Just a Union of Nurses - John Silver Ph D - 2013-06-19

In *Just a Union*, Dr. Silver presents CNA leaders and staff the opportunity to tell their own story about the years leading up to, and the years after the great staff nurse rebellion in California in 1993. In 1995, the CNA's new leadership disaffiliated themselves from the American Nurses Association, which has historically billed itself as THE voice of nursing. In just 4 years, they managed to accomplish what no other nursing group or organization had managed to accomplish even up to now- a mandated nurse-patient ratio law. It was an epic battle, and the details of that battle provide nursing organizations, and perhaps even other organizations and political groups, a road map for achieving political success. This battle pitted a group of very determined union bedside practicing nurses against some of the strongest lobbying groups in healthcare, including groups within nursing itself. Over the course of this struggle, the staff nurses took on the California Hospital Association, the American Hospital Association, the American Nurses Association, the Association of Nurse Executives, and finally, the very popular (at the time) and charismatic new governor of California, Arnold Schwarzenegger. The political tactics used, and the legal battles which this organization had to confront were daunting, and resources were scarce in the beginning. All of these struggles are documented in *Just a Union*. Dr. Silver has taken this information which CNA has provided and examined a model of political empowerment to test the model. In the world of political empowerment, there are no good guys and bad guys. There is only the ability to get your legislation passed, and there is no doubt that in regards to political empowerment, the CNA is the most successful group in nursing."

Nursing in the European Union - Sondra Z. Koff - 2017-07-05

Nursing in the European Union demonstrates how the European Union (EU) has refashioned the nursing world throughout the Member States via its power in many other policy domains. Volume 1 focused on the EU's impact on nursing education, regulation, and research endeavours. This volume focuses on real-life situations and

comparative perspective. In this unique work, Sondra Z. Koff develops a profile of nurses' workplaces, highlighting similarities and diversities, challenges, and nurses' opinions. Though it has limited formal authority in the health and health care sectors, the EU has had a significant impact on the working life of these practitioners in areas such as employment options, industrial relations and their outcomes, organizational and environmental features of nurses' workplaces, collective action, and more. New policies and legalities are regulating the production, distribution, practices, and organization of nursing according to supranational standards. Koff helps to fill a gap in the literature, given the dearth of comparative, cross-national, book-length studies of the nursing profession. By adopting a framework focused on an institution, policies, and politics, Koff addresses these topics from the perspective of multiple actors, both national and international.

Manual of Community Nursing and Communicable Diseases - Marie E. Vlok - 1996-01-28
This edition, written as South Africa moves from expensive curative health care to a more people-focused primary health-care system, highlights transitional structures and bridges the gap between past and present. Part One focuses on the Government of National Unity and population development programmes, emphasising the role of community nurses in the primary health-care system. Subsequent sections cover factors playing an important role in community nursing, including housing, urbanisation and malnutrition. In accordance with the National Health-care Plan for South Africa, prominence is given to issues such as health education and maternal and child health care. The section on communicable diseases has been updated and takes into account changes in legislation and the latest statistical information. Primary health-care problems at community level are covered in depth. Students and practitioners will benefit from the wealth of information in this new edition.

Nursing and Midwifery in Ireland - Yvonne O'Shea - 2008-10-27
Over the past ten years, nursing and midwifery in Ireland have experienced a considerable number of changes, driven principally by the Report of the Commission on Nursing, published in 1998, and the health service reform programme, announced in 2003. In the same period, Irish society has become wealthier and more culturally

sets out to identify the role for nursing and midwifery in the health services of the future in Ireland and to formulate a strategy for the professional development required for the professions. The book has three parts. Part 1 sets out to establish the context within which the professions of nursing and midwifery operate in Ireland by examining the implications of recent key policy developments and the roles played by the Report of the Commission on Nursing and the National Council for the Professional Development of Nursing and Midwifery. Part 2 forms the core of the book and is based on seventy-seven interviews with senior figures in the health services, including policymakers, service managers, medical consultants, educators and leaders of nursing and midwifery. Part 3 goes on to outline a strategy for the professional development of nursing and midwifery, including key steps necessary to reach objectives and to realise the strategy's long-term vision. Published at a time of significant change within the health services in Ireland, the book is intended as a contribution to ensuring that nursing and midwifery take their place at the heart of health service transformation. It will be of great value to all role players in the Irish health service.

