Think Again - Sydney Finkelstein 2009-02-03
Why do smart and experienced leaders make flawed, even catastrophic, decisions? Why do

people keep believing they have made the right choice, even with the disastrous result staring them in the face? And how can you be sure

you're making the right decision--without the benefit of hindsight? Sydney Finkelstein, Jo Whitehead, and Andrew Campbell show how the usually beneficial processes of the human mind can become traps when we face big decisions. The authors show how the shortcuts our brains have learned to take over millennia of evolution can derail our decision making. Think Again offers a powerful model for making better decisions, describing the key red flags to watch for and detailing the decision-making safeguards we need. Using examples from business, politics, and history, Think Again deconstructs bad decisions, as they unfolded in real time, to show how you can avoid the same fate.

Eco-Business - Peter Dauvergne 2013-03-01
Two experts explain the consequences for the planet when corporations use sustainability as a business tool. McDonald's promises to use only beef, coffee, fish, chicken, and cooking oil obtained from sustainable sources. Coca-Cola promises to achieve water neutrality. Unilever

seeks to achieve 100 percent sustainable agricultural sourcing by 2020. Walmart has pledged to become carbon neutral. Big-brand companies seem to be making commitments that go beyond the usual "greenwashing" efforts undertaken largely for public-relations purposes. In Eco-Business, Peter Dauvergne and Jane Lister examine this new corporate embrace of sustainability, its actual accomplishments, and the consequences for the environment. For many leading-brand companies, these corporate sustainability efforts go deep, reorienting central operations and extending through global supply chains. Yet, as Dauvergne and Lister point out, these companies are doing this not for the good of the planet but for their own profits and market share in a volatile, globalized economy. They are using sustainability as a business tool. Dauvergne and Lister show that the eco-efficiencies achieved by big-brand companies limit the potential for finding deeper solutions to pressing environmental problems and reinforce

runaway consumption. Eco-business promotes the sustainability of big business, not the sustainability of life on Earth.

Making It Happen - Iain Martin 2013-09-12

When RBS collapsed and had to be bailed out by the taxpayer in the financial crisis of October 2008 it played a leading role in tipping Britain into its deepest economic downturn in seven decades. The economy shrank, bank lending froze, hundreds of thousands lost their jobs, living standards are still falling and Britons will be paying higher taxes for decades to pay the clean-up bill. How on earth had a small Scottish bank grown so quickly to become a global financial giant that could do such immense damage when it collapsed? At the centre of the story was Fred Goodwin, the former chief executive known as "Fred the Shred" who terrorised some of his staff and beguiled others. Not a banker by training, he nonetheless was given control of RBS and set about trying to make it one of the biggest brands in the world. It

was said confidently that computerisation and new banking products had made the world safer. Only they hadn't... Based on more than 80 interviews and with access to diaries and papers kept by those at the heart of the meltdown, this is the definitive account of the RBS disaster, a disaster which still casts such a shadow over our economy. In *Making It Happen*, senior executives, board members, Treasury insiders and regulators reveal how the bank's mania for expansion led it to take enormous risks its leaders didn't understand. From the birth of the Royal Bank in 18th century Scotland, to the manic expansion under Fred Goodwin in the middle of a mad boom and culminating in the epoch-defining collapse, *Making It Happen* is the full, extraordinary story.

The Great Recession - Michael Roberts
2009-12-03

The Great Recession of 2008-9 was the worst slump in the world economy since the Great Depression in the 1930s. Michael Roberts

forecast that it would happen a few years before and in this book he explains why the Great Recession happened - relying on Marx's analysis of the laws of motion in a capitalist economy. And he makes predictions of whether and when it could happen again.

