To End All Segregation - Robert D. Loevy 1990

This book traces the early history of the Civil Rights Movement in the United States, showing how brutal police treatment of civil rights demonstrators in Birmingham, Alabama, forced President Kennedy to send a strong civil rights bill to Congress in June of 1963. The various legislative strategies used to get the Civil Rights Act of 1964 through Congress are detailed. The study relies on original sources (letters, memoranda, oral histories, daily notes and diaries) in presidential and congressional libraries. These materials are supported by an extensive series of personal interviews by the author. Contents: The Civil Rights Act of 1964; John F. Kennedy, "The Fires of Discord"; Writing the Administration Bill; Subcommittee No. 5 "Out of Control" for Civil Rights; Lyndon B. Johnson, "To Write It in The Books of Law"; "Vultures" in the Galleries/"Miracles" On the Floor; Mike Mansfield and Hubert Humphrey, "Conditioning for the Long Ordeal"; Richard Russel, The Defending Champion; Filibuster #16The Motion to Consider; Filibuster #26The Bill Itself; Everett M. Dirksen, The Great Amender; The Drive for Cloture, "An Idea Whose Time Has Come"; "To Die On The Barricades"/To Earn "A Place of Honor".

Breast MRI - Elizabeth A. Morris 2005-04-26

Drs. Elizabeth Morris and Laura Liberman, two rising stars in breast MRI

from the Memorial Sloan-Kettering Cancer Center, edited this complete, superbly illustrated practical guide. The comprehensive text is written by contributors from the top cancer centers in the world. Introductory chapters are devoted to diagnosis and cover the basics of performing breast MRI exams, setting up a breast MR program, and understanding clinical indications. Additional chapters discuss breast interventional procedures, including the surgeon's use of MR and MR-guided needle interventions. A comprehensive diagnostic atlas completes the volume and addresses the spectrum of clinical situations, such as various carcinomas, special tumor types, and benign histologies. Radiologists, residents, and fellows will benefit from this guide's thorough examination of image interpretation, which highlights pitfalls that specialists must recognize.

Marxism in a Lost Century - Gary Roth 2014-12-22

Marxism in a Lost Century retells the history of the radical left during the twentieth century through the words and deeds of Paul Mattick. Three biographical themes receive special attention -- the self-taught nature of left-wing activity, Mattick's publishing endeavors, and the nexus of men, politics, and friendship.

Dental Secrets - Stephen T. Sonis 1999

Using a question-and-answer format, this book covers all the latest clinical and public health aspects of dentistry as well as how computers and the Internet can manage a dental practice and quickly provide information to dental practitioners. The content of all chapters has been update and revised. New questions, answers, and illustrations reflect current additions to dental materials, surgical techniques, modalities of diagnosis and infection.

Nanotechnology Research Directions: IWGN Workshop Report - R.S.

Williams 2013-03-09

energy production, environmental management, transportation, communication, computation, and education. As the twenty-first century unfolds, nanotechnology's impact on the health, wealth, and security of the world's people is expected to be at least as significant as the combined influences in this century of antibiotics, the integrated circuit, and human-made polymers. Dr. Neal Lane, Advisor to the President for Science and Technology and former National Science Foundation (NSF) director, stated at a Congressional hearing in April 1998, "If I were asked for an area of science and engineering that will most likely produce the breakthroughs of tomorrow, I would point to nanoscale science and engineering." Recognizing this potential, the White House Office of Science and Technology Policy (OSTP) and the Office of Management and Budget (OMB) have issued a joint memorandum to Federal agency heads that identifies nanotechnology as a research priority area for Federal investment in fiscal year 2001. This report charts "Nanotechnology Research Directions," as developed by the Interagency Working Group on Nano Science, Engineering, and Technology (IWGN) of the National Science and Technology Council (NSTC). The report incorporates the views of leading experts from government, academia, and the private sector. It reflects the consensus reached at an IWGN-sponsored workshop held on January 27-29, 1999, and detailed in contributions submitted thereafter by members of the V. S. science and

engineering community. (See Appendix A for a list of contributors.

