Charting and Technical Analysis - Fred McAllen 2012-04-06

To invest successfully or trade in Stocks, Options, Forex, or even Mutual Funds, it is imperative to know AND understand price and market movements that can only be learned from Technical Analysis. You should NEVER attempt Trading or Investing without it! My 25 years experience has taught me that 'Every book

on the market' regarding Charting and Technical Analysis are seemingly worthless! All seem to find yet another creative way to tell you to "Buy Low and Sell High!" And they offer NO in-depth understanding or analysis about WHO is buying and WHO is selling, and when. Point is, anyone, experienced or not, can show you a picture of a Chart and tell you to buy at the bottom and sell at the top. That is simple 'hindsight', and is always 20/20! This book is different! It is IN-DEPTH - EXPLAINED and you WILL learn price movements and technical analysis from this information! You will understand and recognize tops and bottoms in the market and in particular stocks, AS they are forming. This is highly valuable information, and you should NEVER attempt to trade or invest without this knowledge! Mutual Funds? Most people think they do not need this information because they have a Mutual Fund. That could not be farther from the truth. Investing your hard-earned money should be done with your own knowledge

of market direction, when to buy, and when to move your money to safety. Without this knowledge you are at the mercy of a salesperson hungry to earn a commission. Thus, invariably entering the market at the wrong time and in the wrong investment. No one else has your best interest in mind, either learn to protect your money or keep it in the bank. It's that simple. The next move is yours.

Do you want to learn how to day trade for a living? If so, then read Day trading is a form of trading that starts and closes on the same day so that traders can profit from the marginal profits

brought about by the market's daily volatility. If you are a day trader, your goal is to find stocks that are likely to move in your favor for the day to execute your trade accordingly. In general, day traders buy stocks in the morning and hold them until late in the day when the marginal profit is sufficient to make a significant profit. Then they close the deal by selling the stock before the end of the day, so they do not hold the stock after the market closes. Using the day trading strategy means that you always aim to be out of stock in the evening to avoid the risk of price fluctuations overnight. As with all forms of trading, we want to minimize risk without staying in the market longer than intended. Failure to do so may expose you to unexpected changes that can lead to significant losses. This book covers: Risk and Account Management How to Find Stocks for Trades Tools and Platforms Transactions Borrowings and Fiscal Costs Advanced Options Trading Strategies And so much more!

How to Day Trade for a Living - Andrew Aziz
2021-01-31

In the book, I describe the fundamentals of day trading, explain how day trading is different from other styles of trading and investment, and elaborate on important trading strategies that many traders use every day. I've kept the book short so you can actually finish reading it and not get bored by the middle. For beginner traders, this book gives you an understanding of where to start, how to start, what to expect from day trading, and how to develop your strategy. Simply reading this book, however, will not make you a profitable trader. Profit in trading does not come with reading a book or two or browsing online. It comes with practice, the right tools and software and appropriate ongoing education. Intermediate traders may benefit from the book's extensive overview of some of the classic strategies that the majority of retail traders regularly use with proven success. If you think you are beyond the stage of

a novice trader, then you may want to jump ahead and start reading from Chapter 7 for an overview of the most important day trading strategies: Day trading is not gambling or a hobby. You must approach trading very, very seriously. As such, I wake up early, go for a run, take a shower, get dressed, eat breakfast, and fire up my trading station before the markets open in New York. I am awake. I am alert. I am motivated when I sit down and start working on the list of stocks I will watch that day. This morning routine has tremendously helped my mental preparation for coming into the market. Whatever your routine is, starting the morning in a similar fashion will pay invaluable dividends. The ability to gain leverage with very little on margin gives you, the trader, the ability to earn more off smaller swings. Do You Want to Learn How to DAY TRADE? If YES, then keep reading... Starting today trade is not a simple decision to take! It is possible to succeed and earn a decent living through day trading for a few hours a day. However, it may also take months before a person starts making money out of the trade. The initial year can be challenging because of the various ups and downs you will face and the main goal at this time is not to lose everything. If this does not deter you and you are still determined to start day trading, you must plan for the following: Day Trading is something that requires seriousness and considerations. It needs for one to have a rehearsed and sound method that gives you an edge over every trade you make. Begin by watching free live chats on moving assets and ask yourself the following questions: How would one engage in a trade? How would a person get out of a winning and losing trade? How much would you be willing to risk on a trade and what position would you take or volume would you

take? After deciding on the trades to use, what is the probability that a trade will be profitable and what strategies are available? To be able to answer these questions, you will need to implement the same method severally and monitor the outcome. One can create a strategy by simply finding tendencies in price action in a day for the asset or you can learn a strategy from a different person. Practicing frequently is key to day trading. Just like a sport, you practice in order to be the best, so it is in day trading. You must always practice what you need to do before you actually implement it. Remember you must fund your account which takes your hard-earned money. Your money is at stake so practice is important to avoid possible losses. By use of a demo account, practice methodically, honing your strategy over and again. What you are likely to realize is that each trade is different from the next. A particular trade today may be dormant but tomorrow it becomes extremely volatile. Today it can be ranging while tomorrow

it becomes the trending stock. Without practice, you are likely to miss noticing trade signals or find yourself making trades that are not in your strategy. Practice on the strategy you are working on only, perfect it and understand it in and out. With the pressure of trading with real capital, when you move to trading live, you do not want to be second guessing yourself if you take a trade or not. Using the demo account, practice until you start being profitable for several months. Once you attain this level, you can now take the risk to open a live account that uses real capital. If yes, then keep reading. Day trading is a form of trading where trades are

