International Handbook of Curriculum Research - William F. Pinar 2013-10-15

Continuing its calling to define the field and where it is going, the Second Edition of this landmark handbook brings up to date its comprehensive reportage of scholarly developments and school curriculum initiatives worldwide, providing a panoramic view of the state

of curriculum studies globally. Its international scope and currency and range of research and theory reflect and contribute significantly to the ongoing internationalization of curriculum studies and its growth as a field worldwide. Changes in the Second Edition: Five new or updated introductory chapters pose transnational challenges to key questions curriculum research addresses locally. Countries absent in the First Edition are represented: Chile, Colombia, Cypress, Ethiopia, Germany, Iran, Luxembourg, Nigeria, Peru, Poland, Portugal, Singapore, South Africa, Spain, and Switzerland. 39 new or updated chapters on curriculum research in 34 countries highlight curriculum research that is not widely known in North America. This handbook is an indispensable resource for prospective and practicing teachers, for curriculum studies scholars, and for education students around the world.

Digital Didactical Designs - Isa Jahnke 2015-08-14

As web-enabled mobile technologies become increasingly integrated into formal learning environments, the fields of education and ICT (information and communication technology) are merging to create a new kind of classroom: CrossActionSpaces. Grounding its exploration of these co-located communication spaces in global empirical research, Digital Didactical Designs facilitates the development of teachers into collaborative designers and evaluators of technology-driven teaching and learning experiences—learning through reflective making. The Digital Didactical Design model promotes deep learning expeditions with a framework that encourages teachers and researchers to study, explore, and analyze the applied designs-in-practice. The book presents critical views of contemporary education, theories of socio-technical systems and behavior patterns, and concludes with a look into the conceptual and practical prototypes that might emerge in schools and universities in the near future.

Apprenticeship in Thinking - Barbara Rogoff 1990

This interdisciplinary work presents an integration of theory and research on how children develop their thinking as they participate in cultural activity with the guidance and challenge of their caregivers and other companions. The author, a leading developmental psychologist, views development as an apprenticeship in which children engage in the use of intellectual tools in societally structured activities with parents, other adults, and children. The author has gathered evidence from various disciplines--cognitive, developmental, and cultural psychology; anthropology; infancy studies; and communication research--furnishing a coherent and broadly based account of cognitive development in its sociocultural context. This work examines the mutual roles of the individual and the sociocultural world, and the culturally based processes by which children appropriate and extend skill and understanding from

their involvement in shared thinking with other people. The book is written in a lively and engaging style and is supplemented by photographs and original illustrations by the author.

[Play in the Early Years](#) - Marilyn Flear 2021-03-24

Play is crucial to the learning and development of children in the early years. The third edition of *Play in the Early Years* is a comprehensive introduction to the theory and practice of play for children from birth to 8 years old. Drawing on classical and contemporary theories, this text examines social, cultural and institutional approaches to play, and explores a range of strategies for successfully integrating play into early years settings and primary classrooms. This edition features a new chapter on conceptual playworlds, which demonstrates what conceptual playworlds look like to infants and toddlers, pre-schoolers, and children transitioning into school. The text features classroom vignettes and photographs designed to help students connect theory to practice, and reflection questions and research activities encourage in-depth reflection and extend learning. Highly regarded by early childhood researchers and practitioners alike, *Play in the Early Years* remains an essential resource for pre-service students.

What Horses Really Want - Lynn Acton 2020-07-07

Relationships with horses, whether for companionship or competition, are complex and ever-changing. This is one of the reasons why "horsemanship" can become a lifelong pursuit: There is always a balance to be struck with our equine partners, and it demands continual growth and understanding on our side. In this book, horsewoman Lynn Acton explains that when the focus in the relationship is on what we want from the horse, his compliance becomes the measure of success, and what he thinks and feels is often overlooked. Is he calm, confident, and trusting? Or anxiously wishing he could escape? His behavior, performance, and reliability—in whatever discipline we prefer or equestrian sport we pursue—depend on the answers to those questions. Horses want security and social bonds. They want leaders they trust to protect them—not only from danger, but from stress. When we provide this security, they accept our rules. This not only puts us in charge, it makes our leadership more effective because we do not force it on them; they seek it. The result is less anxiety, fewer behavior problems, more efficient learning, and better reliability. Acton refers to this relationship as Protector Leadership because being the "protector" is the foundation. Building methodology based on time-tested training theories that we are often exposed to in bits and pieces, Acton shows why Protector Leadership works and how to make it work for us, fitting the separate pieces together, and illustrating the connections with practical examples of real horses in everyday life.

