[My Life with the Leica](#) - Walther Benser 2006-11-15

Personalities around the Leica such as Ernst Leitz II, Oskar Barnack, Henri Dumur, Paul Wolff, Heinrich Stockler and Julius Behnke come to life again through Walther Benser's tales and recollections presented to us in a new light. The Leica lecture tours, started by Anton Baumann, soon became Benser's specialty with which he achieved world-wide recognition. He took his shows not only around Germany but also into neighboring countries even after he war had begun. As a result of his photographic activity he eventually became a war reporter. Then came the battle for survival, both during and after the war - and the Leica always played an important and often decisive role. Finally he resumed his lecture tours, earning great success across the continents, both for his own pictures and for the

Leica. He then started his own business, which finally grew into a large color-picture agency. These are the stages in Walter Benser's life with the Leica, periods he lived through and helped to mold with every camera model, from the Leica I to the M6.

*Photogrammetric Applications for Cultural Heritage* - JON. BEDFORD 2017-10-31

This guidance covers the practical application of photogrammetry in recording cultural heritage, with particular reference to structure from motion (SfM) techniques. Our audience for this document includes survey contractors, archaeological contractors, voluntary organisations and specialists. Photogrammetric image acquisition and processing, until recently requiring a considerable investment in hardware and software, are now possible at a fraction of their former cost. This has led to a huge increase in the use of photogrammetry in cultural heritage recording. The skills required to apply the techniques successfully and accurately are discussed, and background information on how

various parts of the process work is provided so that better results can be achieved through better understanding. Photogrammetry is characterised by its versatility, and is applicable over a wide range of scales, from landscapes to small objects. The particular requirements needed at these different scales are outlined, and both imaging techniques and useful ancillary equipment are described. The different types of outputs are discussed, including their suitability for further interrogation using a range of established analytical techniques and the presentation options available. A range of case studies illustrates the application of photogrammetry across a variety of projects that broadly reflect the areas discussed in the text. This document is one of a number of Historic England technical advice documents on how to survey historic places.

**Science and Art** - Antonio Sgamellotti

2015-11-09

Science and art are increasingly interconnected in the activities of the study and conservation of works of art. Science plays a key role in cultural heritage, from developing new analytical techniques for studying the art, to investigating new ways of preserving the materials for the future. For example, high resolution multispectral examination of paintings allows art historians to view underdrawings barely visible before, while the use of non-invasive and micro-sampling analytical techniques allow scientists to identify pigments and binders that help art conservators in their work. It also allows curators to understand more about how the artwork was originally painted. Through a series of case studies written by scientists together with art historians, archaeologists and conservators, *Science and Art: The Painted Surface* demonstrates how the cooperation between science and humanities can lead to an increased understanding of the history of art and to better techniques in conservation. The examples used in the book cover paintings from ancient history, Renaissance, modern, and contemporary art, belonging to the artistic expressions of world regions from the Far East to America and Europe. Topics covered include the study of polychrome surfaces from pre-Columbian and medieval manuscripts, the revelation of hidden images below the surface of Van Gogh paintings and conservation of acrylic paints in contemporary art. Presented in an easily readable form for a large audience, the book guides readers into new areas uncovered by the link between science and art. The book features contributions from leading institutions across the globe including the Metropolitan Museum of Art, New York; Art Institute of Chicago; Getty Conservation Institute; Opificio delle Pietre Dure, Firenze; National Gallery of London; Tate Britain; Warsaw Academy of Fine Art and the National Gallery of Denmark as well as a chapter covering the Thangka paintings by Nobel Prize winner Richard Ernst.

*'Archaeologizing' Heritage?* - Michael Falser 2013-05-31

This book investigates what has constituted notions of "archaeological heritage" from colonial times to the present. It includes case studies of sites in South and Southeast Asia with a special focus on Angkor, Cambodia. The contributions, the subjects of which range from

architectural and intellectual history to historic preservation and restoration, evaluate historical processes spanning two centuries which saw the imagination and production of "dead archaeological ruins" by often overlooking living local, social, and ritual forms of usage on site. Case studies from computational modelling in archaeology discuss a comparable paradigmatic change from a mere simulation of supposedly dead archaeological building material to an increasing appreciation and scientific incorporation of the knowledge of local stakeholders. This book seeks to bring these different approaches from the humanities and engineering sciences into a trans-disciplinary discussion.

*My Spiritual Journey 2019* - Alyce-Kay Ruckelshaus 2018-12-06

Journaling has long been regarded as a helpful spiritual practice. This journal combines spiritual journaling with the benefits of bullet journaling. It's a great place to work through things with the Lord, carry out your devotions,

record what you're learning and your growth, practice spiritual disciplines, and keep a record for future inspiration and reflection, as well as something to pass down to future generations ... without becoming overwhelmed! The way this journal is laid out for you will make it a lot easier. This is a Christian dotted bullet journal with some of the setup work done for you. Titles are entered on many pages to guide you and include monthly pages for: Monthly summary, a spiritual goal for the month, a character quality to work on, a Scripture for the month (perhaps to memorize), Bible reading summaries, prayer, ways you need to grow (things God reveals to you), victories, gratefulness, serving, ways others have poured into you, ministry ideas, wisdom God has given (perhaps through Scripture reading, through experiences, during prayer, through others, through sermons), things you may want to share with others, as well as blank pages (with dots) at the end of each month to use for anything you want (sermon notes, artwork, ideas, etc). Each month also features a hymn for the month with plenty of room to write thoughts or make designs around it. There is an index area at the front, as well as a place to summarize the year when it's finished. Some blank (dotted) pages are available at the end. While these headings have been provided, the rest is completely up to you. You can be minimalistic and just write in it. Or you can use it as a worshipful artistic outlet, decorating and personalizing the pages in whatever way you wish. I personally suggest using washi tape on the edge of the first page of each month, so you can easily find the month you want to work on or look back at. Roomy margins allow space for extra notes, creative design, or prophetic artwork. There are many videos and articles online with tons of ideas for ways to use bullet journals and spiritual journals. Watch one or a few and use these as a springboard to make this journal your very own. This would be a great gift, and would be perfect for homeschoolers. It's available with 12 different covers. Look for the other listings. You can find instructional videos explaining each feature of the journal on my website: <http://thresholdofhineni.com/> Click on "Journals." You can also use these journals to make it into more of a guided journal experience. My plan is

to release a new journal each year, which will build on the previous year's journal. The theme this year is helping you establish your spiritual journaling practice. If you have any questions, comments, or requests for features in future journals, I'd be delighted if you'd contact me through my website, where you can also find links for subscribing to my newsletter and possibly offers for free books or other materials. My hope is that this journal will help you draw closer to our precious Lord and enable you to have a deeper, more intimate relationship with Him. Hineni, Alyce-Kay Ruckelshaus Ephesians 3:20

Either way you may find this section easier to understand than you expect; the illustrations and diagrams do help. Part 1 goes into the optical history of E. Leitz, Wetzlar and the Leica Camera of Solms in detail with all the personalities involved. This section is well illustrated with some new pictures. The commercial demands are always battling with the perfectionists at Leica who created some of the world's most famous lenses. Part 2 is an optical digression explaining the lens and glass design features, problems and terms and the continual battle to ensure that Leica users end up with the highest possible standard of lens. Part 3 is the largest part of the book. Puts has tested Leica lenses from 1925 to date; each lens, in most cases with diagram, is detailed with its performances at the critical apertures.