The Future of Nursing - Institute of Medicine - 2011-02-08
The Future of Nursing explores how nurses' roles, responsibilities, and education should change significantly to meet the increased demand for care that will be created by health care reform and to advance improvements in America's increasingly complex health system. At more than 3 million in number, nurses make up the single largest segment of the health care work force. They also spend the greatest amount of time in delivering patient care as a profession. Nurses therefore have valuable insights and unique abilities to contribute as partners with other health care professionals in improving the quality and safety of care as envisioned in the Affordable Care Act (ACA) enacted this year. Nurses should be fully engaged with other health professionals and assume leadership roles in redesigning care in the United States. To ensure its members are well-prepared, the profession should institute residency training for nurses, increase the percentage of nurses who attain a bachelor's degree to 80 percent by 2020, and double the number who pursue doctorates. Furthermore, regulatory and institutional obstacles -- including limits on nurses' scope of practice -- should be removed so that the health system can reap the full benefit of nurses' training, skills, and knowledge in patient care. In this book, the Institute of Medicine makes recommendations for an action-oriented blueprint for the future of nursing.

Frontier Nursing in Appalachia: History, Organization and the Changing Culture of Care - Edie West - 2019-11-01

This book provides a historical analysis of the Frontier Nursing Services in the Eastern Appalachians of the United States, as well as a review of the oral history tradition of former frontier and non-frontier nurses. The data was gathered from 2003 to 2007, and the historical part covers the years 1900 to 1970. The objective of the study presented here was to conduct interviews with former frontier and non-frontier nurses in order to better understand their family and personal relationships, and the experiences that motivated their career choices. These interviews also give a voice to the working and middle-class women of the FNS. The emerging themes include moral inhabitability in work/education environments, the generational mix, nurse-physician and male-female relationships at the workplace, the role of technology, humanitarian versus financial rewards, and the public image of nurses. In addition, the book examines how the FNS shifted from a community/grass-roots structure to the corporate/business model of healthcare delivery employed today. In closing, it stresses the importance of exploring past nursing in order to better grasp present nursing. It also represents a testament to the professional work and vital contributions of frontier nurses.

Nurse and Spy in the Union Army - S.E. Edmonds -

Nurse and Spy in the Union Army - Sarah Edmonds - 2001-01-01

In her 1865 autobiography, Canadian-born Sarah Emma Evelyn Edmonds (nee Edmonson) recounts her sensational life on the front lines of the American Civil War. As a young woman, Emma Edmonds ran away from home, escaping an abusive father and an arranged marriage. To avoid being discovered, she dressed in men's clothes and cut her hair and, eventually, assumed the full-time identity of a man, taking the name Franklin "Frank" Thompson. Frank worked for a time as a Bible salesman, but in 1865 joined the Second Michigan Volunteers as a nurse. Frank, already a master of disguise, eventually volunteered to be a spy and penetrated the enemy lines multiple times in various forms: as a slave, with silver nitrate painted skin to appear Black and, curiously, as a woman. Fearing discovery after recuperating from falling off a horse, Frank eventually deserted the army, and Sarah Emma Edmonds returned, enlisting in the army as a nurse. In 1867, Emma Edmonds married Mr. L. H. Seeye, a fellow Canadian, and eventually the two settled in La Porte, Texas, where they raised three children. In 1884, she attended a regimental reunion, as herself, without her disguise as Frank. Urged by her fellow soldiers, she filed for a full army pension. In 1885, she was awarded a pension from the army for both of her identities. She became the only recognized woman in the Grand Army of the Republic."

Medicine in the Twentieth Century - Roger Cooter - 2020-08-26

During the twentieth century, medicine has been radically transformed and powerfully transformative. In 1900, western medicine was important to philanthropy and public health, but it was marginal to the state, the industrial economy and the welfare of most individuals. It is now central to these aspects of life. Our prospects seem increasingly dependent on the progress of bio-medical sciences and genetic technologies which promise to reshape future generations. The editors of *Medicine in the Twentieth Century* have commissioned over forty authoritative essays, written by historical specialists but intended for general audiences. Some concentrate on the political economy of medicine and health as it changed from period to period and varied between countries, others focus on understandings of the body, and a third set of essays explores transformations in some of the theatres of medicine and the changing experiences of different categories of practitioners and patients.

