Built to Love - Jonathan Cagan 2011-08-19

Built to Love reveals how companies can create captivating products that energize the marketplace and set the standard for what customers want and expect. Firms often hope the answer is to produce the latest high technology devices - only to find that they fail to light up the marketplace. Or firms rely on ads that overstate or mislead, leaving the customer disappointed and disillusioned. Instead, a deeper emotional engagement between the customer and product is required, regardless of whether the products are physical products, services, technologies, software, systems, or brands. Using a combination of industry - based research and laboratory experiments, the authors demonstrate that customers will richly pay for products that authentically provide emotional fulfillment. They uncover the science behind successful products that create an avid and loyal following, and they present evidence that product emotions increase a product's success in the marketplace as well as a firm's success in the stock market (even when the economy is down!). A practical how - to guide, the book next shows how to analyze customers' emotional needs and translate those needs into features that galvanize customers. Throughout, the book uses revealing case studies that show how to energize customers in both consumer and business - to - business worlds, in both large and small firms.

The Loves of Shakespeare's Women - Susannah York 2001

Lonesome Dove - Larry McMurtry 2010-06-01

Nominated as one of America's best-loved novels by PBS's The Great American Read. A love story, an adventure, and an epic of the frontier, Larry McMurtry's Pulitzer Prize-winning classic, Lonesome Dove, the third book in the Lonesome Dove tetralogy, is the grandest novel ever written about the last defiant wilderness of America. Journey to the dusty little Texas town of Lonesome Dove and meet an unforgettable assortment of heroes and outlaws, whores and ladies, Indians and settlers. Richly authentic, beautifully written, always dramatic, Lonesome Dove is a book to make us laugh, weep, dream, and remember.

The Critical Path - Brock Yates 1996-08-12

The story of how Chrysler's minivan team created an automobile that captured the 1995 Motor Trend Car of the Year and other major awards - and reinvented a perilously entrenched corporation in the process - is as dramatic and inspiring a story as any in business today. Brock Yates, one of the most respected writers in the auto world, was given unprecedented access to Chrysler - every planning session, presentation, budget review, test drive, assembly line start-up, and marketing launch. The result is a book that unveils the mysteries of modern car-making, revealing how cars are shaped through countless interlinked decisions ranging from size and power to door configurations, color selections, and innumerable other interconnected details. It also captures the complex process by which the thousands of separate pieces that make up a car are designed, tested, manufactured, and marshaled into place at the exact moment they are needed. For any reader who cares about cars, this is the most intriguing look inside the mysteries of their creation ever written. At the same time, The Critical Path recounts an extraordinary drama of all-too-human managers attempting to make something new, in a new way, inside a corporate culture that resists them at every turn. The story of how Chrysler's minivan platform team kept their commitment to quality, schedule, and budget - with a \$3 billion investment and the company's fate palpably in the balance - is as encouraging a tale as has emerged from American business in years. The unprecedented triumph and Chrysler's resultant comeback is a lesson in successful management that will be savored by any reader interested in how great companies make breakthrough products.

PlanetInform's GLOBAL Directory for Major Automobile Dealers -

Arlen Ness - Michael Lichter, Arlen Ness

In the beginning, there was Arlen Ness. Before Jesse James, Billy Lane, and the battling Teutuls, Arlen Ness

started the business of building celebrity choppers. He is a long-time custom motorcycle builder whose bikes combine the artistic and the extreme. These rolling sculptures have been covered in motorcycle and even hot rod magazines for decades as Arlen Ness built a worldwide reputation as an innovator and sought-out builder of themed custom bikes. This book traces the growth of the Arlen Ness reputation, business empire, and custom bike resume and features stunning new photography of all the bikes in Arlen's personal collection, over 50 in total.