The Powerful and the Damned - Lionel Barber

2020-11-05

'Extraordinary' TONY BLAIR 'Riveting' - PHILIPPE SANDS 'Brutal, brilliant and scurrilously funny' - MISHA GLENNY The real scoop isn't on the front page 'As FT editor, I was a privileged interlocutor to people in power around the world, each offering unique insights into high-level decision-making and political calculation, often in moments of crisis. These diaries offer snapshots of leadership in an age of upheaval...' Lionel Barber was Editor of the Financial Times for the tech boom, the global financial crisis, the rise of China, Brexit, and mainstream media's fight for survival in the age of fake news. In this unparalleled, no-holds-

barred diary of life behind the headlines, he reveals the private meetings and exchanges with political leaders on the eve of referendums, the conversations with billionaire bankers facing economic meltdown, exchanges with Silicon Valley tech gurus and pleas from foreign emissaries desperate for inside knowledge, all against the backdrop of a wildly shifting media landscape. The result is a fascinating - and at times scathing - portrait of power in our modern age; who has it, what it takes and what drives the men and women with the world at their feet. Featuring close encounters with Trump, Cameron, Blair, Putin, Merkel and Mohammed Bin Salman and many more, this is a rare portrait of the people who continue to shape our world and who quite literally, make the news.

Bait and Switch - Barbara Ehrenreich

2006-07-25

The bestselling author of Nickel and Dimed goes back undercover to do for America's ailing middle class what she did for the working poor

Barbara Ehrenreich's *Nickel and Dimed* explored the lives of low-wage workers. Now, in *Bait and Switch*, she enters another hidden realm of the economy: the shadowy world of the white-collar unemployed. Armed with a plausible résumé of a professional "in transition," she attempts to land a middle-class job—undergoing career coaching and personality testing, then trawling a series of EST-like boot camps, job fairs, networking events, and evangelical job-search ministries. She gets an image makeover, works to project a winning attitude, yet is proselytized, scammed, lectured, and—again and again—rejected. *Bait and Switch* highlights the people who've done everything right—gotten college degrees, developed marketable skills, and built up impressive résumés—yet have become repeatedly vulnerable to financial disaster, and not simply due to the vagaries of the business cycle. Today's ultra-lean corporations take pride in shedding their "surplus" employees—plunging them, for months or years at a stretch, into the

twilight zone of white-collar unemployment, where job searching becomes a full-time job in itself. As Ehrenreich discovers, there are few social supports for these newly disposable workers—and little security even for those who have jobs. Like the now classic *Nickel and Dimed*, *Bait and Switch* is alternately hilarious and tragic, a searing exposé of economic cruelty where we least expect it.

Enough is Enough - Fintan O'Toole 2010-10-28

The Republic of Ireland, which declared itself in 1949, allowed the Catholic Church to dominate its civil society and education system.

Investment by American and European companies, and a welcoming tax regime, created the 'Celtic Tiger' of the 1990s. That brief burst of good fortune was destroyed by a corrupt political class which encouraged a wild property boom, leaving the country almost bankrupt.

What Ireland needs now is a programme of real change. It needs to become a fully modern republic in fact as well as name. This disastrous

economic collapse also allows us to think through the kind of multiculturalism that Ireland needs, and to build institutions that can accommodate the sudden influx of migrants who have come to Ireland in the past 15 years. The State should take over the entire education system, for which it pays already, and make it fit for the 21st century. The political system is dysfunctional and is one of the main causes of the debacle we have just experienced. Ireland needs constitutional reform. Politicians have been let get away with murder, and there is a fatalistic sense that nothing can change. The country needs to encourage participation in, and oversight and knowledge of politics, to make people feel that they have a right to challenge the old party machines and to make a difference. It is their country, after all.

Practice Standard for Project Risk Management - Project Management Institute
2009-06-01

The Practice Standard for Project Risk

Management covers risk management as it is applied to single projects only. It does not cover risk in programs or portfolios. This practice standard is consistent with the PMBOK® Guide and is aligned with other PMI practice standards. Different projects, organizations and situations require a variety of approaches to risk management and there are several specific ways to conduct risk management that are in agreement with principles of Project Risk Management as presented in this practice standard.

