Save the People! - Stacy McAnulty 2022-05-10

"Save the People is engaging, funny, affecting and delightful. You'll never have more fun learning science." --Stuart Gibbs, bestselling author of the Spy School series "Serious science and great gags, with a bit of hope thrown in." --Steven Sheinkin, author of Bomb and Fallout Stacy McAnulty, the bestselling author of The Miscalculations of Lightning Girl and the Our Universe series, delivers an action-packed look at past extinction and current threats to humanity's survival -- with the ultimately reassuring message that humans probably have a few more millennia in us. Scientists estimate that 99% of all species that have ever existed are now extinct. Whoa. So, it's not unreasonable to predict humans are doomed to become fossil records as well. But what could lead to our demise? Supervolcanos? Asteroids? The sun going dark? Climate change? All the above?! Humans—with our big brains, opposable thumbs, and speedy Wi-Fi—may be capable of avoiding most of these nightmares. (The T. rex would be super jealous of our satellites.) But we're also capable of triggering world-ending events. Learning from past catastrophes may be the best way to avoid future disasters. Packed with science, jokes, and black and white illustrations, Save the People! examines the worst-case scenarios that could (but hopefully won't) cause

the greatest mass extinction—our own!

The Best Place for Garbage - Sandra Wiese 2011

The Best Place for Garbage is the best place to learn about composting with earthworms. Worms can easily turn your organic waste into very valuable fertilizer that you can use to make anything green grow better and stronger. Use it in your garden, on your lawn, on your houseplants, even to make the green in your wallet grow faster by selling worm compost. Whether you are new to this wonderful process or you want to expand your expertise, this comprehensive tutorial has it all. Everything is covered: from indoor and outdoor worm homes, how to feed your worms, what to feed your worms, how to harvest the castings and, most importantly, both how and why to use them. What sets this book apart is not the telling of what to do (though that part is pretty darn good!), but you will also learn why you are doing what you are doing. This makes it easy for you to figure out things on your own once you get going. There are great trouble-shooting tips and tricks to make sure you never fall victim to a smelly worm bin or worse: dead worms. There are actually many myths surrounding what worms can and cannot eat and where and how they can or cannot live. Find out the real truth in The Best Place for Garbage as you learn how these myths came to be and why they really are just urban legends (Yes, worms can eat meat. And citrus. And bananas. No, you do not need to drill holes in your bin. Really!) Told with a very heavy dose of humor and an even bigger helping of common

sense, this book is perfect for anyone who gardens, anyone who recycles, anyone who eats. It is currently estimated that over a third of all waste is made up of organic matter that can be recycled. Recycling plastics and such is awesome, but in this case, you can personally make a difference and get something valuable in return. Try that with a water bottle. Also includes a bonus section of ideas for school and college level science projects.