Health Financing in Indonesia - 2009-01-01

In 2004 the Indonesian government made a commitment to provide its entire population with health insurance coverage through a mandatory public health insurance scheme. It has moved boldly already provides coverage to an estimated 76.4 million poor and near poor, funded through the public budget. Nevertheless, over half the population still lacks health insurance coverage, and the full fiscal impacts of the government's program for the poor have not been fully assessed or felt. In addition, significant deficiencies in the efficiency and equity of the current health system, unless addressed will exacerbate cost pressures and could preclude the effective implementation of universal coverage (Ue and the desired result of improvements in population health outcomes and financial protection. For Indonesia to achieve UC, systems' performance must be improved and key policy choices with respect to the configuration of the health financing system must be made. Indonesia's health system performs well with respect to some health outcomes and financial protection, but there is potential for significant improvement. High-level political decisions are necessary on key elements of the health financing reform package. The key transitional questions to get there include: [the benefits that can be afforded and their impacts on health outcomes and financial protection; [how the more than 50 percent of those currently without coverage will be insured; [how to pay medical care providers to assure access, efficiency, and quality; [developing a streamlined and efficient administrative structure; [how to address the current supply constraints to assure availability of promised services; [how to raise revenues to finance the system, including the program for the poor as well as currently uninsured groups that may require government subsidization such as the more than 60 million informal sector workers, the 85 percent of workers in firms of less than five employees, and the 70 percent of the population living in rural areas.

Introduction to Interlinguistics - Federico Gobbo 2020-01-25
Script from the year 2020 in the subject Speech Science / Linguistics, grade: 1.0, University of Amsterdam (ACLC), course: Introduction to Interlinguistics (105218036Y), language: English, abstract: This book is the result of the Lecture Notes produced for the class "Introduction to Interlinguistics" held at the University of Amsterdam during my first mandate as Special Chair holder there (2014-2019). This means that the intended readers are my students, who may come from the Humanities, such as English Studies or Philosophy, as well as from more formally oriented curricula, such as Logic or Artificial Intelligence. The structure of the volume follows the structure of the class: there are seven chapters that correspond to the seven weeks of contact hours. Thus, the expression "in this chapter" is equivalent to "in this week". The first three chapters form Part I, which gives the theoretical basis, while the second three chapters of Part II apply the theory to major case studies in Interlinguistics. Please note that there is more material than I succeed to cover in the classroom - I am very ambitious - and that I explain in class the content of this book. This means that some sections may be skipped, depending on the specific class. For details, please pay attention to the official communication sent to class members. In studying this book you will acquire the conceptual toolbox of the working interlinguist. Technical terms and important names are indicated in bold and referred to the index by the end of the book, to facilitate students. Readers who do not belong to my students' cohorts may also appreciate, as - to the best of my knowledge - there is no such book published in English yet. Comparable published works in other languages are: first, the book by Barandovska [1995], written for advanced Esperanto speakers enrolled the programme in Interlinguistics Studies at the Adam Mickiewicz University in Poznań; second, my short textbook in Italian [Gobbo, 2009],

The 60-Year Curriculum - Christopher J. Dede 2020-04-20

The 60-Year Curriculum explores models and strategies for lifelong learning in an era of profound economic disruption and reinvention. Over the next half-century, globalization, regional threats to sustainability, climate change, and technologies such as artificial intelligence and data mining will transform our education and workforce sectors. In turn, higher education must shift to offer every student life-wide opportunities for the continuous upskilling they will need to achieve decades of worthwhile employability. This cutting-edge book describes the evolution of new models—covering computer science, inclusive design, critical thinking, civics, and more—by which universities can increase learners' trajectories across multiple careers from mid-adolescence to retirement. Stakeholders in workforce development, curriculum and instructional design, lifelong learning, and higher and continuing education will find a unique synthesis offering valuable insights and actionable next steps.

Corporate Finance - Aswath Damodaran 1997

A text with a thoroughly integrated applications orientation revolving around the philosophy that companies need to know how to finance organizations in order to reach optimal capital structure. Recognizing that every investment decision involves choosing the right amount of debt and equity, the text suggests readers look at data and ask, "What is relevant? Why is this detail important? How does it answer the question?"