[A Bigger Prize](#) - Margaret Heffernan 2014-04-08
An entrepreneur, chief executive and author describes the cost of being too competitive, discussing how the pressure to win and be the best invites cheating, corruption and degradation and advocates for a more collaborative ethos in the business world. 25,000 first printing.

[Capitalism 4.0](#) - Anatole Kaletsky 2011-06-28
In this controversial book, Anatole Kaletsky puts the upheavals of 2007-2009 in historical and ideological perspective. He shows how the forces that precipitated the financial meltdown are now creating a new and stronger version of the global capitalist system-- one that will continue to be led and shaped by the U.S. if its businesses and politicians play their cards well. This is Capitalism 4.0, and it will change politics,

finance, international relations, and economic thinking in the coming decades.

The Lion Wakes - David Kynaston 2015-03-05

The Lion Wakes tells the modern story of HSBC, starting in the late 1970s, when the bank first broke out of the Asia-Pacific region with its purchase of Marine Midland Bank in the US. It follows HSBC's battle to purchase Midland Bank in 1992, the subsequent move of head office from Hong Kong to London, and the string of acquisitions that brought the bank to its pre-eminent place in global finance today. Acclaimed historians Richard Roberts and David Kynaston chronicle the bank's struggles as well as its successes: the last part of the book deals with the ill-fated move into consumer finance in the US, as well as the financial crisis of 2008 and its effect on HSBC. Impeccably researched and generously illustrated from the HSBC archives, this is a valuable addition to global financial history.

Anglo Republic - Simon Carswell 2011-09-05

As late as 2007, Anglo Irish Bank was a darling of the markets, internationally recognized as one of the fastest growing financial institutions in the world. By 2008, it was bust. The Irish government's hopeless attempts to save Anglo have led the state to ruin - culminating in a punitive IMF bailout in late 2010 and threatening the future of the euro. Now, for the first time, the full story of the Anglo disaster is being told - by the journalist who has led the way in coverage of the bank and its many secrets. Drawing on his unmatched sources in and around Anglo, Simon Carswell of the Irish Times shows how the business model that brought Anglo twenty years of spectacular growth was also at the heart of its - and Ireland's - downfall. He paints a vivid and disturbing picture of life inside Anglo - the credit committee meetings, the lightning-quick negotiations with property developers, the culture of lavish entertainment for politicians and regulators - and of the men who presided over its dizzying rise and fall: Sean

FitzPatrick, David Drumm, Willie McAteer and many others. This is not only the first full account of the Anglo disaster; it will also be the definitive one.

After the Great Complacency - Ewald Engelen

Society in Crisis - Mattias Hesserus 2021-07-20

Timely meditations on human flexibility In this anthology, 25 leading scholars from across the globe describe and analyze how different societies have handled crisis. In ancient Greek, a crisis refers not necessarily to a catastrophic situation but to an opportunity for great change. Edited by Swedish historian Mattias Hessérus and Scottish commentator Iain Martin, *Society in Crisis* takes this classical understanding of the term to heart as it acknowledges the many ways in which humans have made the decision to reorient their societies as a result of crisis.

Contributors include: Clive Aslet, Philip Bobbitt, Peter Burke, Gillian Clark, Jonathan Fenby, Peter Frankopan, Jessica Frazier, Lawrence Freedman, Matthew Goodwin, Andrew Graham-Dixon, Johan Hakelius, Vanessa Harding, Tom Holland, Mark Honigsbaum, Alex Lee, Tim Marshall, Lincoln Paine, Iskander Rehman, Donald Sassoon, David Seedhouse, Graham Stewart, Hew Strachan, Helen Thompson, Richard Whatmore and Adrian Wooldridge.

