Biotensegrity - Graham Melvin Scarr 2019-03-25

The emerging science of biotensegrity provides a fresh context for rethinking our understanding of human movement, but its complexities can be formidable. Biotensegrity: The Structural Basis of Life, Second edition - now with full color illustrations throughout - explores and explains the concept of biotensegrity and provides an understanding and appreciation of anatomy and physiology in the light of the latest research findings. They are then able to develop clinical practice and skills in light of this understanding, leading to more effective therapeutic approaches, with the aim of improved client outcomes. The second edition provides expanded coverage of the developmental and therapeutic aspects of biotensegrity. Coverage now includes: A more thorough look at life's internal processes Closed kinematic chains as the new biomechanics Embryological development as an evolutionary process The human body as a constantly evolving system based on a set of unchanging principles Emergence, heterarchies, soft-matter and small-world networks A deeper look at what constitutes the therapeutic process

The Yezidis - John S Guest 2022-12-30

First Published in 1987 The Yezidis: A Study in Survival traces the origin of Yezidi community's religion, describes the discovery of the people by Western travellers in the early nineteenth century and details the Yezidi community's traumatic history and their status in the 80s. The Yezidi religious group is spread out over Iraq, Turkey, Syria, and erstwhile USSR and have retained their identity for over 500 years. The Yezidi's believe that Lucifer, the fallen angel, has been forgiven by God and reinstated as chief angel: their history is, like their faith, characterized by dignity and survival in the face of great odds. Chapters also cover Sultan Abdul Hamid's cruel but vain efforts to force the Yezidis to embrace Islam, leading to the emergence of Mayan Khatun, a strong-willed Yezidi princess who ruled the community from 1913-1958. They include vivid account of her rivalry with her brother Ismail and the ill-fated marriage between her son and his daughter. The final chapter describes the community in Soviet Armenia and Georgia. This book is a must read for students of Middle East studies and Middle East history.

The Paris System for Reporting Urinary Cytology - Dorothy L. Rosenthal 2022

The first edition of The Paris System for Reporting Urinary Cytology introduced a completely new paradigm for detecting bladder cancer by urine cytology. This system concentrated on defining morphological characteristics of the most clinically significant form of bladder cancer, High Grade Urothelial Carcinoma. This new approach has been widely accepted throughout the world, and has become part of the daily practice of cytology. Considering that the first edition of The Paris System (TPS) introduced a new model of urinary cytodiagnosis, verification and expansion of initial material and data were anticipated. Based on evolving knowledge and readership requests, the group of highly experienced authors have created a new edition of TPS. This second edition includes areas and issues not originally covered. A new chapter on urine cytology of the upper tract, a rarely addressed topic, has been introduced. Furthermore, the issue of cellular degeneration is discussed in the criteria of all diagnostic categories. Examples of standardized reports are included in each chapter. Most importantly, a separate chapter presents data defining the risk of malignancy (ROM) for each diagnostic category to inform clinical management. New high quality images augment those of the first edition to better illustrate diagnostic clues and potential pitfalls. In addition to chapters on diagnostic criteria, current concepts of pathogenesis of bladder cancer, specimen adequacy and preparation, and ancillary tests are covered in separate chapters. A bonus to the volume is a comprehensive history of urine as the earliest diagnostic sample of human disease, richly illustrated with artworks from major museums. Written by internationally recognized authorities, this comprehensive and evidence-based guide to urine cytology is supported by the newest data confirming the original concept and significance of diagnostic criteria defining High Grade Urothelial Carcinoma. TPS is an essential tool for anyone who is practicing urinary cytology, including cytotechnologists, pathologists-in-training and practicing pathologists. This book should find a place in every cytology laboratory throughout the world. The Concept has been endorsed by the American Society of Cytopathology, and the International Academy of Cytology.

Surgical Care at the District Hospital - Organizacion Mundial de la Salud OMS 2003-07-21

Many patients who present to district (first-referral) level hospitals require surgical treatment for trauma, obstetric, abdominal or orthopedic emergencies. Often surgery cannot be safely postponed to allow their transfer to a secondary or tertiary-level hospital but many district hospitals in developing countries have no specialist surgical teams and are staffed by medical, nursing, and paramedical personnel who perform a wide range of surgical procedures often with inadequate training. The quality of surgical and acute care is often further constrained by poor facilities, inadequate low-technology apparatus and limited supplies of drugs, materials, and other essentials. The mission of the team responsible for Clinical Procedures in the World Health Organization Department of Essential Health Technologies (EHT) is to promote the quality of clinical care through the identification, promotion and standardization of appropriate procedures, equipment and materials, particularly at district hospital level. WHO/BCT has identified education and training as a particular priority, especially for non-specialist practitioners who practice surgery and anesthesia. It has therefore

developed Surgical Care at the District Hospital as a practical resource for individual practitioners and for use in undergraduate and postgraduate programs in-service training and continuing medical education programs. The manual is a successor of three earlier publications that are widely used throughout the world and that remain important reference texts: General Surgery at the District Hospital (WHO 1988), Surgery at the District Hospital: Obstetrics Gynecology Orthopedics and Traumatology (WHO 1991), Anesthesia at the District Hospital (WHO 1988; second edition 2000). This new manual draws together material from these three publications into a single volume which includes new and updated material, as well as material from Managing Complications in Pregnancy and Childbirth: A Guide for Midwives and Doctors (WHO 2000).

To Sir, with Love - Lauren Layne 2021-06-29

Love Is Blind meets You've Got Mail in this laugh-out-loud romantic

comedy following two thirty-somethings who meet on a blind dating app—only to realize that their online chemistry is nothing compared to their offline rivalry. Perpetually cheerful and eager to please, Gracie Cooper strives to make the best out of every situation. So when her father dies just months after a lung cancer diagnosis, she sets aside her dreams of pursuing her passion for art to take over his Midtown Manhattan champagne shop. She soon finds out that the store's profit margins are being squeezed perilously tight, and complicating matters further, a giant corporation headed by the impossibly handsome, but irritatingly arrogant Sebastian Andrews is proposing a buyout. But Gracie can't bear the thought of throwing away her father's dream like she did her own. Overwhelmed and not wanting to admit to her friends or family that she's having second thoughts about the shop, Gracie seeks advice and solace from someone she's never met—the faceless “Sir”, with whom she connected on a blind dating app where matches get to know each other through messages and common interests before exchanging real names or photos. But although Gracie finds herself slowly falling for Sir online, she has no idea she's already met him in real life...and they can't stand each other.