The Grandfamily Guidebook - Andrew Adesman 2018-08-28

Are you one of nearly 3 million grandparents across North America raising your grandchildren as part of a grandfamily? You may have done all this parenting stuff before, but times have changed since you raised your own kids, and you likely never thought you'd be raising kids again. What has led to all these family issues and the growing need for grandparents to step up? Now more than ever, substance use and

addiction have made many birth parents simply unfit for the job, whether the problem is alcohol, opioids, or other drugs. Family dynamics might also be undermined by parents' mental health or medical problems, incarceration, or a simple lack of preparedness for family responsibilities. Whatever the reason for your new role, you must now help your grandchildren adjust to their extended family as part of their everyday life, through the best care you are able to provide. While your new role means that you will likely have to change the way you live, the kinship care you provide your grandchildren might make all the difference in the world. In *The Grandfamily Guidebook*—which leading medical experts have called a “must-have” resource for grandparents raising grandchildren—authors Andrew Adesman, MD, and Christine Adamec offer expert medical advice, helpful insights gleaned from other grandparents, and data mined from the 2016 Adesman Grandfamily Study—the broadest and most diverse research study of its kind to date. You'll also find hands-on tips you'll be able to reference whenever you need them, including how to cope with difficult birth parents, school issues and social-life challenges, problem behaviors that stem from a difficult past, and your own self-care. Starting with its foreword by the renowned Dr. William Sears, across this book you will find practical, inspiring help as you navigate the financial impacts, legal considerations, and medical issues that commonly arise when grandparents and grandchildren start becoming a grandfamily.

Worldwide Implementation of Digital Imaging in Radiology -

International Atomic Energy Agency 2015-09-22

This publication provides a basic introduction to digital technology and digital networks as well as an overview of the issues to consider when implementing such technology in diagnostic radiology. In an area that is under rapid development, it provides a careful analysis of the principles and advice on implementation and sustainability of digital imaging and teleradiology. The transition from film to digitally based medical imaging is complex and requires knowledge and planning to be successful. This comprehensive resource guide contains information on the needs and implications of a transition to digital imaging with case studies for different facilities requiring different levels of communication connectivity. It is aimed at hospital administrators and managers, radiologists and radiographers/technologists, medical physicists and clinical engineers as well as information technology staff.

The Land of Zinj - Chauncy Hugh Stigand 1913

Bay Area Radio - John F. Schneider 2012

The San Francisco Bay Area was a key national radio-broadcasting center during the first three decades of commercial radio. In 1909, it was home to the very beginnings of the art and science of broadcasting, when Charles "Doc" Herrold began sending out weekly voice and music programs from his radio school in San Jose. Dozens of other radio pioneers soon followed. In 1926, big broadcasting came to San Francisco when the newly formed National Broadcasting Company (NBC) established its West Coast headquarters on Sutter Street. Other national and regional networks soon set up their own broadcast production centers, and for the next 20 years, thousands of actors, musicians, announcers, and engineers were creating important programs that were heard on the West Coast as well as nationwide. During World War II, San Francisco became the key collection center for Pacific war news, and bulletins received in San Francisco were quickly relayed to an anxious nation. Conversely, powerful shortwave stations broadcast war news and propaganda back to the Pacific and entertained American troops

overseas.

Modelling in Healthcare - 2010

How many patients will require admission to my hospital in two days? How widespread will influenza be in my community in two weeks? What will the changing demographics of our community do to affect demand for medical services in our region in two years? These and similar questions are the province of Modelling in Healthcare. This new volume, presented by the Complex Systems Modelling Group at Simon Fraser University in Canada, uses plain language, sophisticated mathematics and vivid examples to guide and instruct. Sage advice on the benefits and limitations of the modeling process and model predictions is generously distributed so that the reader comes away with an understanding not only of the process but also on the practical uses (and misuses!) of models. Perhaps the most important aspect of this book is that the content and the logic are readily understandable by modelers, administrators and clinicians alike. This volume will surely serve as their common and thus preferred reference for modeling in healthcare for many years. --Timothy G. Buchman, Ph.D., M.D., FACS, FCCM Modelling in Healthcare adds much-needed breadth to the curriculum, giving readers the introduction to simulation methods, network analysis, game theory, and other essential modeling techniques that are rarely touched upon by traditional statistics texts. --Ben Klemens, Ph.D. Mathematical and statistical modeling has tremendous potential for helping improve the quality and efficiency of health care delivery and as a tool for decision making by health care professionals. This book provides many relevant and successful applications of modeling in health care and can serve as an important resource and guide for those working in this exciting new field. --Reinhard Laubenbacher, Ph.D.