The Believers - Adam LeBor 2009-10-08

How America fell for financier Bernie Madoff's \$65 billion investment scam. It was luxurious Palm Beach, by the manicured lawns and Olympic-sized swimming pool, that financier Bernard Madoff ravaged the world of philanthropy and high society he had strived so hard to join, vaporising the assets of charities, foundations and individuals that had trusted him with their funds. It seems nothing was sacrosanct to Madoff, possibly the greatest con-man in history. Even Elie Wiesel's foundation

has lost tens of millions. How could Madoff, a pillar of the Jewish community, do this to a Nobel Laureate and Auschwitz survivor? But Wiesel was hardly alone in trusting the rogue financier. How could some of the most sophisticated and worldly people in America fall victim to a collective delusion for year after year? **THE BELIEVERS** answers these unsettling questions. It opens up the clubbish world where Madoff operated, tracing the links from Palm Beach and The Hamptons to the salons and clubs of Manhattan society. It details the network of relationships across which flows hundreds of millions of dollars. 'The Believers' shows how despite material success and acclaim, some human impulses remain eternal. It reveals how an underlying sense of insecurity still shapes some of the richest and most successful individuals in America, making them crave ever more status and peer acclaim. By focusing on Madoff's connection to, and catastrophic impact on, the American Jewish community, **THE**

BELIEVERS dramatically humanises a story that is part financial scandal and part Greek tragedy. **The Everything Store** - Brad Stone 2013-10-15 The authoritative account of the rise of Amazon and its intensely driven founder, Jeff Bezos, praised by the Seattle Times as "the definitive account of how a tech icon came to life." Amazon.com started off delivering books through the mail. But its visionary founder, Jeff Bezos, wasn't content with being a bookseller. He wanted Amazon to become the everything store, offering limitless selection and seductive convenience at disruptively low prices. To do so, he developed a corporate culture of relentless ambition and secrecy that's never been cracked. Until now. Brad Stone enjoyed unprecedented access to current and former Amazon employees and Bezos family members, giving readers the first in-depth, fly-on-the-wall account of life at Amazon. Compared to tech's other elite innovators -- Jobs, Gates, Zuckerberg -- Bezos is a private man. But he stands out for his restless

pursuit of new markets, leading Amazon into risky new ventures like the Kindle and cloud computing, and transforming retail in the same way Henry Ford revolutionized manufacturing. The Everything Store is the revealing, definitive biography of the company that placed one of the first and largest bets on the Internet and forever changed the way we shop and read.

[The End of Alchemy: Money, Banking, and the Future of the Global Economy](#) - Mervyn King
2016-03-21

“Mervyn King may well have written the most important book to come out of the financial crisis. Agree or disagree, King’s visionary ideas deserve the attention of everyone from economics students to heads of state.”

—Lawrence H. Summers Something is wrong with our banking system. We all sense that, but Mervyn King knows it firsthand; his ten years at the helm of the Bank of England, including at the height of the financial crisis, revealed profound truths about the mechanisms of our

capitalist society. In *The End of Alchemy* he offers us an essential work about the history and future of money and banking, the keys to modern finance. The Industrial Revolution built the foundation of our modern capitalist age. Yet the flowering of technological innovations during that dynamic period relied on the widespread adoption of two much older ideas: the creation of paper money and the invention of banks that issued credit. We take these systems for granted today, yet at their core both ideas were revolutionary and almost magical. Common paper became as precious as gold, and risky long-term loans were transformed into safe short-term bank deposits. As King argues, this is financial alchemy—the creation of extraordinary financial powers that defy reality and common sense. Faith in these powers has led to huge benefits; the liquidity they create has fueled economic growth for two centuries now. However, they have also produced an unending string of economic disasters, from

hyperinflations to banking collapses to the recent global recession and current stagnation. How do we reconcile the potent strengths of these ideas with their inherent weaknesses? King draws on his unique experience to present fresh interpretations of these economic forces and to point the way forward for the global economy. His bold solutions cut through current overstuffed and needlessly complex legislation to provide a clear path to durable prosperity and the end of overreliance on the alchemy of our financial ancestors.

The Law on Corporate Governance in Banks

- Iris H-Y Chiu 2015-02-27

Corporate governance in financial institutions has come under the spotlight since the banking crisis in the UK in 2008-9. In many respects, the banking business raises unique problems for corporate governance that are not found in other corporate sectors

Big Data - Viktor Mayer-Schönberger 2013

This revelatory exploration of big data, which

refers to our newfound ability to crunch vast amounts of information, analyze it instantly and draw profound and surprising conclusions from it, discusses how it will change our lives and what we can do to protect ourselves from its hazards. 75,000 first printing.