opened and closed on the same day, enabling the trader to capitalize on marginal gains earned through the day to day volatility of the market. When you are a day trader, your goal is to identify what stocks are likely to shift into favor that day so that you can conduct your trades accordingly. Generally, day traders will buy their stocks in the morning and hold onto those stocks until later in the day when the marginal gains have accumulated enough to earn a significant profit. Then, they will close the trade by selling the stocks before the end of the day so that they are not left holding any stocks after the market closes. Utilizing the day trading strategy means that your goal is to always be free of stocks in the evening to ensure that you are not exposing yourself to the risk of overnight price changes. As with any form of trading, you want to minimize your risk by never staying in the market longer than you intended to, as doing so could expose you to unforeseen changes that can lead to significant losses. This book covers: Risk

and Account Management How to Find Stocks for Trades Tools and Platforms Transactions Borrowings and Fiscal Costs Advanced Options Trading Strategies ...And so much more!

2020 Updated Version Very few careers can offer you the freedom, flexibility and income that active trading does. As a trader, you can live and work anywhere in the world. You can decide when to work and when not to work. You may only answer to yourself. That is the life of a successful day trader; but it is not easy to achieve and very few succeed. In the book, I describe the fundamentals of day trading, explain how day trading is different from other styles of trading and investment, and elaborate on important trading strategies that many traders use every day. I've kept the book short so you can actually finish reading it and not get bored by the middle. For beginner traders, this

book gives you an understanding of where to start, how to start, what to expect from day trading, and how to develop your strategy. Simply reading this book, however, will not make you a profitable trader. Profit in trading does not come with reading a book or two or browsing online. It comes with practice, the right tools and software and appropriate ongoing education. Intermediate traders may benefit from the book's extensive overview of some of the classic strategies that the majority of retail traders regularly use with proven success. If you think you are beyond the stage of a novice trader, then you may want to jump ahead and start reading from Chapter 7 for an overview of the most important day trading strategies: Day trading is not gambling or a hobby. You must approach trading very, very seriously. As such, I wake up early, go for a run, take a shower, get dressed, eat breakfast, and fire up my trading station before the markets open in New York. I am awake. I am alert. I am

motivated when I sit down and start working on the list of stocks I will watch that day. This morning routine has tremendously helped my mental preparation for coming into the market. Whatever your routine is, starting the morning in a similar fashion will pay invaluable dividends. ABCD Pattern Trading Bull Flag Momentum Trading Top Reversal Trading Bottom Reversal Trading Moving Average Trend Trading VWAP Trading Support and Resistance Trading For each strategy, I explain: How to find the Stock in Play for trade What indicators I am using on my charts When I enter the trade When I exit the trade (profit taking) What is my stop loss Day trading is not gambling. It's not an online poker game. To be successful at day trading you need the right tools and you need to be motivated, to work hard, and to persevere. That's How to Day Trade for a Living.

Very few careers can offer you the freedom, flexibility and income that day trading does. As a day trader, you can live and work anywhere in the world. You can decide when to work and when not to work. You only answer to yourself. That is the life of the successful day trader. Many people aspire to it, but very few succeed. Day trading is not gambling or an online poker game. To be successful at day trading you need the right tools and you need to be motivated, to

work hard, and to persevere. At the beginning of my trading career, a pharmaceutical company announced some positive results for one of its drugs and its stock jumped from \$1 to over \$55 in just two days. Two days! I was a beginner at the time. I was the amateur. I purchased 1,000 shares at \$4 and sold them at over \$10. On my very first beginner trade, I made \$6,000 in a matter of minutes. It was pure luck. I honestly had no idea what I was doing. Within a few weeks I had lost that entire \$6,000 by making mistakes in other trades. I was lucky. My first stupid trade was my lucky one. Other people are not so lucky. For many, their first mistake is their last trade because in just a few minutes, in one simple trade, they lose all of the money they had worked so hard for. With their account at zero, they walk away from day trading. As a new day trader you should never lose sight of the fact that you are competing with professional traders on Wall Street and other experienced traders around the world who are very serious, highly

equipped with advanced education and tools, and most importantly, committed to making money. Day trading is not gambling. It is not a hobby. You must approach day trading very, very seriously. As such, I wake up early, go for a run, take a shower, get dressed, eat breakfast, and fire up my trading station before the markets open in New York. I am awake. I am alert. I am motivated when I sit down and start working on the list of stocks I will watch that day. This morning routine has tremendously helped my mental preparation for coming into the market. Whatever your routine is, starting the morning in a similar fashion will pay invaluable dividends. Rolling out of bed and throwing water on your face 15 minutes before the opening bell just does not give you sufficient time to be prepared for the market's opening. Sitting at your computer in your pajamas or underwear does not put you in the right mindset to attack the market. I know. I've experienced all of these scenarios. In *How to Day Trade for a Living*, I will

show you how you too can take control over your life and have success in day trading on the stock market. I love teaching. It's my passion. In this book, I use simple and easy to understand words to explain the strategies and concepts you need to know to launch yourself into day trading on the stock market. This book is definitely NOT a difficult, technical, hard to understand, complicated and complex guide to the stock market. It's concise. It's practical. It's written for everyone.
