**Pharmacology for the Health Care Professions** - Christine M. Thorp 2008-09-15

Pharmacology for the Health Care Professions is an accessible introduction to the pharmacology necessary

for health care professionals training to be non-medical prescribers looking for an overview of the subject. The book covers the pharmacology necessary for accredited training programmes in non-medical prescribing and certification in access and supply of prescription-only medicines and will be useful as an ongoing reference for future use in practice. Opening with a general introduction to pharmacology as a science, the book goes on to explain what is meant by drugs and medicines and why pharmacology should be of relevance to health care professionals. The reader is presented with general principles of pharmacology followed by systemic pharmacology that covers the actions of important groups of drugs in common use to treat diseases and conditions of the cardiovascular, respiratory, endocrine, musculoskeletal, skin and central nervous systems. The physiology and pathophysiology relevant to the understanding of how these drugs work is included. Finally the book explores the law in relation to the sale, supply, administration and prescription of drugs and explains what is meant by non-medical prescribing. All aspects of non-medical prescribing are considered including the use of exemptions to the Medicines Act, patient group directions, supplementary prescribing and the development of independent prescribing for nurses and pharmacists. Pharmacology is explained in simple, easy to understand terms and the book avoids any unnecessary chemistry where possible. Case studies that are of particular relevance to health care professionals are used throughout to illustrate the importance of the pharmacology major body systems and pathologies and the potential problems of adverse drug reactions and drug-drug interactions. Mosby's Medical, Nursing, & Allied Health Dictionary - Kenneth Anderson 1998

This book was developed to provide a single source of authoritative, up-to-date information concerning health and health care terminology.

Pharmacology for the Primary Care Provider - Marilyn W. Edmunds 2004

The only pharmacology resource specifically written by and for nurse practitioners, this new edition provides a greater emphasis on prototype drugs while retaining its comprehensive approach to the pharmacology content needed by the primary care provider. New features include prototype drug lists in the coverage of drug classes that receive expanded coverage, detailed patient teaching guidelines, expanded content in both the geriatric and pediatric chapters, a special icon identifying the Top 200 Drugs, and highlighted Clinical Alerts. Comprehensive coverage is provided of all drugs commonly prescribed and used in the primary care setting. Prototype drugs are presented first in each drug class, with expanded coverage of these agents. Clear explanations describe how each drug in a class differs from its prototype. Detailed information shows how to provide effective patient teaching, as well as how to gain patient compliance. Chapters focus on the practitioner's role in patient teaching, drug action, and drug therapy. Online Resources are provided at the end of each chapter. The Top 200 Drugs are described according to the number of U.S. prescriptions dispensed. Five new units improve the organization of material: Renal/Genitourinary Agents (Unit 8); Psychotropic Agents (Unit 11); Endocrine Agents (Unit 12); Female Reproductive Agents (Unit 13); and Health Promotion (Unit 15). New chapters examine over-the-counter medications, compliance and the therapeutic experiment, overview of the nervous system, substance abuse, treatment of common infections, weight management, and complementary and alternative treatments. Reorganized and redesigned format and headings are more consistent and easy to follow. Content has been expanded in the geriatric and pediatric "special populations" chapters (Ch. 6 and 7). More concise coverage of disease processes features clearer ties to the Mechanism of Action sections. 25 new figures have been added to the pathophysiology and Mechanisms of Action sections. A Table of Common Interactions is included on the inside of the back cover.