23 Things They Don't Tell You about Capitalism -

Ha-Joon Chang 2011-01-02

INTERNATIONAL BESTSELLER "For anyone who wants to understand capitalism not as economists or politicians have pictured it but as it actually operates, this book will be invaluable."-Observer (UK) If you've wondered how we did not see the economic collapse coming, Ha-Joon Chang knows the answer: We didn't ask what they didn't tell us about capitalism. This is a lighthearted book with a serious purpose: to question the assumptions behind the dogma and sheer hype that the dominant school of neoliberal economists-the apostles of the freemarket-have spun since the Age of Reagan. Chang, the author of the

international bestseller *Bad Samaritans*, is one of the world's most respected economists, a voice of sanity-and wit-in the tradition of John Kenneth Galbraith and Joseph Stiglitz. *23 Things They Don't Tell You About Capitalism* equips readers with an understanding of how global capitalism works-and doesn't. In his final chapter, "How to Rebuild the World," Chang offers a vision of how we can shape capitalism to humane ends, instead of becoming slaves of the market.

The Virgin Banker - Jayne-Anne Gadhia
2017-04-20

Jayne-Anne Gadhia, the straight-talking CEO of Virgin Money, looks back at the events that have influenced, shaped and inspired her to become one of the most powerful women in banking. With anecdotes from her life before becoming a banker, including beating the bullies and experiencing racism as part of a mixed race marriage, through to building a business from scratch, working at RBS under Fred Goodwin

just before the financial crash, and steering Virgin Money to become a listed business, breaking boundaries along the way, professionally and personally. Jayne-Anne shines a light on issues surrounding the role of women in banking and the alpha-male dinosaurs that dominate the industry. She draws on the relationships and deals that have shaped her career so far, including her personal experience with mental health issues, which has helped her attitude and approach to both her business and personal life. This is not a conventional biography, nor a 'how to do it' business book. It is a candid, fresh and fascinating insight into being a woman in business, the financial crisis and the way in which business can be conducted as a force for good.

Crash Bang Wallop - Iain Martin 2016-09-08
Published to mark the 30th anniversary of the financial revolution known as 'Big Bang', *Crash Bang Wallop* will tell the gripping story of how the changes introduced in the 1980s in the City

of London transformed our world. Attitudes to money and the way we measure value and status were completely reshaped by Big Bang, and it had an extraordinary impact on politics, on style, on technology, on the class system, on questions of public ownership, and on the geography of London. Perhaps more than anything, Big Bang revolutionised the international markets, as the capital became a testing ground for financial globalisation, with huge repercussions for the global economy. The definitive insider's account of this critically important moment in modern history, *Crash Bang Wallop* will also explore what's next for global finance as it gets ready to undergo yet another revolution. 'Iain Martin tells it brilliantly, mixing fury-inducing narrative with an acute eye for the broader conclusion.'

Observer

Other People's Money - John Kay 2015-09-22

The finance sector of Western economies is too large and attracts too many of the smartest college graduates. Financialization over the past

three decades has created a structure that lacks resilience and supports absurd volumes of trading. The finance sector devotes too little attention to the search for new investment opportunities and the stewardship of existing ones, and far too much to secondary-market dealing in existing assets. Regulation has contributed more to the problems than the solutions. Why? What is finance for? John Kay, with wide practical and academic experience in the world of finance, understands the operation of the financial sector better than most. He believes in good banks and effective asset managers, but good banks and effective asset managers are not what he sees. In a dazzling and revelatory tour of the financial world as it has emerged from the wreckage of the 2008 crisis, Kay does not flinch in his criticism: we do need some of the things that Citigroup and Goldman Sachs do, but we do not need Citigroup and Goldman to do them. And many of the things done by Citigroup and Goldman do not need to

be done at all. The finance sector needs to be reminded of its primary purpose: to manage other people's money for the benefit of businesses and households. It is an aberration when the some of the finest mathematical and scientific minds are tasked with devising algorithms for the sole purpose of exploiting the weakness of other algorithms for computerized trading in securities. To travel further down that road leads to ruin. A Financial Times Book of the Year, 2015 An Economist Best Book of the Year, 2015 A Bloomberg Best Book of the Year, 2015 *Better Governance Across the Board* - John Zinkin 2019-05-20

