Ludmila's Broken English: A Novel - DBC Pierre 2007-04-17

"A mix of offbeat composition and intoxicating insight....A maddeningly entertaining encore."—Publishers Weekly, starred review A wild and brilliant tale by the winner of the Man Booker Prize and one of our most original storytellers. On a Tuesday in terror-struck London, Blair and Bunny Heath become the first adult conjoined twins ever successfully separated. On a Tuesday in the war-torn Caucasus, Ludmila Derev accidentally kills her grandfather. By December, they find themselves trudging together through a snow field, staring down the barrel of a rebel's gun. Ludmila sets out on a journey west to save her family from starvation and marauding Gnez troops. Hers is an odyssey of sour wit, even sourer vodka, and a Soviet tractor probably running on goat's piss. The Heath twins are released from a newly privatized institution rumored to have been founded for an illegitimate royal baby. They are plunged into a round-the-clock world churning with opportunity, rowdy with the chatter of freedom, self-empowerment, and sex. Dangerous cocktails and a Russian Brides Web site throw these unforgettable characters together with explosive results. DBC Pierre's second novel confirms his place in the ranks of today's most audacious and acclaimed novelists.

Advanced Man-Machine Interaction - K.-F. Kraiss 2006-02-23

Describes the implementation of modern features of man-machine interfaces and offers design guidelines, case studies and discusses algorithms for the implementation. Offers access to extensive public domain software for computer vision, classification and virtual reality.

Cyborg - Marie O'Mahony 2002
'Cyborg', from the Greek for 'steersman' combined with 'organism', was coined in the

mid-20th century to describe the new human who would be required for space travel - enhanced by mechanical, chemical or electronic means, he or she would be half-human, half-machine. This excitingly-illustrated book discusses the astonishing changes in biotechnology that make the cyborg seem more science fact than science fiction. Soon we could all be Superman or Wonderwoman. What will this mean to us as individuals? How will it affect society? The author reminds us that the yearning for immortality and superpowers is as ancient as the human race; it's just that these now seem within our reach. We are guided on a journey through metamorphoses old and new, fictional and factual - from werewolves to genetic engineering, from Dr Frankenstein to a professor's arm controlled by another's thoughts, from the androids of science fiction to a real robot sensitive to human moods.
