliantly illuminates the tipping point phenomenon, is already changing the way people throughout the world think about selling products and disseminating ideas. "A wonderful page-turner about a fascinating idea that should affect the way every thinking person looks at the world."

[Surveillance Valley](#) - Yasha Levine 2018-02-06

The internet is the most effective weapon the government has ever built. In this fascinating book, investigative reporter Yasha Levine uncovers the secret origins of the internet, tracing it back to a Pentagon counterinsurgency surveillance project. A visionary intelligence officer, William Godel, realized that the key to winning the war in Vietnam was not outgunning the enemy, but using new information technology to understand their motives and anticipate their movements. This idea -- using

computers to spy on people and groups perceived as a threat, both at home and abroad -- drove ARPA to develop the internet in the 1960s, and continues to be at the heart of the modern internet we all know and use today. As Levine shows, surveillance wasn't something that suddenly appeared on the internet; it was woven into the fabric of the technology. But this isn't just a story about the NSA or other domestic programs run by the government. As the book spins forward in time, Levine examines the private surveillance business that powers tech-industry giants like Google, Facebook, and Amazon, revealing how these companies spy on their users for profit, all while doing double duty as military and intelligence contractors. Levine shows that the military and Silicon Valley are effectively inseparable: a military-digital complex that permeates everything connected to the internet, even coopting and weaponizing the antigovernment privacy movement that sprang up in the wake of Edward Snowden. With deep research, skilled storytelling, and provocative arguments, *Surveillance Valley* will change the way you think about the news -- and the device on which you read it.

How to Murder Your Life - Cat Marnell 2017-01-31

From the New York Times bestselling author and former beauty editor Cat Marnell, a "vivid, maddening, heartbreaking, very funny, chaotic" (The New York Times) memoir of prescription drug addiction and self-sabotage, set in the glamorous world of fashion magazines and downtown nightclubs. At twenty-six, Cat Marnell was an associate beauty editor at *Lucky*, one of the top fashion magazines in America—and that's all most people knew about her. But she hid a secret life. She was a prescription drug addict. She was also a "doctor shopper" who manipulated Upper East Side psychiatrists for pills, pills, and more pills; a lonely bulimic who spent hundreds of dollars a week on binge foods; a promiscuous party girl who danced barefoot on banquets; a weepy and hallucination-prone insomniac who would take anything—anything—to sleep. This is a tale of self-loathing, self-sabotage, and yes, self-tanner. It begins at a posh New England prep school—and with a prescription for the Attention Deficit Disorder medication Ritalin. It continues

to New York, where we follow Marnell's amphetamine-fueled rise from intern to editor through the beauty departments of NYLON, Teen Vogue, Glamour, and Lucky. We see her fight between ambition and addiction and how, inevitably, her disease threatens everything she worked so hard to achieve. From the Condé Nast building to seedy nightclubs, from doctors' offices and mental hospitals, Marnell "treads a knife edge between glamorizing her own despair and rendering it with savage honesty....with the skill of a pulp novelist" (The New York Times Book Review) what it is like to live in the wild, chaotic, often sinister world of a young female addict who can't say no. Combining "all the intoxicating intrigue of a thriller and yet all the sobering pathos of a gifted writer's true-life journey to recover her former health, happiness, ambitions, and identity" (Harper's Bazaar), *How to Murder Your Life* is mesmerizing, revelatory, and necessary.

Dark Ecology - Timothy Morton 2016-04-12
Timothy Morton argues that ecological awareness in the present Anthropocene era takes the form of a strange loop or Möbius strip, twisted to have only one side. Deckard travels this oedipal path in *Blade Runner* (1982) when he learns that he might be the enemy he has been ordered to pursue. Ecological awareness takes this shape because ecological phenomena have a loop form that is also fundamental to the structure of how things are. The logistics of agricultural society resulted in global warming and hardwired dangerous ideas about life-forms into the human mind. Dark ecology puts us in an uncanny position of radical self-knowledge, illuminating our place in the biosphere and our belonging to a species in a sense that is far less obvious than we like to think. Morton explores the logical foundations of the ecological crisis, which is suffused with the melancholy and negativity of coexistence yet evolving, as we explore its loop form, into something playful, anarchic, and comedic. His work is a skilled fusion of humanities and scientific scholarship, incorporating the theories and findings of philosophy, anthropology, literature, ecology, biology, and physics. Morton hopes to reestablish our ties to nonhuman beings and to help us rediscover the playfulness and joy that can brighten the dark, strange loop we traverse.

Fanfiction and the Author - Judith Fathallah
2017

Whether you look at quantity, quality, or readership, we are in an unprecedented era of fan fiction. Thus far, however, the genre has been subject to relatively little rigorous qualitative or quantitative study—a problem that Judith May Fathallah remedies here through close analysis of fanfiction related to Sherlock, Supernatural, and Game of Thrones. Her large-scale study of the sites, receptions, and fan rejections of fanfic demonstrate how it often legitimates itself through traditional notions of authorship even as its explicit discussion and

deconstruction of the author figure contests traditional discourses of authority and opens new spaces for writing that challenges the authority of media professionals.

Over the Edge - Meredith Wild 2016-11-22
Editorial Reviews "The third book in Wild's Bridge series is a fantastic read, certain to woo new readers and satiate her returning fans. *Over the Edge* checks off all the boxes: it's emotional, intense and extremely sexy. Factfulness - Hans Rosling 2018-04-03

INSTANT NEW YORK TIMES BESTSELLER

"One of the most important books I've ever read—an indispensable guide to thinking clearly about the world." - Bill Gates "Hans Rosling tells the story of 'the secret silent miracle of human progress' as only he can. But *Factfulness* does much more than that. It also explains why progress is so often secret and silent and teaches readers how to see it clearly." —Melinda Gates "Factfulness by Hans Rosling, an outstanding international public health expert, is a hopeful book about the potential for human progress when we work off facts rather than our inherent biases." - Former U.S. President Barack Obama *Factfulness: The stress-reducing habit of*

only carrying opinions for which you have strong supporting facts. When asked simple questions about global trends—what percentage of the world's population live in poverty; why the world's population is increasing; how many girls finish school—we systematically get the answers wrong. So wrong that a chimpanzee choosing answers at random will consistently outguess teachers, journalists, Nobel laureates, and investment bankers. In *Factfulness*, Professor of International Health and global TED phenomenon Hans Rosling, together with his two long-time collaborators, Anna and Ola, offers a radical new explanation of why this happens. They reveal the ten instincts that distort our perspective—from our tendency to divide the world into two camps (usually some version of us and them) to the way we consume media (where fear rules) to how we perceive progress (believing that most things are getting worse). Our problem is that we don't know what we don't know, and even our guesses are informed by unconscious and predictable biases. It turns out that the world, for all its imperfections, is in a much better state than we might think. That doesn't mean there aren't real concerns. But when we worry about everything all the time instead of embracing a worldview based on facts, we can lose our ability to focus on the things that threaten us most. Inspiring and revelatory, filled with lively anecdotes and moving stories, *Factfulness* is an urgent and essential book that will change the way you see the world and empower you to respond to the crises and opportunities of the future. --- "This book is my last battle in my life-long mission to fight devastating ignorance...Previously I armed myself with huge data sets, eye-opening software, an energetic learning style and a Swedish bayonet for sword-swallowing. It wasn't enough. But I hope this book will be." Hans Rosling, February 2017.