Better Governance Across the Board is a practical guide for achieving good corporate governance of organizations regardless of whether they are for profit, listed, state-owned, family owned, or widely held. It delves into the questions boards must ask if they are to fulfill their fiduciary duties, taking account of regulatory issues. Part 1 defines corporate

governance, explaining the four reasons why it matters and how it applies to a wide range of organizations. Part 2 explores the "Five P" framework of Purpose, Principles, Power, People, and Processes that helps boards to create sustainable value. Part 3 concludes by showing how the organization's long-term "license to operate" is achieved by boards focusing on the three most important assets of the organization: its reputation; its people, and its processes. This book explores the dilemmas that currently exist in modern approaches to corporate governance and suggests ways of overcoming them. Based on ten years of teaching more than 1,500 directors of publicly listed companies, it integrates key principles of leadership, ethics, branding, and governance into a unique five-factor framework to help directors make good decisions in strategy, risk management, succession planning, internal controls, and stakeholder engagement.

The Future of Work - R. Donkin 2009-11-06

The forces that are shaping the future of employment are examined in this new book. The author presents a cohesive argument for a fundamental change in attitudes to work, both from policymakers and employers if we are to create a healthier society capable of meeting the expectations and concerns of a developing economy.

Who Runs Britain? - Robert Peston 2008

On 13 September 2007, Robert Peston broke the news that Northern Rock had become a victim of the global credit crunch and was seeking an emergency loan from the Bank of England. It was the latest in a long line of scoops by this award-winning journalist. Over the weeks that followed, the Government found itself exposed to the Rock to the tune of 57 billion or almost 2000 for every taxpayer. As Robert Peston shows in his fascinating new book, the seeds for the collapse of Northern Rock and the upheavals in the financial markets were sown years before. WHO RUNS BRITAIN? is the first time anyone

has drawn all the threads together to weave a story that's rich in extraordinary characters and outrageous feats of economic bravado. This book is about the widening gap between the super-rich and the rest of us. It explores and explodes the myth that the financial creativity of those who are amassing these vast fortunes is good for the wider economy and for all of us. Whether you're a financial expert or just have a bank account, WHO RUNS BRITAIN? is a book you must read.

The Psychology of Fear in Organizations - Sheila Keegan 2015-02-03

In the context of global economic recession, fear has become institutionalized in many organizations, both in the private and public sectors. Board directors are under pressure from

shareholders, senior executives are attempting to maintain sales in a nervous market and many people are concerned about job security and maintaining their living standards. This book shows how fear manifests itself in large organizations, how it impacts on the workforce and how by reducing our willingness to take risks and to innovate, it can inhibit economic growth and innovation, at both an individual and corporate level. *The Psychology of Fear in Organizations* examines the psychological barriers to innovation and presents initiatives to loosen the paralysis caused by the economic downturn.

The Alchemists - Neil Irwin 2014

An unprecedented and important insight into the secret world behind our economy.

The Rise and Fall of the City of Money - Ray Perman 2022-08-04

This is the colourful story of how Edinburgh rose to be one of the top 10 financial centres in Europe - and how the crisis of 2008 decimated

its banking, insurance and investment institutions. Written by award-winning journalist Ray Perman who has reported on the Edinburgh financial industry for 40 years.

The Intoxication of Power - Graham Robinson
2014-01-14

The Intoxication of Power is a collection of contributions by thirteen authors from various academic disciplines sharing a concern for the development of understanding of the nature and origins of leadership hubris. The book originated at conferences held by the Daedalus Trust, which fosters research into challenges to organizational well-being.