Teachers Leading Educational Reform - Alma Harris 2017-07-31

Teachers Leading Educational Reform explores the ways in which

teachers across the world are currently working together in professional learning communities (PLCs) to generate meaningful change and innovation in order to transform pedagogy and practice. By discussing how teachers can work collectively and collaboratively on the issues of learning and teaching that matter to them, it argues that through collective action and collaborative agency, teachers are leading educational reform. By offering contemporary examples and perspectives on the practice, impact and sustainability of PLCs, this book takes a global, comparative view showing categorically that those educational systems that are performing well, and seek to perform well, are using PLCs as the infrastructure to support teacher-led improvement. Split into three sections that look at the macro, meso and micro aspects of how far professional collaboration is building the capacity and capability for school and system improvement, this text asks the questions: Is the PLC work authentic? Is the PLC work being implemented at a superficial or deep level? Is there evidence of a positive impact on students/teachers at the school/district/system level? Is provision in place for sustaining the PLC work? *Teachers Leading Educational Reform* illustrates how focused and purposeful professional collaboration is contributing to change and reform across the globe. It reinforces why teachers must be at the heart of the school reform processes as the drivers and architects of school transformation and change.

Clinical Exercises for Treating Traumatic Stress in Children and Adolescents - Damion J. Grasso 2014-01-21

How do I implement effective strategies for treating traumatic stress in this particular child or adolescent? *Clinical Exercises for Treating Traumatic Stress in Children and Adolescents* combines guidance for personalizing and implementing effective treatment approaches with practical materials to use in session. Assessing 21st Century Skills - National Research Council 2011-09-16

The routine jobs of yesterday are being replaced by technology and/or shipped off-shore. In their place, job categories that require knowledge management, abstract reasoning, and personal services seem to be growing. The modern workplace requires workers to have broad cognitive and affective skills. Often referred to as "21st century skills," these skills include being able to solve complex problems, to think critically about tasks, to effectively communicate with people from a variety of different cultures and using a variety of different techniques, to work in collaboration with others, to adapt to rapidly changing environments and conditions for performing tasks, to effectively manage one's work, and to acquire new skills and information on one's own. The National Research Council (NRC) has convened two prior workshops on the topic of 21st century skills. The first, held in 2007, was designed to examine research on the skills required for the 21st century workplace and the extent to which they are meaningfully different from earlier eras and require corresponding changes in educational experiences. The second workshop, held in 2009, was designed to explore demand for these types of skills, consider intersections between science education reform goals and 21st century skills, examine models of high-quality science instruction that may develop the skills, and consider science

teacher readiness for 21st century skills. The third workshop was intended to delve more deeply into the topic of assessment. The goal for this workshop was to capitalize on the prior efforts and explore strategies for assessing the five skills identified earlier. The Committee on the Assessment of 21st Century Skills was asked to organize a workshop that reviewed the assessments and related research for each of the five skills identified at the previous workshops, with special attention to recent developments in technology-enabled assessment of critical thinking and problem-solving skills. In designing the workshop, the committee collapsed the five skills into three broad clusters as shown below: Cognitive skills: nonroutine problem solving, critical thinking, systems thinking Interpersonal skills: complex communication, social skills, team-work, cultural sensitivity, dealing with diversity Intrapersonal skills: self-management, time management, self-development, self-regulation, adaptability, executive functioning

Assessing 21st Century Skills provides an integrated summary of the presentations and discussions from both parts of the third workshop.

Evaluating the Quality of Learning - John B. Biggs 2014-05-10
Educational Psychology Series: Evaluating the Quality of Learning: The SOLO Taxonomy (Structure of the Observed Learning Outcome) focuses on the approaches, methodologies, and techniques employed in the valuation of the quality of learning. The publication first offers information on the quality and quantity of learning and origin and description of the Structure of the Observed Learning Outcome (SOLO) taxonomy. Discussions focus on general intellectual development and the growth of quality; some assumptions and applications of stage theory; from developmental stage to levels of learning quality; and general intellectual development and the growth of quality. The text then examines the teaching of history, elementary mathematics, English, and geography. Topics include interpreting a map and drawing conclusions, explaining a natural phenomenon, appreciation of poetry, implications for the teaching of history, English, and mathematics, numbers and operations, and general application of SOLO to history. The manuscript takes a look at modern languages, place of the taxonomy in instructional design, and some methodological considerations. Concerns include alternative formats for obtaining SOLO responses, instructional processes, curriculum analysis, remediation, and teacher intentions. The publication is a vital source of data for educators interested in the SOLO taxonomy.

Nerve Cells and Insect Behavior - Kenneth David Roeder 1998

Insects are ideal subjects for neurophysiological studies. This classic volume relates the activities of nerve cells to the activities of insects, something that had never been attempted when the book first appeared in 1963. In several elegant experiments, Roeder shows how stimulus and behavior are related through the nervous system.