Environmental Forensics - R E Hester 2008-06-27

'Environmental forensics' is a combination of analytical and environmental chemistry, which is useful in the court room context. It therefore involves field analytical studies and both data interpretation and modelling connected with the attribution of pollution events to their causes. Recent decades have seen a burgeoning of legislation designed to protect the environment and, as the costs of environmental damage and clean-up are considerable, not only are there prosecutions by regulatory agencies, but the courts are also used as a means of adjudication of civil damage claims relating to environmental causes or environmental degradation. As a result is the increasing number of prosecutions of companies who have breached regulations for environmental protection and in civil claims relating to harm caused by excessive pollutant releases to the environment. Such cases can become extremely protracted as expert witnesses provide their sometimes conflicting interpretations of environmental measurement data and their meaning. It is in this context that environmental forensics is developing as a specialism, leading to greater formalisation of investigative methods which should lead to more definitive findings and less scope for experts to disagree. Now a significant subject in its own right, at least one journal devoted to the field and a number of degree courses have sprung up. As a result of the topicality and rapid growth of the subject area, is the publication of this book - the 26th volume in the highly acclaimed Issues in Environmental Science and Technology Series. This volume contains authoritative articles by a number of the leading practitioners across the globe in the environmental forensics field and aims to cover some of the main techniques and areas to which environmental forensics are being applied. The content is comprehensive and describes a number of the key areas within environmental forensics - topics covered by the authors include: - Source identification issues - Microbial techniques - Metal contamination and methods of assigning liability - The use of isotopes to determine sources and their applications - Molecular biological methods - Hydrocarbon fingerprinting techniques - Oil chemistry and key compound identification - The emerging role of environmental forensics in groundwater pollution Additionally, the volume considers specific pollutants and long-lived pollutants of groundwater such as halocarbons which have presented particular problems and which are described in some depth, as well as the way in which chemical degradation processes can lead to compositional changes which provide valuable information. The book provides a comprehensive overview of many of the key areas of environmental forensics written by some of the leading experts in the field. It will be both of specialist use to those seeking expert insights into the field and its capabilities as well as of more general interest to those involved in both environmental analytical science and environmental law.

Contemporary Hispanic Biography - Ashyia N. Henderson 2004

Provides entries for the Hispanic community throughout the world who have made contributions in such fields as science, politics, music, art, and sports.

Locomotive Dictionary - 1909

Trucking in British Columbia - Daniel Francis 2012

Accompanied by hundreds of previously unpublished archival and contemporary photographs, award-winning historian Daniel Francis delivers a fascinating account of the first hundred years of trucking in BC. Beginning in Vancouver with James Starks first delivery van in 1907, motorized transport exploded in the province, soon traversing every dirt track, hauling logs on temporary plank roads and leading to a frenzy of experimentation and innovation from the failed Renard Road Train and early battery-operated vehicles to some truly impressive purpose-built trucks, many of them manufactured in BC.

Principles of Marketing - John F. Tanner, Jr.

Built to Love - Peter Boatwright 2010-09-13

Boatwright and Cagan show how a firm can create products that electrify the market with excitement, products that go beyond functional performance to provide emotional fulfillment. There is a hum in the marketplace about these products, because they are the topic of conversations, media discussions, and social media posts. This book reveals how to understand, design and deliver products that engage and excite their customers through emotions evoked by the product itself, not just through advertising slogans and campaigns.

International Harvester Trucks - Patrick Foster 2015-09-30

Get the entire history of the best trucks on the road. The International Truck and Engine Corporation has built the trucks that have been a staple of both agricultural and industrial trucking for nearly 100 years. *International Harvester Trucks: The Complete History* tells the complete story of the light-, medium-, and heavy-duty trucks, vans, and station wagons built by International Harvester during over a century of history, starting from the company's early days, through its first truck model in 1907, and right up to the present. The focus is firmly on the trucks themselves including collectible machines such as the Travelall and Scout. Author Patrick R. Foster is one of the world's premier transportation historians. His accessible writing style, illustrated with hundreds of never-before-seen archival photographs, makes this book the best examination of one of the world's most prolific truck manufacturers.
