Gods of the North - Brian Branston 2020-11-06

Gods of the North is about the mythology of the Vikings, Angels, Saxons and Jutes and how it has shaped cultures, languages and later religions. The author Brian Branston states that a myth is like a dream; a direct expression of the unconscious mind, and the events of a myth, its characters and symbols are to the human race as the events, characters and symbols of his dream are to the individual. Like a dream the myth may ignore the conventional logic of space and time relationships, of events following one after another in a causal sequence. Nevertheless, a dream has a meaning which can be made plain; and so has a myth. It is

not easy to interpret the myths of our own culture, for our near ancestors—those of a thousand odd years ago—were persuaded to forget them or to relegate their broken remnants to the nursery. The Gods of the North were once upon a time the gods of our forefathers. The fossilized remains of these deities survive in place-names for instance, as Wansdyke, Wednesbury, Wensley, Tuesley and Thundersley; in the names of the days of the week, as Sunday, Monday, Tuesday, Wednesday, Thursday and Friday; in folklore and fairy tale with their stories of witches on broomsticks.

Japanese Sentence Processing - Reiko Mazuka 2013-05-13

This volume is a direct result of the International Symposium on Japanese Sentence Processing held at Duke University. The symposium provided the first opportunity for researchers in three disciplinary areas from both Japan and the United States to participate in a conference where they could discuss issues concerning Japanese syntactic processing. The goals of the symposium were three-fold: * to illuminate the mechanisms of Japanese sentence processing from the viewpoints of linguistics, psycholinguistics and computer science; * to synthesize findings about the mechanisms of Japanese sentence processing by researchers in these three fields in Japan and the United States; * to lay foundations for future interdisciplinary research in Japanese sentence processing, as well as international collaborations between researchers in Japan and the United States. The chapters in this volume have been written from the points of view of three different disciplines, with various immediate objectives -- from building usable speech understanding systems to investigating the nature of competence grammars for natural languages. All of the papers share the long term goal of understanding the nature of human language processing mechanisms. The book is concerned with two central issues -- the universality of language processing mechanisms, and the nature of the relation between the components of linguistic knowledge and language processing. This volume demonstrates that interdisciplinary research can be fruitful, and provides groundwork for further research in Japanese sentence processing.

Teutonic Myth and Legend - Donald Alexander Mackenzie 1912

The core of J.R.R. Tolkien's inspirations and sources were the ancient literatures of the northern Germanic tribes, Norsemen, Vikings, and Anglo-Saxons. There is perhaps no better introduction to the vast sweep of these traditions than Donald A. Mackenzie's *Teutonic Myth and Legend: An Introduction to the Eddas & Sagas, Beowulf, The Nibelungenlied, etc.* It gives concise, comprehensive retellings from earliest preserved Icelandic Eddas and Sagas to the Anglo-Saxon epic *Beowulf* (an especially important influence on Tolkien), to the medieval romances of the Nibelungs and Dietrich of Bern. This edition is beautifully illustrated and elegantly formatted with the e-reader in mind.

Mythologies of the World - Ron Smith 1981

This book surveys the important available books on mythologies of all parts of the globe and the cultural contexts from which the mythological traditions emerged. Written as a series of bibliographic essays, the guide opens with a description of major reference sources encompassing many cultures, as well as those tracing particular themes (such as that of the creation) across cultures. The other bibliographic essays discuss sources for studying prehistoric mythologies, the mythologies of West Asian

peoples (Mesopotamian, Biblical, Islamic, and others), South and East Asian mythologies, European mythologies, American Indian mythologies (North, Central, and South American), African mythologies, and the mythologies of the Pacific and Australia. An appendix on contemporary mythology--mainly American--discusses a wide range of works that examine the beliefs, traditions, and dreams that manifest themselves in spectator sports, politics, advertising, and forms of popular culture in the United States. Egyptian Myth and Legend - Donald Mackenzie 2012-06-02

In our introduction we deal with the divergent character of some of the ancient myths so as to simplify the study of a difficult but extremely fascinating subject. It is shown that one section of the people recognized a Creator like Ptah, who begot himself and "shaped his limbs" ere he fashioned the Universe, while another section perpetuated the idea of a Creatrix who gave birth to all things. At the dawn of history these rival conceptions existed side by side, and they were perpetuated until the end. It is evident, too, that the theologies which were based on these fundamental ideas had undergone, ere the fusion of peoples occurred, a sufficiently prolonged process of separate development to give them a racial, or, at any rate, a geographical significance.

Annual Report on the Improvement of the Harbours of Lakes Michigan, St. Clair, Erie, Ontario and Champlain - James Duncan Graham 1860

Ancient Europe - Stuart Piggott 2017-09-05

This book interprets the main lines of European prehistory from the first agricultural communities in the sixth or even seventh millennium B.C. until the incorporation of much of barbarian Europe within the Roman Empire. It traces the beginnings of animal domestication and plant cultivation in ancient Western Asia, and the transmission of these skills by movements of peoples or by assimilation, in the European continent. The early technology of working in copper, and later in bronze, is discussed. Metal winning and working, and trade in raw materials and finished products, brought social and political repercussions to barbarian and civilised peoples alike. The spread of the Indo-European languages is considered in its archaeological context, as is the formation of the Celtic peoples, soon to acquire iron technology and to become the main barbarian component in Europe, side-by-side with the civilised Mediterranean societies, Greek, Etruscan or Roman. The later Celtic world of Europe and the British Isles is examined, and an attempt made to estimate the contribution of the older barbarian world to the Europe, which emerged from the ruins of the Roman Empire, geographically, the book ranges over the whole European field, from the Atlantic shores to the Urals and the Caucasus. While it does not pretend to be a prehistory of Europe within the period chosen, the book does bring together and discuss for the first time much scattered and often little-known archaeological evidence. This book is organized in a manner that will permit it being read on two levels. For the general non-specialist reader, the text and illustrations should give a sufficient idea of the nature of the theme and of the evidence, and of the development of the barbarian cultures side-by-side with the civilizations of antiquity, as their precursors and their subsequent counterparts. For the archaeological student however the text is documented with rather full references and notes at the end of each chapter
