Films that Work - Vinzenz Hediger 2009
Industriële films worden gezien als een apart filmgenre van de

twintigste eeuw. Ze werden geproduceerd en gesponsord door de overheid en grote bedrijven en moesten vooral aan de wensen van de sponsors voldoen, en niet zo zeer aan die van de filmmakers. In de hoogtijdagen werkten er duizenden mensen aan deze industriële films. Zo zijn er vakbladen en filmfestivals ontstaan door samenwerking met grote bedrijven als Shell en AT & T. Daarnaast hebben belangrijke regisseurs, zoals Buster Keaton, John Grierson en Alain Resnais, aan deze films meegewerkt. Toch lijkt de industriële film geen spoor te hebben achtergelaten in het filmische culturele discours. Films that Work is het eerste boek waarin de industriële film en zijn opmerkelijke geschiedenis worden onderzocht.

*Archaeology of Iran in the
Historical Period* - Kamal-Aldin
Niknami 2020-05-22

This collection of twenty-eight
essays presents an up-to-date
survey of pre-Islamic Iran, from
the earliest dynasty of Illam to
the end of Sasanian empire,
encompassing a rich diversity
of peoples and cultures.

Historically, Iran served as a
bridge between the earlier
Near Eastern cultures and the
later classical world of the
Mediterranean, and had a
profound influence on political,
military, economic, and
cultural aspects of the ancient
world. Written by international
scholars and drawing mainly
on the field of practical
archaeology, which

traditionally has shared little in
the way of theories and
methods, the book provides
crucial pieces to the puzzle of
the national identity of Iranian
cultures from a historical
perspective. Revealing the
wealth and splendor of ancient
Iranian society - its rich
archaeological data and
sophisticated artistic
craftsmanship - most of which
has never before been
presented outside of Iran, this
beautifully illustrated book
presents a range of studies
addressing specific aspects of
Iranian archaeology to show
why the artistic masterpieces
of ancient Iranians rank among
the finest ever produced.
Together, the authors analyze
how archaeology can inform us
about our cultural past, and
what remains to still be
discovered in this important
region.

**IBM SPSS Statistics 25 Step

by-step approach that makes SPSS software clear to beginners and experienced researchers alike. Extensive use of four-color screen shots, clear writing, and step-by-step boxes guide readers through the program. Exercises at the end of each chapter support students by providing additional opportunities to practice using SPSS. This book covers both the basics of descriptive statistical analysis using SPSS through to more advanced topics such as multiple regression, multidimensional scaling and MANOVA, including instructions for Windows and Mac. This makes it ideal for both undergraduate statistics courses and for postgraduates looking to further develop their statistics and SPSS knowledge. New to this edition: Updated throughout to SPSS 25 Updated / restructured material on: Chart Builder; Univariate ANOVA; moderation on two- and three-way ANOVA; and Factor Analytic Techniques (formerly Factor Analysis structure) New material on

computing z and T scores, and on computing z scores within descriptive statistics Clearer in-chapter links between the type of data and type of research question that the procedure can answer Updated / additional datasets, exercises, and expanded Companion Website material, including Powerpoint slides for instructors

*New Frontiers of the
Automobile Industry* - Alex
Covarrubias V. 2019-11-28
Analysing developments in
digital technologies and
institutional changes, this book
provides an overview of the
current frenetic state of
transformation within the
global automobile industry. An
ongoing transition brought
about by the relocation of
marketing, design and
production centres to emerging
economies, and
experimentation with new
mobility systems such as
electrical, autonomous
vehicles, this process poses the
question as to how original
equipment manufacturers
(OEMs) and newcomers can
remain competitive and ensure
sustainability. With

contributions from specialists
in the automobile sector, this
collection examines the shifts
in power and geographical
location occurring in the
industry, and outlines the key
role that public policy has in
generating innovation in
entrepreneurial states.
Offering useful insights into
the challenges facing emerging
economies in their attempts to
grow within the automobile
industry, this book will provide
valuable reading for those
researching
internationalization and
emerging markets, business
strategy and more specifically,
the automotive industry.

**The Geology of Iran:
Tectonic, Magmatism and
Metamorphism** - Mansour
Ghorbani 2021-05-20

This book describes the
geological setting of Iran
throughout geological history,
referring to paleogeography
and general geodynamics. Also,
all structural units, faults,
tectonic phases and orogeny

Downloaded from

occurred in the geology of Iran have been evaluated. Magmatic and metamorphic rocks along with ophiolitic complexes have extensive outcrops in Iran, and these rocks with Precambrian age constitute its basement. Study and identification of such rocks not only throws light on the geodynamic issues of Iran but also helps in recognition of the mode of formation and evolution of the sedimentary basins located within various structural divisions of the country. Moreover, the majority of metallic and non-metallic mineral deposits are associated either directly or indirectly with magmatic, and at time metamorphic, rocks. In the Magmatism and Metamorphism parts, it is tried to thoroughly consider the various aspects of the igneous rocks, whether intrusive, extrusive or young volcanoes, from the point of view of petrography, geochemistry and geodynamics. In addition, the major intrusive bodies of Iran have been presented along with their petrologic and chronologic specifications in

tables, mentioning the bibliographic resources.

Persepolis: Discovery and

Afterlife of a World Wonder

presents the first full study of the history of archaeological exploration at Persepolis after its destruction in 330 BC. Based in part on archival evidence, anecdotal information, and unpublished documents, this book describes in detail the history of archaeological exploration, visual documentation, and excavations at one of the most celebrated sites of the ancient

world. The book addresses a broad audience of readers ranging from students of the archaeology, history, and art history of ancient, medieval, and modern Iran to scholars in Classical Studies and Ancient Near Eastern Studies.
