Lawnsapes - David Parfitt 2007

Every year, Americans spend some \$38 billion on lawn care. But you don't need to hire a crew of landscapers to have an attractive and eye-catching front yard all that's required is a lawnmower, a few inexpensive items from the hardware store, and a little creativity. *Lawnsapes* teaches readers how to mow artistic masterpieces directly into their lawns everything from checkerboard squares, hearts, and bull's-eyes to Christmas trees, Celtic knotwork, and much more. Gardening expert David Parfitt includes patterns for 20 different designs, plus tips on creating your own masterpieces. Packaged with an Astroturf cover, *Lawnsapes* is the perfect gift for dads across America.

Picture Perfect - David R. Mellor 2001-06-15

"Some artists use canvas to create a work of art. David Mellor uses a baseball field. His patterns are so precise and imaginative, I call him the Rembrandt of groundskeeping."--Bob Uecker, Milwaukee Brewers Broadcaster. Now you can transform your sports field or clubhouse lawn into an envy-grabbing work of optic art. In this book, David Mellor, currently the director of grounds for the Boston Red Sox Baseball Club, shares the turf mowing and maintenance secrets that have made him one of the leading creators of elaborate patterns used on athletic turf nationwide. He gives you the benefit of his years of experience along with simple-to-use techniques for creating playing fields that are a cut above the rest.--From publisher description.

Scotts Guide to the Identification of Turfgrass Diseases and Insects -

Lawn Gone! - Pam Penick 2013-02-12

A colorful guide covering the basics of replacing a traditional lawn with a wide variety of easy-care, no-mow, drought-tolerant, money-saving options that will appeal to today's busy, eco-conscious homeowner. Americans pour 300 million gallons of gas and 1 billion hours every year into mowing their lawns, not to mention 70 million pounds of pesticides and \$40 billion for lawn upkeep. No Wonder the anti-lawn movement is thriving, as today's eco-conscious consumers realize that their traditional lawns are water-hogging, chemical-ridden, maintenance-intensive burdens. *Lawn Gone!*, from award-winning gardening blogger Pam Penick, is the first basic introduction to low-water, easy-care lawn alternatives for beginning gardeners, written in a friendly style with an approachable package. It covers all the available time-saving options: alternative grasses, ground cover plants, artificial turf, hardscaping, mulch, and more. In addition, it includes step-by-step lawn-removal methods, strategies for dealing with neighbors and homeowner associations, and how to minimize your lawn if you're not ready to go all the way.

Gardening in the Pacific Northwest - Paul Bonine 2017-12-27

The climate of the Pacific Northwest presents its gardeners with a unique set of opportunities—ample rain, great soil, and moderate temperatures—and challenges—brief summer heat, wet winters, and ever-present slugs and snails. *Growing the Northwest Garden* tackles these problems in a fresh and comprehensive way. This practical handbook includes everything a home gardener needs to successfully garden in the region. It explores popular gardening styles like Japanese gardens, herbaceous and mixed borders, tropical gardens, rock gardens, and woodland gardens. Plant profiles for hundreds of ornamental plants highlight the best annuals, perennials, trees, shrubs, and bulbs for the region. And a comprehensive review of the region's climates, microclimates, and zones help gardeners with site selection, soil preparation, maintenance, and plant selections.

[The Secret of Our Success](#) - Joseph Henrich 2017-10-17

How our collective intelligence has helped us to evolve and prosper Humans are a puzzling species. On the one hand, we struggle to survive on our own in the wild, often failing to overcome even basic challenges, like obtaining food, building shelters, or avoiding predators. On the other hand, human groups have produced ingenious technologies, sophisticated languages, and complex institutions that have permitted us to successfully expand into a vast range of diverse environments. What has enabled us to dominate the globe, more than any other species, while remaining virtually helpless as lone individuals? This book shows that the secret of our success lies not in our innate intelligence, but in our collective brains—on the ability of human groups to socially interconnect and learn from one another over generations. Drawing insights from lost European explorers, clever chimpanzees, mobile hunter-gatherers, neuroscientific findings, ancient bones, and the human genome, Joseph Henrich demonstrates how our collective brains have propelled our species' genetic evolution and shaped our biology. Our early capacities for learning from others produced many cultural innovations, such as fire, cooking, water containers, plant knowledge, and projectile weapons, which in turn drove the expansion of our brains and altered our physiology, anatomy, and psychology in crucial ways. Later on, some collective brains generated and recombined powerful concepts, such as the lever, wheel, screw, and writing, while also creating the institutions that continue to alter our motivations and perceptions. Henrich shows how our genetics and biology are inextricably interwoven with cultural evolution, and how culture-gene interactions launched our species on an extraordinary evolutionary trajectory. Tracking clues from our ancient past to the present, *The Secret of Our Success* explores how the evolution of both our cultural and social natures produce a collective intelligence that explains both our species' immense success and the origins of human uniqueness.

Scotts Lawns - Nick Christians 2002

A guide to lawn care provides tips, techniques, and advice for an attractive yard, covering such topics as mowing, weeding, fertilizing, and getting rid of pests.

[A Photo Handbook of Weeds Identification and Green Grass Lawn Care for Picture Perfect Turf](#) - Nc Weed Killer 2014-07-04

Also available on Kindle Before you pull out the lawn mower or sign up for the lawn mower service, grab a copy of this book to get insight on a strategy that will allow you to efficiently earn the best lawn in the neighborhood and that will keep you from wasting time and money on losing battles. Among the variety of books on lawn and garden, it has been impossible to find one that combines a concise strategy and actionable tactics with clear photographs of the weeds that are causing your lawn care problems. That gap has now been filled. How do you come up with a schedule for lawn feeding? When do you apply feedings to your lawn? What do forsythias have to do with anything? Do pre-emergent applications only apply to crabgrass? Is your lawn supposed to be a pleasure? or a master? These are some of the questions addressed and answered in a short, targeted text of the NC WEED KILLER's strategy for lawn care and weed control. Then there are 31 full color close-up photographs in the Rogue's Gallery of common weeds. Knowing what you are up against allows you to pick the best strategy and target the best weed control herbicide. Luckily, landing in the 7c zone of North Carolina, the NC WEED KILLER has been able to document the weeds that have been creating problems from New York to Georgia, from North Carolina to The Pacific Northwest. And, he has been able to work out the best ways to combat those weeds- and win! With the books available made so large to attract publishers, and so complex that there is too much information, the home gardener has been left without clear guidelines and a concise strategy. With hardcover volumes so large and with those little web site thumbnail pictures on your computer, getting the information out into the garden for good side by side comparison has been difficult, if even possible. Pick up your 8 x 8 A Photo Handbook to Weeds... and head for the yard! A simple plan, portable information, and actions that aren't going to rob all your time and money. You are looking at the answer you have been looking for. Good reading - and Good Successful Gardening!
