The Digital Economy and Competition Law in Asia - Steven Van Uytsel 2021-05-06

The digital economy, broadly defined as the economy operating on the basis of interconnectivity between people and businesses, has gradually spread over the world. Although a global phenomenon, the digital economy plays out in local economic, political, and regulatory contexts. The problems thus created by the digital economy may be approached differently depending on the context. This edited collection brings together leading scholars based in Asia to detail how their respective jurisdictions respond to the competition law problems evolving out of the deployment of the digital economy. This book is timely, because it will show to what extent new competition law regimes or those with a history of lax enforcement can respond to these new developments in the economy. Academics in law and business strategies with an interest in competition law, both in Asia and more broadly, will find the insights in this edited collection invaluable. Further, this volume will be a key

resource for scholars, practitioners and students.

Arms Export Regulations - Institut international de recherches pour la paix 1991

Governments have a legal obligation to ensure effective control over arms exports and to monitor and supervise the movement of arms to ensure that they do not fall into unauthorized hands. The purpose of this book is to provide a detailed picture of how governments discharge this responsibility. Individual chapters describe national efforts to control arms transfers, concentrating on the legal framework that exists to regulate arms exports. The book includes a discussion of existing multilateral arms transfer control regimes, including the United Nations, the Co-ordinating Committee for East-West Trade Policy (CoCom), the Missile Technology Control Regime (MTCR) and arms embargoes agreed by the Council of Ministers of the European Community. Every effort has been made to produce a comprehensive compendium, but total success has been prevented by the continued failure of some governments to release adequate information into the public domain.

Law and Development in East and South-East Asia - Christoph Antons 2005-10-05

During the 1980s and 1990s Asian 'developmental states' attracted much attention in political science and economics literature, but the role of law in the economic development was neglected. It was only after the Asian crisis of 1997 that many analysts began to focus on a lack of regulation and transparency as a major factor triggering the crisis. The crucial questions now are how successful the current reforms will be, and which features of the Asian approach to commercial law will be resistant to

reform pressures. This book examines the prospects for commercial law reform in Asia, giving particular attention to Japan and Singapore, as frequently cited role models for Asian developmentalism, and also examining development related business laws in countries such as China, Korea, Indonesia, Malaysia, Vietnam and the Philippines.

Environmental Policy and Impact Assessment in Japan - Brendan F. D. Barrett 2019-03-21

First published in 1991. Japanese attitudes to pollution and environmental protection were distinctly equivocal. The Japanese are a nature-loving people, yet they are responsible for widespread environmental destruction; Japan has some of the world's strictest environmental quality standards, but the country also has some of the world's most environmentally damaged areas. In this book the authors present a broad and detailed analysis of policy and process in Japan in the late twentieth century. Brendan Barrett and Riki Therivel, who both have extensive research experience in Japan, describe interest group participation in Japan's environmental policy-making and give an historical review of the relationship between economic growth and environmental problems. They look at the framework for environmental policy-making and outline the system for environmental management. This is complemented by a discussion of Environmental Impact Assessment, and by live case studies of the practical realities of EIA in Japan. With environmental problems reaching global proportions, countries all over the world have much to learn from the experience of

Japan, and the book will be extremely useful to national government officials, to local planning officers responsible for EIA, and to environmental consultants working for commercial and industrial companies. It will also be essential reading for students of geography, environmental studies, Japanese studies and planning economics.

Troubled Industries - Robert M. Uriu 2019-04-15

Robert M. Uriu analyzes the industrial policy-making process in Japan for industries faced with sudden economic decline. He takes exception to the traditional view that policy bureaucrats in Japan are autonomous and insulated from societal pressures, arguing that the private sector in Japan has been actively involved in developing and implementing industrial policy. After carefully defining his conceptual framework, Uriu presents case studies of four industries: cotton spinning, steelmaking in minimills, synthetic fibers, and ship building, along with less detailed examinations of coal mining, aluminum smelting, paper, and steelmaking in integrated mills. These industries, he suggests, have sought public policies that enable them to manage competition domestically. In particular, they have fostered cartels to control production or capacity levels in an attempt to stabilize their industry's conditions. In textiles, steel, and ships, Uriu focuses on several of the industries most important to Japan's early postwar economic successes, the very ones first to confront the problems of decline and adjustment. Uriu also shows how Japan's policy choices more recently have become constrained by changes in the domestic antitrust environment and in Japan's external relations. In particular, pressures from Japan's trading partners have limited the policy tools available to Tokyo. As a result, industries have experienced increasing difficulties over time in managing competition in the domestic market. Analysts need to integrate domestic and international factors more carefully, Uriu argues, in order to trace more

accurately the interactions between industry actors and the policy environment they face.