Europeanization has generated a galaxy of regimes, laws, organizations, new actors, and networks that have diluted institutional barriers to interaction across national borders. Many nation-based policy competencies have been transferred to the European level. The European Union (EU), the world's first regional regulator, bears consequences for the development of public policy and for policies affiliated with the nursing profession. With limited exception, the EU does not have formal powers in the health care arena. However, as a result of its efforts in other fields, it has been heavily involved with health care and its providers. Nursing in the European Union demonstrates how the organization has refashioned the nursing world throughout the member states via its power in many other policy domains. This volume focuses on the EU's impact on nursing education, regulation, and research endeavours, and suggests strategies to achieve desired objectives. Volume 2, Nursing in the European Union: The World of Work, to be published in Fall 2016, focuses on real-life situations and problems EU nurses face: wages, stress, and dispute resolution. Sondra Z. Koff integrates the European experience with a discussion of nursing in the real world, and presents the nursing profession in light of the European Union, its components, its mechanisms, and its output and activities.

Economics and Financial Management for Nurses and Nurse Leaders, Third Edition - Susan J. Penner, RN, MN, MPA, DrPH, CNL - 2016-08-28

Written by and for nurses, this key foundational text helps to build the fundamental economics and financial management skills nurses and nurse leaders need for daily use. This third edition delivers several new features, adding to its value as the only timely and relevant text written for the full spectrum of RN-to-BSN, BSN, and MSN students. It has been significantly revised to simplify content, to address the vast changes in and increasing complexity of U.S. health care financing, and to be useful in both traditional in-class format and hybrid and online programs. Two new and refocused chapters address assessing financial health and nurse entrepreneurship and practice management, and new material illuminates recent research findings and statistics. Chapters feature worksheets such as business plan checklists and text boxes expanding on key chapter content. The book is distinguished by its provision of case examples based on nurse-run clinic and inpatient nursing unit financial issues. It provides multiple opportunities for experiential learning, such as writing business plans and health program grant proposals. It delivers cost-benefit and cost-effectiveness analyses, discusses budget preparation,

engaging format promotes the synthesis of economics and finance across the nursing curriculum through the use of end-of-chapter exercises, discussion questions, and games based on concepts within the text. Additionally, tips throughout the book alert students about the need to apply concepts from other aspects of their education to economic and financial situations. Also included are online supplemental materials for teachers and students, including Excel spreadsheets, grant proposals, a test bank, and PowerPoint slides. New to the Third Edition: Updates health reform, health care spending, and other relevant policies and statistics Includes two new and refocused chapters that address assessing the financial health of a business and nurse entrepreneurship and practice management Highlights recent research findings and key concepts in text boxes Provides blank and completed worksheets, such as business plan checklists, so nurses can apply financial concepts in their clinical settings Fosters understanding of key concepts with enhanced explanations and samples of business plans and other reports Key Features: Aligned with AACN and AONE guidelines, the CNL certification exam, and QSEN competencies Serves as a primary financial management text for multiple nursing academic programs Facilitates experiential learning through end-of-chapter exercises, games, tips for synthesizing knowledge, worksheets, and case examples Designed for use in traditional classrooms and in hybrid and online learning programs Includes a chapter on measuring nursing care with indicators for capacity, staffing, patient acuity, performance, and patient flow NEW! a FREE Q&A App is available (see inside front cover)

Nursing Leadership for Patient-Centered Care - Dr. Harriet Forman, RN, EdD - 2010-09-08

"This book should be read by every nurse manager. Nursing students and faculty will benefit from reading it as well."--Nursing Education Perspectives "Dr. Forman's book is revolutionary and courageous in that it brings to light negative issues that exist in nursing management and patient care. Her use of plain, day-to-day language and methods will ultimately bring reform to health care at the bedside." —Deborah M. Tascone, MS, RN Regional Executive Director North Shore Long Island Jewish Health System "The vignettes provide great examples that