Assessment and Teaching of 21st Century Skills - Esther Care 2017-11-07

This book provides a detailed description of research and application outcomes from the Assessment and Teaching of 21st Century Skills project, which explored a framework for understanding the nature of these skills. The major element of this new volume is the presentation of research information from the global assessment of two 21st century skills that are amenable to teaching and learning: collaborative problem solving, and learning in digital networks. The outcomes presented include evidence to support the validity of assessment of 21st century skills and descriptions of consequent pedagogical approaches which can be used both to teach the skills and to use them to enhance key learning goals in secondary education systems. The sections of the volume are connected through a focus on the degree to which innovative assessment

tasks measure the constructs of interest. This focus is informed by conceptual and methodological issues associated with affordances of 21st century computer-based assessment. How understanding of the nature of the skills, as derived from these assessments, can guide approaches to the integration of 21st century skills in the classroom, is informed by initiatives adopted by participating countries. The guiding questions in this volume are: "Do the assessment tasks measure the constructs?" and "What are the implications for assessment and teaching in the classroom?" It is the third volume of papers from this project published by Springer.

ASEAN Miracle - Kishore Mahbubani 2017-03-08

The Association of Southeast Asian Nations is a miracle. Why? In an era of growing cultural pessimism, many thoughtful individuals believe that different civilisations-especially Islam and the West-cannot live together in peace. The ten countries of ASEAN provide a thriving counter-example of civilizational co-existence. Here 625m people live together in peace. This miracle was delivered by ASEAN. In an era of growing economic pessimism, where many young people believe that their lives will get worse in coming decades, Southeast Asia bubbles with optimism. In an era where many thinkers predict rising geopolitical competition and tension, ASEAN regularly brings together all the world's great powers. Stories of peace are told less frequently than stories of conflict and war. ASEAN's imperfections make better headlines than its achievements. But in the hands of thinker and writer Kishore Mahbubani, the good news story is also a provocation and a challenge to the rest of the world. This excellent book explains, in clear and simple terms, how and why ASEAN has become one of the most successful regional organizations in the world. - George Yeo A powerful and passionate account of how, against all odds, ASEAN transformed the region and why Asia and the world need it even more today. - Amitav Acharya

On Reading Books to Children - Anne van Kleeck 2003-04-02

On Reading Books to Children: Parents and Teachers brings together in one volume current research on adult book reading to children. The authors, drawn from around the world, are key researchers and eminent scholars from the fields of reading and literacy, child language, speech pathology, and psychology, representing multiple perspectives within these disciplines. Chapters on the effects and limitations of book sharing are integrated with chapters discussing promising programs on storybook research. The reality of reading to children is more complex than it appears on the surface. The authors discuss some effects of and suggestions for reading to children that have emerged from the research. The ideas set forth in this volume will stimulate new lines of research on the effects of storybook reading, as well as refinements of current methods, yielding findings that enrich our understanding of this important arena of literacy development.

The Fed and Lehman Brothers - Laurence M. Ball 2018-06-07

The bankruptcy of the investment bank Lehman Brothers was the pivotal event of the 2008 financial crisis and the Great Recession that followed. Ever since the bankruptcy, there has been heated debate about why the Federal Reserve did not rescue Lehman in the same way it rescued other financial institutions, such as Bear Stearns and AIG. The Fed's leaders from that time, especially former Chairman Ben Bernanke, have strongly

asserted that they lacked the legal authority to save Lehman because it did not have adequate collateral for the loan it needed to survive. Based on a meticulous four-year study of the Lehman case, *The Fed and Lehman Brothers* debunks the official narrative of the crisis. It shows that in reality, the Fed could have rescued Lehman but officials chose not to because of political pressures and because they underestimated the damage that the bankruptcy would do to the economy. The compelling story of the Lehman collapse will interest anyone who cares about what caused the financial crisis, whether the leaders of the Federal Reserve have given accurate accounts of their actions, and how the Fed can prevent future financial disasters.

The Six Secrets of Change - Michael Fullan 2011-11-29

From bestselling author Michael Fullan, wisdom for thriving in today's complex environment. Successful organizations adjust quickly and intelligently to shifts in consumer tastes, political climate, and economic opportunity. How do they do it? *The Six Secrets of Change* explores essential lessons for business and public sector leaders for thriving in today's complex environment. Fullan draws on his acclaimed work in

bringing about large-scale and substantial change in education reform in both public school systems and universities, as well as engaging in major change initiatives internationally. This book is filled with lessons that are insightful, actionable, and concisely communicable. "Fullan has an uncanny ability to produce what is needed at the time it is needed. The six secrets are based in theory, grounded in practice, powerful in their relationship to each other, and described in ways that enable deep understanding. It is a refreshing change from the surface lists of leadership and change ideas that all too often permeate education and business literature." —Vicki Phillips, director of education, Bill & Melinda Gates Foundation. Includes so-called leadership "secrets" that are decoded to be accessible and useful. Offers illustrative examples from a variety of businesses, health organizations, and public education systems. Lays out the six factors to organizational success: collegiality, long-range plans allow for the unknown, nurture employees, learning, leadership at all levels, and positive pressure must be inescapable. Michael Fullan is the author of the acclaimed best-seller *Leading in a Culture of Change*. Fullan convinces us that a leader who attends to all six key factors will have an organization that is constantly learning, growing, and thriving.