Algal Technologies for Wastewater Treatment and Resource Recovery - Raul Muñoz 2019-07-26

Over 80% of globally produced wastewater receives little or no treatment before it is disposed into the environment. Therefore, it is urgent to develop new wastewater treatment technologies that are sustainable in the broad sense of the word, i.e. not only produce high quality effluents, but also minimise energy expenses, recover energy and nutrients, and apply technology that is appropriate in relation to the availability of skilled personnel. This book compiles the main outcomes of recent efforts to improve the design of waste stabilisation ponds, and confirms the superior performance of high rate algal ponds as a result of process intensification. Anaerobic digestion devoted to biogas production continues to be the preferred strategy for the energy valorisation of the algal biomass, co-digestion with multiple high C/N ratio substrates gathering significant attention over the past years. The potential of algal biomass as a biosorbent for heavy metal removal (Cu, Ni, F) maintains its share in the research field of water bioremediation, while research on nutrient removal has focused on providing new insights on the mechanism of nitrogen and phosphorus removal from wastewater in algal-bacterial systems. Finally, it is worth noticing that breakthroughs in complementary fields of research such as nanotechnology or lighting technology are gradually being implemented in algal biotechnology, with new products such as nanoparticles for water disinfection or photobioreactors illuminated by low intensity LED panels. In Focus - a book series that showcases the latest accomplishments in water

research. Each book focuses on a specialist area with papers from top experts in the field. It aims to be a vehicle for in-depth understanding and inspire further conversations in the sector.

Systems Thinking - Jamshid Gharajedaghi 2011-08-09

Systems Thinking, Third Edition combines systems theory and interactive design to provide an operational methodology for defining problems and designing solutions in an environment increasingly characterized by chaos and complexity. This new edition has been updated to include all new chapters on self-organizing systems as well as holistic, operational, and design thinking. The book covers recent crises in financial systems and job markets, the housing bubble, and environment, assessing their impact on systems thinking. A companion website is available at interactdesign.com. This volume is ideal for senior executives as well as for chief information/operating officers and other executives charged with systems management and process improvement. It may also be a helpful resource for IT/MBA students and academics. Advanced Coating Materials - Liang Li 2018-12-06

Provides a comprehensive, yet practical source of reference, and

excellent foundation for comparing the properties and performance of coatings and selecting the most suitable materials based on specific service needs and environmental factors. Coating technology has developed significant techniques for protecting existing infrastructure from corrosion and erosion, maintaining and enhancing the performance of equipment, and provided novel functions such as smart coatings greatly benefiting the medical device, energy, automotive and construction industries. The mechanisms, usage, and manipulation of cutting-edge coating methods are the focus of this book. Not only are the working mechanisms of coating materials explored in great detail, but also craft designs for further optimization of more uniform, safe, stable, and scalable coatings. A group of leading experts in different coating technologies demonstrate their main applications, identify the key bottlenecks, and outline future prospects. Advanced Coating Materials broadly covers the coating techniques, including cold spray, plasma vapor deposition, chemical vapor deposition, sol-gel method, etc., and their significant applications in microreactor technology, super(de)wetting, joint implants, electrocatalyst, etc. Numerous kinds of coating structures are addressed, including nanosize particles, biomimicry structures, metals and complexed materials, along with the environmental and human compatible biopolymers resulting from microbial activities. This state-of-the-art book is divided into three parts: (1) Materials and Methods: Design and Fabrication, (2) Coating Materials: Nanotechnology, and (3) Advanced Coating Technology and Applications.