Bank of Dave - Dave Fishwick 2012-05-10
The global financial system is in crisis, bankers are in disrepute and Britain is on the brink of a double-dip recession. Now one man, fed up with never-ending tales of greed and corruption, sets out to prove that there is a different way of doing things - by opening his own bank to help inject much-needed life into local businesses.

Dave Fishwick is a self-made, straight-talking man from Burnley who hates the banks. Published to tie in with a Channel 4 series of the same name, this is the story of his attempt to set up a simple, no-nonsense bank that actually cares about its customers. Dave plans to put hundreds of thousands of pounds of his own money into the enterprise; he will offer his customers a far better rate of interest than they get on the high street; he will lend to struggling local businesses that the banks don't want to know about; and he aims to bring the Bank of Dave into profit within 180 days. If he succeeds, he'll give whatever he makes to charity. If he fails, he'll make a terrible loss and ruin his hard-earned reputation as a successful businessman. Can one man really take on the banking giants and make a real difference to local businesses and his community? Dave Fishwick certainly hopes so.

The Wealth Effect - Jeffrey M. Chwieroth

2019-03-21

Shows how the politics of banking crises has been transformed by the growing 'great expectations' among middle class voters that governments should protect their wealth.

MisLeadership - Dr Jonathan Smith 2012-08-28

The 'MisLeadership' of this book's title is a description of the phenomenon the authors have uncovered through their analysis of the validity, or otherwise, of current leadership styles and achievements, in the light of the challenges leaders face, and particularly of the urgent global issues with which business leaders are now confronted. John Rayment and Jonathan Smith examine existing approaches to leadership with a focus on their shortcomings, categorized according to the four main types of misLeadership the authors have identified - Missing, Misguided, Misinformed and Machiavellian leadership. Each of these forms of misleadership has a corollary in one of the four elements of the kind of holistic leadership that

the authors advocate - the capacity for effective decision making, the adoption of a global perspective, the move to a new business paradigm to replace the current economic and social one, and commitment to a contemporary mission. From Rayment and Smith's passionately argued, but well reasoned perspective, leaders, the led and those responsible for leadership development will gain an insight into the prevalence and causes of misleadership and into ways in which it can be identified and overcome. A range of examples and case studies is provided to enable the concepts presented here to be related to practice. As well as illustrating instances of 'misleadership' these also demonstrate that the emphasis in relation to the decision making models currently available to leaders may not be the most important stages of the processes involved. The global perspective emphasized by the authors is not just about globality in the geographical sense. An important part of the way forward suggested

here involves considering all aspects of humanity - the physical, mental and spiritual strength, stamina and fitness of individuals, groups and societies, in the context of a 'Global Fitness Framework'. All this is presented in a practical and approachable style that enables these authors to introduce a new approach to a key element of management thinking, in a way that will encourage and empower individuals to think on a different scale, challenge assumptions and exercise effective leadership.

Back from the Brink - Alistair Darling
2012-06-01

Alistair Darling's long-awaited book will be one of the most reviewed, widely discussed, and saleable political memoirs of recent years. In the late summer of 2007, shares of Northern Rock went into free-fall, causing a run on the bank - the first in over 150 years. Northern Rock proved to be only the first. Twelve months later, as the world was engulfed in the worst banking crisis for more than a century, one of its largest

banks, RBS, came within hours of collapse. Back from the Brink tells the gripping story of Alistair Darling's one thousand days in Number 11 Downing Street. As Chancellor, he had to avert the collapse of RBS hours before the cash machines would have ceased to function; at the eleventh hour, he stopped Barclays from acquiring Lehman Brothers in order to protect UK taxpayers; he used anti-terror legislation to stop Icelandic banks from withdrawing funds from Britain. From crisis talks in Washington, to dramatic meetings with the titans of international banking, to dealing with the massive political and economic fallout in the UK, Darling places the reader in the rooms where the destinies of millions weighed heavily on the shoulders of a few. His book is also a candid account of life in the Downing Street pressure cooker and his relationship with Gordon Brown during the last years of New Labor. Back from the Brink is a vivid and immediate depiction of the British government's handling of an

unprecedented global financial catastrophe. Alistair Darling's knowledge and understanding provide a unique perspective on the events that rocked international capitalism. It is also a vital historical document.