make the transition from student to practitioner and tips on how to pass the NCLEX-RN Examination. Case care organizations" Diana Mason, PhD, C, FAAN, RN Editor Emeritus, American Journal of Nursing Professor of Nursing, Rudin Chair, Hunter-Bellevue College of Nursing Too often, both nurses and patients witness major breakdowns in the health care system-ineffective communication, unrealistic nurse-patient ratios, tension among staff, abuse of authority, and most importantly, managers drawn away from patients due to administrative duties. This inspiring guide presents engaging, real-life stories of nurses, managers, and leaders who have experienced failures of the system firsthand, and have been motivated to critically examine, address, and resolve them. This collection of narratives includes practical methods, models, and strategies that nurses can apply to enhance and expand their own practices. Readers will gain a wealth of insight on how to overcome narrow-mindedness and egocentrism, to improve their management, leadership, communication, and organizational skills, and ultimately to bring real reform to health care practices and patient care. Key features: Presents stories of actual management issues and how nurse leaders/managers, nursing staff, and patients have handled them Identifies harmful trends in the health care system that can be analyzed and remedied Encourages nurse managers to shift the prevailing "system-centered" orientation to one that is "patient-centered" Provides a phenomenologically based leadership/management model for resolving nursing issues institutionally and individually Includes methods for addressing cultural and religious barriers among staff An engaging, enjoyable read, this book will empower readers to learn from these narratives and to dramatically transform the health care system at large.

No Shortcuts - Jane F. McAlevey - 2016-09-13

The crisis of the progressive movement is so evident that nothing less than a fundamental rethinking of its basic assumptions is required. Today's progressives now work for professional organizations more comfortable with the inside game in Washington DC (and capitols throughout the West), where they are outmatched and outspent by corporate interests. Labor unions now focus on the narrowest possible understanding of the interests of their members, and membership continues to decline in lockstep with the narrowing of their goals. Meanwhile, promising movements like Occupy Wall Street and Black Lives Matter lack sufficient power to accomplish meaningful change. Why do progressives in the United States keep losing on so many issues? In No Shortcuts, Jane McAlevey argues that progressives can win, but lack the organized power to enact significant change, to outlast their bosses in labor fights, and to hold elected leaders accountable. Drawing upon her experience as a scholar and longtime organizer in the student, environmental, and labor movements, McAlevey examines cases from labor unions and social movements to pinpoint the factors that helped them succeed - or fail - to accomplish their intended goals. McAlevey makes a compelling case that the great social movements of previous eras gained their power from mass organizing, a strategy today's progressives have mostly abandoned in favor of shallow mobilization or advocacy. She ultimately concludes that, in order to win, progressive movements need strong unions built from bottom-up organizing strategies that place the power for change in the hands of workers and ordinary people at the community level. Beyond the concrete examples in this book, McAlevey's arguments have direct implications for anyone involved in organizing for social change. Much more than cogent analysis, No Shortcuts explains exactly how progressives can go about rebuilding powerful movements at work, in our communities, and at the ballot box.

Trade Union Strategies against Healthcare Marketization - Jennie Aufferberg - 2021-07-23

Marketization in the healthcare sector affects the quality and delivery of care, as well as healthcare workers' working conditions. Based on a comparison of England and Germany, along with an in-depth case study looking at New York, USA, this volume examines how trade unions respond to marketization processes and the determinants of successful strategies. The author draws on a rich empirical study to develop a theoretical framework that accounts for sector-specific opportunity structures stemming from marketization processes and on the relevant unions' local-level leeway that opens if they build up and mobilise the available resources and capacities. The book identifies determinants of successful trade union strategies, explains the puzzling observation of similar strategic choices across different systems, and draws conclusions for prospects of trade unionism in the marketized healthcare sector. This book emphasizes the transformative effect of marketization on healthcare and the opportunities this change creates for unions, while giving special attention to the local-level conditions of trade unionism in the analysis of conflicts evolving around marketization in the hospital sector. It is of interest to academics and practitioners working in healthcare management, human resource management, and employment relations.

Home Care Nursing Delegation Skills - Ruth I. Hansten - 1999

An essential reference for nursing students in developing and implementing the competencies necessary in caring for critically ill patients! Synergy for Clinical Excellence: The AACN Synergy Model for Patient Care enhances the understanding of The Synergy Model in practice. Based on a decade of work by the American Association of Critical-Care Nurses, the text encompasses the history and development of the nurse and patient characteristic inherent in The Synergy Model, and then thoroughly addresses each characteristic individually and applies the model in practice. Includes sample test questions relevant to the model that will assist nursing students in preparing for certification through AACN, and provide further examples of the integration of the Synergy Model in practice.
