Intellectual Mastery of Nature. Theoretical Physics from Ohm to Einstein, Volume 1 -

Christa Jungnickel 1990-09-15

Christina Jungnickel and Russell McCormach

have created in these two volumes a panoramic history of German theoretical physics. Bridging social, institutional, and intellectual history, they chronicle the work of the researchers who, from the first years of the nineteenth century, strove for an intellectual mastery of nature. Volume 1 opens with an account of physics in Germany at the beginning of the nineteenth century and of German physicists' reception of foreign mathematical and experimental work. Jungnickel and McCormach follow G. S. Ohm, Wilhelm Weber, Franz Neumann, and others as these scientists work out the new possibilities for physics, introduce student laboratories and instruction in mathematical physics, organize societies and journals, and establish and advance major theories of classical physics. Before the end of the nineteenth century, German physics and its offspring, theoretical physics, had acquired nearly their present organizational forms. The foundations of the classical picture of the physical world had been

securely laid, preparing the way for the developments that are the subject of volume 2.

The Brown Center Report on American Education - Paul Diperna 2000-09-01

The Brown Center on Education Policy conducts research on topics in American education, with a special focus on efforts to improve academic achievement in elementary and secondary schools. The center seeks to inform policymakers at all levels of government, to influence the course of future educational research, and to produce a body of work not only valuable to policymakers and scholars, but also parents, teachers, administrators, taxpayers, school board members, and the general public. This annual report card analyzes the state of American education using the latest measures of student learning, uncovers and explains important trends in achievement test scores, and identifies promising and disappointing educational reforms. Unlike similar reports intended solely for government use, the Brown

Center annual report card is written for an audience of parents, teachers, and policymakers.

Pursuing Excellence in Mathematics

Education - Edward Silver 2014-11-26

Chapters in this book recognize the more than forty years of sustained and distinguished lifetime achievement in mathematics education research and development of Jeremy Kilpatrick. Including contributions from a variety of skilled mathematics educators, this text honors Jeremy

Kilpatrick, reflecting on his groundbreaking papers, book chapters, and books - many of which are now standard references in the literature - on mathematical problem solving, the history of mathematics education, mathematical ability and proficiency, curriculum change and its history, global perspectives on mathematics education, and mathematics assessment. Many chapters also offer substantial contributions of their own on important themes, including mathematical problem solving, mathematics curriculum, the role of theory in mathematics education, the democratization of mathematics, and international perspectives on the professional field of mathematics education.

Tools of American Mathematics Teaching, 1800-2000 - Peggy Aldrich Kidwell 2008-08-11
From the blackboard to the graphing calculator, the tools developed to teach mathematics in America have a rich history shaped by

educational reform, technological innovation, and spirited entrepreneurship. In *Tools of American Mathematics Teaching, 1800-2000*, Peggy Aldrich Kidwell, Amy Ackerberg-Hastings, and David Lindsay Roberts present the first systematic historical study of the objects used in the American mathematics classroom. They discuss broad tools of presentation and pedagogy (not only blackboards and textbooks, but early twentieth-century standardized tests, teaching machines, and the overhead projector), tools for calculation, and tools for representation and measurement. Engaging and accessible, this volume tells the stories of how specific objects such as protractors, geometric models, slide rules, electronic calculators, and computers came to be used in classrooms, and how some disappeared.

The Magic of Math - Arthur Benjamin
2015-09-08

Controlling Technology - Eric Katz 2011-07-29
Do we control technology or does technology control us? Explosive progress in the twentieth century has led to the disquieting perception that technology is not the servant of humanity but its master. Controlling Technology brings together readings that focus on the conflicting views concerning the nature of modern technology as it relates to the quality of everyday life and to the larger problems of human survival on this planet. The thesis that technology has indeed become autonomous and independent of human ideals is contrasted with the position that, by its very nature, technology can exist only under human control. Like the first edition, this revised edition contains classic essays that are fundamental to the study of technology. To these have been added recent scholarly treatments that analyze the classic tradition, as well as updated popular essays. A whole new section of case studies delves into the topics of computers, information, and virtual

reality. Also included are essays on technology and the recreation of nature, which debate the pros and cons of environmental restoration. This excellent collection of essays will be of great value as a reader for undergraduate courses in science and technology studies, technology and human values, and the social dimensions of technology. Eric Katz (Newark, NJ) is professor of philosophy and director of the Science, Technology, and Society Program at the New Jersey Institute of Technology. He is the author of *Nature as Subject: Human Obligation and Natural Community*, among other books. Andrew Light (New York, NY) is assistant professor of Environmental Philosophy and director of the Environmental Conservation Education Program at New York University. He is the editor of *Technology and the Good Life?* William B.
