Customer Success with Microsoft Dynamics

Sure Step - Chandru Shankar 2014-01-24

Customer Success with Microsoft Dynamics Sure Step is a focused tutorial of Microsoft Dynamics solution envisioning and delivery, rather than a step-by-step guide into project management. It will equip you with the tactics required to plan, align, and orchestrate your solution selling activities, as well as help you to be efficient, proactive, goal driven, and flexible in your

Microsoft Dynamics engagements. If you are involved in one or more of the roles stated below, then this book is for you: If you are a Project Manager, Engagement Manager, Solution Architect, or Consultant involved in delivering Microsoft Dynamics solutions, this book will teach you how you can improve the quality of your implementation with a consistent, repeatable process. If you are a Customer Project Manager, Subject Matter Expert, Key User, or End User involved in selecting the right business solution for your organization and delivering the Microsoft Dynamics solution, this book will help you determine how the method facilitates the delivery of a solution that is aligned to your vision. If you are a Sales Executive, Services Sales Executive, Technical Sales Specialist, Pre-Sales Consultant, or Engagement Manager involved in the sales of Microsoft Dynamics solutions, this book will help you to understand how you can accelerate your sales cycle and bring it to a close. If you are the

Customer Decision Maker, CxO, Buyer, or Project Manager who participates in the selection process for your business solution needs, this book will show you how to determine how this process can help your due diligence exercise and set the stage for a quality implementation of the solution. If you are a Change Management expert, this book will enable you to learn how you can help the customer manage organizational change during the business solution delivery process, and/or help solution providers adopt a process for selling and delivering solutions.

Dynamics AX Project Accounting and Controlling (Part 1) - Ludwig Reinhard, 2017-01-23

This comprehensive guide to the Project Management and Accounting module in Microsoft Dynamics AX provides the overview you need to harness the software's power to grow your business. This Dynamics AX module is ideal for tracking time and costs within an organization, providing invaluable information for financial and project management. It is crucial that you thoroughly plan your setup to take advantage of the module's integration with other software features, such as Payables, Receivables, Inventory, General Ledger, and more. Part 1 of this two-part guide reviews major topics in accounting and controlling as they relate to module setup and configuration. A second volume, part 2, demonstrates how to tap

into the module's extensive functionality in specific scenarios. Together, both parts form an exhaustive manual. Demo machines are available for download and ready to run without specific add-ons or code modifications, though basic knowledge of Microsoft Dynamics AX terminology is vital. These demos allow you to follow along with all examples given. With its focus on issues of accounting and control, this informative manual helps you optimize your use of Dynamics AX to ensure your project's success.

Microsoft Dynamics Ax Complete Self-assessment Guide - Gerardus Blokdyk
2017-05-13

Is the scope of Microsoft Dynamics AX defined? How does Microsoft Dynamics AX integrate with other business initiatives? Can Management personnel recognize the monetary benefit of Microsoft Dynamics AX? How do we Improve Microsoft Dynamics AX service perception, and satisfaction? What vendors make products that address the Microsoft Dynamics AX needs? Defining, designing, creating, and implementing a process to solve a business challenge or meet a business objective is the most valuable role... In EVERY company, organization and department. Unless you are talking a one-time, single-use project within a business, there should be a process. Whether that process is managed and

implemented by humans, AI, or a combination of the two, it needs to be designed by someone with a complex enough perspective to ask the right questions. Someone capable of asking the right questions and step back and say, 'What are we really trying to accomplish here? And is there a different way to look at it?' For more than twenty years, The Art of Service's Self-Assessments empower people who can do just that - whether their title is marketer, entrepreneur, manager, salesperson, consultant, business process manager, executive assistant, IT Manager, CxO etc... - they are the people who rule the future. They are people who watch the process as it happens, and ask the right questions to make the process work better. This book is for managers, advisors, consultants, specialists, professionals and anyone interested in Microsoft Dynamics AX assessment. Featuring 599 new and updated case-based questions, organized into seven core areas of process design, this Self-Assessment will help you

identify areas in which Microsoft Dynamics AX improvements can be made. In using the questions you will be better able to: - diagnose Microsoft Dynamics AX projects, initiatives, organizations, businesses and processes using accepted diagnostic standards and practices - implement evidence-based best practice strategies aligned with overall goals - integrate recent advances in Microsoft Dynamics AX and process design strategies into practice according to best practice guidelines Using a Self-Assessment tool known as the Microsoft Dynamics AX Scorecard, you will develop a clear picture of which Microsoft Dynamics AX areas need attention. Included with your purchase of the book is the Microsoft Dynamics AX Self-Assessment downloadable resource, containing all 599 questions and Self-Assessment areas of this book. This enables ease of (re-)use and enables you to import the questions in your preferred Management or Survey Tool. Access instructions can be found in the book. You are

free to use the Self-Assessment contents in your presentations and materials for customers without asking us - we are here to help. This Self-Assessment has been approved by The Art of Service as part of a lifelong learning and Self-Assessment program and as a component of maintenance of certification. Optional other Self-Assessments are available. Warehouse Management Using Microsoft Dynamics AX 2012 R3 - Scott Hamilton

2015-04-30

A primary challenge for many manufacturing and distribution firms involves effective

implementation and use of an ERP system for managing their operations and supply chain, especially the integrated warehouse management capabilities. This book focuses on how Microsoft Dynamics AX 2012 R3 provides an integrated ERP system to support warehouse management in manufacturing/distribution firms. It also covers the integration of warehouse management with the larger context of supply chain management, as well as the integration with quality and transportation management. The targeted reader includes those individuals implementing or considering Dynamics AX as their ERP system, as well as those providing consulting assistance. In particular, the book addresses the capabilities and major options for warehouse management within Dynamics AX - consisting of a basic approach and the recently released advanced approach. The book contents have been segmented to support several categories of targeted readers, so that you can focus on just

the relevant chapters for your learning objectives. As the 9th book in Dr. Hamilton's series about Microsoft Dynamics AX, it extends the previous explanations of supply chain management in a broad cross-section of manufacturing and distribution firms. These books covered previous releases of Dynamics AX 3.0, AX 4.0, AX 2009 and AX 2012.

Self Service Reporting in Dynamics Ax 2012 Using Excel and Power Bi - Murray Fife
2015-11-05

Having users perform their own reporting has been a dream on both sides of the organization. The IT group don't particularly like creating reports for the users when they could be spending their time on cooler projects, and users don't particularly like waiting for IT to create the reports that they need to track the data because it's never quite what they wanted, and also takes so long to get (because of the first reason) that it's usually out-of-date. If only there was a

solution... Well there is, because there are so many tools built into Dynamics AX and also the productivity tools like Excel and Word that the users can easily create their own reports themselves without having to get the IT group involved. Everybody wins! In this guide we will show you how the users can do just that, it's so easy that they may not even realize that they are creating reports.