How Do We Fix This Mess? The Economic Price of Having it all, and the Route to Lasting Prosperity - Robert Peston 2012-09-27
'Robert Peston's compelling account of global financial meltdown is a must-read.' Observer
What can we learn from the 2008 recession? ITV's political editor explains the global economic mess and how to escape it - in his characteristically straightforward way. 'How do we fix this mess? I don't know. But don't stop reading now. Perhaps if we have a clearer understanding of what went wrong, we'll have a better idea of what needs to be done. This book is a map of what needs to be fixed.' The record-breaking unbroken growth between 1992 and 2008 wasn't the economic miracle that it seemed. It was based on a number of dangerous

illusions - most notably that it didn't matter that the UK and US year after year consumed more than they earned. But we couldn't go on increasing our indebtedness forever. The financial crash of 2007/8 and the subsequent economic slump in much of the west was the moment when we realised we had borrowed more than we could afford to repay. So who got it wrong? Bankers, investors and regulators? And were they greedy, stupid or asleep? What was the role of government? And what part did we, as consumers, play in all this? How do we get through this difficult period of transition to a more sustainable economy, one based on investment and exports, rather than on borrowing and consumption? With the same probing lucidity he brought to *Who Runs Britain?* and *WTF?*, Robert Peston takes us step-by-step towards a common sense way to fix this mess.

Shredded - Ian Fraser 2014-06-05
An award-winning journalist details the near-

collapse of the Royal Bank of Scotland in the late 2000s. For a few brief months in 2007 and 2009, the Royal Bank of Scotland was the largest bank in the world. Then the Edinburgh-based giant—having rapidly grown its footprint to 55 countries and stretched its assets to £2.4 trillion under its hubristic and delinquent former boss Fred Goodwin—crashed to earth. In *Shredded*, author Ian Fraser explores the series of cataclysmic misjudgments, the toxic internal culture and the “light touch” regulatory regime that gave rise to RBS/NatWest’s near-collapse. He also considers why it became the most expensive bank in the world to bail out and why a culture of impunity was allowed to develop in the banking sector. This new edition brings the story up to date, chronicling the string of scandals that have come to light since taxpayers rescued RBS and concluding with an evaluation of the attempts of the bank’s post-crisis chief executives, Stephen Hester and Ross McEwan, to dismantle Goodwin’s disastrous legacy and

restore the damaged institutions to health. Praise for *Shredded* “A magnificent book. I regard it as one of the best investigative books of the past decade.” —Eamonn O’Neill, BBC Radio Scotland “Impeccably researched and hard to put down at any point—The author pulls no punches.” —Philip Augar, Financial Times (UK) “Combines Greek tragedy with real-life events that have affected us all. It’s hard to put down.” —Devraj Ray, Mortgage Strategy
Disappear - Talitha Stevenson 2011
Charlie Bell's picture is in the paper. He is a popular young man with a successful hedge fund and London is full of money. Then in one evening, everything changes. When his wife Leila threatens to leave him, a journey begins in which they are both forced to discover what they believe in. The plot sweeps the reader from glitzy pre-crisis London, through the Midsummer Night's Dream of rural Spain and then back again to the grittier London of The Hillford Estate and a charitable drop-in centre

for kids. Throughout the book, the inner stories reflect the outer one of the financial crisis. As grand illusions fade, Disappear questions the connection between couples, between family members, even between the helper and the helped. Ultimately it looks at our very sense of

belonging and asks: is it possible simply to disappear from your own life? In the climactic final scenes, set in the heat and sensual chaos of Notting Hill Carnival, each of the main characters will live out their answer.
